<tr>
<td></td>
<td>CDMRP continues to be concerned about the impacts of COVID-19 on Service Members and the public. We are aware of the challenges it poses and are tracking some of the impacts to current awardees and ongoing research. While not every program will have financial resources available to assist, awareness of any significant unresolved issues affecting current research awards is important; The intent of this notice is to remind recipients of the requirements in 32 CFR Part 1134, Subpart E Other Reporting. This provision specifies the requirement for recipients to disclose significant developments as soon as they become known. These include problems, delays, or adverse conditions that will materially impair your ability to meet the objectives of your awards; Disclosures of significant developments may be made on your next interim performance report or at any point between scheduled performance reporting dates by contacting the Science Officer or Grant Specialist assigned to your award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation</td>

Additional Information: Dear Colleagues, During last month’s School Assembly, I was delighted to share that as part of Columbia Mailman’s Centennial, that we would soon be accepting applications for our Centennial Grand Challenges. The purpose of the Grand Challenges RFA is to spur the needed interdisciplinary team development and discovery to tackle some of the most critical public health challenges of this century. After consultation with faculty and members of the school community, we have identified these specific areas of focus as priorities: [1] Growing health inequities with high rates of obesity and chronic disease; [2] The health impacts of climate change; [3] Aging populations and longer lives that could be healthy but are not; [4] The inadequacy of food systems; [5] The global mental health crisis; [6] The likelihood of increased rates of future pandemics; I am pleased to announce that the website for our Centennial Grand Challenges has launched, and we are now accepting applications to this RFA. We are cognizant that our faculty may identify challenges not noted and we are therefore not limiting the call to these topics. I hope you will take advantage of this opportunity for the Centennial Grand Challenges RFA. All full-time faculty holding primary appointments in one of the School’s Departments or Centers are eligible. The extended deadline is 5 p.m. on Friday, February 25, 2022. To apply, please complete this downloadable form, word document. Applications and all supporting documentation should be forwarded to Craig Kandell, Project Coordinator, ckk7@cumc.columbia.edu. We look forward to receiving your submissions.

[New Information Concerning E-Signatures for NIH Other Support]
https://cumc.co1.qualtrics.com/jfe/form/SV_9ssHTmIoOtgznsG [Administrators who need an account to DocuSign should continue to submit requests through the Qualtrics Form. The form can also be used to obtain accounts for faculty later on if we discover they need access]

Additional Information: As a reminder, effective January 25, 2022, PIs and other senior/key personnel must electronically sign the NIH Other Support form to certify the accuracy of the information provided, and adhere to Columbia University’s Electronic Signature Policy. A typed name is not an electronic signature and is not acceptable. Certification cannot be delegated to administrators or other staff. NIH will not accept wet signatures, or pictures of wet signatures. ; The University recommends using DocuSign to electronically sign the Other Support forms. DocuSign is cloud-based and automatically retains the originally signed documents. Both faculty and administrators can use DocuSign. ; CUIT is in the process of creating DocuSign accounts for PIs who have current active or pending NIH grants. Administrators who support faculty in creating and organizing Other Support forms and wish to have access to DocuSign will need to request an account. Please complete this Qualtrics form as soon as possible in order for CUIT to create an account. We only need the person’s name and UNI, and one person can complete forms for multiple individuals.; DocuSign training will be offered next week by CUIT and SPA, and will be recorded if you are unable to attend. A quick desktop reference guide and instructional video resources will also be forthcoming. Please register for the trainings by using a Columbia-affiliated email address here: Friday, January 21st, 2 - 3 pm ; [brought to our attention by] Stephanie F. **Additional Information:** NIH recently released new clarifications for the Other Support format pages and Biographical Sketches. Key clarifications include:

- Signatures are not required on the Other Support format pages until January 25, 2022, regardless of whether you use the old or new formats.
- Completed support from the last three years is no longer required in Other Support. Only include active and pending projects.
- Awardees must report significant changes in Other Support in RPPRs, such as a change in status of previously reported current or pending projects, or access to a new resource/in-kind contribution.
- Only unique, high-value materials and data received within the past three years, that are still in use, must be included as in-kind contributions in Other Support.
- Only current positions and scientific appointments are required in the Biosketch. Applicants may choose to include past appointments that they wish to highlight.
- Consulting agreements must be included in Other Support only when the PD/PI or other senior/key personnel will be conducting research as part of the consulting activities. Non-research consulting activities are not Other Support. Include estimates for the amount paid, rather than time and effort reflected in calendar months, for consulting that is disclosed in Other Support.

Rather than simply updating a previously submitted Other Support form, we strongly recommend that you create a new form from scratch, to ensure that you are able to implement all changes.

To assist you further, we created additional FAQs based on questions collected from researchers and administrators at Columbia University. They are meant to supplement NIH’s FAQs. In addition, we will be hosting monthly webinars to walk you through the forms. Stay tuned for a separate communication with the webinar schedule.

All questions should be directed to your SPA Project Officer. Below is a listing of applicable resources:

**Additional Information:** This announcement informs the research community of the creation of a central email inbox for inquiries related to changes to the biographical sketch and other support templates in response to the high volume of inquiries received.; Effective as of this announcement, please send inquiries related to changes to the biographical sketch and other support templates to nihosbiosketch@nih.gov.; NIH is diligently working to ensure complete and timely responses to inquiries received to date via existing email inboxes. The research community may elect to forward inquiries that are pending a response to the new central email inbox, as needed.; NIH encourages the research community to review the currently available resources related to this effort: Updated Biosketch resources, including FAQs and sample Biosketch format pages can be found here.; Additional resources, including training videos and other materials will be posted on the pages above as they become available.; Related Announcements: NOT-OD-21-110 - Implementation of Changes to the Biographical Sketch and Other Support Format Page; NOT-OD-21-073 - Upcoming Changes to the Biographical Sketch and Other Support Format Page for Due Dates on or after May 25,
2021; NOT-OD-19-114 - Reminders of NIH Policies on Other Support and on Policies related to Financial Conflicts of Interest and Foreign Components; It is important for all NIH applicants and awardees, including PIs, senior/key personnel, and grants administrators, to read it in its entirety.; The updated Biographical Sketch and Other Support format pages will be required for applications and Research Performance Progress Reports (RPPRs) submitted for due dates on or after May 25, 2021. It is advisable that you bookmark these pages: NIH Biosketch format pages and instructions and FAQs; NIH Other Support format pages and FAQs; Please note: PIs and senior/key personnel will be required to certify that their Other Support information is true, complete and accurate to the best of their knowledge.; Our office is in the process of reviewing the updated forms and instructions. We are scheduling webinars in the coming weeks to provide an overview of these changes. NIH is also planning to release additional resources and training materials in the coming weeks. If you are in the process of creating either a Biosketch or Other Support format page for applications and RPPRs due on or after May 25, 2021; Updated Biosketch resources, including FAQs and sample Biosketch format pages can be found here.; Updated Other Support resources, including FAQs and sample Other Support format pages can be found here.; One of the most important changes in the Biosketch instructions is Section B: “List in reverse chronological order all positions and scientific appointments both domestic and foreign, including affiliations with foreign entities or governments. This includes titled academic, professional, or institutional appointments whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary).”; This is critical. The senior/key personnel, and mentors for training grants, have to include all positions and appointments, not just select ones, or ones relevant to the proposal. It’s not just the heading of Section B that changed, it’s the instructions to Section B.; The changes as outlined in the announcement are as follows:

<table>
<thead>
<tr>
<th>Format Page</th>
<th>Changes</th>
</tr>

<tbody>
<tr>
<td>Biographical Sketch Format Page</td>
<td>Section B ‘Positions and Honors’ has been renamed ‘Positions, Scientific Appointments, and Honors’.</td>

Tow Doctoral Scholars Pilot Program 02/15/2022 (Faculty Nomination); 03/10/2022 (Application Deadline of Nominated Student Candidates)

Sponsor: Mailman, Tow Foundation
Deadline(s): 02/15/2022 (Faculty Nomination); 03/10/2022 (Application Deadline of Nominated Student Candidates)
Dear Colleagues,

We are reaching out to Columbia Mailman faculty and staff to request your help with finding potential candidates for the Tow Doctoral Scholars Pilot Program, a new, donor-funded pilot program. This program seeks to identify masters students who demonstrate the potential for success in a doctoral training program, but who have never been exposed to or considered the possibility of going on for a doctoral degree. The program identifies such potential students and will provide support for faculty mentorship and sponsorship to support achieving these goals, along with paid research experiences, training, alumni mentorship, and other enrichment, as well as potential funding for PhD studies at Columbia Mailman if admitted. Again, the goal is to identify and sponsor a small group of students who have previously experienced barriers to access to higher education or otherwise may not have considered doctoral education a possibility for them.; In order to participate in the program, students must be nominated by a faculty member. Students should meet the following criteria: Master's students, from any program or department, currently enrolled at Columbia Mailman; Have the potential to be admitted, and to succeed, in PhD studies in public health at Columbia Mailman; Have experienced barriers to accessing higher education or, because of their backgrounds, have not considered such a career pathway an option for themselves, and have not expressed a prior plan to pursue doctoral study; Nominations are due by Feb. 15, 2022.; For staff, if you know a student who could be a good match for the program, please reach out to the student’s faculty advisor and/or your department chair to request them to nominate the student.; For faculty, to nominate a student, please email Heather Krasna at hk2778@cumc.columbia.edu with the following information: Name of the student; Student's email address or UNI; Between one and three paragraphs explaining your experience working with the student and/or why you are nominating the student.; Students who are nominated will be asked to submit an application by March 10, 2022. A selection committee with representation from each academic department will identify candidates by March 25. By mid-April, selected students will be matched to a research-focused summer practicum experience and assigned to a faculty and alumni mentor, with the goal of building their research experience to bolster their PhD applications for Columbia Mailman by Dec. 2022, with expected enrollment in Fall 2023.; Thank you so much for your valuable assistance with this program.; With warm regards, Linda P. Fried, MD, MPH (she/her); Dean and DeLamar Professor of Public Health; Mailman School of Public Health; Senior Vice President; Columbia University Medical Center; Professor of Epidemiology and Medicine

Additional Information: COVID-19 Updates for the Research Community: January 3, 2022; Dear Members of the Research Community, We write to highlight key COVID-19 updates for the research community: First, as stated in the Provost’s (Update on the Start of the Spring Semester) December 22 message, faculty, researchers, staff, and students involved in research, administration and all other non-instructional activities should work remotely, if feasible, during the first two weeks of January. All in-person, indoor gatherings of any kind are prohibited during the first two weeks of January.; Second, research is not being paused or suspended at this time. However, to the extent feasible, research activities, including human subjects research, should be conducted virtually. Individual units and principal investigators may determine which team members are required to be in person versus remote. They should also take into account the needs and safety of research participants and study-specific requirements. As always when making such determinations, a precautionary approach is warranted and strongly
recommended.; Third, the Research page of the University's COVID-19 Resource Guide contains updated information specific to the research community. This page includes a new FAQ for principal investigators regarding steps to consider in the event that a team member tests positive for COVID-19; Finally, below are important reminders: [1] If you are eligible, get a vaccine booster as soon as possible. Upload documentation no later than January 31, 2022 (details on upload to follow); [2] Wear a properly-fitting face covering for all indoor activity on campus and outdoors in large gatherings; [3] Comply with University testing requirements, including new recommendations as of December 29, 2021. Those who are returning to campus will please note that: all faculty and staff that have traveled, have been away for a period of time, or have participated in social events and gatherings are strongly recommended to get a PCR test from a local testing site 48 hours prior to returning to University facilities. There is no need to provide proof of this test, unless it is positive.; [4] All visitors, including those who enter any campus facility for any period of time, must be vaccinated and show proof of vaccination as part of visitor attestation. This vaccination policy does not apply to individuals accessing a facility for research screening or research participation.; [5] For in-person human subject procedures, research participants must comply with these guidelines and complete an attestation before entering campus spaces. The attestation is available in English and Spanish. As noted above, the visitor vaccine requirement is not applicable to research participants.; [6] If you have COVID-19 symptoms or test positive for COVID-19, you must stay home and isolate as directed by your provider or contact tracing outreach. If you test positive, irrespective of location of the testing, please notify covidtesttrace@columbia.edu.; [7] Close contacts who are fully vaccinated do not have to quarantine and can continue to work in-person, but should test between 5-7 days of exposure/notification.; [8] The Research Ramp-up Ambassadors continue to be a resource for individuals with concerns about on-campus research activities. If you have questions, please feel free to send them to COVID19_research@columbia.edu.; As always, we thank you for your continued care and commitment to safety and to our research enterprise, and we look forward to a productive 2022.; Sincerely, Jeannette M. **Additional Information:** Dear fellow members of the Columbia community, We are writing to provide updates on our December messages regarding Columbia University COVID-19 policies and procedures. We are carefully monitoring the COVID-19 pandemic status in the New York City metro area and among our affiliates. While Columbia is doing its own asymptomatic testing on campus, we also urge you to report any outside positive test results you do receive to covidtesttrace@columbia.edu so that we have an accurate picture of COVID-19 positive cases amongst our affiliates and can provide you with information on available resources. As you are aware, the Omicron variant has been shown to be more transmissible than prior virus variants. However, there are reassuring data suggesting that this variant causes less severe illness and that our vaccines, and particularly once boosted, also protect against symptomatic and severe COVID-19. We have three important updates to share with you; Changes in isolation and quarantine guidelines: New York State, acting on guidance from the CDC, has modified isolation and quarantine as follows; Isolation: All individuals who test positive for COVID-19 can end their isolation after 5 days if they are asymptomatic. Day 0 is considered the first day of symptom onset and/or the day of a positive test result; Quarantine: Individuals who are fully vaccinated and have received booster dose, do not need to quarantine. Such individuals are recommended to get tested on day 5-7 after last exposure; Individuals who are not vaccinated or not fully vaccinated or are eligible for a booster but have not yet received one should quarantine for 5 days – where day 0 is the last day of exposure – provided symptoms do not appear. Such individuals are recommended to get tested on day 5-7; Full details can be found on the New York State Department of Health website; Changes in gathering/events and dining policies: In addition to the policies that were announced on December 20 and December 22, Columbia-related non-academic gatherings on and off campus are prohibited until the end of January; In all dining halls, only grab-and-go food will be available for the first week of the undergraduate return beginning January 18th; All affiliates are strongly urged to avoid indoor social gatherings wherever they are located, unless aware of vaccination and testing status of all attendees. Masking in these locations is also strongly recommended as well as in crowded outdoor social gatherings; Masking indoors at Columbia will continue through March 31, and we urge wearing of masks indoors in all public settings as well as in crowded settings when outdoors; Columbia athletic events will permit no fans for the first two weeks of January; Uploading vaccine and booster information: Next week, we will provide you with the links to be able to upload your booster information. New hires seeking to upload any vaccine (not booster) information may do so on our ReopenCU website; Students can currently upload their vaccine and booster information. For CUIMC students go here. For all other students, go here.; Sincerely, Donna Lynne; Senior Vice President and Chief Operating Officer, CUIMC; University COVID Director; Gerry Rosberg; Senior Executive Vice President

**Additional Information:** NHLBI Funded Training and Mentoring Summer Institute with Possibility for Seed Funding; My name is Jenna Noray and I am the Program Manager for the Program to Increase Diversity Among Individuals Engaged In Cardiovascular Health-Related Research (PRIDE-CVD). PRIDE-CVD is a research career advancing opportunity sponsored by the National Heart, Lung, and Blood Institute (NHLBI) since 2006 at the State University of New York Downstate Health Sciences University at Brooklyn, NY. This mentored research program addresses the difficulties experienced by junior investigators in establishing independent research programs and negotiating through the academic ranks. The desired outcome is to accelerate the path to become independent investigator and improve the recruitment and retention of faculty from disabled, disadvantaged, and underrepresented minority groups in the study of heart, lung, and blood disorders.; The Summer Institute program provides an intensive didactic and mentored research training program in cardiovascular health disparities, grantsmanship and career development skills. The goal of this multidisciplinary research training program is to inspire scholars...
to conduct research in cardiovascular health disparities by employing techniques at the forefront of the field. I am writing to you today on behalf of the PRIDE-CVD Director, Dr. Mohamed Boutjdir, to announce that our program is open for applications, and we are currently recruiting for Summer 2022’s Cohort 10 which begins on June 12th, 2022. I have attached our brochure which has more details about our program. I appreciate you sharing it with any of your Junior Faculty and colleagues.

I am happy to answer any questions you may have so, please do not hesitate to contact me;
Sincerely,

Additional Information: Please refer to the document linked here for the Draft NIH Chief Officer for Scientific Workforce Diversity Strategic Plan for FYs 2022 - 2026: https://diversity.nih.gov/sites/coswd/files/images/FY22-26COSWDStrategicPlan508Revised-2.pdf; The Chief Officer for Scientific Workforce Diversity team (hereafter COSWD) is structured within the National Institutes of Health (NIH), an operating division of the U.S. Department of Health and Human Services (HHS), and is part of the NIH Office of the Director. The COSWD reports directly to the NIH Director. The COSWD’s central organizational position aligns with its NIH-wide mission to be the agency’s thought leader in the science of scientific workforce diversity, using evidence-based approaches to catalyze cultures of inclusive excellence. As these cultures of inclusive excellence mature, the COSWD ultimately aims to enable NIH and NIH-funded institutions to benefit from a full range of talent, fostering creativity and innovation in science.

The purpose of the COSWD Strategic Plan for FYs 2022-2026 is to communicate how the COSWD will advance its mission to be the agency’s thought leader in the science of scientific workforce diversity, using evidence-based approaches to catalyze cultures of inclusive excellence.

**Additional Information:** Many different factors—biological, social, and environmental--affect human health. It is also increasingly recognized that interactions between these factors play a significant role in prevention, pathophysiology, and management of human disease. Sex/gender differences, being a member of a sexual and/or gender minority group, and race/ethnicity are among those factors with a significant impact on human health and disease. However, consideration of these factors in research projects remains limited.

Note: The F&A rate applied to an award is dependent on the award issue date of the Notice of Award (NOA), or the date when a contract or inbound subaward is fully executed. For a full explanation of how our F&A rates are to be applied, including definitions of “on-campus”, “modified off-campus”, and “off-campus”, see the Application of Facilities and Administrative Cost Rate policy. Different rates than those listed above may apply to projects not considered to be research activities. Please contact your SPA Project Officer to verify the nature of the work to be undertaken and the applicable rate. The rate agreement is available on the SPA website on the Institutional Information page. Any questions regarding the new rate agreement should be directed to AskRPIC@columbia.edu.

**Additional Information:** This Notice of Special Interest (NOSI) seeks to expand the breadth of scientific research on the clinical course, prevention and treatment of diseases within the mission of the National Heart, Lung, and Blood Institute (NHLBI) by leveraging ongoing clinical research studies through ancillary studies. The purpose of this NOSI is to invite research project applications to conduct focused ancillary studies to large ongoing clinical trials (including late-stage T4 implementation clinical trials), observational studies, and registries. This NOSI also serves as a replacement for NOT-HL-20-755 (expired as of November 6, 2021).

### 10th Annual Regeneron Prize for Creative Innovation; Deadline: 03/07/2022

[Each institution may nominate no more than two (2) PhD students and two (2) postdoctoral fellows; it is anticipated that CU/Limited Submissions will soon provide stipulations and a deadline relative to an internal Columbia Limited Submission avenue]

**Sponsor:** Regeneron, (and anticipated, a CU/Limited Submissions avenue)

**Deadline(s):** TDB (we anticipate an internal Limited Submissions posting with Deadline); 03/07/2022 (Sponsor Deadline)

**Contact:** science.education@regeneron.com; (Sponsor Contact, Provided for Reference)

**Link(s):** [https://regeneron.avature.net/regnprize](https://regeneron.avature.net/regnprize)

**Mission:** To recognize and honor Excellence in Biomedical Science conducted by graduate students and postdoctoral fellows.

**Prize details:** One (1) graduate student and one (1) postdoctoral fellow are selected to receive the Regeneron Prize for Creative Innovation each year. Each winner receives a check for $50,000. Finalists are each awarded $5,000. In addition, the home institution of the winners will each receive a $5,000 donation to support the institution's seminar series. Approximately 8-10 applicants will be selected for finalist status. Finalists may be invited to visit Regeneron for the onsite competition, travel expenses paid.

**Nominations:** Each institution may nominate no more than two (2) PhD students and two (2) postdoctoral fellows. Each submission must include a signed institutional endorsement form, see attached. Applicants must prepare a description of their “dream” project and submit their full academic CV along with evidence of scholarly achievement; The “Dream” Project, see also description attached.

The research proposed must be within the field of biomedicine, broadly defined.; The proposal must be no more than two single-spaced pages (no smaller than 10-point font). References do not need to be included within the two-
page limit, but any figures, etc. should be. Note that preliminary data is not necessary.; The proposal should clearly define a specific experiment or series of experiments, and include a rationale, basic methodology/design (citing literature is fine), and discussion of how the experiment’s results would advance the field.; Complete applications will include the following: Full academic CV; Institutional endorsement form signed by applicant and institutional endorser; Dream Project (up to 2 pages not including references, no smaller than 10-point font); Publications as evidence of scholarly achievement; All applicants will be asked to certify that the “dream” project proposal submitted is their original idea and does not appear in any publication or grant application where they are not the principal investigator. Project proposals found to the contrary may be disqualified. Please also note that joint/team proposals are not eligible to be submitted for the Regeneron Prize. Regeneron reserves the right to not award a prize if the judges decide that no application meets the requirements or standards.; Nominees should submit their online applications through Avature.; Contact science.education@regeneron.com with questions. Deadline for submissions is Monday March 7th, 2022.

NIH Operates Under a Continuing Resolution

Sponsor: National Institutes of Health
Deadline(s): 12/15/2021 (Release Date)
Contact: Questions regarding adjustments applied to individual grant awards may be directed to the Grants Management Specialist identified in the Notice of Award.

Additional Information: The Department of Health and Human Services (HHS), including National Institutes of Health (NIH), operates under the Further Extending Government Funding Act (Public Law 117-70) signed by President Biden on December 3, 2021. This Act (CR) continues government operations through February 18, 2022 at the FY 2021 enacted level, with no reduction. Continuing the procedures identified under NOT-OD-21-058 and consistent with NIH practices during the CRs of FYs 2006 - 2021, NIH Institutes and/or Centers may, at their discretion, issue non-competitive research grant awards at a level below that indicated on the most recent Notice of Award. Upward adjustments to awarded levels will be considered after FY 2022 appropriations are enacted, but NIH expects institutions to monitor their expenditures carefully during this period. All legislative mandates that were in effect in FY 2021 (see NOT-OD-21-056) remain in effect under this CR, as well as the salary limitation set at Executive Level II of the Federal Pay Scale (see NOT-OD-21-057) and the Ruth L. Kirschstein National Research Service Award predoctoral and postdoctoral stipend levels and tuition/fees as described in NOT-OD-21-049.

Policy and Regulation on ClinicalTrials.gov Registration and Reporting | grants.nih.gov
Additional Information: Last week, the NIH implemented new system validations for Research Performance Progress Reports (RPPR) for clinical trial registration and results reporting. RPPRs that have associated clinical trials that are non-compliant with these requirements will receive errors preventing submission of the RPPR. See NOT-OD-22-008 for more details. As a reminder, failure to register or report results data for an Applicable Clinical Trial (ACT) as per FDAAA 801 and the Final Rule or the NIH Policy on the Dissemination of NIH-Funded Clinical Trial Information can result in immediate suspension or termination of funding, monetary civil penalties of up to $10,000 per day of non-compliance, criminal or civil prosecution, and/or a permanent notice of non-compliance publicly posted on the ClinicalTrials.gov record for a study; Of note, the FDA issued its first Notice of Noncompliance to an individual investigator conducting a trial sponsored by an academic institution. The Principal Investigator (PI) failed to submit required results data to ClinicalTrials.gov. As a result of this noncompliance, the ClinicalTrials.gov record for the study will be permanently marked with and searchable by the “FDAAA 801 Violations” field, even though results were posted a day after the Notice was issued.; The requirements for registration and results reporting are as follows: Applicable studies must be registered no later than 21 days after enrollment of the 1st participant (i.e., date of when the 1st participant signs a study consent form); Results information for applicable studies must be submitted to ClinicalTrials.gov no later than one year after primary completion date (with limited exceptions) for the primary outcome measure, and one year after the study completion date for all other outcome measures, including safety data.; If you require assistance with ClinicalTrials.gov registration or results reporting, please contact the University’s system administrators at ClinicalTrialsGov@columbia.edu, [brought to our attention by] Jane Cho, MS, MPH; Associate Director of Regulatory Science; Clinical Trials Office; Vagelos College of Physicians and Surgeons; Columbia University; E: jc2050@columbia.edu and Stephanie F. **Additional Information:** We are pleased to announce that the 2021 - 2022 cycle of the K Award Development Seminars will begin on Thursday, October 21st, 2021 and will run through Thursday, May 19th, 2022. Please distribute this email to those you feel may benefit from this seminar series. As of now, seminars will be held virtually on the 3rd Thursday of every month from 10:00 am-11:00 am (with the exception of the May seminar which will be Thursday, May 19th; 10:00 am – 11:30 am); These seminars are designed to assist research fellows and junior faculty with preparing their proposal for a K Award, but also to expose the application process to those who are interested in learning more. Each monthly seminar has a faculty presenter or panel and focuses on a component of the K Award application. One of the seminars is a mock review, where seminar participants volunteer to have their applications reviewed by faculty and the class experiences a simulated review committee meeting. Please note that we are expecting participants to commit to the full cycle by attending each monthly seminar and be willing to share interim drafts for constructive comments. We are asking participants to register by completing this survey form: https://www.surveymonkey.com/r/BDRTVBZ. Catherine Monk, PhD, Professor of Medical Psychology (in Psychiatry and Obstetrics and Gynecology), has joined me again this year in co-leading the seminar. If you have any questions, please feel free to email either of us; please distribute this email to those who might benefit from the seminars. Thank you! **Additional Information:** Apply for the 2022 RISE Competition; Dear Colleagues, We invite you to apply to the 2022 Research Initiatives in Science and Engineering (RISE) competition. Via a one to two year annual award of $80k, RISE seeds innovative, interdisciplinary, high-risk, and potentially high-impact research collaborations that are not ready to secure funding through conventional sources. All Columbia-employed, full-time researchers eligible to serve as Principal Investigators may apply for this internal seed funding opportunity, albeit with seven important restrictions and recommendations: PIs and Co-PIs currently funded by the RISE program may not submit applications; Applications must be fully collaborative and must include at least two Lead PIs. Applications from only one PI, or who name a Lead PI who is not a full-time Columbia faculty member, RISE will reject; At least one of the two PIs must be a researcher from a scientific, engineering, and/or medical discipline; Applications from PIs that span two or more schools and departments are strongly encouraged; Applications from PIs that have never previously collaborated are preferred; Proposed projects must not have received support from Columbia’s other seed funding programs; Multiple applications from the same PI are discouraged; **About RISE:** RISE supports projects that conventional funding sources perceive as too risky or unfamiliar. RISE provides up to $80,000 for one year – with potential for a second year of funding – to enable researchers to produce the preliminary data and establish an initial proof of concept before submitting the proposal to government agencies, private foundations, and/or for-profit companies. Therefore, you should not submit proposals currently suitable for submission to such conventional mechanisms to RISE. The most frequent reason reviewers reject RISE proposals is that they believe that the project appears ready for conventional review; Since its inception in 2004, the RISE competition has provided approximately $13.3 million in seed funding to 89 project teams. Consonant with the high risk/high reward objective of RISE, approximately half the projects fail to prove out. However, the half that succeed have subsequently won over $78 million in extramural grants or a nearly six-fold return to our research community; Last year’s 2021 competition received 37 applications. RISE advanced thirteen to the secondary stage of consideration, and awarded funding to six teams. 102 Columbia faculty participated as peer reviewers of the applications; **Other Internal Seed Funding Programs:** The RISE competition is one of multiple seed funding programs internal to Columbia University. Should the project you are conceptualizing not fit within RISE’s purview of early-stage, discovery research, we encourage you to review other internal programs, which are identified via my Office’s webpage: [https://research.columbia.edu/content/internal-seed-funding](https://research.columbia.edu/content/internal-seed-funding); **How to Apply:** To apply for the 2022 RISE competition, please submit your application via InfoReady by 5:00 p.m. EST on Monday, October 18th, 2020. Internal peer review committees composed of researchers across the University review all complete and eligible applications. All eligible applications will receive anonymized feedback relayed by the RISE administrator team.; We invite a small handful of the very strongest applications to submit a four-page Round 2 proposal by January 2022. RISE awards up to six teams from Round 2 by Spring 2022.; For more information pertaining to the RISE program, including a list of Frequently Asked Questions and past awarded teams, please visit the website at [www.columbia.edu/RISE](http://www.columbia.edu/RISE). You may also refer to the sample Evaluation Form that reviewers will use when evaluating applications, which is attached to this email; With questions about the RISE competition or how to design the strongest application, please email rise@columbia.edu.; Sincerely, Jeannette M. Wing; Executive Vice President for Research

**Additional Information:** All of Us Research Program; The Future of Health Begins With You; Now Available: All of Us Research Program Expands Dataset to Fuel New Discoveries; The National Institutes of Health’s All of Us Research Program has announced a significant increase in the COVID-19 data available in its precision medicine database, adding survey responses from more than 37,000 additional participants, and virus-related diagnosis and treatment data from the nearly 215,000 participant electronic health records (EHRs) that are currently available. The program has also expanded its collection of wearable data to now include 11,670 paired participant Fitbit records, a 42% increase from its last update, making this one of the largest publicly-available sets of digital health technology data available.; Researchers interested in exploring the data and conducting analyses can apply for access after their institutions have signed a data use agreement with the program. At this time, any U.S.-based academic, nonprofit, or health care organization can enter into a data use agreement with the program.; The program anticipates releasing the first set of genomic data in the next refresh, anticipated this winter.

Clarification and Guidance for Applicants Preparing Applications for the Fall 2021 Due Dates During the COVID-19 Pandemic

**Sponsor:** Office of the Director, NIH  
**Deadline(s):** 08/25/2021 (Release Date)  
**Contact:** NIH Review Policy Officer; ReviewPolicyOfficer@mail.nih.gov  
**Link(s):** [NOT-OD-21-180](https://grants.nih.gov/grants/guide/notice-files/NOT-OD-21-180.html)

**Additional Information:** Last week, NIH issued announcement NOT-OD-21-180, which provides additional guidance related to COVID-19 for applicants preparing applications for the May 2022 Council round, beginning with the September 25, 2021 due date for Spring 2022 initial peer review meetings. Please see text of the announcement below, especially highlighted section.

Purpose: The NIH remains firmly committed to supporting the biomedical research enterprise as the nation implements the President's Guidelines for Re-Opening America Again. The purpose of this Notice is to clarify the guidance provided earlier NOT-OD-21-026, for applicants preparing applications for the May 2022 Council round, beginning with the September 25, 2021 due date for Spring 2022 initial peer review meetings. Reviewers will continue to receive instructions to assume that constraints arising from the COVID-19 pandemic (e.g., lab occupancy restrictions, declines in patient accrual, etc.) will be resolved during the project period and thus should not affect their scores. Therefore, NIH grant applications should NOT include contingency or recovery plans for problems resulting from the COVID-19 pandemic. However, applicants may address effects due to the pandemic on productivity or other scoreable issues in their Personal Statement in the NIH Biosketch. Reviewers will be instructed to take these pandemic-related circumstances into account when assessing applicants' productivity and other score-driving factors. As with previous instructions, if needed, NIH staff will request and assess plans to resolve specific problems arising from the COVID-19 pandemic prior to funding. About the Fellowship: https://www.healthandagingpolicy.org/; Call for 2022-2023 HAPF Applicants Now Open!; Are you committed to improving health and aging?; Are you interested in learning about policymaking to increase your impact? ; If so, we invite you to apply to join the next class of Health and Aging Policy Fellows!; The 2020-2021 Health and Aging Policy Fellows at their Capstone in Washington, DC; As a Health and Aging Policy Fellow, you have the opportunity to join a dynamic community of 166 Fellows who are committed to improving health and quality of life for older Americans. ; The one-year Fellowship runs from October 1 – September 30 and has full-time and part-time tracks. It is conducted as a hybrid program of mentoring, networking, learning and practicum experiences. Health and Aging Policy Fellows work across diverse fields of aging. They develop lifelong partnerships and networks. Individually and collectively they are improving the lives of older adults around the country.; Click here to learn more about Fellows’ recent placement experiences and accomplishments. Apply here!; THE PROGRAM; The Health and Aging Policy Fellows Program aims to create a cadre of leaders who will serve as change agents in health and aging policy to ultimately improve the health care of older adults. The year-long fellowship offers a rich and unique training and enrichment program that is focused on current policy issues, communication skills development, and professional networking opportunities to provide Fellows with the experience and skills necessary to help affect policy.; PROGRAM TRACKS; The Residential track includes a year-long placement in Washington, DC or at a state agency. Residential Fellows are immersed full-time in a policy-focused placement that is determined in the initial phase of the fellowship. Placements may include working as a legislative assistant in Congress, as professional staff in executive agencies, or with “think tank” organizations, for example.; The Non-Residential track allows Fellows to remain at their home institutions and requires that they dedicate at least 20% of their time to a “virtual” placement and/or project with federal agencies, Congressional offices, or health and aging policy organizations. This may involve short periods of travel throughout the year to relevant sites. Non-residential Fellows may focus on a health policy project that is global, federal, state, city, or community-based.; The VA Track is a specific non-residential track for VA staff to represent the Department of Veterans Affairs as a VA/Health and Aging Policy Fellow. VA/Health and Aging Policy Fellow participate through the non-residential track of the fellowship.; Areas of focus include but are not limited to: Behavioral Health; Societal Aging and Age-Friendly Public Health; Global Health and Aging; Aging at the Federal, State, and/or Community Level;

IMPORTANT NOTE: Both residential and non-residential Fellows are required to attend the 6-week Orientation in Washington, DC at the beginning of their fellowship, from the end of October to the beginning of December. Nothing is scheduled during the week of Thanksgiving. Fellows are also brought together periodically over the course of the fellowship year for HAPF Program events.; WHO SHOULD APPLY?; The program has a broad interdisciplinary focus, and Fellowship cohorts have included physicians, nurses, social workers, psychologists, food scientists, city planners, healthcare administrators, epidemiologists, economists, and lawyers from academic and practice settings, spanning career stages from newly minted PhDs to senior professors and community leaders.; Apply here!; APPLICATION KEY DATES; Submission deadline: April 15, 2022; Notification of finalists to be interviewed: Mid-May; Interviews and selection of Fellows: Mid-June; Fellowship begins October 2022; Information Sessions for the 2022-2023 Fellowship Year; If you are interested in becoming a Health and Aging Policy Fellow and have questions, we are holding information sessions via Zoom on various dates between December 2021 and April 2022.; The schedule is as follows (in EST): Thursday, December 9, 2021 from 12–1 PM; Tuesday, December 14, 2021 from 3–4 PM; Tuesday, January 18, 2022 from 4–5 PM; *Wednesday, February 2, 2022 from 12–1 PM - With a focus on VA track;
Monday, March 7, 2022 from 12–1 PM; Monday, April 4, 2022 from 12–1 PM; RSVP to hapfell@nyspi.columbia.edu; For further questions, or to arrange a call with Dr. Harold Pincus or Dr. Kathleen Pike to discuss applicant eligibility or the application specifically, please contact the Program Coordinator at the above email address.

Additional Information: NIH-Wide Strategic Plan for FY 2021-2025 Now Available; We are pleased to announce that the NIH-Wide Strategic Plan for Fiscal Years (FYs) 2021-2025 is now available. This updated plan articulates NIH’s highest priorities over the next 5 years, outlining our vision for the future direction, capacity, and stewardship of biomedical and behavioral research.; The plan is organized around a framework of three key objectives: [1] Advancing Biomedical and Behavioral Sciences; [2] Developing, Maintaining, and Renewing Scientific Research Capacity; [3] Exemplifying and Promoting the Highest Level of Scientific Integrity, Public Accountability, and Social Responsibility in the Conduct of Science.; The plan weaves five cross-cutting themes across these objectives, centered around minority health and health disparities, women’s health, public health challenges across the lifespan, collaborative science, and data science. The plan also mentions several achievements made during the previous FY 2016-2020 plan, but please recognize that this plan is not meant to describe everything NIH does.; As Dr. Francis Collins, the NIH Director, notes in the opening statement, “NIH will [invest] efficiently and effectively in a wide range of basic, translational, clinical, and applied research, while at the same time supporting the workforce and infrastructure required for a sustainable research enterprise. As outlined in this Strategic Plan, this approach will enable NIH to build a solid foundation of fundamental knowledge about living systems that will serve to accelerate research aimed at addressing our most pressing health needs.”; We appreciate members from the research community, professional societies, advocacy groups, and the public who worked with us and provided feedback throughout the process to develop this plan.

The National Science Foundation (NSF) has enabled a number of enhancements for proposals submitted in Research.gov and FastLane, and upcoming revisions to the NSF-approved Biographical Sketch and Current and Pending Support format pages. In addition, NSF announced significant improvements to the NSF Funding Opportunity Search functionality with enhanced features to help you identify opportunities quickly and easily. Please see below for the details. We'll be sure to provide more information about these changes soon, and as always, please feel free to ask questions to your [SPA Project Officer]; [brought to our attention by] Stephanie F. Scott, MS, CRA; Director of Policy and Research Development; Columbia | Research; Sponsored Projects Administration; sfs2110@cumc.columbia.edu; Website: https://spa.columbia.edu/

**Proposal Submission System Enhancements:** Research.gov proposal features continue to expand to support the transition of all proposal preparation and submission functionality from FastLane to Research.gov by a target date of December 31, 2022. Many NSF funding opportunities are supported in Research.gov and clearly specify whether submission via Research.gov is available or required. Effective August 30, 2021, Conference and Ideas Lab proposal types, renewal and accomplishment-based renewal submission types, and preliminary proposals for Ideas Lab solicitations are all now available for submission in Research.gov. FastLane must be used to submit preliminary proposals for proposal types other than Ideas Lab until that functionality is available in Research.gov. The proposal preparation landing page has been revised, and Principal Investigators will now first select the proposal submission type from the drop-down options and then will follow the proposal setup wizard to initiate a new proposal. In progress and submitted proposals are accessible from the tiles on the revised proposal preparation landing page, after first selecting the submission type from the drop-down options. New automated compliance checks and associated error and warning messages for the enabled proposal and submission types were also implemented. Error messages will prohibit proposal submission to NSF, whereas warning messages still permit proposal submission. New Frequently Asked Questions (FAQs) were added to the Research.gov About Proposal Preparation and Submission page, and the Proposal Submission Capabilities page has been updated to reflect the latest development updates. All supported proposal and submission types as well as associated compliance checks are also enabled in the Research.gov Proposal Preparation Demo Site. Refer to the PAPPG NSF 20-1 for current proposal requirements. Guidelines in the revised PAPPG NSF 22-1 will apply for proposals submitted or due on or after October 4, 2021. NSF-approved Biographical Sketch and Current and Pending Support Format Updates; Current and Pending Support Fillable PDF Updates; Based on feedback from the research community and NSF Program Officers, NSF has incorporated functionality as of August 30, 2021, in FastLane and Grants.gov to remove any pages which do...
not contain data entered by users (i.e., blank pages) from the NSF-approved current and pending support fillable PDF. This trimming functionality will be integrated in Research.gov on October 4, 2021, in coordination with implementation of the revised PAPPG NSF 22-1 for proposals submitted in Research.gov and project reports submitted in the Research.gov Project Reporting System.; The trimming service only applies to the NSF-approved current and pending support fillable PDF and not to any other uploaded PDFs. Current and pending support PDFs generated in SciENcv do not include blank pages.; The current and pending support fillable PDF document is paginated, and the PDF page numbers will not be updated during the trimming process. This means that it is possible for the trimmed PDF to have skipped page numbers corresponding to the blank pages removed from the fillable PDF. NSF Program Officers are aware of this potential occurrence in proposals submitted to NSF.; Proposers with in progress proposals as of August 30, 2021, can delete previously uploaded current and pending support fillable PDFs from their FastLane or Grants.gov proposals and then re-upload them to trigger the trimming service.; Updated Biographical Sketch and Current and Pending Support SciENcv and Fillable PDF Formats; The updated NSF-approved biographical sketch and current and pending support formats will be available in September 2021 to preview before they are required on October 4th. The updated fillable PDF formats will be available for download from the NSF biographical sketch and current and pending support websites by September 3rd. Updated SciENcv formats will be available on the SciENcv Create a New Document screen by September 17th.; Biographical sketch format updates include increasing the page limit from two to three pages; Current and pending support format updates include the addition of new sections for information on objectives and overlap with other projects to help NSF and reviewers assess overlap/duplication.; Although submission of the updated NSF-approved formats is not permitted (i.e., Research.gov, FastLane, and Grants.gov will not allow the 22-1 forms to be uploaded) until implementation of the revised PAPPG NSF 22-1 on October 4, 2021, NSF is encouraging proposers and grantees to begin familiarizing themselves with the updated NSF-approved formats when they are available.; Enhanced Funding Opportunity Search Functionality and Revamped Program Pages; Based on extensive research with external and internal stakeholders, NSF has made significant improvements to the NSF Funding Opportunity Search functionality to help researchers and prospective researchers quickly and easily find relevant programs and NSF-funded projects in specified disciplines. Funding Search results now include short program descriptions, programs incorporated in core program solicitations with links to the relevant guidelines, and Dear Colleague Letters.; The revamped program pages include significant content and navigation improvements including information previously only viewable in solicitations.; For more information about NSF’s beta site, please visit https://beta.nsf.gov/about-beta. NSF will continue to enhance the site, and ongoing feedback from external and internal stakeholders is vital to the process. Feedback on the updated Funding Search and program page enhancements or any other aspect of the site may be directed to beta-nsf-feedback@nsf.gov.; Questions? If you have IT system-related questions, please contact the NSF Help Desk at 1-800-381-1532 (7:00 AM - 9:00 PM ET; Monday - Friday except federal holidays) or to rgov@nsf.gov. This webinar will be recorded.; [brought to our attention by Stephanie Scott]; 2022 NSF Policy Office Webinar Series - Current and Pending Support – Registration Is Open!; The National Science Foundation (NSF) is pleased to announce that it will be launching a 2022 NSF Policy Office Webinar Series, that will focus on specific topics of interest to the research community. We will begin with a webinar covering NSF’s Current and Pending Support policy and frequently asked questions. This virtual webinar will take place on January 31, 2022 at 2:00 pm EST. There is no cost to participate.; Registration is open! To register for this event, visit our website: [https://nsfpolicyoutreach.com/](https://nsfpolicyoutreach.com/); We are encouraging attendees to submit questions ahead of time so that our speakers and panelists may tailor their remarks to answer the audience’s most pressing questions. Please submit your current and pending support questions when you register or email them here: grants.conference@nsf.gov. Feel free to check [https://nsfpolicyoutreach.com/](https://nsfpolicyoutreach.com/) for the most up-to-date webinar information. You can view recordings from previous webinars and conferences on our Resource Center or YouTube page.; For those who cannot attend
the live webinar, all recorded sessions will be available on-demand shortly after the event and posted on our Resource Center or YouTube page. If you require any accommodation, such as closed captioning, or if you have any logistical questions about the webinar, please contact us at grants_conference@nsf.gov; We look forward to seeing you! Sincerely, The National Science Foundation.

**Deadline(s):** 11/10/2022 [NSF Deadlines]  
**Contact:** Inquiries are encouraged and NIH Scientific/Research contacts are listed below. Please see Link(s): https://grants.nih.gov/grants/guide/notice-files/NOT-OD-21-011.html;  

**Additional Information:** Smart Health and Biomedical Research in the Era of Artificial Intelligence and Advanced Data Science; NIH announced a collaboration with the National Science Foundation (NSF) on an interagency funding opportunity, Smart Health and Biomedical Research in the Era of Artificial Intelligence and Advanced Data Science. The solicitation aims to address technological and data science challenges that require fundamental research and development of new tools to address pressing questions in the biomedical and public health communities. Traditional disease-centric medical, clinical, pharmacological, biological, or physiological studies and evaluations are outside the scope of this solicitation. Applications are due Nov. 10. For more information, refer to the NSF Smart Health website.

https://nsfpolicyoutreach.com/get-notified/  

**Additional Information:** Issuance of NSF Proposal and Award Policies and Procedures Guide (NSF 22-1); See below announcement from NSF. They have released the latest version of the NSF Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1), effective for proposals submitted or due on or after October 4, 2021. While this version of the PAPPG becomes effective on October 4, 2021, in the interim, the guidelines contained in the current PAPPG (NSF 20-1) continue to apply. A listing of significant changes can be found here, and a condensed list of major changes are below. NSF will be hosting a webinar to review the significant changes, date to be determined. However, you can sign up here to be notified immediately when registration for
the webinar is open. I’ll also provide that information once it becomes available.; One thing I’d like to highlight is that NSF will be increasing the page limit for the biographical sketch from two to three pages, effective for proposals submitted or due on or after October 4, 2021. Stay tuned for more information about that.; As always, feel free to contact your SPA Project Officer should you have any questions, and we’ll keep you posted of new developments.; [brought to our attention by] Stephanie F. Scott, MS, CRA: Director of Policy and Research Development; sfs2110@cumc.columbia.edu ; Website: https://spa.columbia.edu/ ; Dear Colleagues: ; We are pleased to announce that a revised version of the NSF Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1) has been issued.; The new PAPPG will be effective for proposals submitted or due on or after October 4, 2021. Significant changes include: A new section covering requests for reasonable and accessibility accommodations regarding the proposal process or requests for accessibility accommodations to access NSF’s electronic systems, websites and other digital content; A table entitled, NSF Pre-award and Post-award Disclosures Relating to the Biographical Sketch and Current and Pending Support. This table identifies where pre- and post-award current and pending support disclosure information must be provided. Proposers and awardees may begin using this table immediately; Increasing the page limit for the biographical sketch from two to three pages; Updates to the current and pending support section of NSF proposals to require that information on objectives and overlap with other projects is provided to help NSF and reviewers assess overlap/duplication; Adding planning proposals and Career-Life Balance supplemental funding requests as new proposal types; Updates to travel proposals will require that AORs certify that prior to the proposer’s participation in the meeting for which NSF travel support is being requested, the proposer will assure that the meeting organizer has a written policy or code-of-conduct addressing harassment; You are encouraged to review the by-chapter summary of changes provided in the Introduction section of the PAPPG; NSF plans to conduct a webinar covering these changes. Visit the NSF policy outreach website to sign up for notifications about this and other outreach events.; While this version of the PAPPG becomes effective on October 4, 2021, in the interim, the guidelines contained in the current PAPPG (NSF 20-1) continue to apply. ; If you have any questions regarding these changes, please contact the DIAS/Policy Office at policy@nsf.gov.; Regards, Jean Feldman; Head, Policy Office; Division of Institution and Award Support; Office of Budget, Finance & Award Management

Statement by NSF Director Sethuraman Panchanathan on the President’s FY22 Budget Request

**Sponsor:** NSF  
**Deadline(s):** 05/28/2021 (Release Date)  
**Contact:** https://www.nsf.gov/help/contact.jsp  
https://www.whitehouse.gov/omb/budget/  
https://beta.nsf.gov/budget

**Additional Information:** May 28, 2021; Statement by NSF Director Sethuraman Panchanathan on the President’s FY22 Budget Request; President Proposes Crucial Investments to Advance the Frontiers of U.S. Science and Technology; The Biden-Harris Administration today submitted to Congress the President’s Budget for fiscal year 2022. As the Administration continues to make progress defeating the pandemic and getting our economy back on track, the Budget makes historic investments that will help the country build back better and lay the foundation for shared growth and prosperity for decades to come, “This request will bolster the U.S. economy and our leadership in critical and emerging areas of research and technological advancements, which are essential to our long-term economic and national security,” said NSF Director Sethuraman Panchanathan. “NSF’s mission is unique in supporting research across all fields of science, technology, engineering, and mathematics, and all levels of STEM education. Seven decades of experience building the necessary partnerships between federal, state, and local government, academia, and industry have produced remarkable results for the country. With this budget, we can rapidly scale our investments and build even stronger bridges between discovery, innovation, and commercialization.”; The Budget includes more details on what is
proposed in the two historic plans the President has already put forward — the Americans Jobs Plan and the American Families Plan — and reinvests in education, research, public health, and other foundations of our country’s strength. At the U.S. National Science Foundation, the Budget would: **Enhance Fundamental Research and Development.** $9.43 billion, an increase of $1.55 billion above 2021 enacted level will support research across the spectrum of science, engineering and technology. This includes biological sciences; computer and information sciences; engineering; geosciences; math and physical sciences; social, behavioral, and economic sciences; and education. With this additional funding, NSF will continue to be the champion of basic and fundamental research and will strengthen it at speed and scale.; **Strengthen U.S. Leadership in Emerging Technologies.** Includes the establishment of a new directorate for technology, innovation and partnerships within NSF to help translate research into practical applications. The directorate will work with programs across NSF and with other federal and non-federal entities to expedite technology development in emerging areas that are crucial for the United States’ technological leadership.; **Advances Equity in Science and Engineering.** +$100 million, an increase of about 50 percent, in funding for programs that aim to increase participation in science and engineering of individuals from racial and ethnic groups underrepresented in these fields. Funding will support curriculum design, research on successful recruitment and retention methods, development of outreach or mentorship programs, fellowships, and building science and engineering research and education capacity at historically black colleges and universities, and other minority-serving institutions.; **Advances Climate Science and Sustainability Research.** $1.2 billion for climate and clean energy-related research will fund a broad portfolio of research related to climate science and clean energy, including research on atmospheric composition, water and carbon cycles, modeling climate systems, renewable energy technologies, materials sciences, and social, behavioral, and economic research on human responses to climate change; **Continues Construction of Forefront Research Infrastructure.** Invests in the continued construction of major NSF research facilities, including long-term upgrades of NSF’s major Antarctic infrastructure. It also supports construction of the Vera C. Rubin Observatory to enable astronomy research. In addition, the budget request seeks funding for the construction and procurement of smaller research facilities and equipment across the nation.; Enacting the Budget policies into law this year would strengthen our Nation’s economy and lay the foundation for shared prosperity, while also improving our Nation’s long-term fiscal health.; For more information on the President’s FY22 Budget, please visit: [https://www.whitehouse.gov/omb/budget/](https://www.whitehouse.gov/omb/budget/); For more information on the NSF budget, please visit: [https://beta.nsf.gov/budget](https://beta.nsf.gov/budget); -NSF- [brought to our attention by Stephanie Scott / SPA]

Additional Information: NSF INCLUDES Alliances - Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science; Limited Submission; NSF INCLUDES Alliances - Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science; Internal Deadline: 9:00 a.m. on Wednesday, August 25, 2021; Program: The NSF INCLUDES provides a distinctive approach to addressing broadening participation challenges faced by underrepresented and underserved groups in STEM through collaborative networks and partnerships. The Alliances are integral to NSF INCLUDES and bring together new partners from many academic and professional disciplines and leverage the five design elements of collaborative infrastructure to address a broadening participation challenge at scale. In FY 2018 and FY 2019, NSF INCLUDES funded a total of eight Alliances. For more information on funded NSF INCLUDES Alliances, visit https://www.includesnetwork.org/home.; NSF INCLUDES Alliances build the infrastructure necessary to foster collaboration and broaden participation in STEM by emphasizing the following five design elements of collaborative infrastructure: Shared Vision - Develop a shared vision and strategy (e.g., problem statement and theory of change) for broadening the participation of the target population(s) in STEM along with relevant metrics of success and key milestones/goals to be achieved during the project's lifecycle; Partnerships - Develop multi-stakeholder partnerships and build infrastructure among them to decrease social distance and achieve progress on common goals targeted by the Alliance; Goals and Metrics - Contribute to the knowledge base on broadening participation in STEM through broadening participation and implementation research, sharing project evaluations, data, new scientific findings/discoveries, and promising practices; Leadership and Communication - Establish a "backbone" or support organization that provides a framework for communication and networking, network assistance and reinforcement, visibility and expansion of the Alliance and its partners, that will collaborate with the NSF INCLUDES Coordination Hub; Expansion, Sustainability, and Scale - Advance a logic model or other heuristic that identifies Alliance outcomes that reflect implementation of change at scale and progress toward developing an inclusive STEM enterprise.; NSF anticipates making up to three Alliance awards with a duration of five years, contingent on availability of funds and receipt of competitive proposals. Awards will range from $1.0 to $2.0 million per year for five years depending on the goals, objectives, and the size of the communities involved.; Eligibility: The lead PI must possess the experience and institutional support necessary to implement and manage the INCLUDES Alliance.; Deadlines: Internal Proposal due 9:00 a.m. on Wednesday, August 25, 2021; Sponsor Letter of Intent due October 4, 2021; Sponsor Proposal due January 25, 2022; How: For more information, please visit the internal application at https://columbia.infoready4.com/#/competitionDetail/1848662; Questions should be sent to Greg Culler at limitedsubmissions@columbia.edu.; Program Solicitation: https://www.nsf.gov/pubs/2020/nsf20569/nsf20569.htm; Research Initiatives; Office of the Executive Vice President for Research; Columbia University in the City of New York; To view current limited submission programs please visit: https://columbia.infoready4.com/#limitedsubmissions; COLUMBIA | RESEARCH

Additional Information: This FOA invites basic and/or methodological research projects that seek to illuminate or measure independent and interdependent health-related effects within dyads. For the purpose of this FOA, a dyad is a unit of two individuals whose interactions and influences on one another are nested within larger social contexts and networks. Both animal and human subjects research projects are welcome. Types of projects submitted under this FOA include but are not limited to, observational studies involving humans, or existing/synthesized datasets studies. Researchers proposing basic science experimental studies involving human participants (i.e., experimentally manipulate independent variables) should consider the companion FOA PAR-21-280" Dyadic Interpersonal Processes and Biopsychosocial Outcomes (R01 Basic Experimental Studies with Humans)."

Additional Information: This FOA invites basic and/or methodological research projects that illuminate and/or measure independent and interdependent health-related effects within dyads across relationships and settings. For the purpose of this FOA, a dyad is a unit of two individuals whose interactions and influences on one another are nested within larger social contexts and networks. Dyads are social relationships that extend beyond the individual and have strong bidirectional influences on physical and mental health. For the purpose of this FOA, independent effects are those effects that affect each member of the dyad individually (i.e., by nature of being part of the dyad), whereas interdependent effects are those that affect one member of the dyad contingent upon the other member of the dyad (i.e., not only because the individual is part of a dyad but also because being part of the dyad has an effect on the other individual within the dyad as well).

**Additional Information:** NIH NOSI supports returning biomedical researchers; NIH Office of Research on Women's Health; NIH NOSI Supports Returning Biomedical Researchers; NIH has announced a new supplements program for researchers returning to biomedical careers after a qualifying absence. Under "Notice of Special Interest (NOSI): Research Supplements to Promote Reentry and Reintegration into Health-Related Research Careers” (NOT-OD-21-134), successful applicants will be able to participate in full- or part-time mentored research experiences through existing NIH research grants. Eligible for these reentry supplements are individuals whose research careers have been interrupted for at least 6 months because of family responsibilities or other qualifying circumstances. The reintegration supplements will enable individuals to find supportive scientific environments after departure from an unsafe or discriminatory environment resulting from unlawful harassment.; Most candidates for the reentry supplements will have a doctoral degree or equivalent; however, some awarding NIH Institutes and Centers may enable predoctoral students, including those enrolled in dual-degree programs, to apply. Postdoctoral and predoctoral students are eligible to apply for reintegration supplements to allow them to transition to a safe, supportive research environment and complete their graduate degrees.; Click here for more information, including detailed eligibility requirements and staff contacts. The first available due date for submissions is August 26, 2021, and the supplements program is set to expire on October 7, 2023.; Related Announcements: PA-20-272 - Administrative Supplements to Existing NIH Grants and Cooperative Agreements (Parent Admin Supp Clinical Trial Optional)

**Additional Information:** New Funding Opportunity: Research to Reduce Consumer Food Waste in the United States Request for Applications (RFA) and Informational Webinar; Research to Reduce Consumer Food Waste in the United States Request for Applications (RFA) and Informational Webinar; COVID-19 Update: EPA is providing flexibilities to applicants experiencing challenges related to COVID-19. Please see the Flexibilities Available to Organizations Impacted by COVID-19 clause in Section IV of EPA’s Solicitation Clauses.; URL: [Research to Reduce Consumer Food Waste in the United States Request for Applications (RFA)](https://www.epa.gov/research-grants/research-reduce-consumer-food-waste-united-states-request-applications-rfa); Open / Close Dates: December 10, 2021 – February 9, 2022; Register for the Webinar: [https://food_waste_info_webinar.eventbrite.com](https://food_waste_info_webinar.eventbrite.com); Background: The U.S. Environmental Protection Agency (EPA), as part of its Science to Achieve Results (STAR) program, is seeking applications proposing research to develop, apply, and test innovative and creative community-engaged approaches to reduce household food waste in the United States.; Food waste is a major global environmental, social, and economic challenge. When food is wasted, all the resources used to produce the food – water, energy, fertilizers – and the resources used to transport it from farms to our tables, are wasted as well. Reducing food waste could significantly contribute to the prevention and reduction of air, water, and land pollution and help combat climate change.; Applicants should propose a research project that addresses at least one of the following research areas on how to reduce household food waste: Research Area 1: Changing the U.S. food environment to discourage waste by consumers.; Research Area 2: Strengthening consumers’ motivation, opportunity, and ability to reduce food waste.; Research Area 3: Leveraging and applying research findings and technology to support consumers.
in food waste reduction. Projects submitted under this request for applications (RFA) should build upon existing research where available and include partnerships with state, local, community, or private sector entities where possible. Research should examine how the food waste reduction strategies or methods could be implemented effectively on community and larger scales. For information on eligibility, project specifications, or how to apply, visit: Research to Reduce Consumer Food Waste in the United States Request for Applications (RFA); Learn more about EPA Research Grants.; Informational Webinar for Applicants; Date: Thursday, January 6, 2022; Time: 2:00 - 3:00 p.m.; Register: https://food_waste_info_webinar.eventbrite.com; Join us for an informational webinar on this funding opportunity. The webinar will cover application information and provide an overview of what has already been provided in the RFA.; Webinar Objectives: Share general information and information on research areas for the RFA (EPA Project Officer); Learn about the submission, eligibility, relevancy review and peer review processes (EPA Eligibility, Submission, and Peer Review Officers); Question & answer session; A copy of the webinar presentation will be available on the Research to Reduce Consumer Food Waste in the United States Request for Applications (RFA) for those unable to participate in the scheduled webinar.

**Additional Information:** NIH releases NOSI on COVID-19’s impact on underserved and vulnerable populations; View it as a Web page.; NIH NOSI to Support Studies on COVID-19’s Impact on Underserved and Vulnerable Populations; ORWH has announced its participation in Notice of Special Interest (NOSI): Social, Behavioral, and Economic Impact of COVID-19 in Underserved and Vulnerable Populations (NOT-MH-21-330). The COVID-19 pandemic has demonstrated that prevention and mitigation strategies for the pandemic are uneven—for a range of reasons, including a lack of trust in health systems, economic circumstances, and challenges in sustaining long-term adherence, especially for underserved and vulnerable populations. By increasing our
understanding of the multifaceted effects of the COVID-19 pandemic and public health interventions that mitigate risk and promote resilience in high-risk populations, we can improve the long-term response to the pandemic and prepare more effectively for future public health emergencies; To strengthen the understanding and response to social, behavioral, and economic effects of the COVID-19 pandemic, NIH is encouraging the submission of applications that will: Address the roles and effects of interventions, particularly those under the umbrella of digital health, as well as community-engaged and multilevel interventions in health care settings to address access, reach, delivery, engagement, effectiveness, scalability, and sustainability of services that are utilized during and following the pandemic; Encourage the leveraging of existing large-scale data sources with broad population coverage to improve prediction of various mitigation efforts (including vaccinations, masking, and physical distancing) on transmission reduction and on social and economic effects and assess the downstream health and health care access effects, with an emphasis on underserved and vulnerable populations; The first submission date is October 5, 2021, and subsequent receipt dates will extend through September 8, 2024.

Deadline(s): NA

Contact: HHEARsupport@mssm.edu

Link(s): [HHEAR Data Center](https://hheardatacenter.mssm.edu/)

Additional Information: HHEAR public data available! The HHEAR Data Center’s public data repository has recently been updated. To benefit the broader research community, the HHEAR Data Center hosts a public data repository that contains both de-identified original study and de-identified harmonized data from all studies accepted into the CHEAR and HHEAR program that have passed the embargo period. The goal of this repository is to promote the secondary analysis of pooled environmental health data by providing data in a manner that is findable, accessible, interoperable and reusable. The repository is searchable by a number of features and users are able to compile and download customized datasets from CHEAR and HHEAR research studies. The repository is updated periodically as studies come off embargo. To access both types of data, go to HHEAR Data Center website; Thank you, The HHEAR Coordinating Center

We can also schedule a pre-submission consultation with HHEAR Lab Hub and Data Center scientists who can give you advice for development of an application that is consistent with the goals of HHEAR and that maximizes the scientific value of your project.; Thank you, HHEAR Coordinating Center; The goal of HHEAR is to provide infrastructure for adding or expanding exposure analysis to advance understanding of the impact of environmental exposures on human health throughout the life course. The program places a priority on HHEAR applications that have a focus on either discovery or hypothesis-driven research with adequate power to address the specific aims. Pilot scale studies are not appropriate. The following sections highlight the research priorities for HHEAR analyses by funding agency.

Please note: The previous funding opportunity for this program in 2020 covered the other states and territories of the United States.; Priority 2 will support the evolution of projects ($250,000-500,000 per project) funded under the 2015-2018 funding opportunities from this program. The list of projects that are eligible can be found here; For both priorities, eligible applicants are: institutions of higher education; K-12 public and independent schools and school systems; other nonprofits, including community-based organizations and informal education institutions, such as museums, zoos, and aquariums; state and local government agencies; and Indian tribal governments in the United States.; Please note that we do not anticipate issuing a solicitation for applications next year. Rather, applications to this funding opportunity may be funded with fiscal year 2022 and 2023 funds.; Deadlines: For Priority 1, pre-applications are required and will be used to determine which applicants are invited to submit full applications to this priority. The deadline for pre-applications is 11:59 pm EDT on November 1, 2021 and the deadline for Priority 1 full applications is 11:59 pm EDT on March 17, 2022.; For Priority 2, only full applications are requested and the deadline for Priority 2 applications is 11:59 pm EST on January 25, 2022.; Informational Teleconferences; For Priority 1, two informational teleconferences with the program officers will occur on Thursday, September 23, 2021 from 3:00 to 5:00 pm EDT and Monday, September 27, 2021 from 3:00 to 5:00 pm EDT. An informational teleconference for Priority 2 with the program officers will occur on Thursday October 28, 2021 from 3:00 to 5:00 pm EDT. Interested applicants may obtain the phone number and related teleconference information by visiting the Apply webpage. Whenever possible, individuals from the same institution should try to join the teleconference from the same phone line to maximize our ability to host as many interested institutions as possible.; Additional Information; Read the full funding announcement NOAA-SEC-OED-2022-006995 in Grants.gov for the complete requirements.; Sincerely, NOAA Environmental Literacy Program Grants Team; [brought to our attention by] John McLaughlin; Education Program Manager; National Oceanic and Atmospheric Administration Office of Education; (202) 482-2893;

https://www.aicr.org/research/aicr-grant-program/apply-for-grant/

Additional Information: American Institute for Cancer Research; LOI Deadline: January 21; The AICR Investigator-Initiated Research Grant Program welcomes proposals for research addressing the effects of diet, nutrition, body composition and physical activity on cancer risk and outcomes. The burden of cancer is predicted to rise significantly in the coming years and cancer mortality is predicted to become the leading cause of death in developed nations. However, most cancers are highly preventable and lifestyle factors can also have profound impacts on cancer-associated outcomes. The mission of the American Institute for Cancer Research (AICR) is to eradicate preventable cancers attributable to diet, nutrition, body composition and physical inactivity and improve outcomes in cancer survivors. Our Investigator-Initiated Research Grant Program is a vital element in how we fulfill that mission.

DoD/CDMRP - COVID-19 Impact on Research Awards
R²eport
Friday Newsletter 02/04/2022

CDMRP continues to be concerned about the impacts of COVID-19 on Service Members and the public. We are aware of the challenges it poses and are tracking some of the impacts to current awardees and ongoing research. While not every program will have financial resources available to assist, awareness of any significant unresolved issues affecting current research awards is important. The intent of this notice is to remind recipients of the requirements in 32 CFR Part 1134, Subpart E Other Reporting. This provision specifies the requirement for recipients to disclose significant developments as soon as they become known. These include problems, delays, or adverse conditions that will materially impair your ability to meet the objectives of your award(s). Disclosures of significant developments may be made on your next interim performance report or at any point between scheduled performance reporting dates by contacting the Science Officer or Grant Specialist assigned to your award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation.

Individual Fellows; This week NIH announced a new policy to allow for childcare support costs to recipients of NRSA individual fellowships. See the announcement NOT-OD-21-074, which replaces the previously announced NOT-OD-21-069. NIH also updated its FAQs; if you have any questions regarding how to make the request in a fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. We’ll provide you with any updates brought to our attention by Stephanie Scott, Announcement of Childcare Costs for Ruth L. Kirschstein National Research Service Award (NRSA) Supported Individual Fellows; This week NIH announced a new policy to allow for childcare support costs to recipients of NRSA individual fellowships (i.e., F31, F32, etc.). These costs must be specifically requested in new, continuation applications or through administrative supplements beginning on or after April 8, 2021. Please read the full announcement at NOT-OD-21-069, the FAQs, and supplementary information below. Some key takeaways: The policy applies to full-time NIH-NRSA supported individual fellowship applicants and awardees. However, additional information is forthcoming later this year regarding expanding the policy to trainees on institutional training grants, anticipated for FY2022. Each fellow is eligible to receive $2,500 per budget period for childcare costs. The childcare cost amount is not determined by number of children. Eligible childcare is care that is licensed and/or regulated by state and/or local authorities. See FAQs for more details. At a minimum, recipients must obtain and retain documentation verifying that a childcare provider is licensed and/or regulated by state and/or local authorities, and must document that the fellow is eligible to receive the childcare costs and has eligible dependents. The childcare cost is restricted for that purpose and cannot be rebudgeted without prior written approval from the NIH awarding IC. If you have any questions regarding how to make the request in the fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. The announcement NOT-OD-21-069, and the FAQs, provide instructions on how to make the childcare support request; We’ll provide further guidance on these new costs at a later date. Announcement of Childcare Costs for Ruth L. Kirschstein National Research Service Award (NRSA) Institutional Research Training Awards

**Sponsor**: National Institutes of Health  
**Deadline(s)**: 09/23/2021 (Release Date)  
**Contact**: NIH Office of Policy for Extramural Research Administration; Division of Grants Policy; grantspolicy@nih.gov  
**Additional Information**: In April 2021, NIH began providing childcare cost support to recipients of full-time NRSA fellowships in recognition that the high cost of childcare impacts graduate students and post-doctorates funded through NRSA fellowships, and hinders their ability to successfully complete their training and fully participate in the extramural research workforce [NOT-OD-21-074](https://grants.nih.gov/grants/guide/notice-files/NOT-OD-21-074.html). As Phase 2 of this initiative, anticipated for awards made beginning in Fiscal Year 2022, NIH will begin providing childcare cost support to full-time predoctoral and postdoctoral trainees appointed on NRSA institutional research training awards.

Applications should provide robust study designs that would explore sex and gender influences and social determinants of health in order to reduce health inequities. The proposed research must address at least one objective from strategic goal 1, 2, or 3 of Advancing Science for the Health of Women: The Trans-NIH Strategic Plan for Women’s Health Research.; There is a complex intersection of internal (e.g., genetics) and external institutional and structural forces (e.g., social determinants of health and experiences of trauma) that play a role in the health status, disease presentation, treatment responses, and health-related quality of life of women across the life course. These administrative supplements will support projects highlighting common sources of disparities in the health of women and girls, with an emphasis on projects that propose to integrate measures beyond the individual level and consider perspectives from multiple disciplines. A broad range of research topics studied at the preclinical, clinical, behavioral, and translational levels are encouraged. Proposals incorporating multilevel interventions, using community-engaged approaches, and focusing on one or more NIH-designated health disparity populations are also desired.; Applications are due January 31, 2022.

**Additional Information:** NIH issues funding opportunity for studies on mitigating sexual harassment in the biomedical research enterprise; National Institutes of Health; Office of Research on Women's Health; NIH issues funding opportunity for studies on mitigating sexual harassment in the biomedical research enterprise (govdelivery.com); NIH NOSI to Support Studies on Mitigating Sexual Harassment in the Biomedical Research Enterprise; ORWH has announced its participation in Notice of Special Interest (NOSI): Interventions Designed to Change the Culture to Mitigate or Eliminate Sexual Harassment in the Biomedical Research Enterprise NOT-OD-21-150. The cumulative effect of sexual harassment has a devastating and costly impact on individuals and the Nation. There are emotional, physical, mental, and legal consequences, which may have a direct impact on individual performance and career advancement, as well as social and fiscal effects on institutional settings, students, and co-workers.; The National Academies of Sciences, Engineering, and Medicine report titled Sexual Harassment of Women: Climate, Culture, and Consequences in Academic Sciences, Engineering, and Medicine demonstrates the urgent need to develop new partnerships to address this challenging problem. NIH is encouraging applications to test interventions that would be designed to change the culture and mitigate or eliminate sexual harassment in the biomedical research enterprise.; The first available due date for funding opportunity submissions is October 13, 2021, and subsequent receipt dates will extend through October 14, 2023.

**Additional Information:** Longevity Impetus Grant Announcement; FYI Below. Yousin shared this. Applications open on 9/13: [https://www.impetusgrants.com/](https://www.impetusgrants.com/); Impetus Grants provides funding for scientists to start working on what they consider the most important problems in aging biology, without delay; [www.impetusgrants.com](http://www.impetusgrants.com); September 7, 2021; Dear AGE Member, I’d like to bring to your attention a new source of grant funding for bold ideas in aging research: the Longevity Impetus Grants. These grants will support bold ideas with the potential to change how the field thinks and works, including high-risk projects. For more information about the program and to apply, please visit the website. The applications are ~1 page, and decisions are made within three weeks. Impetus Grants range from $10K to $500K, with a maximum of 10% institutional overhead. There’s no restriction on project period, and no strings attached. The ideal application is able to explain how the project would broadly impact the field, by developing/validating new tools and/or changing how we think about aging biology. Such proposals could seek to prove or disprove common assumptions in the field, discover new ways to reverse aging processes, synthesize isolated manifestations of aging into a systemic perspective, and/or develop widely applicable methodologies. Please consider sharing this email within your institution, and with anyone else you think should apply; I highly encourage you to consider applying for a Longevity Impetus Grant.; Sincerely, [brought to our attention by] Matt Kaeberlein; CEO and Chair, American Aging Association; Impetus Grants provides funding for scientists to start working on what they consider the most important problems in aging biology, without delay. Such work should not be held up by red tape: we offer grants of up to $500k, with decisions made within 3 weeks. Our review process asks "what's the potential for impact" rather than "could this go wrong"; Our goal is to have a broad impact on the field, by supporting projects that challenge assumptions, develop new tools and methodologies,
discover new ways to reverse aging processes, and/or synthesize isolated manifestations of aging into a systemic perspective. To ensure that we learn from every project, we're organizing a special issue of GeroScience to provide an opportunity to publish both positive and negative results from funded studies; Applications will open on September 13, 2021.

The purpose of this Notice of Special Interest (NOSI) is to stimulate novel epidemiological studies in Asian Americans, Native Hawaiians, and Pacific Islanders. The NIEHS seeks applications that advance innovative development of new measures and methods, or validation and adaptation of existing measures and approaches, to address the complex interplay of the physical, chemical, cultural, social, and built environmental factors that contribute to or exacerbate environmental health disparities. Applications of interest may include, but are not limited to: The use of mixed methods approaches that integrate qualitative and quantitative data collection methods and measures of factors that contribute to environmental health disparities, including how qualitative methods can inform the development and validation of quantitative surveys and instruments that evaluate these factors; Application and testing of methods and measures of SDOH, and structural racism and discrimination, to the study of environmental health disparities; Establishment of novel interdisciplinary collaborations (including, but not limited to, methodologists, behavioral scientists, exposure scientists, epidemiologists, bioinformaticians, biostatisticians, data scientists, social scientists) to incorporate concomitant chemical and built environmental factors with existing or developed measures of structural and individual racism into a multilevel assessment of environmental health disparities; Development, testing, and adaptation of methods and measures that capture the lived experience of intersectionality to identify structural factors contributing to disproportionate exposures to chemical and non-chemical stressors at the community and individual level.; Application of community engaged approaches to identify or develop measures that are based on the interests and primary concerns identified by multiple community stakeholders, such as parents, schools, organizations, and fence-line residents, particularly for communities that are under resourced and populations that have historically been combating environmental injustices and disparate rates of adverse health outcomes.; Examination of the ethical issues related to methods and measurement approaches in the study of environmental health disparities, including issues around data harmonization and the collection of common data elements.; Enhancement of existing place-based indices, environmental exposures models and geocoded data to account for social level factors, to explain environmental health disparities at the regional or community level. Of interest are the extent to which these measures demonstrate how placed-based structural racism and discrimination exacerbate environmental risk factors and/or limit protective factors.; Novel use of SDOH and structural racism and discrimination methods and measures to guide the development of multi-level, evidence-based prevention and intervention strategies to reduce environmental health disparities.; NIEHS Program Contacts: Lindsey Martin lindsey.martin@nih.gov and Melissa Smarr melissa.smarr@nih.gov
research to address key knowledge gaps within and between subpopulations of Asian Americans, Native Hawaiians, and Pacific Islanders. These populations are frequently aggregated in research, potentially masking important social and health differences. Given clear heterogeneity in ancestry, culture, immigration patterns among Asian Americans, socioeconomic position, and acculturation into American life, a critical need exists for epidemiological research to enhance our understanding of the interplay of environmental exposures, lifestyle, behavioral, genomics, social, neighborhood, and biological factors that impact the health of Asian American, Native Hawaiian, and Pacific Islander subpopulations. The National Institute of Environmental Health Sciences encourages submissions of applications that are within the mission of NIEHS, which is to discover how the environment affects people to promote healthier lives. Exposures of interest include, but are not limited to, chemicals that people are exposed to via air, water, food, or direct dermal exposure (e.g., personal care products), including air pollutants, pesticides, metals, industrial chemicals, nanomaterials, environmental tobacco smoke, certain microbial products, and certain physical agents, such as environmental radiation. Applications examining the impacts of climate change on health are encouraged and could include a focus on weather extremes (e.g., prolonged or excessively high heat waves, droughts, severe unseasonal cold spells) and extreme weather-related disasters (e.g., hurricanes, storm surges, floods, wildfires) attributed to our changing climate. Specific topics of interest include but are not limited to environmental epidemiology studies: Characterizing environmental health disparities among Asian American, Native Hawaiian and Pacific Islander subpopulations; Investigating exposures at the intersection of the physical, chemical, built, and social environments, including social determinants of health, and how these exposures affect health outcomes in Asian American, Native Hawaiian and Pacific Islander subpopulations; Examining the linkages between structural racism and discrimination, environmental exposures, and health outcomes in Asian American, Native Hawaiian and Pacific Islander subpopulations; Examining resilience among Asian American, Native Hawaiian and Pacific Islander subpopulations in the context of climate change and climate change-related disasters; The NIEHS strongly supports research conducted in partnership with communities. Studies that utilize community engaged and/or citizen science approaches done in partnership with Asian American, Native Hawaiian and Pacific Islander communities and/or community-based organizations are strongly encouraged. Applications that utilize report-back methods to increase the environmental health literacy within these subpopulations are also strongly encouraged; NIEHS Program Contact: Lindsey Martin lindsey.martin@nih.gov

**Additional Information:** NIH Announces Funding Opportunity to Study the Role of Work in Health Disparities in the U.S.; ORWH recently announced its participation in The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional) (PAR-21-275). The funding opportunity will support innovative population-based research designed to identify and characterize pathways and mechanisms through which work or occupation influences health outcomes and health status among populations with health and/or health care disparities; The main objective of this initiative is to determine the extent and mechanisms by which work, as a social determinant of health, both contributes to and helps alleviate disparities related to health and health care; Of particular interest are: Projects designed to examine pathways and mechanisms using conceptual model(s) grounded...
in minority health and health disparities theories that recognize that health disparities arise by multiple and overlapping contributing factors acting at multiple levels of influence; Intersectional approaches that consider different social identities and the embeddedness of individuals within families, households, and communities; Projects that explore whether work can explain the health or health care disparities seen within diseases or conditions (e.g., COVID-19, opioid use disorder, mental/behavioral health, diabetes, cancer, heart disease, asthma, and maternal and infant health); Projects that explore how work contributes to health care disparities—including, but not limited to, disparities in access to preventive, specialty, and emergency care in health insurance coverage and disparities in quality of health care; Applications for The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional) will open on September 5, 2021.

Additional Information: [SPA News] FW: eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; NIH sent this announcement yesterday after they had already made the changes in their Human Subjects System (HSS). Please see below, it outlines the changes made to the HSS and its integration with the updated FORMS-F PHS Human Subjects and Clinical Trials Form. [brought to our attention by] Stephanie Scott ; eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; Monday, June 15, 2020; As of Saturday, June 13, 2020, all applicants and recipients submitting post-submission updates in the Human Subjects System (HSS) will use the updated FORMS-F PHS Human Subjects and Clinical Trials Information Form. These updates address new requirements for participant-level data on sex/gender, race, ethnicity, and age at enrollment for projects subject to the NIH Policy and Guidelines on the Inclusion of Individuals Across the Lifespan as Participants in Research Involving Human Subjects. ; Users with records currently in progress will need to modify the records to meet new FORMS-F requirements.; The changes listed below include items released by eRA in March and items released on June 13.; Key FORMS-F Changes to the PHS Human Subjects and Clinical Trials Information Form; [*] A new Inclusion Enrollment Report title field is now available. The human subjects study title will appear by default for all existing studies and may be changed by the user. For new studies and those with a work in progress study, the title will be blank and need to be filled by the grantee. See Figure 1.; Figure 1: Inclusion Enrollment Report Title Field; [*] For clinical trials, the “Brief Summary” field will no longer appear in Section 4. Information in this field prior to June 13, 2020 will continue to be available in the PDF images of applications and Research Performance Progress Reports (RPPRs) submitted prior to this change.; [*] Question 1.4.a. “Does the study involve human subjects/participants” now has a default value of yes and cannot be changed unless the user changes their response to the question “Are Human Subjects Involved?” on the Other Projects Information form. As a study record should be completed only for research involving human participants, the “No” option is no longer available for this question. See Figure 2.; Figure 2: Question 1.4.a of the Clinical Trial Post Submission Study Record; [*] In Section 2.8 of the Study Record: PHS Human Subjects and Clinical Trials Information screen, the language has been changed from ‘Enrollment of First Subject’ to ‘Enrollment of First Participant.’; [*] A new question has been added to the Study Record: PHS Human Subjects and Clinical Trials Information screen — Section 4.6 asks ‘Is this an applicable clinical trial under FDAAA?’; [*] For a full list of significant FORMS-F changes, see the High-level Grant Application Form Change Summary: FORMS-F PDF.; Key Inclusion Across the Lifespan Changes; [*] Recipients reporting actual enrollment progress for a grant application submitted for due dates January 25, 2019 or later must provide participant-level data on sex/gender, race, ethnicity, and age at enrollment in the Inclusion Enrollment Report of the PHS Human Subjects and Clinical Trials Information Form using HSS.; [*] Users must use the spreadsheet template available in HSS to submit participant-level data. The column titles must not be altered, and data should be provided using the values modeled in the template. Changes to the template may result in a submission error. See Figure 3.; Figure 3: Download Participant Level Data template button on the Inclusion Enrollment Report; [*] Participant-level data must be uploaded in .csv format. Users do not need to separately enter the individual numerical fields in the Actual (Cumulative) Inclusion Enrollment Report table once the .csv file is successfully uploaded. The data provided will populate the actual (cumulative) enrollment table within the system. See Figure 4.; Figure 4: Upload Participant Level Data attachment button on the Inclusion Enrollment Report; [*] For more information on the requirement of individual-level participant data on sex/gender, race, ethnicity, and age at enrollment in progress reports for research supported by NIH projects, please see NOT-OD-18-116; For more information, see: [*] Entering Inclusion Data Using the Participant Level Data Template (video and transcript); Participant-level Data Template ; [*] The eRA Human Subjects System (HSS) information page ; [*] Information about the PHS Human Subjects and Clinical Trials Information form ; electronic Research Administration (eRA); NIH Office of Extramural Research; Questions? Please contact the eRA Service Desk. Check out self-help resources on the Help page before submitting an online ticket; or call Toll-free: 1-866-504-9552, Phone: 301-402-7469. See attached “Changes from FORMS-E to FORMS-F”; I have an email.
to NIH to clarify the significant changes, and any impact they may have in xTRACT. Upon first glance, the changes appear to be more of clarifications of the instructions, rather than anything drastically different.; I know a number of you are preparing training grant proposals for May. Please feel free to take a look at these changes, and let me know if you have questions. This way I can collect them all and send them to NIH for clarification. As every training grant program is different, you may also need to go to your Program Officials for direction on how they want the table completed for your specific set of circumstances.; As soon as I have more information from NIH I will pass it along.; [brought to our attention by] Stephanie F. Extending the Special Exception to the NIH/AHRQ/NIOSH Post-Submission Material Policy During the COVID-19 Pandemic

Sponsor: National Institutes of Health
Deadline(s): This Notice extends the special exception for post-submission material (see NOT-OD-20-123) to applications submitted for the May 2021 Council round.; For applications submitted for the May 2021 council (beginning with applications submitted for the September 25, 2020 due date for Spring 2021 review meetings), the NIH, AHRQ, and NIOSH will accept a one-page update with preliminary data as post-submission materials for applications submitted under all activity codes, ONLY if the Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application.; The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications.; All other materials listed in NOT-OD-19-083 as acceptable post-submission materials will continue to be accepted if submitted 30 days before the study section meeting.

Additional Information:

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- 5 weeks prior to submission deadline—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about they the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- 4 weeks prior to submission deadline —Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.
• **2 weeks prior to submission deadline** — For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@cumc.columbia.edu.

Best wishes,

Pam Factor-Litvak

Evidence for Action: Innovative Research to Advance Racial Equity
Sponsor: RWJF; https://www.evidenceforaction.org/
Deadline(s): Open
Contact: Email: evidenceforaction@ucsf.edu; Website: www.evidenceforaction.org
Additional Information: New funding opportunity: Innovative research to advance racial equity; As we enter into a year and a half of the pandemic there’s no doubt that we have had many difficult conversations as a country. One particular topic we should not stop discussing is the harm structural racism has on the health and well-being of society and how we can dismantle it.; RWJF’s Evidence for Action program is currently seeking proposals to evaluate specific policies, programs, and practices that have the potential to contribute to dismantling and counteracting the harms of structural and systemic racism and improving health, well-being, and equity outcomes. Knowing that some approaches to disrupting racism are in early stages of development; other types of research that can advance racial equity will be considered.; Learn more about eligibility an selection criteria >

**Link(s):** [https://www.czbiohub.org/czbiohub-network-applications/](https://www.czbiohub.org/czbiohub-network-applications/)

**Additional Information:** Columbia University Coordination on CZ Biohub Letter of Intent; Dear Faculty: The Chan Zuckerberg Initiative recently announced a competition for a new **Chan Zuckerberg Biohub** to focus on developing new technologies to measure and observe human biology in ways that help deepen our understanding of human health and disease. The ideal scientific themes should be interdisciplinary in nature, have large engineering challenges to conquer, and should be wildly ambitious. The focus area of this new CZ Biohub should further diversify CZI’s existing research portfolio, which includes: infectious disease and quantitative cell science (San Francisco CZ Biohub); neuroscience and artificial intelligence (Kemper Institute for the Study of Natural and Artificial Intelligence at Harvard University); and the Chan Zuckerberg Institute for Advanced Biomedical Imaging.; The Letter of Intent (LOI) requires a minimum of three geographically proximate institutions collectively to propose a concept for the CZ Biohub. As an organizational structure, the CZ Biohub will be a nonprofit medical research organization that will enter into a collaboration agreement with its institutional partners, enabling the new CZ Biohub to support research at its partner
Institutions. Funding is anticipated in the $200–250 million range, over an initial ten-year period, with the possibility for an additional five-year commitment of funds; Columbia plans to endorse only one institutional partnership application for this opportunity. The EVPR’s Office is working with schools to determine the theme and institutional partners for our Chan Zuckerberg Biohub LOI. I will appoint and convene a faculty committee to coordinate with relevant deans, Provost Boyce, and colleagues in Development on next steps; Please direct any questions to EVPR@columbia.edu with “CZ Biohub” in the subject line; Sincerely, Jeannette M. Wing; Executive Vice President for Research; Professor of Computer Science; Columbia University

RWJF; Pioneering Ideas: Exploring the Future to Build a Culture of Health

**Sponsor:** RWJF  
**Deadline(s):** Open  
**Contact:** pioneeringideas@rwjf.org  
**Additional Information:** What can we do today to create a better, more equitable tomorrow? Through this new funding opportunity, RWJF seeks to understand and anticipate what dramatic changes we might see in the next five to 15 years in four areas: 1) Future of Evidence; 2) Future of Social Interaction; 3) Future of Food; and Future of Work. Additionally, this call for proposals seeks to support unconventional approaches and breakthrough ideas outside of these areas that could improve health equity and well-being for generations to come. We welcome proposals from scientists, anthropologists, artists, urban planners, community leaders—anyone, anywhere who has a cutting edge idea that could alter the trajectory of health and increase opportunities for everyone in the United States to live their healthiest life possible. Please note, while this CFP is focused on broader and longer-term societal trends and shifts that were evolving prior to the COVID-19 outbreak, we recognize the unique circumstances and learning created by the COVID-19 pandemic may inform your response. It is at your discretion whether you propose a project related to the pandemic directly or indirectly.

Additional Information: ViCTER RFA Released!; Hello Colleagues, Just wanted to share information about the release of NIEHS’s Request for Applications (RFA) for the multi-disciplinary “Virtual Consortium for Translational/Transdisciplinary Environmental Research (ViCTER)” RFA-ES-21-007, which posted yesterday evening.; The purpose of the ViCTER program is to foster and promote early-stage transdisciplinary collaborations and/or translational research efforts to address fundamental research among basic (technology and mechanism oriented), clinical (patient-oriented) and population-based researchers in
the environmental health field. The newly established collaborative teams will come together in common interest to investigate potential linkages between human health and one or more environmental stressor(s). The ViCTER program is intended to support innovative high-risk, high-reward transdisciplinary/translational research projects that are more difficult to achieve in a typical R01 application. Collaboration among investigators at different institutions through a virtual consortium arrangement is encouraged. The next due date is February 1, 2022. There will be a free informational webinar on November 18th from 2-3pm ET. Please visit the ViCTER webpage for a link to register to the webinar and for any updates related to this announcement: https://www.niehs.nih.gov/research/supported/translational/victer/index.cfm; I invite you to share this announcement with teams of researchers who might be interested in this funding mechanism. If you have questions, please don’t hesitate to reach out to me.; Thank you, Heather Henry; [brought to our attention by] Heather F. **Notice to Extend Eligibility for Submission of Diversity K22 Applications due to COVID related Disruptions**  
**Sponsor:** National Institute of Neurological Disorders and Stroke  
**Deadline(s):** NINDS understands that COVID-19 has caused a major disruption in the ability of many individuals to make progress on their research. Though subject to future updates, NINDS now will provide at least a 2-receipt cycle extension (roughly 8 additional months) of eligibility for individuals whose eligibility to apply for the K22, under normal eligibility rules (including resubmission policy as defined in NOT-OD-18-197), is expiring between June/July 2020 and February/March 2021 (inclusive of these dates). In addition, those who normally would have been eligible to apply for the June/July 2021 receipt date will have a 1-receipt cycle (roughly 4 months) extension.

Special Exception to the NIH/AHRQ/NIOSH Post-Submission Material Policy During the COVID-19 Pandemic

**Sponsor:** National Institutes of Health (NIH); Agency for Healthcare Research and Quality (AHRQ); The National Institute for Occupational Safety and Health (NIOSH)

**Deadline(s):** For applications submitted for the January 2021 council (beginning with applications submitted for the May 25, 2020 due date for Fall 2020 review meetings), the NIH, AHRQ, and NIOSH will accept a one-page update with preliminary data as post-submission materials for applications submitted under all activity codes, ONLY if the Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application.; The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications. All other materials listed in NOT-OD-19-083 as acceptable post-submission materials will continue to be accepted if submitted 30 days before the study section meeting.

Research Resources has been apprised that the R2eport distribution email to Faculty and other colleagues at times sorts to MS Outlook’s “Other” vs. “Focused” tab when web accessed. You may move an email from the “Other” to “Focused” in box tabs, by selecting Move to Focused if you want only the selected message moved; or you may select Always Move to Focused if you want all future messages from the sender to be delivered to the Focused tab. You may also Turn off Focused In Box when accessing MS Outlook via the web by accessing the settings (cog icon adjacent to your initials), accessing “all outlook settings”, activating the “Don’t sort my messages” button and saving this setting. Rectifying email sorting to Outlook’s Junk folder, may also be addressed. R2eports are posted weekly on our Reports Page

NIH Guide Notice on Delayed Enforcement and Short-Term Flexibilities for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants

Deadline(s): NA; 07/20/2018 (Release Date)  
Contact: Please direct all inquiries to: NIH Grants Information; Email: grantsinfo@od.nih.gov (preferred method of contact); [brought to our attention by] Stephanie F. Scott, MS, CRA; Director of Policy and Research Development; Columbia | Research; Sponsored Projects Administration; Email: stephanie.scott@columbia.edu; or sfs2110@cumc.columbia.edu; Website: https://spa.columbia.edu/  
Additional Information: NIH Guide Notice on Delayed Enforcement for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants; As I previously announced a few weeks ago, NIH will be delaying enforcement for some requirements affecting prospective basic science studies that also meet NIH’s definition of a clinical trial. NIH just released the official notice stating this, along with their future plans: https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-212.html ; Please read the notice in its entirety. The Council on Governmental Relations (COGR) provided a summary below. Here are some highlights: (*) Registration and Reporting: NIH still expects the registration and reporting of these prospective basic science studies, but is giving flexibility to allow reporting on existing basic science portals, and expects the data to eventually be transported to ClinicalTrials.gov. Flexibility given through September 24, 2019. They are issuing a Request for Information (RFI) to collect stakeholder feedback on this topic; (*) Funding Opportunity Announcements (FOAs): NIH will not administratively reject any proposal application for submission to an incorrect FOA based on study-type designation, and they plan to issue an FOA specifically for prospectively basic science studies in November for due dates starting on January 25th, 2019; (*) The PHS Human Subjects and Clinical Trial Information Form (new in FORMS-E) – they still expect that form for all applications involving prospective basic science studies.; (*) Good Clinical Practice (GCP) training is still being enforced for all personnel involved in the conduct, oversight, or management of prospective basic science studies involving human participants. As a reminder, Columbia offers GCP training in Rascal through Course TC3450. For more information, see https://research.columbia.edu/content/good-clinical-practice-training or email NIH-GCP@columbia.edu ; Please read the notice in its entirety for more information, and stay tuned for more updates from me on this topic; [brought to our attention by] Stephanie F. Scott, MS, CRA; Director of Policy and Research Development; Columbia | Research; Sponsored Projects Administration; Email: stephanie.scott@columbia.edu; or sfs2110@cumc.columbia.edu; Website: https://spa.columbia.edu/; NIH Guide Notice on Delayed Enforcement for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants; Dear COGR Members, NIH issued the following Guide Notice this morning, Delayed Enforcement and Short-Term Flexibilities for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants.; As you know, COGR and other organizations have expressed concern that the NIH clinical trial case studies broadened the agency’s definition of “clinical trial” to include basic science studies involving human participants. NIH, in response to report language in the Consolidated Appropriations Act of 2018, has released this notice NOT-OD-18-212 which delays enforcement of registration and reporting policies for prospective basic science studies involving
human participants under NOT-OD-16-149. Per the notice, “through September 24, 2019, NIH will continue to expect registration and reporting for prospective basic science studies involving human participants, with additional flexibility to allow reporting on existing basic science portals, with the expectation that data will eventually be transported to ClinicalTrials.gov.” NIH will issue a Request for Information (RFI) to seek additional input “on registration and results reporting standards best suited for prospective basic science studies involving human participants.”; The notice also provides a period of “leniency for applications submitted to the incorrect FOA based on the study type designation” during which time NIH will not “administratively reject any application for submission to an incorrect FOA based on study-type designation.” The notice also indicates that the agency “plans to issue FOAs specifically for prospective basic science studies involving human participants.” Please see the notice for details.; Lisa Nichols, Ph.D.; Council on Governmental Relations; 1200 New York Avenue, N.W., Suite 460; Washington, D.C. 20005; lnichols@cogr.edu; 202-289-6655

**Additional Information:**

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about they the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.
- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.
- **2 weeks prior to submission deadline**—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.
Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions (if the support services have not been utilized for the grant) of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types (such as R21s) that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@columbia.edu.

Best wishes,
Pam Factor-Litvak

NIH single IRB (sIRB) policy
Sponsor: NIH
Deadline(s): (for NIH application submissions on or after) 01/25/2018
Contact: If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites; If Columbia University is being proposed as one of the participating sites in an application to be submitted this month or soon after by another applicant organization, you must also contact the HRPO immediately. Moving forward, it is recommended that you contact the HRPO as soon as a decision is made to participate in a multi-site study to which the NIH sIRB Policy applies.; An official process that details the requirements for addressing the NIH sIRB Policy is being finalized, to be released shortly. In the meantime, PIs and/or departments can reach out to irboffice@columbia.edu to inform the HRPO about these applications. Upon receipt of your email, HRPO will send you an online form to be completed, and you will be provided with next steps.; In addition, we are offering several options to learn more about the sIRB process. Note: Protocols that address the same research questions, involve the same methodologies, and evaluate the same outcomes are considered to be the “same research protocol.” Additionally, sites that are accruing research participants for studies that are identical except for variations due to local context consideration would be considered to be conducting the “same research protocol”; If you have any questions, please contact irboffice@columbia.edu.; Our website contains resources to help you while you get accustomed to all of the policy changes impacting proposal preparation. We have an Excel checklist to help you complete the new PHS NIH Human Subjects and Clinical Trials Information Form. We also have a one-page reference guide (thank you Katherine Rochmat of School of Social Work for the initial template); https://research.columbia.edu/content/nih-proposal-information; As always, feel free to contact your SPA Project Officer should you have any questions about NIH proposal preparation.; [brought to our attention by] Stephanie F. case studies were added to assist with implementation of this policy. The IRB Data Security Policy was revised to include new terminology and definitions that are included in the IRB HIPAA & Research Policy. Sessions to explain the policy and review the examples will be scheduled. In addition, please let us know if you would like to have us come to your departmental meeting to review the policy!: Revised Standard Operating Procedures (SOPs): Version 5.0 of the IRB’s SOPs were recently released. Included in this version: (*) Comprehensive information on Expanded Access; (*) Incorporation of Columbia’s Institutional Conflict of Interest Policy; (*) Clarifications on when Unanticipated Problems are reported to federal agencies; (*) Updates to the sections regarding recruitment of inpatients at NYP; (*) Addition of the new Single IRB processes; (*) Clarification on the process for IRB disapproval; Process for Implementing the NIH Single IRB Policy: The NIH Single IRB (sIRB) Policy is applicable to new and competing renewal applications/proposals for NIH funding that are due on or after January 25, 2018, and contract solicitations issued on or after January 25, 2018. It is applicable to NIH-funded multi-site domestic studies involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program; If you are preparing an NIH application that is due on or before March 5, 2018, it is important that you contact the HRPO immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND (*) The same research protocol will be conducted at multiple domestic sites.; The HRPO and SPA have developed tools to facilitate implementation of this policy. These tools, including an overview of our process and template language that can used in your grant applications, can be access here. The HRPO’s web page will continue to be updated with additional resources as more information becomes available to facilitate compliance with this policy.; Upcoming HRPO Education Sessions: Monthly IRB-Investigation Monthly Meetings: (*) February 22, 3:30-4:30pm, P&S Amphitheatre 1; (*) March 22, 3:30-4:30pm, P&S Amphitheatre 1; (*) April 26, 3:30-4:30pm, P&S Amphitheatre 1; (*) May 24, 3:30-4:30pm, P&S Amphitheatre 1; We want to hear from you: Please send us your questions as well as suggestions for topics for future education sessions!; We look forward to hearing from you!; Research and Development; and Institutional Review Boards.

Additional Information: I wanted to pass along this email we received from NICHD. Regardless of whether you receive funding from NICHD, I thought it was a great summary of the recent NIH policies concerning human subjects research and the definition of a clinical trial. It also highlights contacting the NIH Program Officials when you are uncertain if your study meets the NIH clinical trial definition.; I promise you will see more communications from me as we prepare you for these proposal application changes in effect for proposals due January 25th, 2018 or later.; Stephanie Scott Changes to NIH policies and procedures related to human subjects research; Dear NICHD Investigator, NIH has broadened its definition of clinical trial, and it may impact your future applications (new, resubmission, or revision) and awards.; NIH’s definition of clinical trial now includes some research approaches not traditionally considered clinical trials. For example, many behavioral or biobehavioral studies that focus on underlying mechanisms of development may now be considered clinical trials. Also, conducting experiments that involve human subjects may be considered a clinical trial. If you are conducting studies involving human subjects, it is very important that you understand this definition and determine whether it applies to your research.; How do I know if my study is a clinical trial?; NIH has four questions that researchers need to answer to determine whether their study is a clinical trial. These questions may use terminology that has a different meaning than the typical meanings understood by certain research...
As stewards of public funding, NIH is implementing changes that will impact you! These policy updates/changes also apply to individuals conducting research through contracts. Why is NIH making these changes? As stewards of public funding, NIH is implementing these changes in support of our scientific and ethical obligation to ensure that the burden and risk that volunteers assume as research participants ultimately contributes to scientific knowledge. In addition, these changes facilitate transparency in how NIH conducts and supports human subjects and clinical trials research and increases dissemination of data and conclusions derived from NIH-conducted or -supported clinical trials. More discussion of the reasons for the policy changes is at: https://grants.nih.gov/policy/clinical-trials-why-changes.htm.

Why is this important? What are the implications if my study is considered a clinical trial? Beginning with applications submitted on or after January 25, 2018, if your application involves a clinical trial, you must: (*) Submit the application through a Funding Opportunity Announcement (FOA) that accepts clinical trials.; (*) Provide additional information in the application, which will be subject to different and distinct review criteria for clinical trials.; If selected for funding, you will need to designate individual(s) to serve as the responsible party for the trial and to register and post results in the ClinicalTrials.gov system.; NIH has also issued other policy updates involving Good Clinical Practice training requirements and the use of Single Institutional Review Board (sIRB) approaches for domestic, multi-site human subjects research. Details about all updates/changes are available at https://grants.nih.gov/policy/clinical-trials.htm; Note: These policy updates/changes also apply to individuals conducting research through contracts.

Please submit the submission form and documents to Craig Kandell at ckk7@cumc.columbia.edu

Additional Information: [adapted from] A MESSAGE FROM DEAN FRIED previously distributed to Faculty; Dear Mailman School faculty; In acknowledgement of the increasingly competitive federal funding environment, the School’s administrative and academic leadership teams have been working to develop new resources to support faculty in preparing grant applications with the highest chance of success. In the fall, we will announce and begin rolling out a suite of such supports; Given the initial fall NIH submission deadline of October 5, I write today to inform you about the first of these resources. The School is providing support for pre-submission external review and for scientific final editing of R01, P, K, Center or other complex NIH proposals for NIH’s October 5 submission deadline, for all full-time faculty with primary appointments in the School. These services will only apply to first submissions (not to resubmissions). Note that, at this time, other grant types such as R03 and R21 are not eligible for this service; For the external review of applications, the PI will be requested to identify an external expert who they think would be willing to review the grant. Please remember that an individual who serves as a reviewer in this way would then become ineligible to review the proposal for NIH. The School will arrange for the review and provide reviewers a $750 honorarium for R01 review and $1,000 for review of P or other more complex proposals. This external review is independent of any departmental review of aims or entire proposals, is independent of review by R5, and is entirely optional; For the final scientific editing, an outside company that has already been used by several departments will be engaged as needed. The editing review will polish writing, help with organization and logical progression, and assist with the production of figures.; Below is the timeline and process for requesting and utilizing these supports: (*) To ensure an adequate amount of time for grant review and/or editing, faculty wishing to participate must first inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) at least five weeks before the grant is due [in the case of the 10/05/2017 deadline, 09/01/2017] that you will be requesting one or both of these services. This request must include: the title of the grant, type of grant, due date, and name of the suggested external reviewer with contact information.; (*) Research Resources will contact the external reviewer to ensure his/her willingness to review within one week. That office will also send the appropriate paperwork for paying the honorarium. Three to four weeks prior to submission, [in the case of the 10/05/2017 deadline], 09/14/2017 (3 weeks) or 09/07/2017 (4 weeks) the PI must send the draft of the science to Craig, who will forward it to the external reviewer to complete his/her review within one week. The external reviewer will return comments directly to Craig and the PI. If you think you cannot meet this timeline, please discuss with Pam Factor-Litvak, Associate Dean for Research Resources.; (*) For editing of grant proposals, Craig will send the revised manuscript to the scientific editor ten to 14 days prior to submission [in the case of the 10/05/2017 deadline], 09/21/2017 – 09/25/2017, and the editor’s comments will be returned to Craig and the PI for finalization and submission within a few days.; If you have any questions about your eligibility or the above process, please contact Pam Factor-Litvak at prf1@columbia.edu; I hope you will consider taking advantage of these new services and that you find them helpful.; With best wishes, Linda P. Fried, MD, MPH; Dean and DeLamar Professor of Public Health; Mailman School of Public Health; Senior Vice President; Columbia University Medical Center; Professor of Epidemiology and Medicine

**Additional Information:** NIH to Limit Total Grant Support to PIs; NIH announced on Tuesday that it will implement a limitation on the total grant support it will provide to principal investigators (PIs) who have multiple awards. The agency will use a “Grant Support Index” that assigns point values to various types of grants. PIs who exceed a set point, linked to having three or more awards with a single PI, will be forced to adjust their portfolio with reduced resources. NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH insists that no existing awards will be rescinded. An article posted by Nature reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.
