[NTW] [WEEKLY HIGHLIGHT/NIH ANNOUNCEMENTS]

xTRACT will be required in FY2020

**Sponsor:** National Institutes of Health (NIH); Agency for Healthcare Research and Quality (AHRQ)

**Deadline(s):** xTRACT will be required in FY2020

**Contact:** Please direct all inquiries to: NIHTrain@mail.nih.gov

**Additional Information:** xTRACT will be required in FY2020; Last week, an announcement came out from NIH & AHRQ that stated “beginning in early FY 2020, NIH and AHRQ intend to require the use of the xTRACT system in the eRA Commons to prepare the required data tables for certain types of training grant applications.”; You can read the full announcement here: [https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-133.html](https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-133.html); Here is the important part: “Beginning with RPPRs due on or after October 1, 2019 and applications submitted for due dates on or after January 25, 2020, NIH and AHRQ anticipate that they will mandate that required training data tables submitted with T32, TL1, T90/R90, and T15 applications and progress reports be created via the xTRACT system. System validations in Grants.gov and the RPPR module will check to ensure that tables were created via xTRACT, and applications and RPPRs that are not in compliance will be rejected.”; Here at Columbia, we’ve been encouraging the use of xTRACT since its inception since October 2015, and we participated as volunteers in its early development. We do have training materials, videos, and we’ve done webinars as well. All of these items can be found on our website at [https://research.columbia.edu/content/nih-institutional-training-grants](https://research.columbia.edu/content/nih-institutional-training-grants). Look at BOTH the ‘Training, Presentations, Videos’ section and ‘Data Tables and xTRACT. We will continue to provide training opportunities in the future.; If you have not touched xTRACT yet, using it for an upcoming RPPR would be a good way to get familiar with it. NIH & AHRQ will provide more guidance as we get closer to their required use, and I will be sure to update you.; [brought to our attention by] Stephanie F. **New NIH funding opportunity PAR-18-552 for Aging & Cancer Research opens May 8**

**Sponsor:** National Institutes of Health (NIH); National Cancer Institute (NCI); National Institute on Aging (NIA); Samuel Waxman Cancer Research Foundation (SWCRF)

**Deadline(s):** 06/08/2018; 06/09/2018 (Expiration)

**Contact:** Scientific/Research Contact(s); Chamelli Jhappan, Ph.D.; National Cancer Institute (NCI); Telephone: 240-276-6200; Email: jhappanc@mail.nih.gov

**Additional Information:**

New NIH funding opportunity PAR-18-552 for Aging & Cancer Research opens May 8; Dear Dr., On behalf of Dr. Samuel Waxman, Founder and CEO of the Samuel Waxman Cancer Research Foundation, I’m writing to share an exciting funding opportunity to address the increased burden of cancer associated with aging. We are spotlighting the news of this innovative collaborative grant within the scientific community and encourage you to apply to it. We would greatly appreciate it if you also shared this information with the investigators at your institution who should apply.; The Partnership for Aging and Cancer Research, a new U01 grant opportunity that arose from discussions led by The Samuel Waxman Cancer Research Foundation (SWCRF), was recently announced by the National Cancer Institute (NCI), the National Institute on Aging (NIA), and SWCRF. This Funding Opportunity will promote research regarding mechanisms by which aging affects cancer onset, progression, metastasis, and/or therapeutic response.; A distinctive aspect of the program is that it requires collaboration between an extramural scientist and an investigator in either the NCI Center for Cancer Research and/or the NIA Intramural Research Program.; Please review the following links to find intramural investigators with whom you can explore a collaboration: (*) The NCI intramural program: [https://ccr.cancer.gov/](https://ccr.cancer.gov/); (*) Directory of all NCI principal investigators: [https://ccr.cancer.gov/research/find-researcher/](https://ccr.cancer.gov/research/find-researcher/); Potential topics, which largely arose from the Aging and Cancer Symposium convened by the SWCRF in 2016, include: [1] The decline in tissue maintenance in old age and its link to rising cancer incidence; [2] Mechanisms of aging-associated changes in stem cell function and relevance to cancer; [3] Mechanisms of clonal evolution in somatic tissues with age; [4] Contributions of the microenvironment in aging-associated tumor formation; [5] Inter-organ system communication in aging and cancer; [6] Chromatin/epigenetic mechanisms in aging and cancer; [7] Mutation and/or de-repression of non-coding genome in aging and cancer; [8] Aging-associated DNA damage response pathways and genomic instability in cancer; [9] Aging-associated changes in metabolism in cancer; [10] Human premature aging disorders as model systems of aging-associated cancer formation; [11] Novel mouse models to study aging in cancer; [12] Cellular mechanisms contributing to direct and inverse comorbidities in aging; Several awards are expected of up to $75,000 (direct costs) to the extramural investigator per year for two years, and a similar award will be given to the intramural collaborator; thus, the total annual budget is up to $150,000 per project per year for two years.; The application is due June 8, 2018. Proposals will be reviewed in October/November, 2018 by a Special Advisory Board.; The entire FOA # PAR-18-552 can be viewed at: [https://grants.nih.gov/grants/guide/pa-files/PAR-18-552.html](https://grants.nih.gov/grants/guide/pa-files/PAR-18-552.html); Please feel free to contact Dr. Waxman with any questions you may have about the FOA at 212-241-7995 or samuel.waxman@mssm.edu.; Sincerely, [brought to our attention by] Edgar Trinidad; Director, Marketing & Communications; Samuel Waxman Cancer Research Foundation; 420 Lexington Avenue, Suite 825; New York, NY 10170; Ph: 646-398-5261; etrinidad@waxmancancer.org; www.waxmancancer.org [*]
Outsourcing of IRB Review for NIH Single IRB Policy

**Sponsor:** NIH/IRB OFFICE AT COLUMBIA

**Deadline(s):** Now in effect; 01/25/2018 (Effective Date)

**Contact:** Please contact the HRPO at (212) 305-5883 or by email at irboffice@columbia.edu if you have any questions

**Link(s):** https://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-094.html

**Additional Information:** Outsourcing of IRB Review for NIH Single IRB Policy; Dear Colleague,

As previously announced, the NIH Policy on the Use of a Single Institutional Review Board for Multi-Site Research ("NIH sIRB Policy") is now in effect; This notice confirms that, for the foreseeable future, the role of Single (Reviewing) IRB as required by the NIH sIRB Policy will be outsourced to Western IRB (WIRB) when a grant or contract is subject to the Policy, Columbia is the Applicant Organization, and Columbia is responsible for IRB review for all sites.; Process: (*) Please contact the Human Research Protection Office (HRPO) by email at irboffice@columbia.edu as soon as possible when preparing an application if the NIH sIRB Policy applies, or if you need assistance in making that determination. ; (*) Upon confirmation that Policy applies, the HRPO will link you to a contact at WIRB, who will provide an estimate for serving as the Single (Reviewing) IRB. ; (*) The HRPO will provide a letter of support, documenting Columbia’s agreement to outsource the review of this study to WIRB should it be funded, and template language that can be used as the sIRB Plan in the application.; NIH sIRB Policy requirements: (*) Applicable to new and competing renewal applications/proposals for NIH funding that are due on or after January 25, 2018, and contract solicitations issued on or after January 25, 2018; (*) Applicable to NIH-funded multi-site domestic studies involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program; (*) Requires that a sIRB Plan be included as part of your grant application, when applicable; (*) Allows the Single (Reviewing) IRB to charge a fee to offset the cost of serving as the IRB for multiple sites. This fee is to be included as a Direct Cost in your grant budget.; The Policy [was scheduled to be] covered in the Monthly IRB-Investigator Meeting on February 22, from 3:30-4:30 in the P&S Amphitheatre 1. We look forward to seeing you there. Please contact the HRPO at (212) 305-5883 or by email at irboffice@columbia.edu if you have any questions.; This message has been sent by the Columbia University Human Research Protection Office. ; if you have questions, please contact: https://research.columbia.edu/irb; Medical Center Office: Phone: 212.305.5883; e-mail: irboffice@columbia.edu; Morningside Office: Phone: 212.851.7040; e-mail: askirb@columbia.edu
MAILMAN INTERDISCIPLINARY RESEARCH PILOT GRANT AWARDS; Pilot Funding in Preparation for submitting R01, P01, U01, and related NIH grants; LETTERS OF INTENT: DUE FEBRUARY 23, 2018; AWARDS PROPOSALS: DUE MARCH 16, 2018

Sponsor: Mailman School

Deadline(s): 02/23/2018 (LOI); 03/16/2018 (Award Proposals)

Contact: Investigators interested in submitting applications are encouraged to discuss them with Associate Dean for Research Resources, Dr. Pam Factor-Litvak pf1@columbia.edu or Vice Dean for Faculty Affairs and Research, Regina Santella rps1@columbia.edu; For administrative issues contact Craig Kandell ckk7@columbia.edu

Additional Information: MAILMAN INTERDISCIPLINARY RESEARCH PILOT GRANT AWARDS; Pilot Funding in Preparation for submitting R01, P01, U01, and related NIH grants; LETTERS OF INTENT: DUE FEBRUARY 23, 2018; AWARDS PROPOSALS: DUE MARCH 16, 2018: Today's challenging public health issues increasingly require contributions at the intersections of academic disciplines. For this reason, the Mailman School of Public Health launched an initiative to foster interdisciplinary research within the school and beyond and created the Interdisciplinary Research Task Force comprised of faculty from across the Mailman School's academic departments and research centers. The Task Force identified four thematic areas for initial exploration and convened workshops on each for faculty from across Mailman departments and centers to present research and discuss synergies in expertise and interests. These topics were: (*) Substance Use and Misuse; (*) Brain Health and Mental Health; (*) Child and Adolescent Health; (*) Precision Health and Predictive Analytics for Disease Prevention; To build on the vast potential for interdisciplinary science in these areas that was evident during the workshops, the Dean's Office has created a pilot grant program to help advance interdisciplinary research concepts to grant applications. The pilot program will support innovative proposals, which are interdisciplinary in scope and that will increase the likelihood of successful funding of NIH R01/P01/U01 or equivalent grants. The expectation is that funded projects will produce at least one NIH grant application per team.; Timeline and Deadlines: Letters of Intent: Due February 23, 2018 (02/23/2018); Proposals: Due March 16, 2018 (03/16/2018); Award notifications: April 1, 2018 (04/01/2018) (anticipated); Deadline for NIH submission: February 5, 2019 (02/05/2019); by selected pilot grant teams; Award Amounts and Selection Process: Pilot applications can request up to $30,000 to support grant development for projects that will produce an investigator-initiated grant application such as an R01 by no later than February 5, 2019. Funding of up to $75,000 will be available to support the development of large center grant applications (e.g., a P01), which will be submitted no later than February 5, 2019. Pilot applications should fully explain why funds are needed to amplify the ability to get a funded grant and justify the amount of funding requested. The Dean's Office will fund up to one project that will lead to a large NIH center grant application and as many interdisciplinary investigator-initiated R01/U01-type grants as are meritorious.; An Internal Review Committee will rigorously evaluate all proposals and review criteria will mirror those used by NIH. Applicants are encouraged to include innovation in analytic methods, in collaboration with faculty from Biostatistics or other Mailman departments. Note that, if areas of expertise are needed and not readily identified, the Dean's office and/or Biostatistics Chair Dr. DuBois Bowman, can assist in identifying potential experts. In considering proposals, emphasis will be placed on the degree to which the project advances Mailman's interdisciplinary research goals and the likelihood of future NIH funding for the project and possibly its extensions.; Deliverables: As a condition of funding, awardees will be required to submit at least one NIH grant application by February 5, 2019. Quarterly progress reports are also required. Given this tight timeline, if the proposal requires IRB approval before starting, the process for obtaining approval should start as early as possible.; Submission Instructions: Letter of Intent: Prospective applicants should submit a letter of intent that includes the following information: (*) Descriptive project title; (*) Brief summary (1-2 paragraphs) of the project activity; (*) Name(s) and department(s) of the PI(s) (multiple PIs are permitted); (*) Names and departments of other key personnel; The letter of intent should be sent to Craig Kandell at ckk7@columbia.edu by February 23. The letter of intent is not binding but will help the review committee to estimate its potential review workload and plan the review process.; Proposal: The format for each project is as follows (page limits do apply): Sections for Each Project: (1) NIH Biosketch for all Key Personnel; (2) Specific Aims [1 page]; (3) (a) Significance, (b) Innovation, and (c) Overview of Research Team. Highlight the impact of interdisciplinary contributions [2 pages]; (4) Approach, including preliminary studies and a timeline for completion. Highlight the impact of interdisciplinary contributions [2 pages]; (5) References; (6) Detailed plans and timeline for NIH grant submission(s); (7) Budget and Justification (may include reasonable salary support for the PI); Contacts: Investigators interested in submitting applications...
are encouraged to discuss them with Associate Dean for Research Resources, Dr. Pam Factor-Litvak, or Vice Dean for Faculty Affairs and Research, Regina Santella. For administrative issues contact Craig Kandell; Frequently Asked Questions: (1) Can funding be used to develop non-NIH proposals? This pilot effort will maintain an NIH focus, since the school’s grant funding objectives link directly to NIH; however, the program will consider projects geared toward other federal grant applications; (2) Is the program open to all NIH funding mechanisms? Yes, while the typical project will produce R01, P01, U01, or similar applications, the program is open to other mechanisms. Keep in mind, however, that this program is a Mailman School investment and the review committee will strongly consider likely return on investment in its work. Therefore, an R03 application may be viewed by the review committee as offering less compelling near-term return on investment than a strong R01 application; (3) Can the research team include investigators outside of Mailman or Columbia University? Yes, the research team may include faculty outside of the Mailman School. However, the proposal must include investigators spanning two or more Mailman School departments or centers, the PI must be a faculty member (professorial or research scientist title) with a primary appointment at the Mailman School, and the grant must be submitted through a Mailman School Department or Center; (4) Are international projects permitted? Yes, with the same requirement as question 3 above; (5) Do projects have to address the topics covered in the workshops? Yes. This pilot program was designed to build on the work of the Interdisciplinary Research Task Force, which identified these four areas as ones for initial exploration. The funding will support the development of grant proposals based on conversations during and subsequent to the Mailman School’s interdisciplinary workshops.

Deadline(s): 03/21/2018 (LOI); 04/15/2018 (Application)
Contact: Please contact Ms. B. Spina at bs2839@cumc.columbia.edu

Additional Information: INTERNAL GRANT AWARDS FOR RESEARCH ON THE NEUROBIOLOGY OF OBESITY; Please do share this funding opportunity with others you feel should receive it! All CUMC faculty and relevant Morningside faculty are eligible to apply. I am trying to share this opportunity as broadly as possible. The Letter of Intent should be sent as a single PDF to Ms. Spina (bs2839@cumc.columbia.edu) by 21 March 2018; Please contact Ms. B. Spina at bs2839@cumc.columbia.edu should you have any questions, and read the attachment and information below. New Opportunity! Sending on behalf of the Russell Berrie Foundation Initiative in the Neurobiology of Body Weight Regulation; Please see attached funding announcement from the Naomi Berrie Diabetes Center. Funds are available to develop new research programs at the interface of neurobiology and metabolism/obesity. Letter of Intent deadline is March 21, 2018; Invited application deadline 15 April 2018; Funding decisions will be made by 15 July 2018; Submission details are in the attachment. ELIGIBILITY: please see attached for further details. For questions, please contact Ms. B. Spina bs2839@cumc.columbia.edu.

**Additional Information:** DoD Anticipated Lung Cancer Research Funding Opportunities (UNCLASSIFIED); More pre-announcements from DoD. This time for their Lung Cancer Research Program. See below; [brought to our attention by Stephanie Scott]; DoD Anticipated Lung Cancer Research Funding Opportunities (UNCLASSIFIED);  
**CLASSIFICATION:** UNCLASSIFIED; Defense Health Program; Department of Defense Lung Cancer Research Program; Anticipated Funding Opportunities for Fiscal Year 2018 (FY18); Due to the current Continuing Resolution, the FY18 Defense Appropriations bill has not been passed. Although funds have not been appropriated for the Department of Defense Lung Cancer Research Program (LCRP), the LCRP is providing the information in this pre-announcement to allow investigators time to plan and develop ideas for submission to the anticipated FY18 funding opportunities.; FY18 LCRP Program Announcements and General Application Instructions for the following award mechanisms are anticipated to be posted on Grants.gov in April 2018. Pre-application and application deadlines will be available when the Program Announcements are released. This pre-announcement should not be construed as an obligation by the Government, and funding of research projects received in response to these Program Announcements is contingent on the availability of Federal funds appropriated for the LCRP.; As directed by the Office of the Assistant Secretary of Defense for Health Affairs, the Defense Health Agency (DHA) J9, Research and Development Directorate manages the Defense Health Program (DHP) Research, Development, Test, and Evaluation (RDT&E) appropriation. The managing agent for the anticipated Program Announcements/Funding Opportunities is the Congressionally Directed Medical Research Programs (CDMRP); Applications submitted to the FY18 LCRP must address at least one of the eight Areas of Emphasis listed below: (*) Identify, develop, or optimize noninvasive or minimally invasive tools to improve the detection of the initial stages of lung cancer, such as, but not limited to, optimizing strategies for management of indeterminate nodules.; (*) Identify, develop, and/or build upon already existing tools for screening or early detection of lung cancer. Screening may include, but is not limited to, imaging modalities, biomarkers, genomics/proteomics/metabolomics/transcriptomics, and assessment of risk factors.; (*) Understand the molecular mechanisms of initiation and progression to clinically significant lung cancer.; (*) Identify innovative strategies for prevention and treatment of lung cancer.; (*) Understand predictive markers to identify responders and nonresponders.; (*) Understand mechanisms of resistance to treatment (primary and secondary); (*) Understand contributors to lung cancer development other than tobacco.; (*) Identify innovative strategies for lung cancer care delivery (clinical management/ surveillance/symptom management).; [http://cdmrp.army.mil/pubs/press/2018/18lcrppreann](http://cdmrp.army.mil/pubs/press/2018/18lcrppreann)

**Concept Award:** (*) Investigators at all academic levels; (*) Supports highly innovative, untested, potentially groundbreaking concepts in lung cancer; (*) Emphasis on innovation; (*) Clinical trials not allowed; (*) **Preliminary data discouraged**; (*) **Military relevance strongly encouraged**; (*) Maximum funding of $100,000 in direct costs (plus indirect costs); (*) Period of performance should not exceed 1 year;  
**Career Development Award:** (*) **Principal Investigator:** Independent investigators at the level of Assistant Professor, Instructor, or equivalent; must be within 5 years of first faculty appointment; (*) **Mentor:** At or above the level of Associate Professor (or equivalent); have a proven publication and funding record in lung cancer research; (*) Supports early-career, independent researchers to conduct research under mentorship of an experienced lung cancer researcher; (*) Clinical trials not allowed; (*) **Preliminary data not required**; (*) **Military relevance strongly encouraged**; (*) Maximum funding of $250,000 in direct costs (plus indirect costs); (*) Period of performance should not exceed 2 years;  
**Idea Development Award:** (*) **Established Investigators:** Independent investigators at or above the level of Assistant Professor (or equivalent); or; (*) **New Investigators:** Investigators that meet the following criteria at the application submission deadline date; (*) Have not previously received a LCRP Idea Development Award or Early Investigator Synergistic Idea Award; (*) Are within 10 years of first faculty appointment (or equivalent); (*) Supports new ideas in the early stages of development representing innovative, high-risk/high-gain research; (*) Emphasis on innovation
and impact; (*) New Investigator category supports applicants early in their faculty appointments or in the process of developing independent research careers; (*) Clinical trials not allowed; (*) Preliminary data required, but may be from outside of lung cancer; (*) Military relevance strongly encouraged; (*) Maximum funding of $350,000 in direct costs (plus indirect costs); (*) Period of performance should not exceed 2 years; Investigator-Initiated Translational Research Award: (*) Independent investigators at or above the level of Assistant Professor (or equivalent); (*) Supports translational research that will develop promising ideas in lung cancer into clinical applications. Translational research may be defined as an integration of basic science and clinical observations; (*) This mechanism is intended to fund a broad range of translational studies, including, but not limited to, the following: (**) Studies advancing/ translating in vitro and/or animal studies to applications with human samples/cohorts; (**) Late-stage preclinical work leading to/preparing for a clinical trial, e.g., Investigational New Drug submission; (**) Correlative studies that are associated with an ongoing or completed clinical trial and projects that develop endpoints for clinical trials; Preliminary data required, but may be from outside of lung cancer; Military relevance strongly encouraged; Maximum funding of $400,000 in direct costs (plus indirect costs); Period of performance should not exceed 2 years; Translational Research Partnership Award: Investigators at or above the level of Assistant Professor (or equivalent); Supports partnerships between clinicians and laboratory scientists that accelerate ideas in lung cancer into clinical applications; One partner is strongly encouraged to be from either a Military Treatment Facility or a VA medical center; Non-Traditional Partnerships are encouraged; Small-scale clinical trials allowed; (*) Preliminary data required, but may be from outside of lung cancer; (*) Maximum combined funding of $900,000 for direct costs (plus indirect costs); (*) Maximum period of performance is 3 years; (*) Military relevance strongly encouraged; A pre-application is required and must be submitted through the electronic Biomedical Research Application Portal (eBRAP) at https://eBRAP.org prior to the pre-application deadline. All applications must conform to the final Program Announcements and General Application Instructions that will be available for electronic downloading from the Grants.gov website. The application package containing the required forms for each award mechanism will also be found on Grants.gov. A listing of all CDMRP funding opportunities can be obtained on the Grants.gov website by performing a basic search using CFDA Number 12.420.; Applications must be submitted through the federal government's single-entry portal, Grants.gov. Submission deadlines are not available until the Program Announcements are released. For email notification when Program Announcements are released, subscribe to program-specific news and updates under “Email Subscriptions” on the eBRAP homepage at https://eBRAP.org. **Additional Information:**

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School's new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared "to support faculty in preparing grant applications with the highest chance of success."

I'm happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: "It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again."

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

- **2 weeks prior to submission deadline**—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services are limited to first-time submissions of R01, P, K, Center, or other complex NIH proposals by full-time faculty with primary appointments in the School. For other grant types and resubmissions, Research Resources is available to provide feedback.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@columbia.edu.

Best wishes,

Pam Factor-Litvak

Additional Information: HRPO and IRB Updates; Dear colleagues, This email provides updates from the Human Research Protection Office (HRPO) on recent new or revised policies, regulations or requirements that may affect IRB activities and requirements.; Status of the Revised Common Rule: The Final (revised) Common Rule, i.e., revisions to Subpart A of the DHHS regulations for the Protection of Human Subjects (45 CFR 46), were published on January 19, 2017, with an effective and compliance date of January 19, 2018 for the majority of the revisions. On January 17, 2018, an Interim Final Rule was released that delays the effective date for 6 months, to July 19, 2018. Certain federal departments and agencies are in the process of developing a proposed rule to further delay implementation.; The HRPO is developing guidance for preparing for the transition to the Revised Common Rule. Stay tuned for more information...; Revised Policies: Revisions have been made to the new IRB Policy on the Privacy Rule and the Use of Health Information in Research (IRB HIPAA & Research Policy) and the IRB Data Security Plans Involving the Use, Storage or Transmission of Electronic Research Data Constituting Sensitive Data (IRB Data Security Policy). The IRB HIPAA & Research Policy, which was released on November 1, 2017, was revised to provide clarifications of definitions, scope, and when a Data Use Agreement is necessary. In addition, several case studies were added to assist with implementation of this policy. The IRB Data Security Policy was revised to include new...
terminology and definitions that are included in the IRB HIPAA & Research Policy. Sessions to explain the policy and review the examples will be scheduled. In addition, please let us know if you would like to have us come to your departmental meeting to review the policy!

Revised Standard Operating Procedures (SOPs): Version 5.0 of the IRB’s SOPs were recently released. Included in this version: (*) Comprehensive information on Expanded Access; (*) Incorporation of Columbia’s Institutional Conflict of Interest Policy; (*) Clarifications on when Unanticipated Problems are reported to federal agencies; (*) Updates to the sections regarding recruitment of inpatients at NYP; (*) Addition of the new Single IRB processes; (*) Clarification on the process for IRB disapproval; Process for Implementing the NIH Single IRB Policy: The NIH Single IRB (sIRB) Policy is applicable to new and competing renewal applications/proposals for NIH funding that are due on or before January 25, 2018, and contract solicitations issued on or before January 25, 2018. It is applicable to NIH-funded multi-site domestic studies involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program;

The HRPO immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND (*) The same research protocol will be conducted at multiple domestic sites; The HRPO and SPA have developed tools to facilitate implementation of this policy. These tools, including an overview of our process and template language that can be used in your grant applications, can be access here. The HRPO’s web page will continue to be updated with additional resources as more information becomes available to facilitate compliance with this policy.

**Additional Information:** NIH grant applicants: Grants.gov downloadable forms submission option retiring Dec. 31; NIH grant applicants: Grants.gov downloadable forms submission option retiring Dec. 31; NIH Grant Applicant, On December 31, 2017, Grants.gov will no longer allow grant applicants to download an entire application form package as a single PDF for offline data entry and later submission.; Since you were involved in a grant application submitted using downloadable forms in 2017, we wanted to provide a final reminder to switch to one of the following submission options for 2018 submissions: (1) NIH’s ASSIST (learn more); (2) Institutional system-to-system solution (if your institution has one); (3) Grants.gov Workspace (learn more); Our submission options page can help you compare features and considerations for each option. Ultimately your office of sponsored research or other group responsible for grant application submissions will decide which option is the best fit for you and your organization.; If there is no business reason to choose one option over another, give NIH’s ASSIST a try. It’s a user-friendly, online solution optimized for NIH applications.; Although Grants.gov will stop presenting their legacy downloadable forms package as an option at the end of this year, Grants.gov and NIH systems will continue to process previously downloaded application packages through March 2018. If you plan to submit a downloaded application package after December 31, 2017, you might want to consider downloading an extra copy of the forms package for the opportunity before Dec 31 just in case you run into a technical difficulty with the original.; Hope you have a great holiday season!; Sheri; Sheri Cummins; Communications & Outreach; NIH Office of Extramural Research; cummins@nih.gov

Changes to NIH policies and procedures related to human subjects research

**Link(s):** https://grants.nih.gov/ct-decision/index.htm
https://grants.nih.gov/policy/clinical-trials.htm

**Additional Information:** I wanted to pass along this email we received from NICHD. Regardless of whether you receive funding from NICHD, I thought it was a great summary of the recent NIH policies concerning human subjects research and the definition of a clinical trial. It also highlights contacting the NIH Program Officials when you are uncertain if your study meets the NIH clinical trial definition; I promise you will see more
communications from me as we prepare you for these proposal
takes of the NIH policies and procedures
results in the ClinicalTrials.gov
- awards; NIH’s definition of clinical trial now includes some
research approaches not traditionally considered clinical trials.
for example, many behavioral or biobehavioral studies that focus
on underlying mechanisms of development may now be
considered clinical trials. Also, conducting experiments that
involve human subjects may be considered a clinical trial. If you
are conducting studies involving human subjects, it is very
important that you understand this definition and determine
whether it applies to your research.; How do I know if my
study is a clinical trial?; NIH has four questions that researchers
need to answer to determine whether their study is a clinical trial.
These questions may use terminology that has a different meaning
than the typical meanings understood by certain research
communities. It’s important to review the FAQs and case studies
provided by the NIH Office of Extramural Research. If you answer
“yes” to each of these four questions, your research will be
considered a clinical trial by NIH: (1) Does the study involve
human participants? (2) Are the participants prospectively
assigned to an intervention? (3) Is the study designed to evaluate
the effect of the intervention on the participants? (4) Is the effect
being evaluated a health-related biomedical or behavioral outcome?; Here is a link that can help you determine if your
research is a clinical trial: https://grants.nih.gov/grants/ct-decision/index.htm;
Why is this important? What are the implications if my study
is considered a clinical trial?; Beginning with applications
submitted on or after January 25, 2018, if your application
involves a clinical trial, you must: (*) Submit the application
through a Funding Opportunity Announcement (FOA) that accepts
clinical trials.; (*) Provide additional information in the
application, which will be subject to different and distinct review
criteria for clinical trials.; If selected for funding, you will need to
designate individual(s) to serve as the responsible party for the
trial and to register and post results in the ClinicalTrials.gov
system; NIH has also issued other policy updates involving Good
Clinical Practice training requirements and the use of Single
Institutional Review Board (sIRB) approaches for domestic, multi-
site human subjects research. Details about all updates/changes
are available at https://grants.nih.gov/policy/clinical-trials.htm; Note:
These policy updates/changes also apply to individuals
conducting research through contracts; Why is NIH making
these changes?; As stewards of public funding, NIH is
implementing these changes in support of our scientific and
ethic obligation to ensure that the burden and risk that
volunteers assume as research participants ultimately contributes
to scientific knowledge. In addition, these changes facilitate
transparency in how NIH conducts and supports human subjects
and clinical trials research and increases dissemination of data
and conclusions derived from NIH-conducted or -supported
clinical trials. More discussion of the reasons for the policy
changes is at: https://grants.nih.gov/policy/clinical-trials/why-changes.htm;
We know this is a lot to process, but we are here to answer your
questions. Please contact your Program Officer with any
questions. If you’re uncertain who your Program Officer is, this
information is available in your Commons account.; Kind regards,
Meredith D. Temple-O’Connor, Ph.D.; Senior Policy Advisor for
Clinical Research; Division of Extramural Research; Eunice
Kennedy Shriver National Institute of Child Health and Human
Development; National Institutes of Health / D1HHS, Bethesda, MD
20892; NICHDTrails@nih.gov; Doing human subjects research? New
policies will impact you! Learn more.; Updated application forms
(FORMS-E) are required for due dates of January 25, 2018 and
beyond – includes new Human Subject and Clinical Trial
Information Form. Take a tour of the new form.

NIH FOAs with FORMS-E

Additional Information: Update: NIH FOAs with FORMS-E; For
those of you planning to submit NIH proposals in February, NIH
has re-issued the Funding Opportunity Announcements (FOAs) for
the Parent R01, R03, R21, and most Career Development Awards
(K-series) with FORMS-E to be used with application due dates
January 25th, 2018 or later. Before initiating an application
package, you must first determine whether the study meets the definition
of a clinical trial, and then select the appropriate FOA:
https://grants.nih.gov/grants/guide/parent_announcements.htm
If submitting an application with a due date before January 25th,
2018 (such as an AIDS-related application due January 7th), you
must select an opportunity that supports FORMS-D. For example,
if preparing an R01 application: (*) Use PA-16-160 (FORMS-D) for
the January 7th 2018 AIDS-related deadline. (*) Use PA-18-345
(FORMS-E) for the R01 clinical trial February 5th deadline.; (*) Use
PA-18-484 (FORMS-E) for an R01 application that is NOT a clinical
trial due February 5th.; Due to the complexity of FORMS-E, in
particular the new PHS Human Subjects and Clinical Trials Information
Form, we very strongly suggest that you submit your proposals
early to SPA and encourage submission five business days prior to
the NIH deadline. ; We have begun testing the new forms in both
ASSIST and InfoEd. Further guidance will be provided soon. Please
feel free to reach out to me, or your assigned SPA Senior Project
Officer, with questions. We will continue to update you.; For more
information on the release of Parent Announcements, see NIH Plans

Announcements.; [brought to our attention by] Stephanie F. Scott,

**Additional Information:** Be Careful to Pick the Right Funding Opportunity Announcement (FOA); In follow-up to the announcement I sent last night, Update: NIH FOAs with FORMS-E, Dr. Mike Lauer of NIH just wrote a blog on the importance of selecting the correct Funding Opportunity Announcement (FOA). See full blog post: Key takeaways: (*) If any part of your study (the specific aims, components, studies, etc) meets NIH’s definition of a clinical trial, then you must select an FOA that allows for clinical trials.; (*) If none of the aims or studies within your project meet the definition, select an FOA that says “Clinical trials not allowed” or “Clinical trials optional”; (*) “The participating organizations may vary between the “clinical trial not allowed” parent FOA and the “clinical trial required” parent FOA for the same activity code. Read the details of each FOA carefully.”; (*) “Note that some institutes that participate on a “Clinical Trial Required” parent may limit their participation to mechanistic studies.”; If you are unsure whether your study meets the definition of a clinical trial, I highly encourage you to reach out to the Program Official named on the FOA to help you make the appropriate determination, and to clarify the appropriate FOA to be selected. Include in your application cover letter the name of the Program Official who assisted you, and confirmed, the selection of the FOA: [brought to our attention by] Stephanie Scott, sfs2110@columbia.edu

[Grant Review Submission Form; submit to Craig Kandell via email at ckk7@columbia.edu] https://rreport.files.wordpress.com/2014/04/mailmansubsmissionformw_08-15-17a.docx

**Additional Information:** [adapted from] A MESSAGE FROM DEAN FRIED [previously distributed to Faculty]; Dear Mailman School faculty,; In acknowledgement of the increasingly competitive federal funding environment, the School’s administrative and academic leadership teams have been working to develop new resources to support faculty in preparing grant applications with the highest chance of success. In the fall, we will announce and begin rolling out a suite of such supports.; Given the initial fall NIH submission deadline of October 5, I write today to inform you about the first of these resources. The School is providing support for pre-submission external review and for scientific final editing of R01, P, K, Center or other complex NIH proposals for NIH’s October 5 submission deadline, for all full-time faculty with primary appointments in the School. These services will only apply to first submissions (not to resubmissions). Note that, at this time, other grant types such as R03 and R21 are not eligible for this service.; For the external review of applications, the PI will be requested to identify an external expert who they think would be willing to review the grant. Please remember that an individual who serves as a reviewer in this way would then become ineligible to review the proposal for NIH. The School will arrange for the review and provide reviewers a $750 honorarium for R01 review and $1,000 for review of P or other more complex proposals. This external review is independent of any departmental review of aims or entire proposals, is independent of review by R2, and is entirely optional.; For the final scientific editing, an outside company that has already been used by several departments will be engaged as needed. The editing review will polish writing, help with organization and logical progression, and assist with the production of figures.; Below is the timeline and process for requesting and utilizing these supports: (*) To ensure an adequate amount of time for grant review and/or editing, faculty wishing to participate must first inform Research Resources (via Craig Kandell at ckk7@cscum.columbia.edu) at least five weeks before the grant is due [in the case of the 10/05/2017 deadline, 09/01/2017] that you will be requesting one or both of these services. This request must include: the title of the grant, type of grant, due date, and name of the suggested external reviewer with contact information.; (*) Research Resources will contact the external reviewer to ensure his/her willingness to review within one week. That office will also send the appropriate paperwork for paying the honorarium. Three to four weeks prior to submission [in the case of the 10/05/2017 deadline, 09/14/2017 (3 weeks) or 09/07/2017 (4 weeks)] the PI must send the draft of the science to Craig, who will forward it to the external reviewer to complete his/her review within one week.

**Additional Information:** To Principal Investigators, Sponsored Projects Administrators; From: Barbara Hough, Vice President, Controller and Treasurer, Rudi Odeh-Ramadan, Associate Vice President for Research Administration; We are writing to inform you that, based on the approval obtained from the Federal government, the fringe rate applicable to government grants and contracts will increase from 28.9% to 30.3%, effective July 1, 2017. For all funding sources other than government grants and contracts, the fringe benefit rate will be 29.75%. The increase in the rate is primarily driven by the significant increase in medical costs the University has experienced over the past several years. Please note that you may wish to take this opportunity to review the impact the change in the fringe benefits recovery rate may have on the allocation of personnel related costs for the remainder of the grant life cycle.; For information regarding student employees working during the academic year or summer, refer to http://finance.columbia.edu/content/fringe-benefit-rates. ; For grants administrators: FY17 Cost Transfers involving sponsored projects will continue to be processed with the FY17 fringe rates through the July 7th deadline. The new FY18 fringe rates will be introduced with FY18 payroll runs; The rate agreement is available on the SPA website on the Institutional Information page and on the Finance Gateway at http://finance.columbia.edu/content/fringe-benefit-rates. ; Any questions about the government fringe rate should be directed to AskRPIC@columbia.edu.

Outreach & Community Benefit Programs Across Columbia University Survey
Sponsor: Columbia
Deadline(s): Please report the outreach programs that you administer via the [linked] form by 07/31/2017. Please submit this form once for each program

Additional Information: Dear Colleagues, We believe we can both help Columbia faculty and staff strengthen the outreach component of their research proposals and extend the impact and longer-term stability of our existing excellent outreach programs by creating a centralized database of such programs for researchers to consult when crafting their proposals. Leveraging our experience base and established partners as well as citing outcomes data of existing programs may strengthen the outreach components of new research grant proposals, and may create an opportunity to share mutual administrative costs.; However, at present no centralized source exists for PIs to identify programs to consider when developing extramural proposals. From community service, to public lectures, to tutoring and mentorship, we wish to catalogue information about all the ways in which Columbians directly interact with the outside community.; Please report the outreach programs that you administer via the following form by Monday, July 31st: HTTPS://GOO.GL/FORMS/XR8vGfHTG4FHMW1; Please submit this form once for each program. The Office of the Executive Vice President for Research will host the catalogued information on their new website, with the new page launched during the late summer months. You will have the annual opportunity to update previously entered information.; Should you have any questions regarding this request, please contact Marley Bauce, Manager of Research Initiatives, at mb3952@columbia.edu. We thank you for helping to catalogue Columbia’s many outreach programs. This effort will only succeed with your participation.; Sincerely, G. http://www.nature.com/news/nih-grant-limits-rike-biomedical-research-community-1.21949

Additional Information: NIH to Limit Total Grant Support to PIs; NIH announced on Tuesday that it will implement a limitation on the total grant support it will provide to principal investigators (PIs) who have multiple awards. The agency will use a “Grant Support Index” that assigns point values to various types of grants. PIs who exceed a set point, linked to having three or more awards with a single PI, will be forced to adjust their portfolio with reduced resources. NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH says that it believes 6 percent of PIs will be affected and that resources will be freed up to fund about 1,600 additional awards. NIH insists that no existing awards will be rescinded; An article posted by Nature reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.

rate is primarily driven by the significant increase in medical costs the University has experienced over the past year; Please note that you may wish to take this opportunity to review the impact the change in the fringe benefits recovery rate may have on the allocation of personnel related costs for the remainder of the grant life cycle.; With respect to students, the fringe benefit rate applicable to salaries funded by government projects will not change and will remain at 8.15%. For all funding sources other than government projects, the fringe benefit rate will be 8.15%; For grants administrators: FY16 Cost Transfers involving sponsored projects will continue to be processed with the FY16 fringe rates through the July 15 deadline. The new FY17 fringe rates will be introduced with FY17 payroll runs.; The rate agreement is available on the SPA website on the Institutional Information page. It will be posted on the Finance website shortly.; Any questions about the government fringe rate should be directed to Carl Sparano at email cs16@columbia.edu or voice 212-854-1049.

Two items NIH fellowship applicants should be aware of

**Additional Information:** Please pass this on to anyone you know whom may be preparing an NIH individual fellowship application (pre- or postdoc); Anyone who started a grant application for any of these fellowship opportunities prior to June 8, 2016 must return to the funding opportunity announcement and begin again.; There were problems in the fellowship forms packages attached to the funding announcements. NIH has since corrected the problem. See below for details, and https://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-106.html. Impacts the Parent fellowship funding announcements as well as PA-16-130 from NIGMS and PAR-16-210 from NICHD. [forwarded to our attention by Stephanie Scott, SPA Communications and Outreach Director, sfs2110]; NIH Fellowship applicants, I’d like to bring two issue to your attention: (1) Anyone who started a fellowship application between June 3 and June 7 must return to their funding opportunity announcement to get an updated application package (NOT-OD-16-106); (2) If you use Grants.gov downloadable forms or Workspace to prepare your application, be aware that the “View Attachment” button associated with the 23. Resource Sharing Plan attachment on the PHS Fellowship Supplemental form displays the 22. Select Agent Research attachment instead of the expected one. This is simply an issue with the Grants.gov form interface. It does not impact how the attachments are sent to NIH or how we assemble your application image in eRA Commons.; We are working with Grants.gov to address the issue. In the meantime, do not rely on the “View Attachment” feature for the Resource Sharing Plan. Instead, carefully check your attachments prior to uploading them and again when viewing your application image in eRA Commons.; This issue only impacts the PDF version of the form. If you use ASSIST or a system-to-system solution to prepare your application, then you are not impacted.; If you have any questions, please contact Grants Information at grantsinfo@od.nih.gov; Sheri; Sheri Cummins; Chief, Grants Information; Division of Communications and Outreach; NIH Office of Extramural Research; cummins@mail.nih.gov; 301-496-3405;

ensure successful submission. We will reissue fellowship, career development, training and all parent funding opportunity announcements this spring to ensure the announcements include instructions that match the form requirements. We’ll also make a variety of resources available this spring to help ensure you submit using the right forms; if you have been using the Grants.gov downloadable forms and haven’t tried ASSIST yet, members of my staff (the electronic Research Administration or eRA) are working on enhancing the copy application feature to make it easier to move your application (including attachments) from one form version to another. During the last round of grant applications, over 25% of the applicants switched from using downloadable forms to ASSIST. They successfully submitted their applications on the first try over 90% of the time compared with only 60% of the time for those still using the standard downloadable forms. So be on the lookout for new application instructions we will release at the end of November, and for more communications from us as we get closer to the time we move to FORMS-D;

**Additional Information:** This Notice is to inform potential applicants and offerors that the requirements of the Vertebrate Animals Section (VAS) of grant applications, cooperative agreements and contract proposals has changed. The changes have been made to remove redundancy with Institutional Animal Care and Use Committee review while meeting the requirements of the Public Health Service Policy on Humane Care and Use of Laboratory Animals. Updated VAS Requirements: If live vertebrate animals are to be used, federal policy requires applicants to address the following criteria: (*) Description of Procedures. Provide a concise description of the proposed procedures to be used that involve vertebrate animals in the work outlined in the application or proposal. Identify the species, strains, ages, sex and total number of animals by species to be used in the proposed work. If dogs or cats are proposed, provide the source of the animals; (**) Justifications. Provide justification that the species are appropriate for the proposed research. Explain why the research goals cannot be accomplished using an alternative model (e.g., computational, human, invertebrate, in vitro); (**) Minimization of Pain and Distress. Describe the interventions including analgesia, anesthesia, sedation, palliative care and humane endpoints to minimize discomfort, distress, pain and injury; (**) Euthanasia. State whether the method of euthanasia is consistent with the recommendations of the American Veterinary Medical Association (AVMA) Guidelines for

Stay tuned for more.; **Steph:** We periodically need to update our application forms and instructions to accommodate changing policy, new business needs, and sometimes (not often enough) to reduce the amount of information we ask of you. Given our constraints, we have been working to provide systems support to make the mechanics of these transitions easier for you. This particular set of changes implements a number of policy changes impacting applications submitted in 2016, which we announced in a series of recent NIH Guide notices. We would like to give you a quick overview of what is happening.; We will be rolling out the changes in two phases, as summarized in this notice published in the NIH Guide, since our new application forms will not be ready until the spring.; You may want to pay particular attention to the following changes, effective for applications submitted on or after January 25, 2016: (*) There will be new application requirements and review language regarding enhanced rigor and reproducibility (We’ll be elaborating on these requirements in a separate upcoming post.); (*) We will ask for less information in the vertebrate animal section of the application, to remove redundancy with information already included in IACUC reviews. (Some of this information will be shifted to the research strategy section.); (*) We are updating the NIH policy on inclusion of children to lower the age designation for children to include those under 18 years old. (The current age designation for children includes all research subjects under 21 years old.); (*) For training grants, information requirements will change and lower applicant burden; For due dates of May 25, 2016 and beyond, we will require use of new application forms (FORMS-D). We will remind you again this spring, but please understand that it is imperative that you submit your application on the right form package to

NIH & AHRQ Announce Transition to New Research Training Table Formats for 2016 and Upcoming Release of the xTRACT System; 
**Sponsor:** National Institutes of Health; Agency for Healthcare Research and Quality; 
**Deadline(s):** NA Release Date: 10/13/2015; 
**Contact:** Please direct all inquiries to: NIHTrain@mail.nih.gov; 
**Link(s):** http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-007.html; 
**Additional Information:** This Notice serves to announce the availability of new research training data tables for use with FY 2016 institutional training grant applications and research performance progress reports (RPPRs). Table formats, instructions, and a completed set of tables with sample data may be found on the NIH website at: http://grants.nih.gov/grants/funding/424/datatables.htm. Where specified in the Funding Opportunity Announcement for a program, these tables may also be used in institutional career development and research education applications and RPPRs. 
*Background and Related Information:* In keeping with the recommendations of NIH’s Advisory Committee to the Director’s Working Group on the Biomedical Research Workforce, we plan to introduce an electronic system, xTRACT, for creating research training data tables and storing the information reported in those tables. xTRACT is expected to be available for users to access via the eRA Commons beginning October 16, 2015. In conjunction with the development of xTRACT, and to implement related recommendations from the Working Group, we have revised existing research training data tables to: (*) Reduce the number of tables from 12 to 8; (*) Minimize the reporting of individual-level information; (*) Extend the tracking of trainee outcomes from 10 to 15 years; Where possible, existing data will be used to pre-populate the xTRACT system, including trainee names and selected characteristics, institutions, grant numbers, and subsequent NIH, AHRQ and other HHS awards.

NIH & AHRQ Announce New Form for PHS Awarding Component and Peer Review Requests;

**Additional Information:** Applicants who want to communicate requests pertinent to the assignment and initial peer review of applications must use a new PHS Assignment Request Form beginning with applications for due dates on or after May 25, 2016. Use of this form will ensure applicant requests are effectively communicated to agency staff and may be used to expedite the processing and assignment of applications.

NIH & AHRQ Change Font Guidelines for Applications to Due Dates On or After May 25, 2016; 
**Sponsor:** National Institutes of Health; Agency for Healthcare Research and Quality; 
**Deadline(s):** Release Date: 10/13/2015; For Applications to Due Dates On or After May 25, 2016: 05/25/2016; 
**Contact:** Please direct all inquiries to: NIH Grants Information; Email: grantsinfo@od.nih.gov (preferred method of contact); 
**Telephone:** 301-435-0714; 
**Link(s):** http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-009.html; 
**Additional Information:** This notice informs the biomedical and health services research communities of additional flexibility regarding the fonts used in PDF attachments included in grant applications. For applications submitted for due dates on or after May 25, 2016, the following new guidelines apply: Text in PDF attachments must follow these minimum requirements: (*) Font size: must be 11 points or larger (smaller text in figures, graphs, diagrams and charts is acceptable as long as it is legible when the page is viewed at 100%); (*) Type density: must be no more than 15 characters per linear inch (including characters and spaces); (*) Line spacing: must be no more than six lines per vertical inch; (*) Text Color: must be black (color text in figures, graphs, diagrams, charts, tables, footnotes and headings is acceptable as long as it is legible); Since some PDF converters may reduce font size, it is important to confirm that the final PDF document complies with the font requirements. The following fonts are recommended, although other fonts (both serif and non-serif) are acceptable if they meet the above requirements: (*) Arial; (*) Garamond; (*) Georgia; (*) Helvetica; (*) Palatino Linotype; (*) Times New Roman; (*) Verdana; Legibility is of paramount importance. Applications that include PDF attachments that do not conform to the minimum requirements listed above may be withdrawn from consideration.
Inclusion of Children in Clinical Research: Change in NIH Definition;
Sponsor: National Institutes of Health;
Deadline(s): NA Release Date: 10/13/2015;
Contact: Please direct all inquiries to: NIH Inclusion Policy Officer; Office of Extramural Research (OER); Telephone: 301-435-7124; Email: inclusion@od.nih.gov;
Link(s): http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-010.html;
For more information on the child inclusion policy: https://grants.nih.gov/grants/funding/children/children.htm;
Additional Information: The purpose of this notice is to notify NIH applicants/offerors and grantees/contractors about a change related to the NIH policy on the inclusion of children in clinical research. NIH's long-standing policy has been that children must be included in all human subjects' research, conducted or supported by the NIH, unless there are scientific and ethical reasons not to include them. The policy was developed because medical treatments applied to children are often based upon testing done only in adults, and scientifically evaluated treatments are less available to children due to barriers to their inclusion in research studies. Therefore, applicants / offerors conducting human subjects' research must include a description of plans for including children. If children (or a subset of children) will be excluded from the research, the application or proposal must present an acceptable justification.;
What's Changing: Starting with applications/proposals submitted for due dates on or after January 25, 2016, for the purposes of inclusion policy, the age of a child will be defined as individuals under 18 years old instead of under 21 years old, the current NIH definition of a child for inclusion policy considerations. Applicants / offerors for NIH funding will still be expected to justify the age range of the proposed participants in their clinical research, with particular attention paid to addressing the inclusion (or exclusion) of children (or subsets of children). However, now that threshold applies to individuals under the age of 18 rather than under the age of 21.;
Reason for Change: Consideration of children as a vulnerable population for human protections from research risk and the NIH child inclusion policy are often conflated. While these are distinct policies, many think of children as under 18 years of age, typically the age of consent. This has sometimes led to confusion on the part of applicants/offerors, peer reviewers, grantees/contractors, and even NIH staff about how to ensure compliance with the child inclusion policy. By aligning the NIH definition for the age of a child with the typical age of consent and the common perception of the age of adulthood, the NIH can continue to implement this policy in a manner that focuses on the group of children that need particular attention.; The NIH recognizes that development continues well beyond 18 (and even 21, the current age); however, there is particular concern about ensuring the appropriate inclusion of individuals under 18 while also safeguarding this vulnerable group. NIH policies on inclusion are aimed at ensuring that appropriate individuals are included in clinical research and clinical trials. Results need to be generalizable to individuals that comprise the population under study. This includes consideration of age as a factor in the scientific design.; For more information on the child inclusion policy: https://grants.nih.gov/grants/funding/children/children.htm;

Implementing Rigor and Transparency in NIH & AHRQ Research Grant Applications;
Sponsor: National Institutes of Health; Agency for Healthcare Research and Quality;
Deadline(s): NA Release Date: 10/09/2015;
Contact: Please direct all inquiries to: reproducibility@nih.gov;
Additional Information: This notice informs the biomedical research community of updates to application instructions and review language intended to enhance the reproducibility of research findings through increased scientific rigor and transparency. These updates will take effect for most* research grant applications (including small business and complex research grant applications) submitted for due dates on or after January 25, 2016. For research contracts, this policy will be effective for proposals received on/after January 25, 2016 and expected to result in contract awards in Fiscal Year 2017 and beyond.; Updates include: (*) Revisions to application guide instructions for preparing your research strategy attachment; (*) Use of a new "Authentication of Key Biological and/or Chemical Resources" attachment; (*) Additional rigor and transparency questions reviewers will be asked to consider when reviewing applications; These updates focus on four areas deemed important for enhancing rigor and transparency: (1) 1) the scientific premise forming the basis of the proposed research; (2) rigorous experimental design for robust and unbiased results; (3) consideration of relevant biological variables, and (4) authentication of key biological and/or chemical resources.; The basic principles of rigor and transparency and the four areas of focus apply to the full spectrum of research, from basic to clinical. Investigators will need to consider how all four areas apply to their proposed research. Likewise, reviewers will assess whether these areas have been appropriately addressed by the applicant through revised language defining the peer review criteria. (*)

*Notes & Exceptions: (*) Research grant activity codes excluded from this policy include C06, G08, G11, G12, G13, G20, R13, S06, S10, S21, SB1, U13, U55, UB1, UC6, UC7, UG4, UH4, X02, and 333; (*) Research Resource and Related grants or components (P30, P40, P41, P2C, R24, R28, U24, U41, U42, and U2C) may have slightly revised review language; please refer to the Funding Opportunity Announcement.; (*) Refer to NOT-OD-16-012 for updates to Career Development Award application instructions and review language.; (*) Fellowship and Training grant applications submitted for the May 25, 2016 due date and beyond will include new instructions and review criteria to address this policy. Details on these changes will be available by December 2015;

FY16 Fringe Rates;
Sponsor: http://spa.columbia.edu;
Deadline(s): FY16;
Contact: Please feel free to contact your assigned Project Officer, or SPA-eBiz@columbia.edu; if you have specific questions concerning InfoEd.;
Link(s): http://spa.columbia.edu/proposals/institutional-information;
Additional Information: Dear All, The federal fringe rate changed from 28.2% to 27.1% for FY16. Please see below for details. The new DHHS Rate Agreement, dated 9/21/2015, has been posted to the Sponsored Projects Administration (SPA) website, and can be found at http://spa.columbia.edu/proposals/institutional-information; If you are currently working with your Project Officer on an upcoming proposal submission, she can advise on the budget preparation for the submission. If you are currently working on a proposal in Proposal Development (PD) in InfoEd, the new fringe rate will be reflected in the system next Monday. Budgets will automatically adjust in InfoEd to reflect the new rate for proposals submitted Monday and thereafter; As always, please feel free to contact your assigned Project Officer, or SPA-eBiz@columbia.edu; if you have specific questions concerning InfoEd; Thanks: Rosa [Rivera, Director, Sponsored Projects Administration]; To all Budget Tool users, FY16 Fringe Rates: (*) For salaries charged to government grants and contracts, the FY16 fringe rate is 27.1%; (*) For salaries charged to all other funding sources, the FY16 fringe rate is 30.5%; [emphasis added]: The Budget Tool has been updated with the new government fringe rates and the new fringe benefit assessments have been calculated in the Payroll module. Although the overall fringe assessment on non-government grant accounts is not changing, the split between accounts 59010 and 59020 will shift; The lower fringe rate for government grants and contracts will require users to review their grant projections and make necessary adjustments; [emphasis added]; Users will need to apply these changes to update their FY16 current estimate and future year budgets; Next Steps: When you open the Budget Tool, a message that says “You have unassembled payroll changes” will appear. You must apply and confirm these amounts from the Payroll module and then have them approved before the transaction will post to ARC; If you have any questions, please contact the Finance Service Center, You can log an incident or request a service by using a self-service web form, or you can contact the Service Center by phone at (212) 854-2122 Monday, Tuesday and Thursday, 9:00 am – 5:00 pm; Wednesday 9:30 am – 5:00 pm; Friday 9:00 am – 4:00 pm; Thank you; The Budget Tool Team;

Dear fellow members of the Columbia community,

Now in its 12th year, the University’s Faculty Diversity Initiatives continue to support our core values of inclusion and excellence. The Provost’s Grants Program for Junior Faculty Who Contribute to the Diversity Goals of the University is a key component of Columbia’s ongoing commitment to maintaining a diverse and thriving faculty body. I am pleased to write today to announce the Fall 2016 awardees of the Junior Faculty Diversity Grants program. Grantees were selected through a competitive process, with all applications reviewed by a committee of faculty from both the Morningside and Medical Center campuses. This most recent round of funding follows seven prior rounds of support from this program. Since the Junior Faculty Diversity Grant was launched in 2013 it has supported eighty-two projects across the university. Information on the program and the previous rounds of funded projects can be found here. Please join Vice Provost for Faculty Diversity and Inclusion Dennis A. Mitchell and me in congratulating the recipients of these grants; John H. Coatsworth, Provost; [List of Awardees Fall 2016].

(*) Localization of Stored Platelets to Sites of Active Bleeding Following Transfusion; Richard Francis; Assistant Professor of Clinical Pathology; College of Physicians and Surgeons; (*) In Vivo Imaging of Lung Apoptosis in Alpha-1 Antitrypsin Deficiency; Monica Goldklang; Assistant Professor of Medicine (in Anesthesiology); College of Physicians and Surgeons; (*) The Role of Essentialism in Social Perception; Larisa Heińetz; Assistant Professor of Psychology; Faculty of Arts and Sciences; (*) Tools for Manipulating the Mechanical Forces that Drive Morphogenesis; Karen Kasza; Assistant Professor of Mechanical Engineering; Fu Foundation School of Engineering and Applied Science; (*) Infant Gastrointestinal Tract Microbiome Dysbiosis and its Impact on CD8+ T Cell Gene Transcription Regulation; Esi Lamoué-Smîth; Assistant Professor of Pediatrics; College of Physicians and Surgeons; (*) Mapping Asian Diasporic Performances of Race, Gender and Nation; Ana Paulina Lee; Assistant Professor of Latin American and Iberian Cultures; Faculty of Arts and Sciences; (*) Molecular Changes Related to Infections and Relevant to Pubertal Timing; Jasmine McDonald; Assistant Professor of Epidemiology; Mailman School of Public Health; (*) Intimate Contract: Queer Attachment, Risk and the Word of Law; Tey Meadow; Assistant Professor of Sociology; Faculty of Arts and Sciences; (*) DISTANCED: Intersectionality & Gendered Experience of American Urban Space; Leah Meisterlin; Assistant Professor; Graduate School of Architecture, Planning and Preservation; (*) Textiles, Migration and Trade in Painting; Aliza Nisenbaum; Assistant Professor of Professional Practice; School of the Arts

EBOLA and ZOONOTIC DISEASE

**Message from President Bollinger relative to Ebola;**

**Sponsor:** Columbia University;

**Deadline(s):** NA

**Contact:** If you or anyone has any concerns, please visit the University’s Ebola Preparedness site or the New York City Department of Health Ebola update page. You may also contact Student Health Services at 212-854-2284 or Workforce Health and Safety for Faculty/Staff with Hospital Responsibilities at 212-305-7590.

**Link(s):** If you or anyone has any concerns, please visit the University’s Ebola Preparedness site or the New York City Department of Health Ebola update page;

**Additional Information:** Dear fellow members of the Columbia community: As you may have seen in the media, Dr. Craig Spencer is being treated for Ebola at Bellevue Hospital in New York.
Dear Colleagues,

By now, many of you have learned that a New York Presbyterian physician, Dr. Craig Spencer, who recently returned from treating patients in Guinea, has tested positive for Ebola. I ask you all to keep Dr. Spencer, who recently returned from treating patients in Guinea, in your thoughts, and to keep the Columbia community informed as we learn more from him.

We will also continue to keep you informed of all developments as we continue to work with experts to contain, treat, and understand this outbreak.

At a moment of global distress, public health knowledge is vital. It is important to recognize that this crisis will continue, and that all available scientific information suggests the risk of transmission here is extremely low; Dr. Spencer’s commitment is among many noteworthy examples of our colleagues passing seamlessly from service to science. As we move through this global crisis, we must all take pride in that commitment. Sincerely, Linda Bollinger;

CLARIFICATION - RE: 3rd Reminder-eRA Commons IDs and Complete Profiles Required for Students and Postdocs; The requirement for NIH eRA Commons IDs, as per notice NOT-OD-13-097;

Sponsor: NIH;
Deadline(s): Starting in October 2014;
Contact: Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu/
Additional Information: This is to clarify the requirement for NIH eRA Commons IDs, as per notice NOT-OD-13-097. The Commons IDs, and complete Personal Profiles, are required for postdocs, graduate and undergraduate students when: (*) They have participated at least one person month on an NIH award, regardless if they were paid from the grant; and (*) Their participation is required to be included in Participants Section (D.1) in the Research Performance Progress Report (RPPR) – (*) note some select NIH grant mechanisms may be exempt from reporting in this section. (*) The RPPR Instruction Guide contains Supplemental Instructions for Specific Grant Types (such as training awards and multi-project awards), which can be found at: http://grants.nih.gov/grants/rpr/rprr_instruction_guide.pdf. ; TIP – when preparing your RPPR, click “Check for Errors” prior to routing the report to your SPA Project Officer. You will be alerted of missing eRA Commons IDs and incomplete profiles. This is the best time to contact SPA-eBiz to request IDs, or to alert individuals to complete their Commons profiles; If you are requesting an eRA Commons ID from SPA-eBiz@columbia.edu, please include the following information with your request: (*) Full Name; (*) UNI; (*) Email address; (*) Campus (Morningside or CUMC); SPA-eBiz will work with you to determine the appropriate eRA Commons role.; Please feel free to ask me, or your assigned SPA Project Officer, any questions. Thank you for your patience; Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu/

Reminder-eRA Commons IDs and Complete Profiles Required for Students and Postdocs;
Sponsor: NIH;
Deadline(s): Starting in October 2014;
Contact: Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu/
Link(s): NOT-OD-13-097; NOT-OD-14-092; http://grants.nih.gov/grants/rprr/
Additional Information: This is a reminder that beginning October 2014, Research Performance Progress Reports (RPPRs) lacking an eRA Commons ID for graduate and undergraduate students will receive an error and the RPPR will not be accepted by the NIH without this information. RPPRs that are not accepted could delay issuance of Notice of Grant Awards. See full NIH notice at NOT-OD-13-097. Currently, warnings appear in the eRA Commons screens to alert individuals identified as undergraduate students, graduate students, and postdoctoral researchers that the following fields should be completed in their eRA Commons profiles: date of birth, gender, race, ethnicity,
disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Beginning on October 1, 2014, those fields in the eRA Commons screens will be required for individuals identified in any of those three roles. If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu. In addition, graduate and undergraduate students, and postdoctoral researchers should complete their Personal Profiles in the eRA Commons, ensuring all fields listed above are complete. Tutorials on the Personal Profile can be found at eRA Commons Manage Personal Profile; RPPRs will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rppr/. Therefore, if you have students supported on non-SNAP awards, now is the time to ensure they have eRA Commons profiles completed. Please share this information with your students and postdocs who are supported on NIH grants. If you have any questions, you may contact me, or your assigned SPA Project Officer; Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Ph: 212-854-0606; CUMC Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

Additional Information: NIH: The View From 10,000 Feet: Posted on July 24, 2014 by Sally Rockey; Here on the blog we discuss many different aspects of NIH’s research program – policies, funding trends, workforce issues. A few weeks ago, while I was preparing to give the opening talk at the NIH Regional Seminar on Program Funding and Grants Administration, I realized some Rock Talk readers might be interested in learning more about how these topics fit into the big picture of NIH. So, I asked my colleagues to tape this talk, “NIH: The View from 10,000 Feet”, so I could share it with you on the blog

Dear PIs and Administrators, If you are planning to prepare and submit an NIH multi-project application over the next several months, please let me know. Examples of multi-project grant mechanisms include, but are not limited to, P01, P30, P50, and U19. All multi-project Funding Opportunity Announcements (FOAs) now require proposals to be submitted electronically using ASSIST (Application Submission System and Interface for Submission Tracking). For a listing of all multi-project FOAs, go to http://grants.nih.gov/searchGuide/ComplexOnly.cfm. If you plan to submit a multi-project application in the coming months, please contact me and your SPA Project Officer and we will schedule a time to meet to provide you with training and guidance. Please feel free to contact me if you have any questions. Our website contains many ASSIST resources: http://spa.columbia.edu/electronic-systems/assist. Thank you; Stephanie F. The Columbia University Medical Center IRB Office has a standing "IRB Consultation Hour". This service provides an opportunity for researchers to stop in at the IRB office and meet with an IRB professional to discuss regulatory, policy, and procedural questions. The sessions are scheduled for every Tuesday from 10 am to 11 am. No appointment is necessary. The IRB office is located at 154 Haven Avenue, 1st Floor. Attendees should sign in at the IRB receptionist desk, and will meet with IRB staff in the order of arrival. If situations warrant, individual consultations may be limited to 15 minutes. Important Note: If you have questions about a protocol that has already been submitted to the IRB, please contact the staff members who administer the IRB to which the protocol is assigned rather than bringing those questions to a Consultation Hours session. Staff contact information may be obtained on the IRB website: http://www.cumc.columbia.edu/dept/irb/.

Researchers may also call in during these times, to the IRB main number, for consultation: 212.305.5883. Email: irboffice@columbia.edu;

New Program for NIH-funded Grad Students and Postdocs; Sponsor: NIH;
Deadline(s): Open Ended; Contact: Please contact Rory Flinn (rf2531@columbia.edu); Director of the Office of Postdoctoral Affairs, with any questions about the program;
Additional Information: Dear Colleagues: The Office of the Executive Vice President of Research (EVPR), including the Office of Postdoctoral Affairs, and the Graduate School of Arts and Sciences (GSAS) are pleased to announce the introduction of an individual development plan (IDP) program for National Institutes of Health (NIH)-funded graduate students and postdoctoral researchers (postdocs). An IDP consists of a self-assessment of skills, interests and values that guides the development of short and long term plans to achieve career goals. In 2012, the NIH published a task force report on the current state of the biomedical workforce which found, among other things, that universities need to better prepare biomedical graduate students and postdocs for a broad range of career opportunities beyond academia. As one of a number of initiatives designed to address the recommendations of the task force, the NIH issued a policy, released on July 23, 2013 and revised on August 4, 2014 (http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-113.html), that does not require, but strongly encourages recipients of NIH awards to develop and use IDPs for graduate students and postdocs supported by the NIH. In addition, the revised policy provides that, beginning on October 1, 2014, annual progress reports relating to NIH awards must include a description of whether or not the institution uses IDPs and how they are employed to help manage the training and career development of graduate students and postdocs associated with such awards. The University’s IDP program will begin later this month and will include seminars on topics relating to the development of an IDP. Optional workshops will assist participants in completing an IDP. Career panels and networking events will be held to offer opportunities for participants to learn more about potential career options and the skills and experiences needed to gain employment in a wide array of fields. Complete IDP program details, including registration information, can be found at https://www2.gsas.columbia.edu/idp. Faculty members should strongly encourage their NIH-funded graduate student and postdocs to register and participate in the IDP program. A description of the Columbia IDP program to be utilized in progress reports can be found at https://www2.gsas.columbia.edu/idp/node/3#summary. Please contact Rory Flinn (rf2531@columbia.edu), Director of the Office of Postdoctoral Affairs, with any questions about the program;
Sincerely, G. Michael Purdy; Executive Vice President; Carlos J. Alonso; Dean, Graduate School of Arts and Sciences; Arthur G. Palmer III; Associate Dean for Graduate Affairs; College of Physicians & Surgeons;

Prior Announcement: As the next NIH deadline for Predoctoral (F31) and Postdoctoral (F32) Fellowship applications approaches August 8th, I wanted to take this opportunity to remind applicants, their mentors, and administrators of the new "Additional Educational Information" document required in the applications. All applications lacking this attachment will be considered incomplete and will not proceed to review. Please refer to the following notices regarding this new requirement: NIH Notice of Clarification (F31s); NIH Notice of Clarification (F32s); FAQs for Fellowships; Columbia University’s Office of Postdoctoral Affairs (OPA) provides template language you can include in the "Additional Educational Information" document for F32s. This language can be obtained from the OPA website at: http://www.postdocs.columbia.edu/funding.html. If you have any questions regarding this new requirement, please contact your SPA Project Officer. Thank you;
Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus

Additional Information: Complete Profiles Required for Students and Postdocs; As we get closer to October 2014, I wanted to remind investigators and administrators of the new NIH progress reporting requirement regarding eRA Commons IDs. Postdocs, graduate and undergraduate students supported on NIH awards must have eRA Commons IDs, with complete eRA Commons Personal Profiles. Beginning with NIH progress reports due October 2014, NIH will not accept progress reports that have missing eRA Commons IDs and incomplete profiles. As you are aware, if NIH rejects a progress reports, that could delay issuance of the next year's funding.; Complete eRA Commons profiles are just as important as the ID itself. NIH can reject the progress report if the following fields are not complete in the profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest
The Research Performance Progress Report (RPPR); Sponsor: NIH; Deadline(s): starting October 17, 2014; Contact: Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; CUMC Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu; Link(s): NOT-OD-13-097; NOT-OD-14-092; eRA Commons Manage Personal Profile; Additional Information: The Research Performance Progress Report (RPPR) format will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rppr/. Please share this information with your students and postdocs who are supported on NIH grants. If you have any questions, you may contact me, or your assigned SPA Project Officer; Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu; This is a reminder that beginning October 2014, Research Performance Progress Reports (RPPRs) lacking an eRA Commons ID for graduate and undergraduate students will receive an error and the RPPR will not be accepted by the NIH without this information. RPPRs that are not accepted could delay issuance of Notice of Grant Awards. See full NIH notice at NOT-OD-13-097. Currently, warnings appear in the eRA Commons screens to alert individuals identified as undergraduate students, graduate students, and postdoctoral researchers that the following fields should be completed in their eRA Commons profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Beginning on October 1, 2014, those fields in the eRA Commons screens will be required for individuals identified in any of those three roles; If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu. In addition, graduate and undergraduate students, and postdoctoral researchers should complete their Personal Profiles in the eRA Commons, ensuring all fields listed above are complete. Tutorials on the Personal Profile can be found at eRA Commons Manage Personal Profile; RPPRs will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rppr/. Therefore, if you have students supported on non-SNAP awards, now is the time to ensure they have eRA Commons profiles completed.; Please share this information with your students and postdocs who are supported on NIH grants. submitting Applications with more than 5 budget periods. The bulk of NIH FOAs will continue to use the standard R&R Budget form.

Impact of Biosketch Pilot on Non-pilot Applications: Did you see in the NIH Guide (NOT-OD-14-091) or in RockTalk (Changes to the Biosketch) that NIH is piloting a new biosketch format? The pilot directly impacts applicants applying to a few Funding Opportunity Announcements (FOAs) (e.g., RFA-NR-15-001), but there is an immediate indirect impact to all applicants as well. In order to accommodate the pilot applications, eRA has changed the way we systematically validate the biosketch page limit for all applications. Specifically, a warning will fire if you submit a 5-page biosketch and an error will fire if your biosketch is over 5 pages. Applicants to pilot FOAs can ignore the 5-page warning, but everyone else should take action or risk post-submission rejection of their applications. After your application moves forward to NIH staff, we will do a manual check of the biosketches in applications to FOAs not participating in the pilot. If your non-pilot FOA requires 4 pages, but you included 5 and ignored the warning then your application may not be reviewed. Applicants must read and follow all FOA and application guide instructions – even those that aren’t enforced by electronic systems.

Non-standard Characters in Form Fields: Although NIH systems now support a broader character set including Greek and other non-standard characters, Grants.gov systems currently do not. When completing application form fields type content directly from your keyboard. Avoid cutting and pasting from Word and other word processors - they often convert your plain text to rich text (e.g. Word converts quotes to ‘smart quotes’ that curve towards the text between them and combines two dashes into one long em-dash.) Also, keep your text as simple as possible. The following characters are typically ‘safe’: letters, numbers, spaces, underscores, periods, dashes (not em-dashes), quotes (not smart quotes), parentheses, brackets, ampersands, tildes, exclamation points, commas, colons, semicolons, at signs, number signs, dollar signs, percent signs, plus signs, equal signs, and asterisks. Limit your use of fancier characters to the body of your PDF attachments.

Submitting Applications with more than 5 Budget Periods: Although NIH typically allows only 5 budget periods to be submitted with grant applications, from time to time you will come across a FOA that allows more than 5 budget periods. Most NIH FOAs include the R&R Budget form which only accommodates data collection for 5 budget periods leaving applicants wondering what to do with the rest of the data. Applicants have been forced to use a rather clunky ‘workaround’ that includes adding the additional budget period information in the budget justification. eRA has just added system support for Grants.gov’s R&R Budget 10YR form that will allow for the collection of up to 10 budget periods of data. Going forward, this form will be included with the few, special FOAs that allow more than 5 budget periods. The bulk of NIH FOAs will continue to use the standard R&R Budget form.

Transition to FORMS-C To Complete in August: If it seems like I’ve been talking about transitioning to FORMS-C for a year – I have. On May 30, 2013, we announced our first transition to updated application forms (FORMS-C) for application due dates on/after September 25, 2013 (NOT-OD-13-074). The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs are our last remaining programs to use the older forms. These programs are scheduled to transition to FORMS-C for due dates on/after August 5, 2014 (NOT-OD-14-088) marking the end of a rather lengthy transition. Believe it or not, this summer my friends in policy will start pulling together requirements for the next OMB clearance of the PHS (agency-specific) forms used in our applications (they expire in August 2015). Before you know it we’ll be talking about ‘FORMS-D’ forms. For now, let’s celebrate getting through this one. Woo-hoo!

CYA: Cover Your Application - that’s what you thought I was talking about – right? NIH form packages no longer use a separate, agency-specific PHS Cover Letter form. The version of the SF424 (R&R) cover form included in FORMS-C packages has a new Cover Letter Attachment (item #21 at the very bottom of the form). If you plan to include a cover letter with your application – use this Cover Letter Attachment only! The eRA systems know to keep this attachment separate from your assembled application image and to limit access to it. If you attach it someplace else (e.g., Pre-application attachment on the SF424 (R&R) cover form, Other Attachments on the R&R Other Project Information form) it will become part of your assembled application image and will be visible to everyone with access to your application including reviewers.

[NIH-Investigators] Reminder-eRA Commons IDs and Complete Profiles Required for Students and Postdocs
This is a reminder that beginning October 2014, Research Performance Progress Reports (RPPRs) lacking an eRA Commons ID for graduate and undergraduate students will receive an error and the RPRR will not be accepted by the NIH without this information. RPPRs that are not accepted could delay issuance of Notice of Grant Awards. See full NIH notice at NOT-OD-13-097.

Currently, warnings appear in the eRA Commons screens to alert individuals identified as undergraduate students, graduate students, and postdoctoral researchers that the following fields should be completed in their eRA Commons profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Beginning on October 1, 2014, those fields in the eRA Commons screens will be required for individuals identified in any of those three roles.

If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu. In addition, graduate and undergraduate students, and postdoctoral researchers should complete their Personal Profiles in the eRA Commons, ensuring all fields listed above are complete. Tutorials on the Personal Profile can be found at eRA Commons Manage Personal Profile.

RPPRs will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rppr/. Therefore, if you have students supported on non-SNAP awards, now is the time to ensure they have eRA Commons profiles completed. Please share this information with your students and postdocs who are supported on NIH grants. If you have any questions, you may contact me, or your assigned SPA Project Officer.

Mentorship Matters for the Biomedical Workforce
Posted on June 6, 2014 by Sally Rockey
Nature Medicine asked me to share my thoughts on the role of mentorship in the biomedical workforce, and I want to share this article with Rock Talk readers, as well. ... Mentorship Matters for the Biomedical Workforce: The mentorship of early-career scientists is necessary to their individual career success and the future of the biomedical research enterprise as a whole. Recently launched NIH programs and tools aim to facilitate this important type of training. .... Continue reading →

RPPR Required for Non-SNAP Progress Reports Beginning October 17, 2014
NIH currently requires use of the fed-wide progress reporting format — known as the RPPR (Research Performance Progress Report) — to submit progress reports for Streamlined Non-competing Award Process (SNAP), fellowship, and multi-year funded awards. In April we opened the RPPR for use for all Type 5 Non-SNAP progress reports in anticipation of an October 2014 requirement for RPPR use. Now, it’s official — all type 5 non-SNAP progress reports submitted on or after October 17, 2014 need to be submitted through the RPPR module of eRA Commons. .... Continue reading →

Promoting Research Integrity: Building the Foundation of Trust
Exemplifying and promoting the highest level of scientific integrity, public accountability, and social responsibility in the conduct of science are among NIH’s main goals as an agency. Research integrity is not about being flawless. It is about conducting science using honest and verifiable methods, complying with rules and regulations and adhering to professional standards. Ultimately, it is also about trust, the foundation upon which the scientific research enterprise is built. We’ve recently updated our website on research integrity, .... Continue reading →

New Website for iEdison Invention Reporting Information:
True or false: iEdison is the newest Apple™ light bulb. Well, for now at least, false. iEdison – which stands for “interagency Edison” – is a system for reporting inventions resulting from federal funding. iEdison is now part of NIH’s electronic Research Administration (eRA) suite of services, and our new website helps iEdison users access information and resources related to invention reporting. .... You Ask, We Answer:
Can I Resubmit My Grant Application While It Is Under Appeal of the Initial Peer Review Results?

What is the Deadline for Resubmitting my Unfunded Application?

NIH REVISED SUBMISSION RULES

NIH & AHRQ just released more clarifications on the new resubmission policy. In this announcement are clarifications on due dates, applicability, time limits, and the various options PIs have. See NOT-OD-14-082: http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-082.html. I know this revised policy is important to you and has many implications. Please feel free to ask me, or your SPA Project Officer questions. I am following up with additional information on the important announcement I sent last week regarding NIH and AHRQ’s new resubmission policy (see below). NIH just posted extensive FAQs describing various scenarios when you may submit applications as ‘new’ that were previously submitted, resubmitted and not funded (including competing renewal applications that were not funded). Refer to the following resources and articles:

FAQs:
The policy announcement: NOT-OD-14-074: A Change in Our Resubmission Policy – Rock Talk article explaining the reasons for the change; NIH Policy on Resubmission Applications; Science Magazine article: NIH to Relax ‘Two Strikes’ Grant Submission Policy; Deciding whether to submit an application as a resubmission or as a new submission can sometimes be complex. You may need to speak with an NIH Program Official or Program Director regarding your specific situation. Please feel free to ask me, or your SPA Project Officer, questions as they arise. Please read full announcement, NOT-OD-14-074 at http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-074.html. Effective immediately, for NIH and AHRQ applications due after April 16, 2014, following an unsuccessful resubmission (A1) application, applicants may submit the same idea as a new (A0) application for the next appropriate due date. The NIH and AHRQ will not assess the similarity of the science in the new (A0) application to any previously reviewed submission when accepting an application for review. Although a new (A0) application does not allow an introduction or responses to the previous reviews, the NIH and AHRQ encourage applicants to refine and strengthen all application submissions. Please read the full announcement for more details on the background of this policy change and the policy details. The NIH time limit for accepting resubmission (A1) applications remains in effect, as does the policy for New Investigator R01 resubmission deadlines.

- Additional Information for the two above mentioned announcements; This Notice alerts grantees to a change in the implementation timeline, previously announced in NOT-OD-13-120 and NOT-OD-14-093, for the NIH transition to new U.S. Department of Health and Human Services (HHS) payment policies for domestic, non-competing continuation awards and use of Payment Management System (PMS) subaccounts. It also announces a change in how competitive revisions/administrative supplements (Type-3s) awards will be processed. This Notice only applies to domestic non-competing continuation awards that have not yet transitioned to PMS subaccounts. In response to critical feedback from the grantee community, NIH requested an amendment to its subaccount implementation plan to delay the transition of domestic, non-competing continuation awards to PMS subaccounts for an additional year; e.g., now beginning October 1, 2015. HHS’s Office of the Assistant Secretary for Financial Resources recently approved the request. This additional time is provided to allow grantees to prepare their systems to accommodate the changes. Grantee with inadequate systems in place to appropriately manage this transition by October 1, 2015, may be unable to appropriately access PMS accounts and risk losing their ability to draw down funding. Grantees are advised that there will be no additional
implementation delays considered and no exceptions granted to the deadline. As of October 1, 2015, NIH will utilize only subaccounts for awarding grant funds. Every grant that is awarded funding in FY 2016 (whether it be in the first, second, third or fourth quarter of FY 2016) will be in a subaccount. NIH will continue transitioning payment of grant awards with new document numbers to domestic institutions to PMS subaccounts in FY 2015 as announced in Notice NOT-OD-13-120. The administrative changes announced in NOT-OD-14-093 will now apply to the transition that will occur between October 1, 2015 and September 30, 2016. This Notice reiterates those administrative changes for non-competing, continuation awards and highlights the revised implementation timelines and T-3 award process for all domestic awards. - See more at: http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-103.html#sthash.0l3doSVZ.dpuf; http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-103.html#sthash.q3dTkMY2.dpuf;

Dear Colleagues:

We are writing to announce the release of the revised Sponsored Project Subawards Policy, which can be found in the Administrative Policy Library here. This Policy was recently revised to reflect the provisions of the Uniform Guidance. Principal Investigators (PIs) are required to properly monitor the progress and spending of subrecipients as specified under the rules in the Uniform Guidance. To ensure compliance with these provisions, key changes in the revised Policy include new forms to be submitted to Sponsored Projects Administration (SPA) during proposal review, and a new process to determine a subrecipient’s risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward. The following sections summarize the key changes to the Policy; however, those who are governed by the Policy should read it in its entirety.

**Forms to be submitted to the SPA Project Officer, accompanied with the grant proposal, if subrecipients are included:**
- (*) Subrecipient/Contractor Classification Form - NEW FORM
- (*) Subaward Face Page - REVISED FORM
- (*) Pre-award Assessment of the Proposed Subawards, if applicable - REVISED FORM
- (*) International Research Questionnaire (IRQ), if applicable; (*) Subawardee Financial Conflict of Interest Policy Form –
