Additional Information: NIH’s New COVID-19 Research Website; Below is an announcement from Dr. Mike Lauer of NIH announcing their new NIH COVID-19 website. See below for more details; We are pleased to announce that the new NIH COVID-19 website launched earlier this week. The site provides a central location for trusted, up-to-date, accurate information about NIH research and our strategic role in COVID-19 research. The site complements information made available on our COVID-19 Information for NIH Applicants and Recipients of NIH Funding webpage.; The new site includes information about key programs such as the Accelerating COVID-19 Therapeutic Interventions and Vaccines public-private partnership and the Rapid Acceleration of Diagnostics initiative to develop state-of-the-science diagnostic tests for COVID-19. Users are also able to search information on funded research by state, institution, Congressional district, and more.; https://nexus.od.nih.gov/all/wp-content/uploads/2021/01/covidfundingfinal.png ; To support ongoing efforts to direct the public to critical information on COVID-19, the website also includes links to information on: Vaccines, treatments, and testing; Clinical trials and how to participate; How to donate plasma; Resources from NIH’s Community Engagement Alliance Against COVID-19 Disparities and Federal agencies such as the Centers for Disease Control and Prevention and Department of State ; https://nexus.od.nih.gov/all/wp-content/uploads/2021/01/cov2.jpg ; View article...

[NTW] [CBPR PARTNERSHIP ACADEMY]
Community-Based Participatory Research Partnership Academy
Community-Based Participatory Research Partnership Academy 4th annual call for applications

**Sponsor:** https://detroiturc.org  
**Deadline(s):** 01/27/2021  
**Contact:** Administrative Coordinator Eliza Wilson-Powers, ewpowers@umich.edu  
**Link(s):** https://detroiturc.org/programs-expertise/cbpr-partnership-academy  

**Additional Information:** We are delighted to share information with you about the Detroit Urban Research Center’s Community-Based Participatory Research Partnership Academy, and request your assistance in promoting this opportunity. The Partnership Academy is an intensive training program to enhance capacity of social and behavioral scientists to use community-based participatory research (CBPR), funded by the National Institute of Environmental Health Sciences. The program is designed for an academic researcher with little or no experience in CBPR and a community partner to participate together in forming a CBPR partnership aimed at eliminating health inequities in their communities; We are now recruiting participants for our fourth cohort and hope that you’ll assist in promoting this program! One of our major objectives is to recruit a diverse participant pool to enhance the capacity of investigators from underrepresented racial and ethnic groups to engage in CBPR. To date the Partnership Academy has brought together three cohorts each made up of 12 diverse community-academic teams from around the country, for a year-long program that begins with a one week intensive course in Ann Arbor, Michigan*, all expenses paid. (*Course location for this year - in person or virtual - will be determined based on COVID guidance.) Throughout the year, newly formed teams work together to develop and implement their CBPR partnership and project focused on improving the health and well-being of their communities, supported by a small planning grant. Monthly ongoing learning activities enable participants to engage in collaborative learning experiences, peer feedback, and mentoring. A Partnership Academy Network enables participants to share support, innovation, and networking beyond the year-long program. We are delighted to share with you some results to date; Participants from the first three cohorts include: 36 community-academic teams from 18 states and 2 tribal nations; 2/3 of participants are people of color; Rural, urban, suburban, and indigenous communities; Diverse academic disciplines, community organizations, and critical issues; Accomplishments and impact include: Innovative research projects conducted to address health inequities; CBPR-related grants received ranging from $5,000-$1 million; Academics incorporated CBPR into their teaching and institutions; CBPR workshops and trainings conducted for diverse audiences; Two peer-reviewed manuscripts: in Health Promotion Practice and Pedagogy in Health Promotion; A highly successful Symposium featuring past participants; Evaluation of the intensive course was outstanding. Here are a few comments from participants: “This has been a transformative experience for me, and I’m really excited about doing this work going forward.”; I think this is really going to transform the work that I do and the way that I do it.”; We are delighted to share with you materials describing the program including this 4th annual call for applications, and links to the program webpage and online application below. We greatly appreciate your forwarding the e-blast and sharing these materials widely to help in recruiting potential applicants to the CBPR Partnership Academy. Please let us know if you need any additional information and if you have any specific suggestions of strategies for us to use in encouraging faculty and community partners to apply; CBPR Partnership Academy Program Webpage; Online Application; Thank you for considering this request to share with your networks. We so value your contributions to the field and your own efforts in enhancing the capacity of researchers and community partners in CBPR. We are pleased to be in touch with you regarding this endeavor and will keep you informed of the program’s activities and accomplishments. ; Best Regards, Barbara Israel and Chris Coome; Detroit Urban Research Center detroiturc@umich.edu ; subject: CBPR Partnership Academy Accepting Applications; CBPR Partnership ; Apply by January 27, 2021; alternative announcement: Do you want to learn more about community-based participatory research (CBPR) -- a collaborative approach
for improving health and equity?; If the answer is YES, then we invite you to apply for the CBPR Partnership Academy, a year-long, intensive training program in CBPR.; The CBPR Partnership Academy is for community members and academic researchers with little or no CBPR experience who are interested in enhancing their knowledge and skills using a CBPR approach, to conduct research and action in collaborative partnership aimed at eliminating health inequities in their communities.; This highly successful program is facilitated by longstanding community and academic partners of the Detroit Community-Academic Urban Research Center (Detroit URC); Read About Past Participants and Program Accomplishments; The overarching goal is for community-academic teams – working and learning together – to enhance their capabilities, knowledge, and skills in developing a successful CBPR partnership to make a positive difference in the health and well-being of their local communities. Engaging with other diverse teams fosters co-learning and innovation while building a supportive network across the country that includes previous cohorts, instructors, and mentors.; Program Opportunities Include: A week-long, intensive course in CBPR (July 11-16, 2021)*; Monthly webinars and forums; Grant Funding for partnership/project development; Mentoring by an experienced community-academic team; Participation in the national CBPR Partnership Academy Network; * Course location (in person or remote) will be decided based on COVID guidance.; Twelve teams will be selected to participate in this unique, nationwide program. We encourage people from groups underrepresented in research to apply.; The application deadline is January 27, 2021!; Click Here for More Details; This program is being funded by the National Institute of Environmental Health Sciences of the National Institutes of Health under Award #9R25ES031549-05.; Related materials do not necessarily represent views of NIH. **Additional Information:** Dear Fellow Members of the Columbia Community, As we approach 2021, I write to update you about an important requirement for Spring Term 2021 SARS-CoV-2 Gateway testing. Effective January 4, 2021, a **NEW** gateway test is required for all faculty, staff, and students accessing Columbia campuses and other facilities. This includes individuals who have been on a campus throughout 2020 and who previously complied with the requirements of the gateway testing program. This gateway test must be administered by Columbia University’s COVID Testing Program starting January 4, 2021 through January 25, 2021. Due to our stringent quality and data management systems, the only acceptable tests will be conducted by Columbia's COVID Testing Program at one of our five approved testing sites (Monday to Friday in Morningside Lerner Hall & CUIMC Black Building Schaeffer Gallery; Select dates at West 51st St, Lamont Doherty Earth Observatory, or Tarrytown Columbia Doctors). Tests submitted from other locations, including NYP or WHS, will not be accepted. Access to all Columbia campuses and facilities via the ReOpenCU app (symptom checker app) and Columbia University ID card swipe system will only be permitted for those faculty, staff, and students who have completed the repeat gateway test requirement by January 25, 2021. Register for this gateway test online beginning December 23\textsuperscript{rd}, 2020. The schedule opens 10-14 days in advance. During the gateway period, there will be more than sufficient schedule capacity in the Morningside and CUIMC locations to accommodate all those requiring testing; however, schedule availability in each site will depend on the demand for specific appointment dates and time slots. We encourage you to plan ahead, schedule in advance, and consider all testing sites if a particular date and time is preferred. For those who do not complete a new SARS-CoV-2 PCR test between January 4\textsuperscript{th} and January 25\textsuperscript{th}, access to the campuses and facilities will be reinstated within 48-72 hours of completion of a gateway test at an approved site. More information regarding the testing plan for the Spring Term can be found online. We thank you for your continuing commitment to participating in the University testing program and the steps you take each and every day to keep our community safe. With care for our community, Melanie J Bernitz, MD, MPH; Associate Vice President & Medical Director, Columbia Health; Associate Clinical Professor of Medicine (in the Center for Family and Community Medicine); More Information: covid19.columbia.edu

Additional Information: An Update from the Columbia University Biobank (CUB) and COVID-19 research; This message is sent on behalf of the Columbia University Biobank (CUB) from Dr. Muredach Reilly, Director, Irving Institute for Clinical and Translational Research, and Dr. Michael Shelanski, Senior Vice Dean for Research, at the Columbia University Irving Medical Center.; For questions, contact: General questions: Danielle Pendrick, dp2657@cumc.columbia.edu; Researchers can contact - PS-Officeforresearch@cumc.columbia.edu; Participants can contact - CUBiobankCOVID19@cumc.columbia.edu; As you will remember, the Columbia University Biobank (CUB) quickly pivoted in April 2020 in response to the urgent needs surrounding the coronavirus pandemic. Since then CUB has collected biospecimens from Columbia University Irving Medical Center/NewYork-Presbyterian Hospital (CUIMC/NYP) patients who tested positive for SARS-CoV-2, and re-distributed samples to researchers across campus. Currently we have over 90,000 biospecimens banked from more than 14,000 patients (both COVID-19 positive, and negative) including DNA, RNA, serum, plasma, urine, and other tissue samples. Given the number of patients treated for COVID-19 at CUIMC/NYP and the diversity of our patient population, Columbia's COVID-19 biobank is arguably the largest and most distinct in the United States. Additionally, CUB has consented more than 2,400 patients for genomic research and future research studies to further advance our understanding of COVID-19 and its devastating clinical consequences.; Since our last update, whole exome sequencing data has been generated on more than 1,000 patients diagnosed with SARS-CoV-2, and is currently available in AWS for download with the appropriate IRB and CUB approvals. Host and virome RNA sequencing and microbiome data generation is ongoing, and will soon be available to investigators with CUB approval. We are also excited to announce that Dr. David Goldstein has partnered with Vanda Pharmaceuticals to perform whole genome sequencing on 1,000 CUB COVID+ patients. Once generated, this data will also be available to CUIMC researchers for their own analyses.; Dr. Krzysztof Kiryluk in the Department of Medicine is spearheading an effort to generate SARS-CoV-2 genome-focused clinical phenotypes, which will then be combined with sequencing data generated by the Institute for Genomic Medicine, into a single dataset that will be available centrally through CUB. We hope that this data will be useful to any Columbia investigator performing genetics and genomics analyses to address SARS-CoV-2-related research. Additionally, the CUB Clinical Phenotype Committee (CPC), led by Dr. Mitchell Elkind, has been established to oversee efforts related to the generation of broader COVID-19 clinical phenotypes. The CPC is multidisciplinary working group which includes experts from the Departments of Anesthesiology, Surgery, Pediatrics, Emergency Medicine, Biomedical Informatics, Obstetrics and Gynecology, and Medicine (Pulmonary, Cardiology, Nephrology and Transplant). The CPC has focused efforts on standardizing, validating, and refining core SARS-CoV-2 related phenotype definitions, which will be made widely available when completed.; As of October 2020, over 140 requests to the biobank were reviewed by the CUB Sample and Data Committee, and more than 22,000 samples have been disbursed to support a wide range of research studies across the CUIMC community. With assistance from Drs. Kevin Roth, Eldad Hod, and Susan Whittier in the Department of Pathology and Cell Biology, we are able to continue residual clinical sample collections, which will be critical as the coronavirus continues to spread.; While CUB has initially focused on COVID-19 due to obvious needs, it continues to look past the pandemic and begin University-wide recruitment efforts with multiple partners and across multiple domains towards the ultimate goal of enrolling all CUIMC/NYP patients. To this end, we are excited to be partnering with the IGM's All of Us team. The Columbia University Biobank is now being offered to All of Us participants during their enrollment and retention activities. CUB looks forward to applying the lessons learned from the All of Us Research Program to the CUB
recruitment efforts. We encourage you to use the research resources offered through the CUB website. As we enter another chapter in the COVID-19 pandemic and again brace ourselves for potential challenges ahead, it is with great thanks that we acknowledge the strength of the Columbia community. Having the Columbia University Biobank now in full operation will significantly benefit the vital research yet to come.

Stay safe,
Muredach Reilly, MBBCh; Director, Irving Institute for Clinical and Translational Research; Michael Shelanski, MD, PhD; Senior Vice Dean for Research; On behalf of the Columbia University Biobank

**Additional Information:** 2021 FIRE Grant Program; Deadline: February 1; The RUNX1 Research Program (RRP) and the Edward P. Evans Foundation are pleased to announce their joint RRP & EvansMDS 2021 FIRE Grants on Inflammation and Clonal Hematopoiesis. The Edward P. Evans Foundation is a non-profit Charitable Trust dedicated to funding research on Myelodysplastic Syndromes (MDS) through its EvansMDS initiative. EvansMDS is seeking to fund the discovery of new knowledge that will lead to the development of better MDS therapies and ultimately, disease cures. The RUNX1 Research Program (RRP), is a non-profit organization with the mission to improve the quality of life and prevent cancer in RUNX1 familial platelet disorder. RRP pursues its mission through funding world-class, collaborative research, and building an empowered patient network integrated within the medical research community. EvansMDS and RRP are working together to multiply our impact on a highly specific area of research that will benefit patients if given focused attention.; The joint FIRE Grant Program is particularly interested in funding projects that are considered high-risk/high reward. Priority will be given to projects that focus on RUNX1-FPD but other projects are welcomed. If submitting a project without focus in RUNX1-FPD, it is imperative the investigators clearly communicate how a proposed study has direct relevance to, or potential impact on RUNX1-FPD; Other immediate priorities include: Strategies for therapeutic intervention in high-risk patient populations with germline mutations that predispose to MDS/AML; Leveraging FDA-approved or advanced investigational agents that target proinflammatory pathways to determine if such agents can halt disease progression; Inclusion of data derived from patient specimens to inform hypothesis-driven translational studies directed toward future clinical studies; Investigator-initiated proof-of-concept clinical trials.; Formation of multidisciplinary teams that include expertise in basic, translational and clinical research.; Through this funding mechanism, RRP and EvansMDS have allocated approximately $800,000 to this grant program. Each proposal can request funding for 2 years. We will support approximately two (2) studies. We anticipate this to be a highly selective and highly competitive process. Applications will be peer-reviewed by an independent review panel led by both RRP and EvansMDS.; For more information and to apply, follow the link here.; Request for Letters of Intent for Studies of Inflammation and Clonal Hematopoiesis; Award amount: Up to $200,000 per year for up to two years; Letter of Intent Submission Deadline: February 1, 2021; Letters of intent are due February 1, 2021 and will be reviewed by a Joint Reviewing Committee comprised of Scientific Advisors from each Foundation. All documents must be submitted in electronic form, as a single pdf file, by email, to grants@epefoundation.org. Applicants selected to submit a full proposal will be notified in early March 2021. The deadline for submission of the full proposals will be in early April 2021. It is intended that funding will be initiated by September 1, 2021.

Additional Information: SU2C Colorectal Cancer Health Equity Dream Team Program; Deadline: March 1; Stand Up To Cancer (SU2C) is making available funds to support an initiative aimed at improving colorectal cancer screening, early detection and prevention across the United States. The initiative will fund a colorectal cancer ‘Dream Team’ of researchers, as well as a comprehensive public awareness campaign to increase screenings.; The new Dream Team will be awarded in early 2021 and will identify communities near anchor institutions that serve minority and medically underserved communities, pinpoint the unique local needs of those areas and turn participating at-risk communities into “Stand Up To Cancer Zones” with high rates of colorectal cancer screening. The Dream Team will provide free colorectal cancer testing in the identified zones and will study samples collected via approved tests for colorectal cancer, including colonoscopy, CT colonography, flexible sigmoidoscopy, and at-home stool tests that analyze fecal DNA and/or blood. The research will aim to develop better approaches to colorectal cancer interception.; Click to button below to learn more about the funding opportunity.

**Additional Information:** CALL FOR APPLICATIONS: Center & Institute Initiative to Enhance Remote Learning and Teaching;

Dear Colleagues, Please find below information about brand new grants offered by a consortium of Columbia centers and institutes, including the Center for Science and Society. We hope you will help us spread the word among your students and colleagues who may be eligible to apply. We encourage you to apply if you are teaching/taking classes online this academic year and have ideas for activities and initiatives that can improve the online teaching/learning experience. I am also attaching a PDF document with all the information about the grants.; **Eligibility:** All Columbia and Barnard faculty, instructors, undergraduate and graduate students, TAs, research fellows and postdocs (if teaching or taking a class in the 2020-21 academic year) are eligible to apply.; **Amount:** Funding of up to $1,500 per proposal is available.; **Deadline:** Applications for the grants are open via rolling submission throughout the 2020-21 academic year.; **Description:** With a challenging academic year ahead, a consortium of Centers and Institutes will offer funding for proposals that cultivate student engagement and enhance the online learning experience for Columbia students and instructors. As many universities and colleges grapple with the reality of online and hybrid instruction in the wake of the COVID-19 pandemic, faculty members, teaching assistants, instructors, and students prepare to learn and teach in unprecedented ways. Structuring engaging online or hybrid courses is not a simple task.; To help ameliorate some of the challenges, the Center for Science and Society, the Center for the History and Ethics of Public Health, the Institute for Religion, Culture and Public Life, the Institute for Comparative Literature and Society, the Center for Justice, the Center for American Studies, and the Institute for the Study of Human Rights will offer funds throughout the 2020-21 academic year to proposals that aim to improve the online classroom experience and promote student engagement. We welcome proposals from any member of any course offered in the 2020-21 academic year - instructor, TA, or student. Successful proposals will lay out course activities (to be carried out inside or outside class sessions) that will enhance the teaching and learning experiences of remote learning; they can also suggest innovative pedagogical strategies and tools. They can be proposed at any time during an ongoing, or in advance of a future, course. This funding opportunity aims to make resources available quickly so that students and teachers can respond rapidly to class dynamics, ideas, and opportunities.; Activities might include forming online student-instructor groups, special events, public outreach activities or webinars, journal/book clubs, outdoor activities, in-home activities or demonstrations, financial support for assistance in the classroom, special speaker honoraria, etc.; We look forward to receiving innovative proposals, especially from students and TAs. Visit the Center for Science and Society website to apply. ; Best, Jozef; [brought to our attention by] Jozef Sulik; Senior Project Manager; Presidential Scholars in Society and Neuroscience; The Center for Science and Society; Columbia University in the City of New York; presidentscholars.columbia.edu; scienceandsociety.columbia.edu

**Friday Newsletter 01/22/2021**

; Users with records currently in progress will need to modify the records to meet new FORMS-F requirements.; The changes listed below include items released by eRA in March and items released on June 13.; Key FORMS-F Changes to the PHS Human Subjects and Clinical Trials Information Form; [*] A new Inclusion Enrollment Report title field is now available. The human subjects study title will appear by default for all existing studies and may be changed by the user. For new studies and those with a work in progress study, the title will be blank and need to be filled by the grantee. See Figure 1.; **Figure 1: Inclusion Enrollment Report Title Field;** [*] For clinical trials, the “Brief Summary” field will no longer appear in Section 4. Information in this field prior to June 13, 2020 will continue to be available in the PDF images of applications and Research Performance Progress Reports (RPPRs) submitted prior to this change.; [*] Question 1.A.a. “Does the study involve human subjects/participants” now has a default value of yes and cannot be changed unless the user changes their response to the question “Are Human Subjects Involved?” on the Other Projects Information form. As a study record should be completed only for research involving human participants, the “No” option is no longer available for this question. See Figure 2.; **Figure 2: Question 1.A.a of the Clinical Trial Post Submission Study Record;** [*] In Section 2.8 of the Study Record: PHS Human Subjects and Clinical Trials Information screen, the language has been changed from ‘Enrollment of First Subject’ to ‘Enrollment of First Participant.’; [*] A new question has been added to the Study Record: PHS Human Subjects and Clinical Trials Information screen — Section 4.6 asks ‘Is this an applicable clinical trial under FDAAA?’; [*] For a full list of significant FORMS-F changes, see the High-level Grant Application Form Change Summary: FORMS-F PDF.; Key Inclusion Across the Lifespan Changes; [*] Recipients reporting actual enrollment progress for a grant application submitted for due dates January 25, 2019 or later must provide participant-level data on sex/gender, race, ethnicity, and age at enrollment in the Inclusion Enrollment Report of the PHS Human Subjects and Clinical Trials Information Form using HSS.; [*] Users must use the spreadsheet template available in HSS to submit participant-level data. The column titles must not be altered, and data should be provided using the values modeled in the template. Changes to the template may result in a submission error. See Figure 3.; **Figure 3: Download Participant Level Data Template button on the Inclusion Enrollment Report;** [*] Participant-level data must be uploaded in .csv format. Users do not need to separately enter the individual numerical fields in the Actual (Cumulative) Inclusion Enrollment Report table once the .csv file is successfully uploaded. Go to: [https://grants.nih.gov/grants/forms-f/data-tables.htm](https://grants.nih.gov/grants/forms-f/data-tables.htm); They did not post a significant changes document yet, so I took the instructions from the previous tables and did a comparison to the new tables. See attached "Changes from FORMS-E to FORMS-F"; I have an email to NIH to clarify the significant changes, and any impact they may have in xTRACT. Upon first glance, the changes appear to be more of clarifications of the instructions, rather than anything drastically different.; I know a number of you are preparing training grant proposals for May. Please feel free to take a look at these changes, and let me know if you have questions. This way I can collect them all and send them to NIH for clarification. As every training grant program is different, you may also need to go to your Program Officials for direction on how they want the table completed for your specific set of circumstances.; As soon as I have more information from NIH I will pass it along.; [brought to our attention by] Stephanie F. **Additional Information:** Training Grant RPPRs and survey; Training Grant RPPRs and survey; Hello, Training Grant PIs and Administrators. This is just a quick reminder to please take the very survey below from HICCC, available here: https://cumc.co1.qualtrics.com/jfe/form/SV_dnlpKjMHjJQo5kp; For background, see below and attached. If you have any questions about it, please contact Stuart Fischer at sgf2@cumc.columbia.edu. Thank you! We will be contacting folks individually if we don’t hear from you.; Steph; Dear Training Grant Directors and Administrators, We have two important updates regarding Research Performance Progress Reports (RPPRs); To follow up on the TGA meeting we held on August 12 (see attached slides), we’d like to request that PIs complete the following Qualtrics survey indicating your willingness to share your next RPPR with the Herbert Irving Comprehensive Cancer Center (HICCC) administration. Go to https://cumc.co1.qualtrics.com/jfe/form/SV_dnlpKjMHjJQo5kp to complete the survey.; Background: HICCC is an NCI-designated Comprehensive Cancer Center. Its Cancer Center Support Grant with Dr. Anil Rustgi as Principal Investigator was recently renewed for a period of five years. Starting this year, as required by NCI, a new dedicated Cancer Research Career Enhancement (CRCE) Core, with Dr. Wendy Chung as Director, was established in the HICCC to coordinate education and training activities and provide educational opportunities at all levels, from high school to faculty.; CRCE serves all HICCC members, some of whom may be mentors on your active institutional grants. The NCI requires that HICCC collect data and submit reports on the education and training activities of HICCC members who are mentors on your grants. During our meeting on August 12, we discussed your willingness to share your RPPRs with the HICCC in order to meet NCI’s mandate. Attendees on the call were amenable to the idea. The information will be used solely for the purposes of enabling the CRCE Core to meet the NCI’s requirement and will allow CRCE to enhance the programming focused on trainees in cancer research.; SPA will provide a copy of the RPPR to HICCC if you select YES to the following statement: "As the P.I of this training grant, I am willing to share the Research Performance Progress Report of this training grant with the Herbert Irving Comprehensive Cancer Center administration." If you are unwilling to provide the RPPR to HICCC, please email Stuart Fischer at sgf2@cumc.columbia.edu and we will connect with you separately.; New Requirement for Trainee Diversity Report, beginning October 30, 2020; See full NIH announcement at https://grants.nih.gov/grants/guide/notice-files/NOT-OD-20-178.html; NIH is integrating the Trainee Diversity Report into xTrain, which will now be generated electronically using trainees’ demographic data from their eRA Commons Personal Profiles. This electronically generated report must be included with the RPPR. RPPRs lacking an electronically generated report will not be accepted. We are waiting for more specific instructions on how this will work, so stay tuned and we’ll provide you with more information.; If you have any questions about the Qualtrics survey, please reach out to Stuart Fischer at sgf2@cumc.columbia.edu; Thank you!; Stephanie F. Extending the Special Exception to the NIH/AHRQ/NIOSH Post-Submission Material Policy During the COVID-19 Pandemic

**Sponsor:** National Institutes of Health

**Deadline(s):** This Notice extends the special exception for post-submission material (see NOT-OD-20-123) to applications submitted for the May 2021 Council round; For applications submitted for the May 2021 council (beginning with applications submitted for the September 25, 2020 due date for Spring 2021 review meetings), the NIH, AHRQ, and NIOSH will accept a one-page update with preliminary data as post-submission materials for applications submitted under all activity codes, ONLY if the Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application. The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications; All other materials listed in NOT-OD-19-083 as acceptable post-submission materials will continue to be accepted if submitted 30 days before the study section meeting.

Additional Information:

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about they the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

- **2 weeks prior to submission deadline**—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.
Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions (if the support services have not been utilized for the grant) of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@cumc.columbia.edu.

Best wishes,

Pam Factor-Litvak

**Additional Information:** What can we do today to create a better, more equitable tomorrow? Through this new funding opportunity, RWJF seeks to understand and anticipate what dramatic changes we might see in the next five to 15 years in four areas: 1) Future of Evidence; 2) Future of Social Interaction; 3) Future of Food; and Future of Work; Additionally, this call for proposals seeks to support unconventional approaches and breakthrough ideas outside of these areas that could improve health equity and well-being for generations to come. We welcome proposals from scientists, anthropologists, artists, urban planners, community leaders—anyone, anywhere who has a cutting edge idea that could alter the trajectory of health and increase opportunities for everyone in the United States to live their healthiest life possible. Please note, while this CFP is focused on broader and longer-term societal trends and shifts that were evolving prior to the COVID-19 outbreak, we recognize the unique circumstances and learning created by the COVID-19 pandemic may inform your response. It is at your discretion whether you propose a project related to the pandemic directly or indirectly.

**Additional Information:** Research shows that the earliest years of life are a critical period of human development. Yet, some families do not have access to the basic necessities and resources to foster the nurturing experiences and stimulating environments that young children need to thrive. RWJF is seeking research proposals that explore policies and programming to help improve families’ access to the social safety net system. Grants, up to $200,000 each, are available to study the ways that access to early child care education, income supports, and nutrition supports interact and potentially reinforce one another to promote families’ well-being; Academic institutions, public entities and private nonprofit organizations, state and local government agencies, and for-profit organizations from a variety of fields are encouraged to apply.

Current, FY 2020 Department of Defense Funding Opportunities

**Sponsor:** Department of Defense

**Deadline(s):** Please see piecemeal programs and their individual opportunities for Deadlines

**Contact:** CDMRP Help Desk, help@ebrap.org

**Link(s):** https://cdmrp.army.mil/funding/prgdefault

**Additional Information:** Research Resources regularly posts funding opportunity announcements from the Department of Defense. The https://cdmrp.army.mil/funding/prgdefault link defaults to all current opportunities. Please see piecemeal programs and their individual opportunities for Deadlines. Detailed descriptions of funding opportunities, evaluation criteria, and submission requirements can be found in the specific Program Announcements. The Program Announcements are available electronically for downloading from the Grants.gov website, the CDMRP website https://cdmrp.army.mil/funding/prgdefault and the electronic Biomedical Research Application Portal (eBRAP) https://eBRAP.org. All CDMRP funding opportunities, both recently and previously released, are available on the CDMRP website https://cdmrp.army.mil.; Subsequent notifications will be sent when additional funding opportunities are released. A listing of all open CDMRP funding opportunities can be obtained on the Grants.gov website by performing a basic search using CFDA Number 12.420.; Submission is a two-step process requiring both pre-application submission and full application submission. All pre-applications must be submitted through eBRAP https://eBRAP.org. Full applications from extramural organizations (non-DoD organizations) must be submitted through Grants.gov https://www.grants.gov. Intramural DoD organizations may submit full applications to either eBRAP or Grants.gov. Refer to the General Application Instructions, Section II.A. for registration and submission requirements for eBRAP and Grants.gov. For detailed information on the submission process, refer to Section II.D. of the Program Announcement/Funding Opportunity.; eBRAP is a multifunctional web-based system that allows PIs to submit their pre-applications electronically through a secure connection, to view and edit the content of their pre-applications and full applications, to receive communications from the CDMRP, and to submit documentation during award negotiations and period of performance. A key feature of eBRAP is the ability of an organization's representatives and PIs to view and modify the Grants.gov application submissions associated with them. eBRAP will validate Grants.gov application files against the specific Program Announcement/Funding Opportunity requirements and discrepancies will be noted in an email to the PI and in the Full Application Files tab in eBRAP. It is the applicant's responsibility to review all application components for accuracy as well as ensure proper ordering as specified in this Program Announcement/Funding Opportunity.

Additional Information: [brought to our attention by] Stephanie Scott, sfs2110@cumc.columbia.edu ; This is the DoD pre-announcement everyone has been waiting for....the Peer Reviewed Medical Research Program (PRMRP) of anticipated funding opportunities for FY21; Click https://cdmrp.army.mil/pubs/press/2021/21prmrppreann to see the full listing of scientific topics (it's a large, broad list), as well as the planned award mechanisms. Opportunities for postdocs through full professors; Remember, these are anticipated funding opportunities. We do not yet know when these opportunities will be officially released. This pre-announcement gives researchers time to plan and develop ideas for proposals as we wait for the official announcements to be released.; DoD Peer Review Medical Research Program Anticipated Funding Opportunities; Defense Health Program; Department of Defense Peer Review Medical Research Program; Anticipated Funding Opportunities for Fiscal Year 2021 (FY21); Although the Fiscal Year 2021 (FY21) Defense Appropriations Bill has been signed into law, the FY21 appropriation for the Department of Defense Peer Reviewed Medical Research Program (PRMRP) is contingent upon the outcome of a pending rescissions request. The PRMRP is providing the information in this pre-announcement to allow investigators time to plan and develop ideas for submission to the anticipated FY21 funding opportunities. This pre-announcement should not be construed as an obligation by the Government; The FY21 Defense Appropriations Act is anticipated to provide funding to the Department of Defense PRMRP to support research that will improve the health, care, and well-being of all military Service members, Veterans, and beneficiaries by encouraging, identifying, selecting, and managing medical research projects of clear scientific merit and direct relevance to military health. As directed by the Office of the Assistant Secretary of Defense for Health Affairs, the Defense Health Agency J9, Research and Development Directorate manages the Defense Health Program (DHP) Research, Development, Test, and Evaluation (RDT&E) appropriation. The managing agent for the anticipated Program; Announcements/Funding Opportunities is the Congressionally Directed Medical Research Programs (CDMRP) at the U.S. Army Medical Research and Development Command (USAMRDC); Subject to the FY21 Congressional appropriation for PRMRP funding, FY21 PRMRP Program Announcements and General Application Instructions for the following award mechanisms will be posted on the Grants.gov website. Pre-application and application deadlines will be available when the Program Announcements are released.; Congressionally Directed Topic Areas: Applications submitted to the FY21 PRMRP must address at least one of the FY21 PRMRP Congressionally directed topic areas. As of the release date of this pre-announcement, the FY21 PRMRP Topic Areas have not been finalized. This pre-announcement should not be construed as an obligation by the Government to include any of these Topic Areas or others in the FY21 PRMRP. Please see the announcement for the potential FY21 PRMRP Topic Areas are as follows: https://cdmrp.army.mil/pubs/press/2021/21prmrppreann; A pre-application is required and must be submitted through the electronic Biomedical Research Application Portal (eBRAP) at https://eBRAP.org prior to the pre-application deadline. All applications must conform to the final Program Announcements and General Application Instructions that will be available for electronic downloading from the Grants.gov website. The application package containing the required forms for each award mechanism will also be found on Grants.gov. A listing of all CDMRP and other USAMRDC extramural funding opportunities can be obtained on the Grants.gov website by performing a basic search using CFDA Number 12.420.; Submission deadlines are not available until the Program Announcements are released. For email notification when Program Announcements are released, subscribe to program-specific news and updates under “Email Subscriptions” on the eBRAP homepage at https://eBRAP.org. Special Exception to the NIH/AHRQ/NIOSH Post-Submission Material Policy During the COVID-19 Pandemic

**Sponsor**: National Institutes of Health (NIH); Agency for Healthcare Research and Quality (AHRQ); The National Institute for Occupational Safety and Health (NIOSH)

**Deadline(s)**: For applications submitted for the January 2021 council (beginning with applications submitted for the May 25, 2020 due date for Fall 2020 review meetings), the NIH, AHRQ, and NIOSH will accept a one-page update with preliminary data as post-submission materials for applications submitted under all activity codes, ONLY if the Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application.; The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications.; All other materials listed in NOT-OD-19-083 as acceptable post-submission materials will continue to be accepted if submitted 30 days before the study section meeting.

Research Resources has been apprised that the R2eport distribution email to Faculty and other colleagues at times sorts to MS Outlook’s “Other” vs. “Focused” tab when web accessed. You may move an email from the “Other” to “Focused” in box tabs, by selecting Move to Focused if you want only the selected message moved; or you may select Always Move to Focused if you want all future messages from the sender to be delivered to the Focused tab. You may also Turn off Focused In Box when accessing MS Outlook via the web by accessing the settings (cog icon adjacent to your initials), accessing “all outlook settings”, activating the “Don’t sort my messages” button and saving this setting. Rectifying email sorting to Outlook’s Junk folder, may also be addressed. R2eports are posted weekly on our Reports Page

Notice of Requirement for Electronic Submission of all Administrative Supplements

Sponsor: National Institutes of Health
Deadline(s): [1] Effective immediately, NIH will begin accepting administrative supplement applications for multi-project awards electronically. Since the administrative supplement applies to the parent award as a whole, the single-project application form package used for research grants and cooperative agreements will be used for these submissions (e.g., Competition ID=“FORMS-F-ADMSUPP-RESEARCH.”); [2] Effective July 25, 2020, the streamlined submission method through the eRA Commons will be discontinued and replaced with the option to initiate the administrative supplement application within eRA Commons and leverage technology available in NIH ASSIST to complete submission; [3] Effective July 25, 2020, all supplement applications to existing single and multi-project awards must be submitted electronically through Grants.gov using NIH ASSIST, Grants.gov Workspace, or institutional system-to-system (S2S) solutions.

Contact: Please direct all inquiries to: NIH Office of Policy for Extramural Research Administration (OPERA) Systems Policy Branch; Email: opersystemspolicy@nih.gov

DO NOT use those fields unless requested to do so in the application guide or announcement. Why not? Even if you have the best of intentions, you need to resist the temptation to force fit information into your application where it doesn’t belong. The page limits and guidance are there for fairness and you may find your application pulled from consideration if you try to get around them. **NOT-OD-11-081**; The Duplication Balancing Act: The application guide statement “do not duplicate information between the Research Strategy attachment and the PHS Human Subjects and Clinical Trials Information form” appears to be causing some angst in the community. In fact, our new human subjects form invites a certain amount of overlap between the sections. It would be difficult, for example, to provide a “Brief Summary” of a protocol without talking about information captured elsewhere in the application; The point we were actually trying to make is that we don’t want you to copy and paste blocks of text into multiple places in your application. Your Specific Aims and Research Strategy should include enough human subjects and clinical trial information to tell a cohesive and complete story. The human subjects form is meant to provide structured, supporting details for the study (sorry, it isn’t just extra space to expound on the research strategy). The Brief Summary in the Protocol Synopsis section of the human subjects form aligns with what the public would see in ClinicalTrials.gov without the benefit of the full application. It should hit the key points at a very high level in as close to plain language as possible. The bottom line is there will be some overlap of information within your application, but reviewers should not be reading blocks of text copied verbatim into multiple sections of the application.; **Space-Fill Compulsion:** My mother, an interior designer, never saw a horizontal surface she didn’t want to decorate. For years I encouraged her to declutter and often she’d begrudgingly remove a knick-knack from a table of shelf. But the next time I’d visit a new knick-knack was sitting right it its place. My dad calls it space-fill compulsion; Our new human subjects form has several text fields with large character limits (e.g., Eligibility Criteria - 15,000 characters; Brief Summary - 5,000 characters; Narrative Study Description - 32,000 characters). These character limits match those in ClinicalTrials.gov and were set artificially high so the system could accommodate more characters than are actually needed.; Here is a fun little tidbit we’ve learned … folks who are already funded and seeking clinical experience. Consequently, all Fellowship opportunities are posted as independent Clinical Trials Not Allowed.; The sponsor is the responsible individual of record for oversight of the trial. He or she is ultimately responsible for tasks.
like interacting with relevant Institutional Review Board (IRB) staff, reviewing all informed consent documents, reporting potential serious adverse events, and maintaining responsibility for patient safety. But there are no restrictions on the responsibilities the fellow can assume with the sponsor’s oversight; If you plan on submitting a fellowship application, clearly delineate the roles both the sponsor and the fellow are undertaking. This can be done in the Sponsor and Co-Sponsor attachment for the sponsor and the Research Strategy for the fellow. It needs to be clear that the fellow is not the responsible individual. Overselling their role to the point where it looks like they are leading the trial can hurt more than it helps. It’s fine to show the fellow working side-by-side with his or her sponsor through every aspect of the trial. It’s not OK for them to be off on their own shouldering all the responsibility themselves.

**Additional Information:** NIH Guide Notice on Delayed Enforcement for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants; As I previously announced a few weeks ago, NIH will be delaying enforcement for some requirements affecting prospective basic science studies that also meet NIH’s definition of a clinical trial. NIH just released the official notice stating this, along with their future plans: https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-212.html; Please read the notice in its entirety. The Council on Governmental Relations (COGR) provided a summary below. Here are some highlights: (*) **Registration and Reporting:** NIH still expects the registration and reporting of these prospective basic science studies, but is giving flexibility to allow reporting on existing basic science portals, and expects the data to eventually be transported to ClinicalTrials.gov. Flexibility given through September 24, 2019. They are issuing a Request for Information (RFI) to collect stakeholder feedback on this topic; (*) **Funding Opportunity Announcements** (FOAs): NIH will not administratively reject any proposal application for submission to an incorrect FOA based on study-type designation, and they plan to issue an FOA specifically for prospectively basic science studies in November for due dates starting on January 25th, 2019; (*) **The PHS Human Subjects and Clinical Trial Information Form** (new in FORMS-E) – they still expect that form for all applications involving prospective basic science studies; (*) **Good Clinical Practice (GCP) training** is still being enforced for all personnel involved in the conduct, oversight, or management of prospective basic science studies involving human participants. As a reminder, Columbia offers GCP training in Rascal through Course TC3450. For more information, see https://research.columbia.edu/content/good-clinical-practice-training or email NIH-GCP@columbia.edu; Please read the notice in its entirety for more information, and stay tuned for more updates from me on this topic; [brought to our attention by] Stephanie F. **Additional Information:** NIH Salary Cap: Guidance on Salary Limitation for Grants and Cooperative Agreements FY 2018; NIH issued guidance on the use of a new NIH salary cap, to increase from $187,000 to $189,600. See https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-137.html. The effective date of this increase is January 7th, 2018; NIH has not received the final Fiscal Year (FY) 2018 appropriation and is operating under a continuing resolution through March 23rd, 2018 (see NOT-OD-18-136 also a very important notice). However, NIH issued this guidance until a budget is passed; In summary, this is how the $189,600 salary cap can be applied: (*) NIH proposal budgets may be submitted using the new cap.; (*) Active NIH awards may rebudget to the new cap if restricted to Executive Level II, and adequate funds are available, and the salary cap increase is consistent with the institutional base salary. The new cap should be prorated for the applicable months: (**) Cap is $187,000 through 1/6/18; (**) Cap is $189,600 from 1/7/18 – present; If you have any questions, please feel free to reach out to your SPA Project Officer. Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that info, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about the type of grant at least five weeks prior to the grant due date. If you seek external review, provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

- **2 weeks prior to submission deadline**—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions (if the support services have not been utilized for the grant) of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types (such as R21s) that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@columbia.edu.

Best wishes,
Pam Factor-Litvak

NIH single IRB (sIRB) policy
**Sponsor:** NIH
**Deadline(s):** (for NIH application submissions on or after)
01/25/2018
**Contact:** If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites
**Link(s):**
**Additional Information:** The NIH single IRB (sIRB) policy applies to the domestic sites of new and competing renewal applications/proposals with due dates of January 25, 2018 and beyond for NIH-funded multi-site studies where each site will conduct the same protocol involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program; If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites; If Columbia University is being proposed as one of the participating sites in an application to be submitted this month or soon after by another applicant organization, you must also contact the HRPO immediately. Moving forward, it is recommended that you contact the HRPO as soon as a decision is made to participate in a multi-site study to which the NIH sIRB Policy applies.; An official process that details the requirements for addressing the NIH sIRB Policy is being finalized, to be released shortly. In the meantime, PIs and/or departments can reach out to irboffice@columbia.edu to inform the HRPO about these applications. Upon receipt of your email, HRPO will send you an online form to be completed, and you will be provided with next steps; In addition, we are offering several options to learn more about the sIRB process. **Note:** Protocols that address the same research questions, involve the same methodologies, and evaluate the same outcomes are considered to be the “same research protocol.” Additionally, sites that are accruing research participants for studies that are identical except for variations due to local context consideration would be considered to be conducting the “same research protocol.”; If you have any questions, please contact irboffice@columbia.edu.; Our website contains resources to help you while you get accustomed to all of the policy changes impacting proposal preparation. We have an Excel checklist to help you complete the new PHS NIH Human Subjects and Clinical Trials Information Form. **Additional Information:** I wanted to pass along this email we received from NICHD. Regardless of whether you receive funding from NICHD, I thought it was a great summary of the recent NIH policies concerning human subjects research and the definition of a clinical trial. It also highlights contacting the NIH Program Officials when you are uncertain if your study meets the NIH clinical trial definition.; I promise you will see more communications from me as we prepare you for these proposal application changes in effect for proposals due January 25th, 2018 or later.; *Stephanie Scott* Changes to NIH policies and procedures related to human subjects research; Dear NICHD Investigator, NIH has broadened its definition of clinical trial, and it may impact your future applications (new, resubmission, or revision) and awards.; NIH’s definition of clinical trial now includes some research approaches not traditionally considered clinical trials. For example, many behavioral or biobehavioral studies that focus on underlying mechanisms of development may now be considered clinical trials. Also, conducting experiments that involve human subjects may be considered a clinical trial. *If you are conducting studies involving human subjects, it is very important that you understand this definition and determine whether it applies to your research.; How do I know if my study is a clinical trial?* NIH has four questions that researchers need to answer to determine whether their study is a clinical trial. These questions may use terminology that has a different meaning than the typical meanings understood by certain research communities. It’s important to review the FAQs and case studies provided by the NIH Office of Extramural Research. If you answer “yes” to each of these four questions, your research will be considered a clinical trial by NIH: (1) Does the study involve human participants? (2) Are the participants prospectively assigned to an intervention? (3) Is the study designed to evaluate the effect of the intervention on the participants? (4) Is the effect being evaluated a health-related biomedical or behavioral outcome?; Here is a link that can help you determine if your research is a clinical trial: https://grants.nih.gov/ct-decision/index.htm.

**Why is this important? What are the implications if my study is considered a clinical trial?** Beginning with applications submitted on or after January 25, 2018, if your application involves a clinical trial, you must: (*) Submit the application through a Funding Opportunity Announcement (FOA) that accepts clinical trials; (*) Provide additional information in the application, which will be subject to different and distinct review criteria for clinical trials; If selected for funding, you will need to designate individual(s) to serve as the responsible party for the trial and to register and post results in the ClinicalTrials.gov system; NIH has also issued other policy updates involving Good

Additional Information: Be Careful to Pick the Right Funding Opportunity Announcement (FOA); In follow-up to the announcement I sent last night, Update: NIH FOAs with FORMS-E, Dr. Mike Lauer of NIH just wrote a blog on the importance of selecting the correct Funding Opportunity Announcement (FOA). See full blog post; Key takeaways: (*) If any part of your study (the specific aims, components, studies, etc) meets NIH’s definition of a clinical trial, then you must select an FOA that allows for clinical trials.; (*) If none of the aims or studies within your project meet the definition, select an FOA that says “Clinical trials not allowed” or “Clinical trials optional”; (*) “The participating organizations may vary between the “clinical trial not allowed” parent FOA and the “clinical trial required” parent FOA for the same activity code. Read the details of each FOA carefully.; (* )“Note that some institutes that participate on a “Clinical Trial Required” parent may limit their participation to mechanistic studies.”; If you are unsure whether your study meets the definition of a clinical trial, I highly encourage you to reach out to the Program Official named on the FOA to help you make the appropriate determination, and to clarify the appropriate FOA to be selected. Include in your application cover letter the name of the Program Official who assisted you, and confirmed, the selection of the FOA; [brought to our attention by] Stephanie Scott, sfs2110@cumc.columbia.edu

**Additional Information:** [adapted from] A MESSAGE FROM DEAN FRIED [previously distributed] to Faculty; Dear Mailman School faculty; In acknowledgement of the increasingly competitive federal funding environment, the School’s administrative and academic leadership teams have been working to develop new resources to support faculty in preparing grant applications with the highest chance of success. In the fall, we will announce and begin rolling out a suite of such supports; Given the initial fall NIH submission deadline of October 5, I write today to inform you about the first of these resources. The School is providing support for pre-submission external review and for scientific final editing of R01, P, K, Center or other complex NIH proposals for NIH’s October 5 submission deadline, for all full-time faculty with primary appointments in the School. These services will only apply to first submissions (not to resubmissions). Note that, at this time, other grant types such as R03 and R21 are not eligible for this service.; For the external review of applications, the PI will be requested to identify an external expert who they think would be willing to review the grant. Please remember that an individual who serves as a reviewer in this way would then become ineligible to review the proposal for NIH. The School will arrange for the review and provide reviewers a $750 honorarium for R01 review and $1,000 for review of P or other more complex proposals. This external review is independent of any departmental review of aims or entire proposals, is independent of reviewer’s R; and is entirely optional.; For the final scientific editing an outside company that has already been used by several departments will be engaged as needed. The editing review will polish writing, help with organization and logical progression, and assist with the production of figures.; Below is the timeline and process for requesting and utilizing these supports: (*); To ensure an adequate amount of time for grant review and/or editing, faculty wishing to participate must first inform Research Resources (via Craig Kandell at ckk7@columbia.edu) at least five weeks before the grant is due in the case of the 10/05/2017 deadline, 09/01/2017 that you will be requesting one or both of these services. This request must include: the title of the grant, type of grant, due date, and name of the suggested external reviewer with contact information.; (*); Research Resources will contact the external reviewer to ensure his/her willingness to review within one week. That office will also send the appropriate paperwork for paying the honorarium. Three to four weeks prior to submission, in the case of the 10/05/2017 deadline, 09/14/2017 (3 weeks) or 09/07/2017 (4 weeks) the PI must send the draft of the science to Craig, who will forward it to the external reviewer to complete his/her review within one week. The external reviewer will return comments directly to Craig and the PI. If you think you cannot meet this timeline, please discuss with Pam Factor-Litvak, Associate Dean for Research Resources.; (*); For editing of grant proposals, Craig will send the revised manuscript to the scientific editor ten to 14 days prior to submission in the case of the 10/05/2017 deadline, 09/21/2017 – 09/25/2017, and the editor’s comments will be returned to Craig and the PI for finalization and submission within a few days.; If you have any questions about your eligibility or the above process, please contact Pam Factor-Litvak at prf1@columbia.edu; I hope you will consider taking advantage of these new services and that you find them helpful.; With best wishes, Linda P. Fringe Benefits Rates for Fiscal Year Beginning July 1, 2017 (FY 2018)

Sponsor: Sponsored Projects Administration
NA, FY2018 Announcements, brought to our attention on Deadline(s): 07/06/2017
Contact: Any questions about the government fringe rate should be directed to AskRPIC@columbia.edu.
Link(s): http://finance.columbia.edu/content/fringe-benefit-rates
http://spa.columbia.edu/proposals/institutional-information

Additional Information: To: Principal Investigators, Sponsored Projects Administrators; From: Barbara Hough, Vice President, Controller and Treasurer, Rudi Odeh-Ramadan, Associate Vice President for Research Administration; We are writing to inform you that, based on the approval obtained from the Federal government, the fringe rate applicable to government grants and contracts will increase from 28.9% to 30.3%, effective July 1, 2017. For all funding sources other than government grants and contracts, the fringe benefit rate will be 29.75%. The increase in the rate is primarily driven by the significant increase in medical costs the University has experienced over the past several years; Please note that you may wish to take this opportunity to review the impact the change in the fringe benefits recovery rate may have on the allocation of personnel related costs for the remainder of the grant life cycle; For information regarding student employees working during the academic year or summer, refer to http://finance.columbia.edu/content/fringe-benefit-rates. ; For grants administrators: FY17 Cost Transfers involving sponsored projects will continue to be processed with FY17 fringe rates through the July 7th deadline. The new FY18 fringe rates will be introduced with FY18 payroll runs; The rate agreement is available on the SPA website on the Institutional Information page and on the Finance Gateway at http://finance.columbia.edu/content/fringe-benefit-rates. ; Any questions about the government fringe rate should be directed to AskRPIC@columbia.edu.

A Potential, New NIH Policy that Stands to Affect all PIs:  
(1) Implementing Limits on Grant Support to Strengthen the Biomedical Research Workforce  
(2) Research Commitment Index: A New Tool for Describing Grant Support

**Additional Information:** NIH to Limit Total Grant Support to PIs; NIH announced on Tuesday that it will implement a limitation on the total grant support it will provide to principal investigators (PIs) who have multiple awards. The agency will use a “Grant Support Index” that assigns point values to various types of grants. PI who exceed a set point, linked to having three or more awards with a single PI, will be forced to adjust their portfolio with reduced resources. NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH says that it believes 6 percent of PIs will be affected and that resources will be freed up to fund about 1,600 additional awards. NIH insists that no existing awards will be rescinded.; An article posted by Nature reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.

NIH’s Deputy Director for Extramural Research: (1) Implementing Limits on Grant Support to Strengthen the Biomedical Research Workforce; and (2) Research Commitment Index: A New Tool for Describing Grant Support; posted on 05/02/2017 and 01/26/2017 respectively. Please note Table 1 on the RCI post that shows the RCI point values for a PI per activity code and whether the grant has one or multiple PIs.

**Additional Information:** Please also note the highlighted final research report requirement below: Several updates to ASSIST happened [01.19.17], you can read about those updates below.; In addition, you may recall that NIH now requires the use of a Final Research Performance Progress Report (FRPPR). See NOT-OD-17-022. Section D.1 in the Participants section will now be included, per the email below regarding eRA Commons updates.; I’ll need to provide more information on the FRPPR separately. It appears NIH just posted some FAQs on the FRPPR and Interim RPPR. See https://grants.nih.gov/grants/rppr/faqs.htm#5038. I’ll provide a separate email with this information.; Should you have any questions, please feel free to reach out to your SPA Project Officer. [brought to our attention by] Stephanie Scott; eRA Enhancements: eRA Commons Upcoming Release and Scheduled Downtime for Wednesday, January 18; eRA Enhancements: eRA Commons Upcoming Release and Scheduled Downtime for Wednesday, January 18; Friday, January 13, 2017; Scheduled Downtime for the January Release: eRA Commons and ASSIST will be unavailable beginning at 9 p.m. ET Wednesday, January 18 and will return to service by 7 a.m. ET Thursday, January 19, 2017. When the system is available again, you will see new features and functionality have been added to the system.; Highlights of ASSIST’s January Software Release; (*) New Access Maintainer Role; (**) A new role called "ASSIST_ACCESS_MAINTAINER_ROLE” with Access Maintainer Privileges has been added to the Account Management System (AMS).; (** Only the Signing Official (SO) has the authority to provide this role to whomever they want to manage access to applications in ASSIST on behalf of the organization; (**) By
providing this role, the SO is delegating the authority to manage access to all applications at the organization level, rather than application by application level. (***) Access Management within ASSIST for individual applications has not changed. (****) Multi-Employment Functionality; (****) Senior Key Persons who are affiliated with multiple organizations will be able to select from their current employments so they can choose the most appropriate organization as it relates to their application. (***) When the user provides their eRA Commons User ID and multiple active employments are associated with the account, the system displays the organization, the state, the city of each employment organization. The user can select the appropriate appointment and click the “Select” button. (***) New Link for SOs from ASSIST to Commons Status Screen; (***) When SOs access the Application Information page, they will find a new link titled “To view Commons post submission actions” in the Agency section of the page. (***) The link will take them to the Commons Status search page. From here they can search for the application under the Recent/Pending Submissions option so they can quickly reject the application if so desired/needed. (***) This link is only available to Signing Officials. (***) A Warning if Appendix Material is Submitted in Applications; (***) Per the policy outlined in NOT-OD-16-128, the submission of most appendix materials has been eliminated from NIH applications. (***) If the system detects the submission of appendix materials, a new warning will advise the applicant to closely review the Funding Opportunity Announcement to confirm that these materials are requested as part of the application. (*) Form Lock Message Includes User Name; (***) When a user opens a form screen in ASSIST to edit or add information, the system locks that form so others cannot simultaneously edit the same form. (***) ASSIST displays a message indicating the form you are trying to access is locked by another user and now includes the name of the user who holds the lock. Highlighs of eRA Commons January Software Release; (*) Final RPPR Section D.1 Added; (****) As part of the transition to the use of the Final Research Performance Progress Report (FRPPR), Section D.1 of Participants is now included; (****) & Section D.1 asks “What individuals have worked on the project?” This information will be the list of people who have worked on the project since the previous progress report. It does not include all the individuals during the lifetime of the award; (***) New Design of the Status Information Screen for PI’s and SO’s; The Status Information screen will have a new look and feel. The screen is an important source of information for Principal Investigators (PI’s) and Signing Officials (SO’s) for such things as scores, summary statements, NIH contacts, reference letter status, etc. [a] provided picture has been linked at:
https://r2report.files.wordpress.com/2014/04/nihannouncementspicturepdfformat.pdf; New Status Information screen with some sections expanded, other collapsed; (*) The new design is similar to other updated screens, such as the Personal Profile and the Institution Profile; (*) Categories of information are organized into collapsible/expandable sections; (§) Expand All (default view) and Collapse All buttons show and hide the information on the screen; (*) New Text Filter; (§) A new field will allow you to enter text and display the results on those sections with matches; (§) Matching text will be highlighted, allowing you to quickly locate the information; (*) Important information is displayed along the left side: (§) Warnings; (§) Contact information; (*) Scientific Review Officer (SRO); (*) Grants Management Specialist (GMS); (*) Program Official (PO); (§) Latest Updates; (§) eRA Service Desk contact information; (*) New Print Capabilities; (§) New formatting capabilities allow you to print all the information with the click of a single button; (§) Organized by category; (§) Includes warnings; (§) Includes NIH contacts; NOTE: The ability to submit help tickets online will not be available during the downtime listed above; Joe Schumaker; eRA Communications; Division of Communications and Outreach; NIH Office of Extramural Research; Questions? **Additional Information:** Contacting Staff at the NIH Institutes and Centers; In today’s NIH Extramural News blog, the NIH staff posted a handy chart of the major roles of NIH staff: Program Officials, Scientific Review Officers, Grants Management Officials, and staff of the Division of Receipt and Referral in NIH’s Center of Scientific Review. It explains each role’s responsibility, when it is appropriate to contact them, and where to find their contact information; See [Who At NIH Can Answer my Question About….?](https://grants.nih.gov/grants/how-to-apply-application-guide/resources/contacting-nih-staff.htm); Remember that your Sponsored Projects Administration (SPA) Project Officer must communicate with NIH staff directly when submitting proposals, negotiating awards, submitting Just-In-Time information, submitting formal requests for prior approval, submitting progress reports, clarifying NIH policies, and discussing financial or administrative issues. However, there may be times when contacting NIH directly is appropriate, for example, to identify the right type of grant program and/or funding opportunity for you and your research, or to verify that your idea fits within the mission and priorities of an NIH Institute or Center. When in doubt, reach out to your SPA Project Officer; [brought to our attention by] Stephanie F. The Fringe Rate Applicable to Government Grants and Contracts will Increase from 27.1% to 28.9%, effective July 1, 2016

**Sponsor:** NA

**Deadline(s):** 07/01/2016 (effective)

**Contact:** Any questions about the government fringe rate should be directed to Carl Sparano at email cs16@columbia.edu or voice 212-854-1049.

**Link(s):** http://spa.columbia.edu/proposals/institutional-information

**Additional Information:** To: Principal Investigators, Sponsored Projects Administrators; From: Anne Sullivan, Executive Vice President for Finance; Rudi Odeh-Ramadan, Associate Vice President for Research Administration; We are writing to inform you that, based on the approval obtained from the Federal government, the fringe rate applicable to government grants and contracts will increase from 27.1% to 28.9%, effective July 1, 2016. For all funding sources other than government grants and contracts, the fringe benefit rate will be 29.5%. The increase in the rate is primarily driven by the significant increase in medical costs the University has experienced over the past year.; Please note that you may wish to take this opportunity to review the impact the change in the fringe benefits recovery rate may have on the allocation of personnel related costs for the remainder of the grant life cycle.; With respect to students, the fringe benefit rate applicable to salaries funded by government projects will not change and will remain at 8.15%. For all funding sources other than government projects, the fringe benefit rate will be 8.15%.; For grants administrators: FY16 Cost Transfers involving sponsored projects will continue to be processed with the FY16 fringe rates through the July 15 deadline. The new FY17 fringe rates will be introduced with FY17 payroll runs.; The rate agreement is available on the SPA website on the Institutional Information page. It will be posted on the Finance website shortly.; Any questions about the government fringe rate should be directed to Carl Sparano at email cs16@columbia.edu or voice 212-854-1049.

**Additional Information:** Please pass this on to anyone you know whom may be preparing an NIH individual fellowship application (pre- or postdoc); Anyone who started a grant application for any of these fellowship opportunities prior to June 8, 2016 must return to the funding opportunity announcement and begin again.; There were problems in the fellowship forms packages attached to the funding announcements. NIH has since corrected the problem. See below for details, and https://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-106.html. Impacts the Parent fellowship funding announcements as well as PA-16-130 from NIGMS and PAR-16-210 from NIDCD. [forwarded to our attention by] Stephanie Scott, SPA Communications and Outreach Director, sfs2110; NIH Fellowship applicants, I’d like to bring two issue to your attention: (1) Anyone who started a fellowship application between June 3 and June 7 must return to their funding opportunity announcement to get an updated application package (NOT-OD-16-106); (2) If you use Grants.gov downloadable forms or Workspace to prepare your application, be aware that the “View Attachment” button associated with the 23. Resource Sharing Plan attachment on the PHS Fellowship Supplemental form displays the 22. Select Agent Research attachment instead of the expected one. This is simply an issue with the Grants.gov form interface. It does not impact how the attachments are sent to NIH or how we assemble your application image in eRA Commons.; We are working with Grants.gov to address the issue. In the meantime, do not rely on the “View Attachment” feature for the Resource Sharing Plan. Instead, carefully check your attachments prior to uploading them and again when viewing your application image in eRA Commons.; This issue only impacts the PDF version of the form. If you use ASSIST or a system-to-system solution to prepare your application, then you are not impacted.; If you have any questions, please contact Grants Information at grantsinfo@od.nih.gov; Sheri; Sheri Cummins; Chief, Grants Information; Division of Communications and Outreach; NIH Office of Extramural Research; cumminss@mail.nih.gov; 301-496-3405;

Change is Coming: Updates to NIH Application Forms and Instructions; Summary from the NIH “Open Mike” Blog Regarding the Many Changes Taking Place with NIH Application Forms and New Policy Requirements;

**Sponsor:** NIH; Extramural Nexus Blog; 
**Deadline(s):** 01/25/2016; effective for applications submitted on or after January 25, 2016;

**Contact:** Please see appropriate links;

**Additional Information:** Below is a nice summary from the NIH “Open Mike” blog [provided by Stephanie] Scott regarding the many changes taking place with NIH application forms and new policy requirements. I reviewed these changes this week with departmental/grants managers during the Research Administration Forums. I will certainly continue to provide updates and summaries of these changes for faculty and the rest of the research community. Stay tuned for more; Step; We periodically need to update our application forms and instructions to accommodate changing policy, new business needs, and sometimes (not often enough) to reduce the amount of information we ask of you. Given our constraints, we have been working to provide systems support to make the mechanics of these transitions easier for you. This particular set of changes implements a number of policy changes impacting applications submitted in 2016, which we announced in a series of recent NIH Guide notices. We would like to give you a quick overview of what is happening; We will be rolling out the changes in two phases, as summarized in our notice published in the NIH Guide, since our new application forms will not be ready until the spring; You may want to pay particular attention to the following changes, effective for applications submitted on or after January 25, 2016: (*) There will be new application requirements and review language regarding enhanced rigor and reproducibility (We'll be elaborating on these requirements in a separate upcoming post); (*) We will ask for less information in the vertebrate animal section of the application, to remove redundancy with information already included in IACUC reviews. (Some of this information will be shifted to the research strategy section.); (*) We are updating the NIH policy on inclusion of children to lower the age designation for children to include those under 18 years old. (The current age designation for children includes all research subjects under 21 years old.); (*) For training grants, information requirements will change and lower applicant burden; For due dates of May 25, 2016 and beyond, we will require use of new application forms (FORMS-D). We will remind you again this spring, but please understand that it is imperative that you submit your application on the right form package to ensure successful submission; We will reissue fellowship, career development, training and all parent funding opportunity announcements this spring to ensure the announcements include instructions that match the form requirements. We’ll also make a variety of resources available this spring to help ensure you submit using the right forms; If you have been using the Grants.gov downloadable forms and haven’t tried ASSIST yet, members of my staff (the electronic Research Administration or eRA) are working on enhancing the copy application feature to make it even easier to move your application (including attachments) from one form version to another. During the last round of grant applications, over 25% of the applicants switched from using downloadable forms to ASSIST. They successfully submitted their applications on the first try over 90% of the time compared with only 60% of the time for those still using the standard downloadable forms; So be on the lookout for new application instructions we will release at the end of November, and for more communications from us as we get closer to the time we move to FORMS-D;

Simplification of the Vertebrate Animals Section of NIH Grant Applications and Contract Proposals;

**Sponsor:** National Institutes of Health; 
**Deadline(s):** NA Release Date: 10/13/2015;
NIH's Advisory Committee to the Director's Working Group on research education tables may also be used in institutional career development and performance progress reports (RPPRs). For questions or further information, contact: Office of Laboratory Animal Welfare (OLAW); Telephone: 301-496-7163; Email: olaw@od.nih.gov.

Additional Information: This Notice is to inform potential applicants and offerors that the requirements of the Vertebrate Animals Section (VAS) of grant applications, cooperative agreements and contract proposals has changed. The changes have been made to remove redundancy with Institutional Animal Care and Use Committee review while meeting the requirements of the Public Health Service Policy on Humane Care and Use of Laboratory Animals.; Updated VAS Requirements: If live vertebrate animals are to be used, federal policy requires applicants to address the following criteria: (*) Description of Procedures. Provide a concise description of the proposed procedures to be used that involve vertebrate animals in the work outlined in the application or proposal. Identify the species, strains, ages, sex and total number of animals by species to be used in the proposed work. If dogs or cats are proposed, provide the source of the animals.; (*) Justifications. Provide justification that the species are appropriate for the proposed research. Explain why the research goals cannot be accomplished using an alternative model (e.g., computational, human, invertebrate, in vitro); (*) Minimization of Pain and Distress. Describe the interventions including analgesia, anesthesia, sedation, palliative care and humane endpoints to minimize discomfort, distress, pain and injury.; (*) Euthanasia. State whether the method of euthanasia is consistent with the recommendations of the American Veterinary Medical Association (AVMA) Guidelines for the Euthanasia of Animals. If not, describe the method and provide a scientific justification.;

NIH & AHRQ Announce Transition to New Research Training Table Formats for 2016 and Upcoming Release of the xTRACT System;

Sponsor: National Institutes of Health; Agency for Healthcare Research and Quality;

Deadline(s): NA Release Date: 10/13/2015;

Contact: Please direct all inquiries to: NIHTrain@mail.nih.gov.

Link(s): http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-007.html;

Additional Information: This Notice serves to announce the availability of new research training data tables for use with FY 2016 institutional training grant applications and research performance progress reports (RPPRs). Table formats, instructions, and a completed set of tables with sample data may be found on the NIH website at: http://grants.nih.gov/grants/funding/424/datatables.htm.; Where specified in the Funding Opportunity Announcement for a program, these tables may also be used in institutional career development and research education applications and RPPRs ; Background and Related Information: In keeping with the recommendations of NIH’s Advisory Committee to the Director’s Working Group on the Biomedical Research Workforce, we plan to introduce an electronic system, xTRACT, for creating research training data tables and storing the information reported in those tables. xTRACT is expected to be available for users to access via the eRA Commons beginning October 16, 2015.; In conjunction with the development of xTRACT, and to implement related recommendations from the Working Group, we have revised existing research training data tables to: (*) Reduce the number of tables from 12 to 8; (*) Minimize the reporting of individual-level information; (*) Extend the tracking of trainee outcomes from 10 to 15 years; Where possible, existing data will be used to pre-populate the xTRACT system, including trainee names and selected characteristics, institutions, grant numbers, and subsequent NIH, AHRQ and other HHS awards;

NIH & AHRQ Announce New Form for PHS Awarding Component and Peer Review Requests;

Sponsor: National Institutes of Health; Agency for Healthcare Research and Quality;

Deadline(s): NA Release Date: 10/13/2015;

Contact: Please direct all inquiries to: Division of Receipt and Referral; Center for Scientific Review (CSR); Telephone: 301-435-0715; Email: csrdr@mail.nih.gov.

Link(s): http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-008.html;

Additional Information: Applicants who want to communicate requests pertinent to the assignment and initial peer review of applications must use a new PHS Assignment Request Form beginning with applications for due dates on or after May 25, 2016. Use of this form will ensure applicant requests are effectively communicated to agency staff and may be used to expedite the processing and assignment of applications; Fields included in the new form: (*) PHS Awarding Component (including NIH Institute/Center (IC) Requests), both positive (“assign to”) and negative (“do not assign to”); (*) Study Section or Special Emphasis Panel Requests, both positive and negative; (*) List of potential reviewers in conflict, and why; (*) List of scientific expertise needed to review the application; The form is optional, and use of the form does not require completion of all fields in the form. For example, an applicant may wish only to request a specific awarding component or study section assignment and leave the other fields on the form blank; The PHS Assignment Request Form complements the Cover Letter Attachment on the SF 424 (R&R) form. Although NIH will no longer check the Cover Letter Attachment for requests pertinent to the assignment and review of applications, the Cover Letter Attachment still may be used to communicate a variety of other issues, as specified in application guides (e.g., reason for late submission);

NIH & AHRQ Change Font Guidelines for Applications to Due Dates On or After May 25, 2016

Sponsor: National Institutes of Health; Agency for Healthcare Research and Quality;
Inclusion of Children in Clinical Research: Change in NIH Definition

**Sponsor:** National Institutes of Health;  
**Deadline(s):** NA Release Date: 10/13/2015;  
**Contact:** Please direct all inquiries to: NIH Inclusion Policy Officer; Office of Extramural Research (OER); Telephone: 301-435-7124; Email: inclusion@od.nih.gov;  
**Link(s):** http://grants.nih.gov/grants/guide/notice-files/NH-009.html;

**Additional Information:** This notice informs the biomedical and health services research communities of additional flexibility regarding the fonts used in PDF attachments included in grant applications; For applications submitted for due dates on or after May 25, 2016, the following new guidelines apply: Text in PDF attachments must follow these minimum requirements:

- (*) Font size: must be 11 points or larger (smaller text in figures, graphs, diagrams and charts is acceptable as long as it is legible when the page is viewed at 100%);
- (*) Type density: must be no more than 15 characters per linear inch (including characters and spaces);
- (*) Line spacing: must be no more than six lines per vertical inch;
- (*) Text Color: must be black (color text in figures, graphs, diagrams, charts, tables, footnotes and headings is acceptable as long as it is legible); Since some PDF converters may reduce font size, it is important to confirm that the final PDF document complies with the font requirements; The following fonts are recommended, although other fonts (both serif and non-serif) are acceptable if they meet the above requirements: (*) Arial; (*) Garamond; (*) Georgia; (*) Helvetica; (*) Palatino Linotype; (*) Times New Roman; (*) Verdana; Legibility is of paramount importance. Applications that include PDF attachments that do not conform to the minimum requirements listed above may be withdrawn from consideration;

**Inclusion of Children in Clinical Research: Change in NIH Definition:**

- Applicants / offerors, peer reviewers, grantees/contractors about a change related to the NIH policy on the inclusion of children in clinical research. NIH’s long-standing policy has been that children must be included in all human subjects’ research, conducted or supported by the NIH, unless there are scientific and ethical reasons not to include them. The policy was developed because medical treatments applied to children are often based upon testing done only in adults, and scientifically evaluated treatments are less available to children due to barriers to their inclusion in research studies. Therefore, applicants / offerors conducting human subjects’ research must include a description of plans for including children. If children (or a subset of children) will be excluded from the research, the application or proposal must present an acceptable justification;  
- **What's Changing:** Starting with applications/proposals submitted for due dates on or after January 25, 2016, for the purposes of inclusion policy, the age of a child will be defined as individuals under 18 years old instead of under 21 years old, the current NIH definition of a child for inclusion policy considerations. Applicants / offerors for NIH funding will still be expected to justify the age range of the proposed participants in their clinical research, with particular attention paid to addressing the inclusion (or exclusion) of children (or subsets of children). However, now that threshold applies to individuals under the age of 18 rather than under the age of 21.;
- **Reason for Change:** Consideration of children as a vulnerable population for human protections from research risk and the NIH child inclusion policy are often conflated. While these are distinct policies, many think of children as under 18 years of age, typically the age of consent. This has sometimes led to confusion on the part of applicants/offerors, peer reviewers, grantees/contractors, and even NIH staff about how to ensure compliance with the child inclusion policy. By aligning the NIH definition for the age of a child with the typical age of consent and the common perception of the age of adulthood, the NIH can continue to implement this policy in a manner that focuses on the group of children that need particular attention.; The NIH recognizes that development continues well beyond 18 (and even 21, the current age); however, there is particular concern about ensuring the appropriate inclusion of individuals under 18 while also safeguarding this vulnerable group. NIH policies on inclusion are aimed at ensuring that appropriate individuals are included in clinical research and clinical trials. Results need to be generalizable to individuals that comprise the population under study. This includes consideration of age as a factor in the scientific design; For more information on the child inclusion policy: [https://grants.nih.gov/grants/funding/children/children.htm](https://grants.nih.gov/grants/funding/children/children.htm);

**Additional Information:** This notice informs the biomedical research community of updates to application instructions and review language intended to enhance the reproducibility of research findings through increased scientific rigor and transparency. These updates will take effect for most Career Development Award applications submitted for due dates on or after January 25, 2016. For research contracts, this policy will be effective for proposals received on/after January 25, 2016 and expected to result in contract awards in Fiscal Year 2017 and beyond.; Updates include: (*) Revisions to application guide instructions for preparing your research strategy attachment; (*) Use of a new “Authentication of Key Biological and/or Chemical Resources” attachment; (*) Additional rigor and transparency questions reviewers will be asked to consider when reviewing applications; These updates focus on four areas deemed important for enhancing rigor and transparency: (1) the scientific premise forming the basis of the proposed research; (2) rigorous experimental design for robust and unbiased results; (3) consideration of relevant biological variables, and; (4) authentication of key biological and/or chemical resources.; The basic principles of rigor and transparency and the four areas of focus apply to the full spectrum of research, from basic to clinical. Investigators will need to consider how all four areas apply to their proposed research. Likewise, reviewers will assess whether these areas have been appropriately addressed by the applicant through revised language defining the peer review criteria.;

**Notes & Exceptions:** (*) Career Development Award activity codes excluded from this policy include K02, K05, and K24, as candidates for these awards are expected to have independent, peer reviewed research support at the time the career award is made.; (*) Refer to NOT-OD-16-011 for updates to Research grant application instructions and review language.; (*) Fellowship and Training grant applications submitted for the May 25, 2016 due date and beyond will include new instructions and review criteria to address this policy. Details on these changes will be available by December 2015.;

NIH Releases Protocol Template for Behavioral and Social Sciences Research Involving Humans

Sponsor: National Institutes of Health

Deadline(s): 03/26/2019 (Release Date)

Contact: Please direct all inquiries to: NIH Office of Science Policy SciencePolicy@od.nih.gov

Additional Information: Purpose: The National Institutes of Health (NIH) has released a clinical trial protocol template with instructional and example text for NIH funded investigators to use in writing protocols for behavioral and social sciences clinical trials. This template was developed in response to changes in NIH policies that expanded the requirements associated with clinical trials beyond FDA-regulated clinical trials to those studies including behavioral or social interventions. Use of the template is recommended, but not required.

Additional Information: Dear Colleagues, By now, many of you have learned that a New York Presbyterian physician, Dr. Craig Spencer, who recently returned from treating patients in Guinea, has tested positive for Ebola. I ask you all to keep Dr. Spencer, who is a 2013 Mailman School graduate, in your thoughts, and to acknowledge that the extraordinary efforts of our alumni, current students, and faculty continue to play a critical role in the containment, treatment, and understanding of this outbreak. ; At a moment of global distress, public health knowledge is vital. It is important to recognize that this crisis will continue, and that all available scientific information suggests the risk of transmission here is extremely low.; Dr. Spencer’s commitment is among many noteworthy scientific colleagues of us colleagues passing seamlessly from science to service. As we move through this global crisis, we must all take pride in that commitment.; Sincerely, Linda; Linda P. Fried, MD, MPH; Dean and DeLamar Professor of Public Health; Mailman School of Public Health; Senior Vice President; Columbia University Medical Center; Professor of Epidemiology and Medicine;

EBOLA and ZOONOTIC DISEASE

Message from President Bollinger relative to Ebola;
Sponsor: Columbia University;
Deadline(s): NA
Contact: If you or anyone has any concerns, please visit the University’s Ebola Preparedness site or the New York City Department of Health Ebola update page. You may also contact Student Health Services at 212-854-2284 or Workforce Health and Safety for Faculty/Staff with Hospital Responsibilities at 212-305-7590.;
Link(s): If you or anyone has any concerns, please visit the University’s Ebola Preparedness site or the New York City Department of Health Ebola update page.;
Additional Information: Dear fellow members of the Columbia community: As you may have seen in the media, Dr. Craig Spencer is being treated for Ebola at Bellevue Hospital in Manhattan. Dr. Spencer, an emergency department physician at NewYork-Presbyterian/Columbia University Medical Center, recently returned from a humanitarian mission with Doctors Without Borders to one of the outbreak areas in Western Africa. We admire and appreciate all of those willing to do this vital and selfless public health work around the globe.; It’s critical to bear in mind what our public health and infectious disease experts have emphasized – that the risk to people in New York City and at Columbia remains extremely low. If you or anyone has any concerns, please visit the University’s Ebola Preparedness site or the New York City Department of Health Ebola update page. You may also contact Student Health Services at 212-854-2284 or Workforce Health and Safety for Faculty/Staff with Hospital Responsibilities at 212-305-7590.; We must keep Dr. Spencer in our thoughts and wish him a full and speedy recovery, as we do the vulnerable populations he serves. We will also continue to keep the Columbia community informed as we learn more from City, State, and Federal health officials.; Sincerely, Lee C. Bollinger;

CLARIFICATION - RE: 3rd Reminder-eRA Commons IDs and Complete Profiles Required for Students and Postdocs; The requirement for NIH eRA Commons IDs, as per notice NOT-OD-13-097;

Sponsor: NIH;

Deadline(s): Starting in October 2014;

Contact: Scientific/Research Contact(s); Faye Chen, Ph.D.; National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS); Telephone: 301-594-5055; Email: chenf1@mail.nih.gov

Link(s): NOT-OD-13-097;
http://spa.columbia.edu/;

Additional Information: This is to clarify the requirement for NIH eRA Commons IDs, as per notice NOT-OD-13-097. The Commons IDs, and complete Personal Profiles, are required for postdocs, graduate and undergraduate students when: (*) They have participated at least one person month on an NIH award, regardless if they were paid from the grant; and (*) Their participation is required to be included in Participants Section (D.1) in the Research Performance Progress Report (RPPR) – (*) note some select NIH grant mechanisms may be exempt from reporting in this section. (*) The RPPR Instruction Guide contains Supplemental Instructions for Specific Grant Types (such as training awards and multi-project awards), which can be found at: http://grants.nih.gov/grants/rppr/rppr_instruction_guide.pdf; TIP – when preparing your RPPR, click “Check for Errors” prior to routing the report to your SPA Project Officer. You will be alerted of missing eRA Commons IDs and incomplete profiles. This is the best time to contact SPA-eBiz to request IDs, or to alert individuals to complete their Commons profiles.; If you are requesting an eRA Commons ID from SPA-eBiz@columbia.edu, please include the following information with your request: (*) Full Name; (*) UNI; (*) Email address; (*) Campus (Morningside or CUMC); SPA-eBiz will work with you to determine the appropriate eRA Commons role.; Please feel free to ask me, or your assigned SPA Project Officer, any questions. Thank you for
your patience!; Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

Additional Information: As we get closer to October 2014, I wanted to remind investigators and administrators of the new NIH progress reporting requirement regarding eRA Commons IDs. Postdocs, graduate and undergraduate students supported on NIH awards must have eRA Commons IDs, with complete eRA Commons Personal Profiles. Beginning with NIH progress reports due October 2014, NIH will not accept progress reports that have missing eRA Commons IDs and incomplete profiles. As you are aware, if NIH rejects a progress report, that could delay issuance of the next year’s funding; Complete eRA Commons profiles are just as important as the ID itself. NIH can reject the progress report if the following fields are not complete in the profiles; date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Tutorials on the eRA Commons Personal Profile can be found at eRA Commons Manage Personal Profile.; If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu.; Finally, the Research Performance Progress Report (RPPR) format will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rppr/.; Please share this information with your students and postdocs who are supported on NIH grants. If you have any questions, you may contact me, or your assigned SPA Project Officer.; Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

Link(s): NOT-OD-13-097; NOT-OD-14-092; http://grants.nih.gov/grants/rppr;

Additional Information: This is a reminder that beginning October 2014, Research Performance Progress Reports (RPPRs) lacking an eRA Commons ID for graduate and undergraduate students will receive an error and the RPPR will not be accepted by the NIH without this information. RPPRs that are not accepted could delay issuance of Notice of Grant Awards. See full NIH notice at NOT-OD-13-097. Currently, warnings appear in the eRA Commons screens to alert individuals identified as undergraduate students, graduate students, and postdoctoral researchers that the following fields should be completed in their eRA Commons profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Beginning on October 1, 2014, those fields in the eRA Commons screens will be required for individuals identified in any of those three roles. If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu. In addition, graduate and undergraduate students, and postdoctoral researchers should complete their Personal Profiles in the eRA Commons, ensuring all fields listed above are complete. Tutorials on the Personal Profile can be found at eRA Commons Manage Personal Profile.; RPPRs will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). Additional Information: NIH: The View From 10,000 Feet; Posted on July 24, 2014 by Sally Rockey; Here on the blog we discuss many different aspects of NIH's research program – policies, funding trends, workforce issues. A few weeks ago, while I was preparing to give the opening talk at the NIH Regional Seminar on Program
Funding and Grants Administration, I realized some Rock Talk readers might be interested in learning more about how these topics fit into the big picture of NIH. So, I asked my colleagues to tape this talk, "NIH: The View from 10,000 Feet", so I could share it with you on the blog.

Additional Information: Formula for Innovation: People + Ideas + Time; Posted on July 17, 2014 by Sally Rockey and Francis Collins; In these times of tight budgets and rapidly evolving science, we must consider new ways to invest biomedical research dollars to achieve maximum impact—to turn scientific discoveries into better health as swiftly as possible. We do this by thinking strategically about the areas of research that we support, as well as the process by which we fund that research. ... We often hear from investigators at all career stages that they spend a significant portion of their careers writing grant applications, consuming precious time that could otherwise be spent conducting research. .... Dear PIs and Administrators, If you are planning to prepare and submit an NIH multi-project application over the next several months, please let me know. Examples of multi-project grant mechanisms include, but are not limited to, P01, P30, P50, and U19. All multi-project Funding Opportunity Announcements (FOAs) now require proposals to be submitted electronically using ASSIST (Application Submission System and Interface for Submission Tracking). For a listing of all multi-project FOAs, go to http://grants.nih.gov/searchGuide/ComplexOnly.cfm. If you plan to submit a multi-project application in the coming months, please contact me and your SPA Project Officer and we will schedule a time to meet to provide you with training and guidance. Please feel free to contact me if you have any questions. Our website contains many ASSIST resources: http://spa.columbia.edu/electronic-systems/assist. Thank you.; Stephanie F. The Columbia University Medical Center IRB Office has a standing "IRB Consultation Hour". This service provides an opportunity for researchers to stop in at the IRB office and meet with an IRB professional to discuss regulatory, policy, and procedural questions. The sessions are scheduled for every Tuesday from 10 am to 11 am. No appointment is necessary. The IRB office is located at 154 Haven Avenue, 1st Floor. Attendees should sign in at the IRB receptionist desk, and will meet with IRB staff in the order of arrival. If situations warrant, individual consultations may be limited to 15 minutes. Important Note: If you have questions about a protocol that has already been submitted to the IRB, please contact the staff members who administer the IRB to which the protocol is assigned rather than bringing those questions to a Consultation Hours session. Staff contact information may be obtained on the IRB website: http://www.cumc.columbia.edu/dept/irb/
Researchers may also call in during these times, to the IRB main number, for consultation: 212.305.5883. Email: irboffice@columbia.edu;

**Additional Information:** Dear Colleagues: The Office of the Executive Vice President of Research (EVPR), including the Office of Postdoctoral Affairs, and the Graduate School of Arts and Sciences (GSAS) are pleased to announce the introduction of an individual development plan (IDP) program for National Institutes of Health (NIH)-funded graduate students and postdoctoral researchers (postdocs). An IDP consists of a self-assessment of skills, interests and values that guides the development of short and long term plans to achieve career goals. In 2012, the NIH published a task force report on the current state of the biomedical workforce which found, among other things, that universities need to better prepare biomedical graduate students and postdocs for a broad range of career opportunities beyond academia. As one of a number of initiatives designed to address the recommendations of the task force, the NIH issued a policy, released on July 23, 2013 and revised on August 4, 2014 (http://grants.nih.gov/grants/guide/notice-
that does not require, but strongly encourages recipients of NIH awards to develop and use IDPs for graduate students and postdocs supported by the NIH. In addition, the revised policy provides that, beginning on October 1, 2014, annual progress reports relating to NIH awards must include a description of whether or not the institution uses IDPs and how they are employed to help manage the training and career development of graduate students and postdocs associated with such awards. The University’s IDP program will begin later this month and will include seminars on topics relating to the development of an IDP. Optional workshops will assist participants in completing an IDP. Career panels and networking events will be held to offer opportunities for participants to learn more about potential career options and the skills and experiences needed to gain employment in a wide array of fields. Complete IDP program details, including registration information, can be found at https://www2.gsas.columbia.edu/idp. Faculty members should strongly encourage their NIH-funded graduate student and postdocs to register and participate in the IDP program. A description of the Columbia IDP program to be utilized in progress reports can be found at https://www2.gsas.columbia.edu/idp/node/3#summary. Please contact Rory Flinn (r2531@columbia.edu), Director of the Office of Postdoctoral Affairs, with any questions about the program.

Sincerely,
G. Michael Purdy; Executive Vice President;
Carlos J. Alonso; Dean, Graduate School of Arts and Sciences;
Arthur G. Palmer III; Associate Dean for Graduate Affairs; College of Physicians & Surgeons;

NEW ITEMS FROM THE NIH

NIH-Investigators Reminder for NIH-Investigators: eRA Commons IDs and Complete Profiles;
Sponsor: NIH eRA Commons IDs and Complete Profiles;
Deadline(s): Starting in October 2014;
Contact: Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Ph: 212-854-0606; CUMC Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu/;
Link(s): eRA Commons Manage Personal Profile;
http://era.nih.gov/reg_accounts/manage_personal_profile.cfm;
Additional Information: Complete Profiles Required for Students and Postdocs; As we get closer to October 2014, I wanted to remind investigators and administrators of the new NIH progress reporting requirement regarding eRA Commons IDs. Postdocs, graduate and undergraduate students supported on NIH awards must have eRA Commons IDs, with complete eRA Commons Personal Profiles. Beginning with NIH progress reports due October 2014, NIH will not accept progress reports that have missing eRA Commons IDs and incomplete profiles. As you are aware, if NIH rejects a progress report, that could delay issuance of the next year’s funding. Complete eRA Commons profiles are just as important as the ID itself. NIH can reject the progress report if the following fields are not complete in the profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have "I Do Not Wish to Provide" as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. NIH-Investigators FW: NIH eSubmission Items of Interest – Sponsor: NIH
Deadline(s): June 4, 2014
From Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); "NIH eSubmission Items of Interest" (June 4, 2014) (see below). In particular, it addresses the new Biosketch Pilot program, tips on using non-standard characters in form fields, and the cover letter attachment.

Don’t Forget the eSubmission Basics: I had the privilege of spending some time last week with the eRA Commons Help Desk and posed the question - “If you could tell the applicant community one thing about application submission what would it be?” I was a bit surprised to hear the same key messages that we have been pushing for years. On the other hand, that’s why we consider them ‘the eSubmission basics’.

So, here’s a quick reminder...

- Check your entire assembled application image in eRA Commons. If you can’t view it, we can’t review it!
- If federal system issues threaten your on-time submission you need to notify the help desk and follow the Guidelines for Applicants Experiencing System Issues.

Impact of Biosketch Pilot on Non-pilot Applications: Did you see in the NIH Guide (NOT-OD-14-091) or in Rock Talk (Changes to the Biosketch) that NIH is piloting a new biosketch format? The pilot directly impacts applicants applying to a few Funding Opportunity Announcements (FOAs) (e.g., RFA-NR-15-001), but there is an immediate indirect impact to all applicants as well. In order to accommodate the pilot applications, eRA has changed the way we systematically validate the biosketch page limit for all applications. Specifically, a warning will fire if you submit a 5-page biosketch and an error will fire if your biosketch is over 5 pages. Applicants to pilot FOAs can ignore the 5-page warning, but everyone else should take action or risk post-submission rejection of their applications. After your application moves forward to NIH staff, we will do a manual check of the biosketches in applications to FOAs not participating in the pilot. If your non-pilot FOA requires 4 pages, but you included 5 and ignored the warning, then your application may not be reviewed. Applicants must read and follow all FOA and application guide instructions – even those that aren’t enforced by electronic systems.

Non-standard Characters in Form Fields: Although NIH systems now support a broader character set including Greek and other non-standard characters, Grants.gov systems currently do not. When completing application form fields type content directly from your keyboard. Avoid cutting and pasting from Word and other word processors- they often convert your plain text to rich text (e.g. Word converts quotes to ‘smart quotes’ that curve towards the text between them and combines two dashes into one long em-dash.) Also, keep your text as simple as possible. The following characters are typically ‘safe’: letters, numbers, spaces, underscores, periods, dashes (not em-dashes), quotes (not smart quotes), parentheses, brackets, ampersands, tilde, exclamation points, commas, colons, semicolons, at signs, number signs, dollar signs, percent signs, plus signs, equal signs, and asterisks. Limit your use of fancier characters to the body of your PDF attachments.

Submitting Applications with more than 5 Budget Periods: Although NIH typically allows only 5 budget periods to be submitted with grant applications, from time to time you will come across a FOA that allows more than 5 budget periods. Most NIH FOAs include the R&R Budget form which only accommodates data collection for 5 budget periods leaving applicants wondering what to do with the rest of the data. Applicants have been forced to use a rather clunky ‘workaround’ that includes adding the additional budget period information in the budget justification. eRA has just added system support for...
Grants.gov’s R&R Budget 10YR form that will allow for the collection of up to 10 budget periods of data. Going forward, this form will be included with the few, special FOAs that allow more than 5 budget periods. The bulk of NIH FOAs will continue to use the standard R&R Budget form.

**Transition to FORMS-C To Complete in August:** If it seems like I’ve been talking about transitioning to FORMS-C for a year – I have. On May 30, 2013, we announced our first transition to updated application forms (FORMS-C) for application due dates on/after September 25, 2013 (NOT-OD-13-074). The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs are our last remaining programs to use the older forms. These programs are scheduled to transition to FORMS-C for due dates on/after August 5, 2014 (NOT-OD-14-089) marking the end of a rather lengthy transition. Believe it or not, this summer my friends in policy will start pulling together requirements for the next OMB clearance of the PHS (agency-specific) forms used in our applications (they expire in August 2015). Before you know it we’ll be talking about ‘FORMS-D’ forms. For now, let’s celebrate getting through this one. Woo-hoo!

**CYA: Cover Your Application** - that’s what I thought I was talking about – right? NIH form packages no longer use a separate, agency-specific PHS Cover Letter form. The version of the SF424 (R&R) cover form included in FORMS-C packages has a new Cover Letter Attachment (item #21 at the very bottom of the form). If you plan to include a cover letter with your application – use this Cover Letter Attachment only! The eRA systems know to keep this attachment separate from your assembled application image and to limit access to it. If you attach it someplace else (e.g., Pre-application attachment on the SF424 (R&R) cover form, Other Attachments on the R&R Other Project Information form) it will become part of your assembled application image and will be visible to everyone with access to your application including reviewers.

RPPR Required for Non-SNAP Progress Reports Beginning October 17, 2014

NIH currently requires use of the fed-wide reporting format — known as the RPPR (Research Performance Progress Report) — to submit progress reports for Streamlined Non-competitive Award Process (SNAP), fellowship, and multi-year funded awards. In April we opened the RPPR for use for all Type 5 Non-SNAP progress reports in anticipation of an October 2014 requirement for RPPR use. Now, it’s official — all type 5 non-SNAP progress reports submitted on or after October 17, 2014 need to be submitted through the RPPR module of eRA Commons. .... Continue reading →

Promoting Research Integrity: Building the Foundation of Trust
Exemplifying and promoting the highest level of scientific integrity, public accountability, and social responsibility in the conduct of science are among NIH’s main goals as an agency. Research integrity is not about being flawless. It is about conducting science using honest and verifiable methods, complying with rules and regulations and adhering to professional standards. Ultimately, it is also about trust, the foundation upon which the scientific research enterprise is built. We’ve recently updated our website on research integrity, .... Continue reading →

New Website for iEdison Invention Reporting Information:

You Ask, We Answer:

Can I Resubmit My Grant Application While It Is Under Appeal of the Initial Peer Review Results?

What is the Deadline for Resubmitting my Unfunded Application?

NIH REVISED SUBMISSION RULES

NIH & AHRQ just released more clarifications on the new resubmission policy. In this announcement are clarifications on due dates, applicability, time limits, and the various options PIs have. See NOT-OD-14-082: http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-082.html: I know this revised policy is important to you and has many implications. Please feel free to me or your assigned Project Officer questions. I am following up with additional information on the important announcement I sent last week regarding NIH and AHRQ’s new resubmission policy (see below). NIH just posted extensive FAQs describing various scenarios when you may submit applications as ‘new’ that were previously submitted, resubmitted and not funded (including competing renewal applications that were not funded). Refer to the following resources and articles: FAQs: http://grants.nih.gov/grants/policy/resubmission_q&a.htm; The policy announcement: NOT-OD-14-074: A Change in Our Resubmission Policy – Rock Talk article explaining the reasons for the change; NIH Policy on Resubmission Applications; Science Magazine article: NIH to Relax ‘Two Strikes’ Grant Submission Policy; Deciding whether to submit an application as a resubmission or as a new submission can sometimes be complex. You may need to speak with an NIH Program Officer or Program Director regarding your specific situation. Please feel free to ask me, or your SPA Project Officer, questions as they arise. Please read full announcement, NOT-OD-14-074 at http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-074.html Effective immediately, for NIH and AHRQ applications due after April 16, 2014, following an unsuccessful resubmission (A1) application, applicants may submit the same idea as a new (A0) application for the next appropriate due date. The NIH and AHRQ will not assess the similarity of the science in the new (A0) application to any previously reviewed submission when accepting an application for review. Although a new (A0) application does not allow an introduction or responses to the previous reviews, the NIH and AHRQ encourage applicants to refine and strengthen all application submissions. Please read the full announcement for more details on the background of this policy change and the policy details. The NIH time limit for accepting resubmission (A1) applications remains in effect, as does the policy for New Investigator R01 resubmission deadlines. Stephanie F. Scott, M.S., CRA

Additional Information for the two above mentioned announcements: This Notice alerts grantees to a change in the implementation timeline, previously announced in NOT-OD-13-120 and NOT-OD-14-093, for the NIH transition to new U.S. Department of Health and Human Services (HHS) payment policies for domestic, non-competing continuation awards and use of Payment Management System (PMS) subaccounts. It also announces a change in how competitive revisions/administrative supplements (Type-3s) awards will be processed. This Notice only applies to domestic non-competing continuation awards that have not yet transitioned to PMS subaccounts. In response to critical feedback from the grantee community, NIH requested an amendment to its subaccount implementation plan to delay the transition of domestic, non-competing continuation awards to PMS subaccounts for an additional year; e.g., now beginning October 1, 2015. HHS’s Office of the Assistant Secretary for Financial Resources recently approved the request. This additional time is provided to allow grantees to prepare their systems to accommodate the changes. Grantee with inadequate systems in place to appropriately manage this transition by October 1, 2015, may be unable to appropriately access PMS accounts and risk losing their ability to draw down funding. Grantees are advised that there will be no additional implementation delays considered and no exceptions granted to the deadline. As of October 1, 2015, NIH will utilize only subaccounts for awarding grant funds. Every grant that is awarded funding in FY 2016 (whether it be in the first, second, third or fourth quarter of FY 2016) will be in a subaccount. NIH will continue transitioning payment of grant awards with new document numbers to domestic institutions to PMS subaccounts in FY 2015 as announced in Notice NOT-OD-13-120. The administrative changes announced in NOT-OD-14-093 will now apply to the transition that will occur between October 1, 2015 and September 30, 2016. This Notice reiterates those administrative changes for non-competing continuation awards and highlights the revised implementation timelines and T-3 award process for all domestic awards. - See more at: http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-103.html#shash.0i3doSVZ.dpuf; http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-103.html#shash.q3dTkMY2.dpuf;

**FEDERAL FUNDING TRAVEL POLICY**

**NIH-Investigators New Policy on Fly America Act:** Sponsored Projects Administration (SPA) and the Accounts Payable (AP) department is happy to announce the release of an updated version of the Fly America Act policy, effective immediately. SPA and AP have partnered together on this effort, resulting in a clearer, more comprehensive policy to ensure compliance with the Fly America Act. You can find the full policy in the Administrative Policy Library at: [http://policylibrary.columbia.edu/fly-america-act](http://policylibrary.columbia.edu/fly-america-act). This link contains:  
* Full policy text, including links to resources;  
* FAQs;  
* A Decision Tree Diagram;  
* A new form, the Fly America Exception Checklist;  
These resources can also be found on the SPA website at: [http://spa.columbia.edu/policies/us-flag-carrier-policy/](http://spa.columbia.edu/policies/us-flag-carrier-policy/).

The Fly America Act is a Federal regulation that states that any foreign air travel that is financed by Federal funds must be booked on U.S. Flag Air Carriers, regardless of cost or convenience. Only Federally funded sponsored projects are subject to this policy. The Fly America Act is not a new policy. Rather, our offices updated our existing policies, which now live in a central location in the Policy Library. There are specific exceptions to the Fly America Act that allow travelers to use Federal funds on foreign carriers, but only under certain circumstances. These exceptions can be quite complex to interpret. Therefore, our offices created a Fly America Exception Checklist and Decision Tree Diagram to assist travelers when booking flights internationally as part of the work to be done on a Federal sponsored project. In cases of exceptions, the Fly America Exception Checklist Form will need to accompany the Columbia Travel & Business Expense Report (TBER) to be submitted to AP. Appropriate back-up documentation should accompany the Checklist. The full policy and FAQs outline this process.

Anyone planning to travel internationally as part of work to be done on a Federally sponsored project is responsible for knowing and adhering to this policy. Please share this information with all faculty, administrators, postdocs and students who may be traveling internationally.

When questions arise that are related to the Fly America Act (for example, what is allowable vs. unallowable, Open Skies Agreement exceptions, etc.) you may contact your SPA Project Officer or myself. However, if you have specific questions about reimbursement of travel expenses or regarding your supporting travel documentation, you should contact AP through the Finance Service Center or call 212-854-2122. Thank you.

Thank you, Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects; Administration (SPA); CUMC
