A MESSAGE FROM THE VICE DEAN FOR RESEARCH STRATEGY AND INNOVATION

Dear Mailman Research Community,

We have been working closely with University and funding agency officials to better understand the impact of the COVID-19 pandemic on the research enterprise. It is unclear what the Governor’s orders mean for research. We believe the ramp down we have accomplished is well-aligned with the Governor’s orders. We have minimized our on-site footprint and have the vast majority of our workforce working remotely. It is possible that CUIMC will be viewed as exempt, but we believe the remote working strategy we have developed should continue.

Several items that are being addressed and that I will update you on soon include:
- Transition plan for postdocs that have positions ending in the next few months
- Graduate student issues
- Tenure clock extension
- Pay continuation on grants
  - NIH-super flexible
  - NSF-hasn’t said much
  - DOD-not being flexible, but that could change
- ...and many other topics.

I will be working closely with Pam and the Chairs and Center Directors to address all research-related issues. Stay tuned for further guidance. Please feel free to send me or Pam any questions or concerns.

Gary

[NTW] [COVID-19/NIH ANNOUNCEMENTS]

Coronavirus Disease 2019 (COVID-19): Information for NIH Applicants and Recipients

**Sponsor:** NIH  
**Deadline(s):** NA 03/17/2020 (Last updated)  
**Contact:** [https://grants.nih.gov/support/index.html](https://grants.nih.gov/support/index.html)  
**Link(s):** [https://grants.nih.gov/grants/natural_disasters/coronavirus.htm](https://grants.nih.gov/grants/natural_disasters/coronavirus.htm)  

**Additional Information:** The NIH is deeply concerned for the health and safety of people involved in NIH research, and about the effects on the biomedical enterprise in the areas affected by the HHS declared public health emergency for COVID-19. Due to the potential exceptional impact, we want to assure our recipient community that NIH will be doing our part to help you continue your research. This is a rapidly evolving situation and we will provide updated guidance and information as it becomes available.

[NTW] [COVID-19/CDC BAA]

The Centers for Disease Control and Prevention (CDC) has issued a Broad Agency Announcement (BAA) for research proposals related to Covid-19

**CDC BAA for Research Proposals related to Covid-19, Full Announcement**

**Sponsor:** CDC  
**Deadline(s):** 03/25/2020  
**Contact:** BAA POINTS OF CONTACT CDC’s COVID-19 BAA Technical Coordinator and point of contact is Jan Gum, who may be reached by email at [tzg7@cdc.gov](mailto:tzg7@cdc.gov). Based on the research topic area, CDC has multiple contractual points of contact. The POCs and the research areas they are responsible for is listed below. Name Research Topic Area Telephone Number Email Mr. Ronnie Williams #1, #2 404-498-2594 [oga3@cdc.gov](mailto:oga3@cdc.gov) Ms. Christina McMichael #3, #4, #5 770-488-2697 [wpn6@cdc.gov](mailto:wpn6@cdc.gov)

**Additional Information:** The Centers for Disease Control and Prevention (CDC) has issued a Broad Agency Announcement (BAA) for research proposals related to Covid-19. The BAA calls for white papers to be submitted by March 25. The full announcement is available [here](https://www.beta.sam.gov/opps/728e1131ef444abc880f63540a37c364/view?keywords=COVID-19&sort=relevance&index=&is_active=true&page=2).

The listed topics of interest are:  
**Topic #1:** Surveillance, natural history and household transmission of SARS CoV-2 DVD/RVB;  
**Topic #2:** Diagnostics development and novel technology development and evaluation to improve diagnostic testing capabilities for Covid-19 detection DVD/RVB;  
**Topic #3:** Immune response and transmission dynamics for SARS CoV-2 DVD/RVB;  
**Topic #4:** Host infection dynamics for SARS CoV-2 DVD/RVB;  
**Topic #5:** Prospective Cohorts to Assess Covid-19 and Other Respiratory Diseases

**Purpose:** NIDA is issuing this Notice of Special Interest (NOSI) to highlight the urgent need for research on the 2019 Novel Coronavirus (2019-nCoV, also known as COVID-19). NIDA is especially interested in research collecting and examining data on the risks and outcomes for COVID-19 infection in individuals suffering from substance use disorders; **Background:** As people across the U.S. and the rest of the world prepare for what could be a pandemic of the 2019 novel coronavirus, or COVID-19, the research community should be alert to the possibility that it could affect some populations with substance use disorders or HIV particularly hard. Because it attacks the lungs, COVID-19 could be an especially serious threat to those with histories of smoking tobacco or marijuana or of vaping. People who use opioids or methamphetamine may also be vulnerable due to those drugs’ effects on respiratory and pulmonary health and potential effects on immune mechanisms. Likewise, those with HIV may be affected if their immune function is compromised. Additional social and environmental factors associated with drug use may worsen the transmission and treatment of COVID-19, especially among individuals who experience homelessness or incarceration, which is more common among those with a substance use disorder; **Research Objectives:** In order to rapidly improve our understanding of the risks, prevalence, and available control measures for 2019-nCoV in substance using or HIV-affected populations, NIDA is encouraging the submission of applications for Competitive Revisions to active grants to address the following research areas of interest: 

- Research to determine whether substance use (especially smoking tobacco or marijuana, vaping, opioids and other drug use) is a risk factor for the onset and progression of COVID-19;
- Research on how HIV among persons who use substances may impact the onset and progression of COVID-19;
- Research to understand system-level responses to COVID-19 prevention and risk mitigation in secure settings such as prisons and jails, with a particular emphasis on detainees with substance use disorder (SUD). For example: Interactions of COVID-19 treatment with SUD treatments, including medications for opioid use disorders;
- Strategies for integrating COVID-19 and other infectious disease screening, prevention, and treatment protocols with SUD treatment and other health services;
- Research to understand the respiratory effects of SARS-CoV-2 infection among individuals with substance use disorders (SUD); in particular those with nicotine, marijuana, opioid, and methamphetamine use...
disorders; [*] Research to understand how the respiratory effects of COVID-19 influences the rate of opioid overdoses both in pain patients as well as patients with an opioid use disorders and also to assess how it influences the outcomes for naloxone interventions for overdose reversal; [*] Research to develop therapeutic approaches for comorbid SARS-CoV-2 infection and SUDs; [*] Research to evaluate drug-drug interaction of medications to treat SARS-CoV-2 and substances of abuse or medications to treat SUDs; [*] Research to understand system- or organizational-level responses to identify, prevent, or mitigate the impact of COVID-19 in service settings that serve vulnerable populations, including people who are homeless or unstably housed; [*] Research to understand and mitigate the impact of COVID-19 in methadone treatment programs and syringe exchange services; [*] Research on how potential overcrowding of emergency departments and health services will impact the treatment of opioid overdoses and of opioid use disorder; [*] Research using ongoing studies to understand the broad impacts of COVID-19 (e.g., school closures, food insecurity, anxiety, social isolation, family loss) on neurodevelopment, substance use, substance use disorders, and access to addiction treatment; Application and Submission Information: Applications in response to this NOSI must be submitted using the following targeted funding opportunity: [*] PA-18-935 Urgent Competitive Revision to Existing NIH Grants and Cooperative Agreements (Urgent Supplement - Clinical Trial Optional) is intended to provide funds for NIH grantees applying to expand the scope of their active grant; [*] PA-18-591 Administrative Supplements to Existing NIH Grants and Cooperative Agreements (Parent Admin Supp Clinical Trial Optional) is intended to provide funds for NIH grantees where the work proposed in the supplement is fully within the scope of the ongoing grant; [*] The funding instrument, or activity code, will be the same as the parent award; When developing applications in response to this NOSI, all instructions in the SF424 (R&R) Application Guide must be followed, with the following additions: [*] The Research Strategy section of the application is limited to 6 pages; [*] The award project period of the submission must not exceed two years; Application budgets are generally limited to no more than $100,000 direct costs per year. Should the proposed research require a higher budget, the applicant should consult with the program official assigned to the parent award and include a strong justification for the larger budget in the supplement application. The proposed budget must reflect the actual needs of the proposed project; [*] The parent award must be active when the application is submitted. The project and budget periods must be within the currently approved project period for the existing parent award; [*] Applications will be accepted on a rolling basis through March 31, 2021 by 5:00 PM local time of the applicant organization. This NOSI expires on April, 1, 2021; [*] All applications (including those for multi-project activity codes) must be submitted electronically using a single-project application form package; [**] Administrative supplement applications to PA-18-591 must use the application form package with the Competition ID of “FORMS-E-ADMSUPP-RESEARCH”. This FOA will be reissued with a “FORMS-F-ADMSUPP-RESEARCH” package on May 25, 2020. Submissions to PA-18-591 must be completed by June 25, 2020 (see NOT-OD-20-026 for details.) Submissions to the reissued FOA will be accepted on or after May 25, 2020 through the expiration date of this Notice. In addition, the process for Streamlined Submissions using the eRA Commons cannot be used for this initiative.; [**] Competitive revision applications to PA-18-935 must use the application form package with the Competition ID of “NOT-DA-20-047-FORMS-E.” This FOA will be reissued with a “NOT-DA-20-047-FORMS-F” package on May 25, 2020. Submissions to PA-18-935 must be completed by June 25, 2020. Submissions to the reissued FOA will be accepted on or after May 25, 2020 through the expiration date of this Notice; [*] IMPORTANT: For funding consideration, all applicants must designate “NOT-DA-20-047” (without quotation marks) in the Agency Routing Identifier field (Box 4b) of the SF424 (R&R) Form. Applications without this information in Box 4b will not be considered for this initiative.; [*] Investigators planning to submit an application in response to the NOSI are strongly encouraged to contact the program officers listed below to discuss the proposed project in the context of the parent award; Applications nonresponsive to terms of this NOSI will not be considered for the NOSI initiative; Inquiries; Please direct all inquiries to the Scientific/Research, Peer Review, and Financial/Grants Management contacts in Section VII of the listed funding opportunity announcements; Scientific/Research Contact(s): MeLisa Creamer, PhD, MPH; Division of Epidemiology, Services, and Prevention Research; National Institute on Drug Abuse (NIDA); Telephone: 301-402-1933; Email: melisa.creamer@nih.gov; Shwe Gyaw, MD; Division of Therapeutics & Medical Consequences; National Institute on Drug

Close schools. Cancel public gatherings. But is this social distancing realistic? Not without the right public policies. ; The greatest strains as the world deals with COVID-19 will fall on certain demographics because of their economic, social, or health status. Not everyone has a fair opportunity to do the right thing — staying home when you’re sick is a challenge without sick leave. Closing schools won’t be effective without access to childcare.; We don’t know how the COVID-19 story will end in the United States or elsewhere, but here’s a few recommendations for America to take to heart from Rich Besser, Robert Wood Johnson Foundation president and former acting director of the CDC.

https://nsf.gov/home/blog/2020/03/05/nsf-supporting-research-to-address-coronavirus-disease/

Additional Information: Dear Colleague Letter on the Coronavirus Disease 2019 (COVID-19); Dear PI and co-PIs, Please review this Dear Colleague Letter published by NSF.; In light of the emergence and spread of the coronavirus disease 2019 (COVID-19) in the United States and abroad, the National Science Foundation (NSF) is accepting proposals to conduct non-medical, non-clinical-care research that can be used immediately to explore how to model and understand the spread of COVID-19, to inform and educate about the science of virus transmission and prevention, and to encourage the development of processes and actions to address this global challenge.; NSF encourages the research community to respond to this challenge through existing funding opportunities. In addition, we invite researchers to use the Rapid Response Research (RAPID) funding mechanism, which allows NSF to receive and review proposals having a severe urgency with regard to availability of or access to data, facilities or specialized equipment as well as quick-response research on natural or anthropogenic disasters and similar unanticipated events. Requests for RAPID proposals may be for up to $200K and up to one year in duration. Well-justified proposals that exceed these limits may be entertained. All questions should be directed either to a program officer managing an NSF program with which the research would be aligned or to rapid-covid19@nsf.gov.; Complete guidance on submitting a RAPID proposal may be found in Chapter II.E.1 of the NSF Proposal and Award Policies and Procedures Guide.; We ask that all investigators and organizations maintain awareness of the dynamic nature of this event through regular monitoring of official communications from the Centers for Disease Control and World Health Organization.; Sincerely, Dr. France A. Córdova; Director; The IUCRC Program invites submissions that are responsive to this announcement.; Sincerely, IUCRC Program Directors: Dr. Prakash Balan; Dr. Behrooz Shiarazi; Dr. Gregory Reed; Dr. Rebecca Ferrell; Dr. Ann Von Lehmen; Dr. Barbara Ransom; NSF Supporting Research to Address Coronavirus Disease; NSF Supporting Research to Address Coronavirus Disease; March 5, 2020; The National Science Foundation is working closely with the research community to bolster our national response to coronavirus disease 2019 (COVID-19).; NSF is currently funding 20 research projects across the agency involving COVID-19. With research programs at more than 2,000 academic institutions across the country, we are ready to mobilize the full force of the scientific community to better understand and develop measures to protect against this virus.; In response to the urgency of COVID-19 and increasing inquiries from the research community, NSF has issued a letter to researchers inviting additional proposals for rapid response grants related to the virus. This letter welcomes research to help understand COVID-19, inform and educate the public about virus transmission and prevention, and develop effective strategies for addressing this challenge at the local, state, and national levels.; Support for these efforts is made through NSF’s Rapid Response Research (RAPID) funding mechanism, which enables the agency to swiftly process and support research that addresses an urgent need. Previous RAPID awards have helped advance our understanding of past Ebola and Zika outbreaks as well as measures to contain them. RAPID funds have also enabled research to improve our preparedness for natural disasters like Hurricane Harvey or unexpected events like the 2010 Gulf of Mexico oil spill.; Critical challenges like these often require input from a variety of experts. As the only U.S. federal agency that supports fundamental research and education across all fields of science and engineering, NSF is uniquely positioned to gather a spectrum of scientific input, bringing to bear the best research and researchers on our most complex national concerns.; Advancing the national health, prosperity, and welfare continues to be a vital part of NSF’s mission. As
Americans take extra precautions to protect themselves and their families against COVID-19, NSF remains a proactive and steady ally.; FAQs About the Coronavirus Disease 2019; -NSF-

Additional Information: The purpose of this Notice is to inform applicants that the National Institute of Biomedical Imaging and Bioengineering (NIBIB) will participate, effective immediately, in PA-20-135 "Emergency Competitive Revision to Existing NIH Awards (Emergency Supplement - Clinical Trial Optional)". The following changes and updates are made to PA-20-135 (shown in italics) to reflect NIBIB participation in this FOA.
Office of Behavioral and Social Sciences Research (OBSSR); Notice of Special Interest (NOSI): Competitive Revisions for Firearms Injury and Mortality Prevention Research

Sponsor: NIH; National Institute of Health; Office of Behavioral and Social Sciences Research

Deadline(s): 05/15/2020 (First Application Due Date); 05/16/2020 (Expiration)

Contact: Please direct all inquiries to the contacts in Section VII of the listed funding opportunity announcements with the following additions/substitutions to: Dara Blachman-Demner, Ph.D.; Office of Behavioral and Social Sciences Research; National Institutes of Health; Telephone: 301-496-8522; Email: dara.blachman-demner@nih.gov

Additional Information: Notice of Special Interest (NOSI): Competitive Revisions for Firearms Injury and Mortality Prevention Research; https://grants.nih.gov/grants/guide/notice-files/NOT-OD-20-089.html; NIH; National Institute of Health; Office of Behavioral and Social Sciences Research; OBSSR Updates; March 20, 2020; Notice of Special Interest (NOSI): Competitive Revisions for Firearms Injury and Mortality Prevention Research; Notice Number: NOT-OD-20-089; Key Dates: Release Date: March 20, 2020; First Application Due Date: May 15, 2020; Expiration Date: May 16, 2020; Purpose: This Notice solicits competitive revision applications to support the expansion of existing R01 and R21 programs well poised to expand their focus to include firearms research as described below. Revision applications can support a significant expansion of the scope and research protocol approved and funded for the "parent" award on which the revision application is based. Prospective investigators can consult the contact list below to ensure that projects will contribute considerably to achieving the goal of this Notice.; Nearly 40,000 people in the U.S. die from firearm-related deaths each year, primarily from suicide (60%) or homicide (37%), and many more have experienced non-fatal firearm injuries, both intentional and nonintentional. The Joint Explanatory Statement accompanying the FY2020 Further Consolidated Appropriations Act (H.R. 1865) included funding for the NIH to conduct research on firearm injury and mortality prevention and recommended that NIH take a comprehensive approach to studying the underlying causes and evidence-based methods of prevention of firearm injury, including crime prevention. Within the legislative mandates and limitations of NIH funding (NOT-OD-20-068, NOT-OD-20-066), the NIH, via this NOSI, encourages research to improve understanding of the determinants of firearm injury, the identification of those at risk of firearm injury (including both victims and perpetrators), the development and evaluation of innovative interventions to prevent firearm injury and mortality, and the examination of approaches to improve the implementation of existing, evidence-based interventions to prevent firearm injury and mortality. ; Application and Submission Information; Applicants do not need to apply to the same FOA that the parent grant was submitted to. Instead, we will be using existing FOAs noted below for application submission. In an exception to standard practice, the participating institutes/centers will accept competitive revision applications submitted to the FOAs listed below. Receipt dates indicated in these FOAs do not apply to applications responding to this request for competitive revisions. Therefore, applicants must submit competitive revision applications by April X, 2020 as described below by 5pm at the local time of the applicant organization.; Submit applications for this initiative using one of the following funding opportunity announcements (FOAs) or any resubmissions of these announcement through the expiration date of this notice.; For applicants with a current active R01: [*] PA-19-055 - NIH Research Project Grant (Parent R01 Clinical Trial Required); [*] PA-19-056 - NIH Research Project Grant (Parent R01 Clinical Trial Not Allowed); [*] PA-19-091 - NIH Research Project Grant (Parent R01 Basic Experimental Studies with Humans Required); For applicants with a current active R21: [*] PA-19-053, NIH Exploratory/Developmental Research Grant Program (Parent R21 Clinical Trial Not Allowed); [*] PA-19-054, NIH Exploratory/Developmental Research Grant Program (Parent R21 Basic Clinical Trial Required); [*] PA-19-092, NIH Exploratory/Developmental Research Grant Program (Parent R21 Basic Experimental Studies with Humans Required); All instructions in the SF424 (R&R) Application Guide and the funding opportunity announcement used for submission must be followed, with the following additions: [*] Resource Sharing Plans are expected to must include a data sharing plan that describes their proposed process for making resulting publications, code, and to the extent possible, the underlying primary data immediately and broadly available to the public.
See Section 8.2.3.1 of the NIH GPS. The NIH Policy on Dissemination of NIH-funded Clinical Trial Information establishes the expectation that all NIH-funded recipients and investigators conducting clinical trials, funded in whole or in part by the NIH, will ensure that their clinical trials are registered at, and that summary results information is submitted to, ClinicalTrials.gov for public posting. See Section 4.1.3 of the NIH GPS; Applicants will be expected to submit plans for pre-registration of research projects using publicly available platforms or ClinicalTrials.gov as applicable. Funded awardees that are not using ClinicalTrials.gov should provide in their annual progress reports the unique identifier assigned by the alternative platform, if available, and a link to the report (e.g., page or record) in the alternative platform.; NIH Public Access Policy; NIH-funded investigators are required by Federal law to submit (or have submitted for them) to the NIH National Library of Medicine PubMed Central an electronic version of the final, peer-reviewed manuscript upon acceptance for publication, to be made publicly available no later than 12 months after the official date of publication. See Section 8.2.2 of the NIH GPS.; One-year supplement applications may be submitted with budgets up to $200,000 in direct costs. The project and budget periods must be within the currently approved project period for the existing parent award and the parent grant must be active when the application is submitted. Projects currently in a no-cost extension status are not eligible to apply.; For funding consideration, applicants must include “NOT-OD-20-089” (without quotation marks) in the Agency Routing Identifier field (box 4B) of the SF424 R&R form. Applications without this information in box 4B will not be considered for this initiative.; Applications nonresponsive to terms of this NOSI will be withdrawn from consideration for this initiative.; Standard review criteria used in the FOAs noted above apply.; Inquiries: Please direct all inquiries to the contacts in Section VII of the listed funding opportunity announcements with the following additions/substitutions to: Dara Blachman-Demner, Ph.D.; Office of Behavioral and Social Sciences Research; National Institutes of Health; Telephone: 301-496-8522; Email: dara.blachman-demner@nih.gov; https://grants.nih.gov/grants/guide/notice-files/NOT-OD-20-089.html

https://columbia.infoready4.com/#competitionDetail/1808463  

**Additional Information:** SEAS-HICCC joint seed grants competition application deadline extended to Monday, March 23rd, 11:59 p.m.; Good Afternoon: The application deadline for SEAS-HICCC JOINT SEED GRANTS COMPETITION has been extended to Monday, March 23rd, 11:59 p.m.; This is a new jointly seeded funding opportunity between Columbia’s School of Engineering and Applied Science (SEAS) and the Herbert Irving Comprehensive Cancer Center (HICCC). Three (3) SEAS-HICCC joint seed grants in the area of cancer and engineering will be supported this year. These resources have been developed to respond to a need articulated by faculty for funding to initiate and support interdisciplinary and collaborative research. The SEAS-HICCC joint grant should include collaboration between SEAS and HICCC and thus should include faculty from both organizations. Preference will be given to faculty who have not worked together previously. A firm expectation is that the pilot grants will catalyze larger multi-PI grants to the NCI/NIH. Projects will be funded at the level of $80K for one year. Funds are encouraged to be used to support one graduate student through a GRA in SEAS (where a tuition at the half rate, equivalent to the rate used for government grants, will be charged to the project); Proposal Format: Submit the following materials via https://columbia.infoready4.com/#homePage by the proposal submission deadline. The PI(s) should indicate relevance to the SEAS-HICCC Joint Seed Fund: [1] Project Proposal – 5-page maximum, single space (Arial 11 font) with the following sections: [a] Project summary (250 words); [b] Specific Aims (1/2 page); [c] Background/Significance (1/2 page); [d] Innovation (1/2 page); [e] Research strategy (3 pages); [f] Summary and future directions (related to external grant applications) (1/2 page); [2] 1 page budget with justification; [3] NIH formatted biosketch for Faculty Collaborators; If you need assistance in identifying potential collaborators in SEAS or HICCC, please contact Eric Vieira (Director of Strategic Collaborations @ SEAS) emv2144@columbia.edu; or Emer Smyth at es3551@cumc.columbia.edu, 212-851-4878.; [brought to our attention by]; Tanisha Jackson, Ph.D.; Senior Research Program Manager; Herbert Irving Comprehensive Cancer Center; lj2325@cumc.columbia.edu Columbia | Columbia University Herbert Irving Comprehensive Cancer Center

**Additional Information:** [SPA News] Update on FORMS-F; NIH issued this update yesterday: https://grants.nih.gov/grants/guide/notice-files/NOT-OD-20-077.html. Some key highlights directly from the notice: [*] Applicants must use FORMS-F application packages for due dates **on or after May 25, 2020** and must use FORMS-E application packages for due dates **on or before May 24, 2020**.; [*] FORMS-F Grant Application Instructions are now posted on the How to Apply - Application Guide page. All significant changes to form instructions are listed at: https://grants.nih.gov/grants/how-to-apply-application-guide/forms-f/general/g.120-significant-changes.htm.; [*] The forms packages are currently being added to active funding opportunities, and they expect to be done by March 25, 2020.; [*] All Parent Announcements will be reissued for due dates on or after May 25, 2020. Consequently, FORMS-F application packages will not be added to the existing Parent Announcements with FORMS-E application packages.; [**] This was not initially clear, but has since been clarified. The Parent Announcements are definitely being reissued; For a transition period, both FORMS-E and FORMS-F application packages and instructions will be active, simultaneously. Though the forms will be active at the same time, applicants can only use one package to submit their application and must carefully choose the appropriate application package and associated instructions for their due date.; Please read the full notice above for more guidance and information. We'll provide you with updates as we receive them, and notify you when the Parent Announcements are reissued; [brought to our attention by] Stephanie F. Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

- **2 weeks prior to submission deadline**—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.
Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions (if the support services have not been utilized for the grant) of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@cumc.columbia.edu.

Best wishes,
Pam Factor-Litvak

2020 Provost’s Teaching and Learning Grants

Sponsor: https://vptli.columbia.edu/
Deadline(s): 04/20/2020

Contact: Applicants are strongly encouraged to meet with the Center for Teaching and Learning (CTL) team in advance to help develop the project plan and discuss the appropriate in-kind support level. Please contact ColumbiaCTL@columbia.edu to schedule a meeting.

Link(s): https://vptli.columbia.edu/request-for-proposals

Additional Information: Dear fellow members of the Columbia community: It is my pleasure to invite you to apply for the 2020 Provost’s Teaching and Learning Grants. Teaching and Learning Grants, given in a range of categories, help faculty integrate new technology and educational approaches into their classrooms and develop jointly taught interdisciplinary courses. Grants are available to individual faculty as well as school and department-wide initiatives. This year, we are delighted to add a new category to our offerings: Emerging Technology Grants. Since 2014, 133 Provost’s Teaching & Learning Grants have been awarded, involving faculty at all sixteen schools across the University. We look forward to expanding our impact through this next round of funding. Please submit applications to the Provost’s Teaching and Learning Grants by Monday, April 20, 2020. Request for Proposal (RFP) details and application instructions are available here; Applicants are strongly encouraged to meet with the Center for Teaching and Learning (CTL) team in advance to help develop the project plan and discuss the appropriate in-kind support level. Please contact ColumbiaCTL@columbia.edu to schedule a meeting; All teaching and learning grants are listed below: Innovative Course Design (full course) grants support the redesign of courses or the design of new courses to improve teaching and learning using innovative learning strategies. Designs advanced by technology or media-enhanced pedagogy are encouraged, but not required. Awardees will receive in-kind support from the CTL and funds up to $20,000; Innovative Course Module Design (Start Small!) grants support experimentation with a new pedagogical strategy or tool without attempting a full course redesign. Awardees will receive in-kind support from the CTL and receive up to $2,000 for a one-semester period.; Large-Scale Teaching and Learning Grants support large-scale, coordinated efforts around teaching initiatives and exploration. These projects have the potential to make a significant, lasting impact within a department, school, or program beyond the funding period. Awards provide up to $20,000 per academic year plus in-kind support from the CTL.; The Massive Open Online Courses (MOOCs) grant program provides support for open online courses taught by Columbia faculty. Columbia courses offered through MOOC platforms continue to reach a large global learning community, promote public engagement, and make teaching and research activities at the University more visible. A limited number of grants of up to $25,000, plus hands-on support from the CTL, will be awarded.; The Interdisciplinary Teaching Awards (ITA) support collaborations between faculty from different disciplines on the design and launch of interdisciplinary courses. This program, which emerged from the recommendations of the Provost’s Interdisciplinary Faculty Working Group, will award up to $20,000 to teams of two or more faculty from different departments or schools.; Emerging Technology Grants support faculty members who want to experiment with new pedagogical strategies using emerging technologies in their classrooms to improve student engagement and outcomes. These grants are designed to promote innovative approaches with emerging technologies specifically involving augmented/virtual/mixed reality and 3D scanning/printing. Awardees will receive in-kind support from CUIT and funds of up to $20,000.; Please visit vptli.columbia.edu/request-for-proposals for the full request for proposals and to learn about the resources available to applicants.; The Provost and I look forward to continuing to support Columbia faculty as they develop new and exciting ways to enhance teaching and learning across the University and around the world.; Sincerely, Soulaymane Kachani; Vice Provost for Teaching, Learning, and Innovation.

Sponsor: Department of Defense
Deadline(s): Please see piecemeal programs and their individual opportunities for Deadlines
Contact: CDMRP Help Desk, help@ebrap.org
Link(s): https://cdmrp.army.mil/funding/prgdefault

Additional Information: Research Resources regularly posts funding opportunity announcements from the Department of Defense. The https://cdmrp.army.mil/funding/prgdefault link defaults to all current opportunities. Please see piecemeal programs and their individual opportunities for Deadlines. Detailed descriptions of funding opportunities, evaluation criteria, and submission requirements can be found in the specific Program Announcements. The Program Announcements are available electronically for downloading from the Grants.gov website http://www.grants.gov, the CDMRP website https://cdmrp.army.mil/funding/prgdefault and the electronic Biomedical Research Application Portal (eBRAP) https://eBRAP.org. All CDMRP funding opportunities, both recently and previously released, are available on the CDMRP website https://cdmrp.army.mil; Subsequent notifications will be sent when additional funding opportunities are released. A listing of all open CDMRP funding opportunities can be obtained on the Grants.gov website by performing a basic search using CFDA Number 12.420. Submission is a two-step process requiring both pre-application submission and full application submission. All pre-applications must be submitted through eBRAP https://eBRAP.org. Full applications from extramural organizations (non-DoD organizations) must be submitted through Grants.gov http://www.grants.gov. Intramural DoD organizations may submit full applications to either eBRAP or Grants.gov. Refer to the General Application Instructions, Section 11.A. for registration and submission requirements for eBRAP and Grants.gov. For detailed information on the submission process, refer to Section 11.D. of the Program Announcement/Funding Opportunity. eBRAP is a multifunctional web-based system that allows PIs to submit their pre-applications electronically through a secure connection, to view and edit the content of their pre-applications and full applications, to receive communications from the CDMRP, and to submit documentation during award negotiations and period of performance. A key feature of eBRAP is the ability of an organization’s representatives and PIs to view and modify the Grants.gov application submissions associated with them. eBRAP will validate Grants.gov application files against the specific Program Announcement/Funding Opportunity requirements and discrepancies will be noted in an email to the PI and in the Full Application Files tab in eBRAP. It is the applicant’s responsibility to review all application components for accuracy as well as ensure proper ordering as specified in this Program Announcement/Funding Opportunity.

Additional Information: NIH High-End Instrumentation (HEI) Grant (S10) Program; Funding Opportunity

NIH High-End Instrumentation (HEI) Grant (S10) Program; What: The High-End Instrumentation (HEI) Grant (S10) Program encourages applications from groups of NIH-supported investigators to purchase or upgrade a single item of expensive, specialized, commercially available instruments or integrated systems that cost at least $600,000. The maximum award is $2,000,000. Over the last 10 years, the average award amount is $1,352,000.; Important Information: [*] Under the S10 mechanism, funding requests are limited to the purchase cost of the instrument only. Support is not allowable for technical personnel, service contracts, extended warranties, or supplies.; [*] This program does not provide facilities and administrative (F&A) costs, or support, construction, alterations, or renovations.; [*] Matching funds are not required; however, commitment of an appropriate level of institutional support to insure the associated infrastructure is expected (building alterations, or renovations, post-award service contracts and technical personnel).; [*] The NIH requires all applicants to secure institutional support toward the maintenance and operation of the instrument. In particular, confirmation that the institution will commit to provide backup of the financial plan for five years from installation of the instrument or for its effective/usable lifetime.; Who:
The following eligibility requirements apply; [*] PI - The PD/PI for this application should have documented (in the biographical sketch) technical expertise directly related to the type of the chosen instrument. The PD/PI does not need to have an NIH research grant or any other research support, but is expected to be an expert on the requested instrument. The PD/PI may be a Core director or non-tenured faculty member of the applicant organization; he/she must be affiliated with the applicant organization, and must be registered on eRA Commons; [*] Major User Group - A Major User group composed of three individuals who have substantial need for the instrument must be identified. Each member of this group must be a PD/PI on a distinct NIH-funded research grant or cooperative agreement award in an area of basic, translational, or clinical research. (The requirement is at least one award per investigator. An award given to multi-PDs/PIs is counted only once towards the fulfillment of this requirement.) PDs/PIs on NIH training or fellowship grants (e.g., T and F mechanisms) and other non-research grants such as conference grants are not eligible to be Major Users. Once the eligibility requirement has been met, additional users with active research awards from NIH or other sources may be added as Major or Minor Users.; [**] A Major User group composed of three individuals who have substantial need for the instrument must be identified. Once the eligibility requirement has been met, additional users with active research awards from NIH or other sources may be added as Major or Minor Users.; [***] To demonstrate the clear need for the requested instrument, the projects supported by NIH research grants should together require at least 75 percent of the Accessible User Time (AUT). Major Users supported by NIH grants should together require at least 35 percent of the AUT.; [1] Cover Page; [*] PI name and contact information.; [*] Instrumentation Program (High-End Instrumentation OR Shared Instrumentation); [*] Major User Group – Provide name of each individual who is PI of a qualifying grant ; [*] Financial Plan. Submit a specific financial plan for long-term operation and maintenance of the instrument. Explain how various operational costs will be met; specifically, costs associated with routine operation of the instrument, the maintenance, support personnel, and service costs associated with effective use of the instrument must be described.; [3] Institutional Commitment: [*] Provide a letter of support that includes an explicit commitment to provide backup for the proposed financial plan. Specifically, the letter must state that if the financial plan should fall short of its projected income, funds are available to replace the shortfall and maintain operation of the instrument.; Please combine all three parts of the internal proposal in a single PDF file and email to limitedsubmissions@columbia.edu by 9:00 a.m. on Tuesday, April 14, 2020. Additional Information: NIH Shared Instrumentation for Animal Research (SIFAR) Grant Program (S10); PAR-20-112; Anyone who plans to submit a proposal to this program must provide the information requested below to limitedsubmissions@columbia.edu by 9:00 a.m. on Wednesday, March 25th. “NIH SIFAR (S10)” should appear in the subject line of the email.; Please provide the following information: [1] PI – Name, department and contact information; [2] Required Major User Group – Provide name and department for each Major User (minimum of three required). Each Major User must be a PD/PI on a distinct active NIH research award in an area of biomedical research using animals or animal tissue.; [3] Instrumentation – Provide brief description of the instrumentation to be requested including make and model.; Questions should be sent to limitedsubmissions@columbia.edu.; For a list of current limited submission programs please visit: https://research.columbia.edu/content/limitedsubmissions.; Funding Opportunity Purpose; The Shared Instrumentation for Animal Research (SIFAR) Grant Program encourages applications from groups of NIH-funded investigators to purchase or upgrade scientific instruments necessary to carry out animal experiments in all areas of biomedical research supported by the NIH. Applicants may request clusters of commercially available instruments configured as specialized integrated systems or as series of instruments to support a thematic well-defined area of research using animals or related materials. Priority will be given to uniquely configured systems to support innovative and potentially transformative investigations.; This FOA supports requests for state-of-the art commercially available technologies needed for NIH-funded research using any vertebrate and invertebrate animal species.; This funding opportunity announcement (FOA) does not support requests for single instruments. At least one item of the requested instrumentation must cost at least $50,000, after all applicable discounts. No instrument in a cluster can cost less than $20,000, after all applicable discounts. There is no maximum price requirement; however, the maximum award is $750,000 of direct costs.

**Additional Information:** NIH RFA-DK-19-002 -- Nutrition Obesity Research Centers (NORCs) (P30 Clinical Trial Optional); Anyone who is planning to submit a proposal to this program must provide the information requested below to limitedsubmissions@columbia.edu by 9:00 a.m. on Thursday, March 26th. “Nutrition Obesity Research” should appear in the subject line of the email.; Please provide the following: [1] PI – Name, department, and contact information; [2] Co-PI(s) – Name, department, and institution; [3] Participating Institutions; [4] Project Summary (one paragraph); Questions should be sent to Michael Shelter at limitedsubmissions@columbia.edu ; RFA: https://grants.nih.gov/grants/guide/rfa-files/RFA-DK-19-002.html ; Funding Amount: Application budgets are limited to $750,000 direct costs but need to reflect actual needs of the proposed Center. This budget limit is exclusive of F&A costs for consortium and subcontract arrangements.; Deadline: June 2, 2020; Limit: 1 per institution; Objective: This Funding Opportunity Announcement (FOA) invites applications for Nutrition Obesity Research Center (NORC) grants to support research in nutrition and/or obesity. The mission of the NORC program is to serve as a key component of the NIDDK-supported research effort to advance nutrition and obesity research. The NORCs promote new discoveries and enhance scientific progress through support of cutting-edge basic, clinical, and translational research in nutrition science and obesity with the ultimate goal of improving public health.; To accomplish this mission, the NORCs: [*] Create an environment that supports important and innovative research; [*] Attract and retain early stage investigators and investigators new to nutrition/obesity research; [*] Provide core services that leverage funding and unique expertise; [*] Foster interdisciplinary collaborations, especially in emerging areas of research, to catalyze new ideas and scientific approaches; [*] Raise awareness and interest in fundamental and clinical nutrition and/or obesity research at their institutions, as well as locally, regionally, and nationally; [*] Promote the translation of scientific discoveries from bench to bedside to community to improve public health; and [*] Enhance nutrition and obesity research education and training opportunities.;

**Additional Information:** NIH OBSSR Office of Behavioral and social Sciences Research Request for Information: Identify Important New Directions for Health-related Behavioral and Social Sciences Research; OBSSR Updates; March 12, 2020 (Release Date); The OBSSR is seeking broad input on important new directions for health-related behavioral and social sciences research (BSSR). On February 18, we released a Request for Information (NOT-OD-20-059) and launched a crowd-source submission website seeking your input on research directions that will support the achievement of the scientific priorities in the OBSSR Strategic Plan 2022-2026,
and that will advance or transform the broader health impact of BSSR. OBSSR is interested in focusing on research directions that are trans-disease and cross-cutting in nature and address critical gaps in the field. The role of the OBSSR is to coordinate and promote BSSR research across the NIH and assist the NIH Institutes and Centers in developing research and training resources to advance the field. OBSSR supports a broad range of BSSR disease, condition, population, and setting specific priorities across the NIH covering the spectrum, from basic to implementation science research. We would like input on the most important or cutting-edge, trans-disease research directions that would accelerate progress in these three strategic priority areas: [1] SYNERGY IN BASIC AND APPLIED BSSR; OBSSR is committed to advancing cross-cutting approaches that stimulate health-related research on the fundamental processes that influence behavior and social systems. This includes facilitating the translation of basic BSSR findings into pathways to improve individual and population health and using intervention or population-based research findings to inform meaningful new fundamental research questions; Ideas could include emerging basic BSSR areas that are promising for application to human health; basic BSSR findings that are ready for translation to promote health behavior change; or study of novel processes or mechanisms that influence behavior and social systems that would enhance the impact, reach, or durability of behavioral interventions; [2] BSSR RESOURCES, METHODS, AND MEASURES; The future of an efficient and integrated approach to BSSR requires the development and application of innovative research resources, measures, and methods; Ideas could include new research resources, tools or infrastructure that are needed to accelerate BSSR; promising new methods and measures that should be used more widely in BSSR; or research domains or constructs that require improved measurement to advance BSSR; [3] ADOPTION OF EFFECTIVE BSSR IN PRACTICE; There is often a significant time lapse between the publication of research findings that demonstrate the efficacy of a prevention or healthcare strategy and when these approaches are adopted in practice and delivered to individuals, families, communities, and organizations. Research is needed to facilitate more rapid, effective, and widespread uptake and sustained implementation of BSSR findings to improve healthcare and public health; Ideas could include methods to develop and test interventions that are designed with eventual dissemination and implementation factors in mind; research that is needed to accelerate the implementation of effective interventions; or approaches to encourage more rigorous evaluation of interventions, programs, or policies that are already being implemented; To ensure consideration, responses must be submitted by 11:59pm ET March 29, 2020 through OBSSR’s crowd-source submission website. Once your IdeaScale account is created and you are logged in, you can submit an idea, browse and respond to comments that have already been submitted, and vote for your other ideas; If you have an inquiry, please contact Farheen Akbar at Farheen.akbar@nih.gov or 301-496-9165; Additional opportunity to provide feedback: In tandem with OBSSR’S RFI and Crowd-source effort, the NIH Office of Disease Prevention (ODP) has also released an RFI on strategies for increasing collaboration and engagement between the ODP and your organization. If you would like to respond to ODP’s RFI, please visit: https://prevention.nih.gov/StakeholderRFI; Submit an Idea: https://obssr.ideascale.com/

**Additional Information:** NIH eSubmission Items of Interest - July 31, 2018; NIH sent the newsletter below the other day, which contains a lot of tips on the new PHS Human Subjects and Clinical Trial Information Form. In addition, they address Fellowship applications, and some things to keep in mind if the fellow is seeking clinical research experience. Since the fellowship deadline is next week (August 8th), I wanted to bring this to your attention; I highlighted what I thought were the key points below. [brought to our attention by] Stephanie Scott; NIH eSubmission Items of Interest - July 31, 2018; Happy National Mutt Day! Yes, it’s a real thing. And, why shouldn’t it be? I vividly remember bringing my mutt home from a pet adoption event years ago and introducing her to her new “daddy.” “She’s two dogs long and one dog tall and looks like she’s made from spare parts,” Jeff said. All true. An emaciated basset-beagle-ish dog with ears longer than her bowed little legs isn’t going to win any beauty contests. But, our Dixie is the most lovable hound on the planet and we wouldn’t trade her for the world.; Mutts are amazing, but what do they have to do with grant application submission? Not much actually, but if you love your mutt as much as I love mine, then I’ve at least got your attention. Besides, who passes up the opportunity to celebrate? More wag, less bark!; Hopefully you’ll find this edition to have an interesting mix ... not unlike your favorite mutt.; Where Do I Put the Information I Know You’d Want, But Didn’t Ask For?; You want to give staff and reviewers ALL the information you think they need to provide a thorough review of your proposal. There is certainly nothing wrong with that - right? Well, actually it depends. The application guide and funding opportunity announcement provide very specific guidance on what to include in your application and, in some cases, there are page limits you must stay within to convey the requested information; If you have information that doesn’t fit in page-limited attachments like your Specific Aims and Research Strategy, rework those attachments until you tell the best story possible within the confines of the page limits. Do not try to stuff that extra information into other non-limited fields of the application forms. Similarly, if you have information that doesn’t have a “natural home” based on our instructions, don’t include it.; There are several form fields with
tempting names like “Appendix,” “Other Attachments,” “Other Requested Information,” and “Other Clinical Trial-related Attachments.” DO NOT use those fields unless requested to do so in the application guide or announcement. Why not? Even if you have the best of intentions, you need to resist the temptation to force fit information into your application where it doesn’t belong. The page limits and guidance are there for fairness and you may find your application pulled from consideration if you try to get around them. **The Duplication Balancing Act:** The application guide statement “do not duplicate information between the Research Strategy attachment and the PHS Human Subjects and Clinical Trials Information form” appears to be causing some angst in the community. In fact, our new human subjects form invites a certain amount of overlap between the sections. It would be difficult, for example, to provide a “Brief Summary” of a protocol without talking about information captured elsewhere in the application. The point we were actually trying to make is that we don’t want you to copy and paste blocks of text into multiple places in your application. Your Specific Aims and Research Strategy should include enough human subjects and clinical trial information to tell a cohesive and complete story. The human subjects form is meant to provide structured, supporting details for the study (sorry, it isn’t just extra space to expound on the research strategy). The Brief Summary in the Protocol Synopsys section of the human subjects form aligns with what the public would see in ClinicalTrials.gov without the benefit of the full application. It should hit the key points at a very high level in as close to plain language as possible. The bottom line is there will be some overlap of information within your application, but reviewers should not be reading blocks of text copied verbatim into multiple sections of the application. **Space-Fill Compulsion:** My mother, an interior designer, never saw a horizontal surface she didn’t want to decorate. For years I encouraged her to declutter and often she’d begrudgingly remove a knick-knack from a table of shelf. But the next time I’d visit a new knick-knack was sitting right it its place. My dad calls it space-fill compulsion.; Our new human subjects form has several text fields with large character limits (e.g., Eligibility Criteria - 15,000 characters; Brief Summary - 5,000 characters; Narrative Study Description - 32,000 characters). These character limits match those in ClinicalTrials.gov and were set artificially high so the system could accommodate more characters than are actually needed.; Here is a fun little tidbit we’ve learned ...folks who are already funded and entering information into ClinicalTrials.gov tend to be more pithy than folks applying for funding. Could it be that while composing your response you see the character count is well below the available space and assume NIH wants more? Space-fill compulsion, perhaps?. If you’ve covered what you need to say in a few paragraphs, then stop. You don’t need to fill the entire allotted space. Eligibility criteria is typically quite succinct. A Brief Summary typically runs 2,000 characters or less and the Project Narrative typically 5,000 characters or less. It would be unusual to come even close to the character limits for those fields. It’s OK. **Cover the topics using only the space you need.**; Remember, this is the supporting detail for your story, not the story itself. Less is more. Don’t bury your main point under unnecessary information. **Do Fellowship Awards Allow Clinical Trials?**; We encourage fellows to receive training in clinical research, including clinical trials. NIH-supported fellows just can’t independently lead them. The career stage of a fellow may not yet align with the responsibilities of navigating all the components, complexities and reporting requirements associated with a clinical trial. In addition, fellowship grants do not include sufficient research funds to support the majority of clinical trials. Consequently, all Fellowship opportunities are posted as independent Clinical Trials Not Allowed.; The sponsor is the responsible individual of record for oversight of the trial. He or she is ultimately responsible for tasks like interacting with relevant Institutional Review Board (IRB) staff, reviewing all informed consent documents, reporting potential serious adverse events, and maintaining responsibility for patient safety. But there are no restrictions on the responsibilities the fellow can assume with the sponsor’s oversight; If you plan on submitting a fellowship application, clearly delineate the roles both the sponsor and the fellow are undertaking. This can be done in the Sponsor and Co-Sponsor attachment for the sponsor and the Research Strategy for the fellow. It needs to be clear that the fellow is not the responsible individual. Overselling their role to the point where it looks like they are leading the trial can hurt more than it helps. It’s fine to show the fellow working side-by-side with his or her sponsor through every aspect of the trial. It’s not OK for them to be off on their own shouldering all the responsibility themselves. **Dog Days of Summer:** "Be the person your dog thinks you are."

**Additional Information:** NIH Guide Notice on Delayed Enforcement for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants

As I previously announced a few weeks ago, NIH will be delaying enforcement for some requirements affecting prospective basic science studies that also meet NIH’s definition of a clinical trial. NIH just released the official notice stating this, along with their future plans: https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-212.html; Please read the notice in its entirety. The Council on Governmental Relations (Cogr) provided a summary below. Here are some highlights:

- (*) **Registration and Reporting:** NIH still expects the registration and reporting of these prospective basic science studies, but is giving flexibility to allow reporting on existing basic science portals, and expects the data to eventually be transported to ClinicalTrials.gov. Flexibility given through September 24, 2019. They are issuing a Request for Information (RFI) to collect stakeholder feedback on this topic.
- (*) **Funding Opportunity Announcements (FOAs):** NIH will not administratively reject any proposal application for submission to an incorrect FOA based on study-type designation, and they plan to issue an FOA specifically for these “core” basic science studies in upcoming months.
- (*) **Good Clinical Practice (GCP) training:** is still being enforced for all personnel involved in the conduct, oversight, or management of prospective basic science studies involving human participants. As a reminder, Columbia offers GCP training in Rascal through Course TC3450. For more information, see https://research.columbia.edu/content/good-clinical-practice-training or email NIH-GCP@columbia.edu. Please read the notice in its entirety for more information, and stay tuned for more updates from me on this topic.

**Additional Information:**

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about they the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.
- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external
reviewer. Generally, they provide feedback within a week.

- **2 weeks prior to submission deadline** — For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions (if the support services have not been utilized for the grant) of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types (such as R21s) that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at pr11@columbia.edu.

Best wishes,

Pam Factor-Litvak

**NIH Single IRB (sIRB) policy**

**Sponsor:** NIH

**Deadline(s):** (for NIH application submissions on or after) 01/25/2018

**Contact:** If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites

**Additional Information:** The NIH single IRB (sIRB) policy applies to the domestic sites of new and competing renewal applications/proposals with due dates of January 25, 2018 and beyond for NIH-funded multi-site studies where each site will conduct the same protocol involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program. If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites; If Columbia University is being proposed as one of the participating sites in an application to be submitted this month or soon after by another applicant organization, you must also contact the HRPO immediately. Moving forward, it is recommended that you contact the HRPO as soon as a decision is made to participate in a multi-site study to which the NIH sIRB Policy applies.; An official process that details the requirements for addressing the NIH sIRB Policy is being finalized, to be released shortly. In the meantime, PI's and/or departments can reach out to irboffice@columbia.edu to inform the HRPO about these applications. Upon receipt of your email, HRPO will send you an online form to be completed, and you will be provided with next steps.; In addition, we are offering several options to learn more about the sIRB process. Note: Protocols that address the same research questions, involve the same methodologies, and evaluate the same outcomes are considered to be the “same research protocol.” Additionally, sites that are accruing research participants for studies that are identical except for variations due to local context consideration would be considered to be conducting the “same research protocol.”; If you have any questions, please contact irboffice@columbia.edu; Our website contains resources to help you while you get accustomed to all of...
the policy changes impacting proposal preparation. We have an Excel checklist to help you complete the new PHS NIH Human Subjects and Clinical Trials Information Form. **Additional Information:** HRPO and IRB Updates; Dear colleagues, This email provides updates from the Human Research Protection Office (HRPO) on recent new or revised policies, regulations or requirements that may affect IRB activities and requirements.

**Status of the Revised Common Rule:** The Final (revised) Common Rule, i.e., revisions to Subpart A of the DHHS regulations for the Protection of Human Subjects (45 CFR 46), were published on January 19, 2017, with an effective and compliance date of January 19, 2018, for the majority of the revisions. On January 17, 2018, an Interim Final Rule was released that delays the effective date for 6 months, to July 19, 2018. Certain federal departments and agencies are in the process of developing a proposed rule to further delay implementation; the HRPO is developing guidance for preparing for the transition to the Revised Common Rule. Stay tuned for more information...;

**Revised Policies:** Revisions have been made to the new IRB Policy on the Privacy Rule and the Use of Health Information in Research (IRB HIPAA & Research Policy) and the IRB Data Security Plans Involving the Use, Storage or Transmission of Electronic Research Data Constituting Sensitive Data (IRB Data Security Policy). The IRB HIPAA & Research Policy, which was released on November 1, 2017, was revised to provide clarifications of definitions, scope, and when a Data Use Agreement is necessary. In addition, several case studies were added to assist with implementation of this policy. The IRB Data Security Policy was revised to include new terminology and definitions that are included in the IRB HIPAA & Research Policy. Sessions to explain the policy and review the examples will be scheduled. In addition, please let us know if you would like to have us come to your departmental meeting to review the policy!

**Revised Standard Operating Procedures (SOPs):** Version 5.0 of the IRB’s SOPs were recently released. Included in this version: (*) Comprehensive information on Expanded Access; (*) Incorporation of Columbia’s Institutional Conflict of Interest Policy; (*) Clarifications on when Unanticipated Problems are reported to federal agencies; (*) Updates to the sections regarding recruitment of inpatients at NYP; (*) Addition of the new Single IRB processes; (*) Clarification on the process for IRB disapproval; Process for Implementing the NIH Single IRB Policy: The NIH Single IRB (sIRB) Policy is applicable to new and competing renewal applications/proposals for NIH funding that are due on or after January 25, 2018, and contract solicitations issued on or after January 25, 2018. It is applicable to NIH-funded multi-site domestic studies involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program.; If you are preparing an NIH application that is due on or before March 5, 2018, it is important that you contact the HRPO immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND (*) The same research protocol will be conducted at multiple domestic sites; The HRPO and SPA have developed tools to facilitate implementation of this policy. These tools, including an overview of our process and template language that can be used in your grant applications, can be accessed here. The HRPO’s web page will continue to be updated with additional resources as more information becomes available to facilitate compliance with this policy.

**Upcoming HRPO Education Sessions:** Monthly IRB-Investigation Monthly Meetings: (*) February 22, 3:30-4:30pm, P&S Amphitheatre 1; (*) March 22, 3:30-4:30pm, P&S Amphitheatre 1; (*) April 26, 3:30-4:30pm, P&S Amphitheatre 1; (*) May 24, 3:30-4:30pm, P&S Amphitheatre 1; We want to hear from you! Please send us your questions as well as suggestions for topics for future education sessions; We look forward to hearing from you!; https://research.columbia.edu/irb;

NIH ANNOUNCEMENTS: On December 31, 2017 Grants.gov will no longer allow grant applicants to download an entire application form package as a single PDF for offline data entry and later submission

Deadline(s): 12/31/2017 (Effective Date)
Contact: Sheri Cummins; Communications & Outreach; NIH Office of Extramural Research; cummins5@mail.nih.gov
Additional Information: NIH grant applicants: Grants.gov downloadable forms submission option retiring Dec. 31; NIH grant applicants: Grants.gov downloadable forms submission option retiring Dec. 31; NIH Grant Applicant, On December 31, 2017 Grants.gov will no longer allow grant applicants to download an entire application form package as a single PDF for offline data entry and later submission. Since you were involved in a grant application submitted using downloadable forms in 2017, we wanted to provide a final reminder to switch to one of the following submission options for 2018 submissions: (1) NIH’s ASSIST (learn more); (2) Institutional system-to-system solution (if your institution has one); (3) Grants.gov Workspace (learn more); Our submission options page can help you compare features and considerations for each option. Ultimately your office of sponsored research or other group responsible for grant application submissions will decide which option is the best fit for you and your organization; If there is no business reason to choose one option over another, give NIH’s ASSIST a try. It’s a user-friendly, online solution optimized for NIH applications. Although Grants.gov will stop presenting their legacy downloadable forms package as an option at the end of this year, Grants.gov and NIH systems will continue to process previously downloaded application packages through March 2018. If you plan to submit a downloaded application package after December 31, 2017, you might want to consider downloading an extra copy of the forms package for the opportunity before Dec 31 and in case you run into a technical difficulty with the original.; Hope you have a great holiday season! Changes to NIH policies and procedures related to human subjects research

**Sponsor:** NIH  
**Deadline(s):** these proposal application changes in effect for proposals due January 25th, 2018 or later; 01/25/2018 (Effective Date)  
**Contact:** [brought to our attention by] Meredith D. Temple-O’Connor, Ph.D.; Senior Policy Advisor for Clinical Research; Division of Extramural Research; Eunice Kennedy Shriver National Institute of Child Health and Human Development; National Institutes of Health / DHHS; Bethesda, MD 20892; NICHDTrials@nih.gov; [and] Stephanie Scott; Director of Policy and Research Development; Sponsored Projects Administration; sfs2110@cumc.columbia.edu  

**Additional Information:** I wanted to pass along this email we received from NICHD. Regardless of whether you receive funding from NICHD, I thought it was a great summary of the recent NIH policies concerning human subjects research and the definition of a clinical trial. It also highlights contacting the NIH Program Officials when you are uncertain if your study meets the NIH clinical trial definition.; I promise you will see more communications from me as we prepare you for these proposal application changes in effect for proposals due January 25th, 2018 or later.; **Stephanie Scott** Changes to NIH policies and procedures related to human subjects research; Dear NICHD Investigator, NIH has broadened its definition of clinical trial, and it may impact your future applications (new, resubmission, or revision) and awards.; NIH’s definition of clinical trial now includes some research approaches not traditionally considered clinical trials. For example, many behavioral or biobehavioral studies that focus on underlying mechanisms of development may now be considered clinical trials. Also, conducting experiments that involve human subjects may be considered a clinical trial. If you are conducting studies involving human subjects, it is very important that you understand this definition and determine whether it applies to your research.; How do I know if my study is a clinical trial?; NIH has four questions that researchers need to answer to determine whether their study is a clinical trial. These questions may use terminology that has a different meaning than the typical meanings understood by certain research communities. It’s important to review the FAQs and case studies provided by the NIH Office of Extramural Research. If you answer “yes” to each of these four questions, your research will be considered a clinical trial by NIH: (1) Does the study involve human participants?; (2) Are the participants prospectively assigned to an intervention?; (3) Is the study designed to evaluate the effect of the intervention on the participants?; (4) Is the effect being evaluated a health-related biomedical or behavioral outcome?; Here is a link that can help you determine if your research is a clinical trial: https://grants.nih.gov/ct-decision/index.htm.; Why is this important? What are the implications if my study is considered a clinical trial?; Beginning with applications submitted on or after January 25, 2018, if your application involves a clinical trial, you must: (*) Submit the application through a Funding Opportunity Announcement (FOA) that accepts clinical trials; (*) Provide additional information in the application, which will be subject to different and distinct review criteria for clinical trials.; If selected for funding, you will need to designate individual(s) to serve as the responsible party for the trial and to register and post results in the ClinicalTrials.gov system.; NIH has also issued other policy updates involving Good Clinical Practice training requirements and the use of Single Institutional Review Board (sIRB) approaches for domestic, multisite human subjects research. Details about all updates/changes are available at https://grants.nih.gov/policy/clinical-trials.htm.; Note: These policy updates/changes also apply to individuals conducting research through contracts.; Why is NIH making these changes?; As stewards of public funding, NIH is implementing these changes in support of our scientific and ethical obligation to ensure that the burden and risk that volunteers assume as research participants ultimately contributes to scientific knowledge. In addition, these changes facilitate transparency in how NIH conducts and supports human subjects and clinical trials research and increases dissemination of data and conclusions derived from NIH-conducted or -supported clinical trials. More discussion of the reasons for the policy changes is at: https://grants.nih.gov/policy/clinical-trials/why-changes.htm.; We know this is a lot to process, but we are here to answer your questions. Please contact your Program Officer with any questions. If you’re uncertain who your Program Officer is, this information is available in your Commons account.; Kind regards, Meredith D. Temple-O’Connor, Ph.D.; Senior Policy Advisor for Clinical Research; Division of Extramural Research; Eunice Kennedy Shriver National Institute of Child Health and Human Development; National Institutes of Health / DHHS; Bethesda, MD 20892; NICHDTrials@nih.gov; Doing human subjects research? New policies will impact you! Learn more.; Updated application forms...

NIH FOAs with FORMS-E
Sponsor: NIH
Deadline(s): 01/25/2018 (FORMS-E to be used with application due dates January 25th, 2018 or later)

Link(s): https://grants.nih.gov/ct-decision/index.htm

Additional Information: Update: NIH FOAs with FORMS-E; For those of you planning to submit NIH proposals in February, NIH has re-issued the Funding Opportunity Announcements (FOAs) for the Parent R01, R03, R21, and most Career Development Awards (K-series) with FORMS-E to be used with application due dates January 25th, 2018 or later. Before initiating an application package, you must first determine whether the study meets the definition of a clinical trial, and then select the appropriate FOA: https://grants.nih.gov/grants/guide/patient_announcements.htm; If submitting an application with a due date before January 25th, 2018 (such as an AIDS-related application due January 7th), you must select an opportunity that supports FORMS-D. For example, if preparing an R01 application: (*) Use PA-16-160 (FORMS-D) for the January 7th, 2018 AIDS-related deadline. (*) Use PA-18-345 (FORMS-E) for the R01 clinical trial February 5th deadline; (*) Use PA-18-464 (FORMS-E) for an R01 application that is NOT a clinical trial due February 5th; Due to the complexity of FORMS-E, in particular the new PhS Human Subjects and Clinical Trials Information Form, we very strongly suggest that you submit your proposals early to SPA and encourage submission five business days prior to the NIH deadline; We have begun testing the new forms in both ASSIST and InfoEd. Further guidance will be provided soon. Please feel free to reach out to me, or your assigned SPA Senior Project Officer, with questions. We will continue to update you.; For more information on the release of Parent Announcements, see NIH Plans for Clinical Trial Specific Parent R01 and Parent R21 Funding Opportunity Announcements; [brought to our attention by] Stephanie F. Additional Information: Be Careful to Pick the Right Funding Opportunity Announcement (FOA); In follow-up to the announcement I sent last night, Update: NIH FOAs with FORMS-E, Dr. Mike Lauer of NIH just wrote a blog on the importance of selecting the correct Funding Opportunity Announcement (FOA).

See full blog post.; Key takeaways: (*) If any part of your study (the specific aims, components, studies, etc.) meets NIH’s definition of a clinical trial, then you must select an FOA that allows for clinical trials; (*) If none of the aims or studies within your project meet the definition, select an FOA that says “Clinical trials not allowed” or “Clinical trials optional”; (*) “The participating organizations may vary between the “clinical trial not allowed” parent FOA and the “clinical trial required” parent FOA for the same activity code. Read the details of each FOA carefully.; (*) “Note that some institutes that participate on a “Clinical Trial Required” parent may limit their participation to mechanistic studies.”; If you are unsure whether your study meets the definition of a clinical trial, I highly encourage you to reach out to the Program Official named on the FOA to help you make the appropriate determination, and to clarify the appropriate FOA to be selected. Include in your application cover letter the name of the Program Official who assisted you, and confirmed, the selection of the FOA; [brought to our attention by] Stephanie Scott, sfs2110@cumc.columbia.edu

**Additional Information:** [adapted from] A MESSAGE FROM DEAN FRIED [previously distributed] to Faculty, Dear Mailman School faculty,: In acknowledgement of the increasingly competitive federal funding environment, the School’s administrative and academic leadership teams have been working to develop new resources to support faculty in preparing grant applications with the highest chance of success. In the fall, we will announce and begin rolling out a suite of such supports.; Given the initial fall NIH submission deadline of October 5, I write today to inform you about the first of these resources. The School is providing support for pre-submission external review and for scientific final editing of R01, P, K, Center or other complex NIH proposals for NIH’s October 5 submission deadline, for all full-time faculty with primary appointments in the School. These services will only apply to first submissions (not to resubmissions). Note that, at this time, other grant types such as R03 and R21 are not eligible for this service.; For the external review of applications, the PI will be requested to identify an external expert who they think would be willing to review the grant. Please remember that an individual who serves as a reviewer in this way would then become ineligible to review the proposal for NIH. The School will arrange for the review and provide reviewers a $750 honorarium for R01 review and $1,000 for review of P or other more complex proposals. This external review is independent of any departmental review of aims or entire proposals, is independent of review by R2, and is entirely optional.; For the final scientific editing, an outside company that has already been used by several departments will be engaged as needed. The editing review will polish writing, help with organization and logical progression, and assist with the production of figures.; Below is the timeline and process for requesting and utilizing these supports: (*) To ensure an adequate amount of time for grant review and/or editing,
faculty wishing to participate must first inform Research Resources (via Craig Kandell at ckk7@columbia.edu) at least five weeks before the grant is due [in the case of the 10/05/2017 deadline, 09/01/2017] that you will be requesting one or both of these services. This request must include: the title of the grant, type of grant, due date, and name of the suggested external reviewer with contact information; (*) Resource Research will contact the external reviewer to ensure his/her willingness to review within one week. That office will also send the appropriate paperwork for paying the honorarium. Three to four weeks prior to submission, [in the case of the 10/05/2017 deadline, 09/14/2017 (3 weeks) or 09/07/2017 (4 weeks)] the PI must send the draft of the science to Craig, who will forward it to the external reviewer to complete his/her review within one week. The external reviewer will return comments directly to Craig and the PI. If you think you cannot meet this timeline, please discuss with Pam Factor-Litvak, Associate Dean for Research Resources; (*) For editing of grant proposals, Craig will send the revised manuscript to the scientific editor ten to 14 days prior to submission [in the case of the 10/05/2017 deadline, 09/21/2017 – 09/25/2017, and the editor's comments will be returned to Craig and the PI for finalization and submission within a few days; If you have any questions about your eligibility or the above process, please contact Pam Factor-Litvak at prf1@columbia.edu; I hope you will consider taking advantage of these new services and that you find them helpful; With best wishes, Linda P. Fried, MD, MPH; Dean and DeLamar Professor of Public Health; Mailman School of Public Health; Senior Vice President; Columbia University Medical Center; Professor of Epidemiology and Medicine

Fringe Benefits Rates for Fiscal Year Beginning July 1, 2017 (FY 2018)

Sponsor: Sponsored Projects Administration

NA, FY 2018 Announcements, brought to our attention on

Deadline(s): 07/06/2017

Contact: Any questions about the government fringe rate should be directed to AskRPIC@columbia.edu

Link(s): http://finance.columbia.edu/content/fringe-benefit-rates

Additional Information: To: Principal Investigators, Sponsored Projects Administrators; From: Barbara Hough, Vice President, Controller and Treasurer, Rudi Odeh-Ramadan, Associate Vice President for Research Administration; We are writing to inform you that, based on the approval obtained from the Federal government, the fringe rate applicable to government grants and contracts will increase from 28.9% to 30.3%, effective July 1, 2017. For all funding sources other than government grants and contracts, the fringe benefit rate will be 29.75%. The increase in the rate is primarily driven by the significant increase in medical costs the University has experienced over the past several years.; Please note that you may wish to take this opportunity to review the impact the change in the fringe benefits recovery rate may have on the allocation of personnel related costs for the remainder of the grant life cycle.; For information regarding student employees working during the academic year or summer, refer to http://finance.columbia.edu/content/fringe-benefit-rates.
grants administrators: FY17 Cost Transfers involving sponsored projects will continue to be processed with the FY17 fringe rates through the July 7th deadline. The new FY18 fringe rates will be introduced with FY18 payroll runs.; The rate agreement is available on the SPA website on the Institutional Information page and on the Finance Gateway at http://finance.columbia.edu/content/fringe-benefit-rates.; Any questions about the government fringe rate should be directed to AskR LIC@columbia.edu.

NIH to Limit Total Grant Support to PIs

Sponsor: NIH
Deadline(s): NA

http://www.nature.com/news/nih-grant-limits-rile-biomedical-research-community-1.21949

Additional Information: NIH to Limit Total Grant Support to PIs; NIH announced on Tuesday that it will implement a limitation on the total grant support it will provide to principal investigators (PIs) who have multiple awards. The agency will use a “Grant Support Index” that assigns point values to various types of grants. PIs who exceed a set point, linked to having three or more awards with a single PI, will be forced to adjust their portfolio with reduced resources. NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH says that it believes 6 percent of PIs will be affected and that resources will be freed up to fund about 1,600 additional awards. NIH insists that no existing awards will be rescinded.; An article posted by Nature reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.

It explains each role’s responsibility, when it is appropriate to contact them, and where to find their contact information.; See Who At NIH Can Answer my Question About….?; Remember that your Sponsored Projects Administration (SPA) Project Officer must communicate with NIH staff directly when submitting proposals, negotiating awards, submitting just-in-Time information, submitting formal requests for prior approval, submitting progress reports, clarifying NIH policies, and discussing financial or administrative issues. However, there may be times when contacting NIH directly is appropriate, for example, to identify the right type of grant program and/or funding opportunity for you and your research, or to verify that your idea fits within the mission and priorities of an NIH Institute or Center. [forwarded to our attention by] Stephanie Scott, SPA Communications and Outreach Director, sfsc2110; NIH Fellowship applicants, I’d like to bring two issue to your attention: (1) Anyone who started a fellowship application between June 3 and June 7 must return to their funding opportunity announcement to get an updated application package (NOT-OD-16-106); (2) If you use Grants.gov downloadable forms or Workspace to prepare your application, be aware that the “View Attachment” button associated with the 23. Resource Sharing Plan attachment on the PHS Fellowship Supplemental form displays the 22. Select Agent Research attachment instead of the expected one. This is simply an issue with the Grants.gov form interface. It does not impact how the attachments are sent to NIH or how we assemble your application image in eRA Commons.; We are working with Grants.gov to address the issue. In the meantime, do not rely on the “View Attachment” feature for the Resource Sharing Plan. Instead, carefully check your attachments prior to uploading them and again when viewing your application image in eRA Commons.; This issue only impacts the PDF version of the form. If you use ASSIST or a system-to-system solution to prepare your application, then you are not impacted.; If you have any questions, please contact Grants Information at grantsinfo@od.nih.gov.; Sheri; Sheri Cummins; Chief, Grants Information; Division of Communications and Outreach; NIH Office of Extramural Research; cumminss@mail.nih.gov; 301-496-3405;

**Additional Information:** Below is a nice summary from the NIH “Open Mike” blog [provided by Stephanie] Scott regarding the many changes taking place with NIH application forms and new policy requirements. I reviewed these changes this week with departmental/grants managers during the Research Administration Forums. I will certainly continue to provide updates and summaries of these changes for faculty and the rest of the research community. Stay tuned for more.; Steph: We periodically need to update our application forms and instructions to accommodate changing policy, new business needs, and sometimes (not often enough) to reduce the amount of information we ask of you. Given our constraints, we have
been working to provide systems support to make the mechanics of these transitions easier for you. This particular set of changes implements a number of policy changes impacting applications submitted in 2016, which we announced in a series of recent NIH Guide notices. We would like to give you a quick overview of what is happening; We will be rolling out the changes in two phases, as summarized in our notice published in the NIH Guide, since our new application forms will not be ready until the spring; You may want to pay particular attention to the following changes, effective for applications submitted on or after January 25, 2016: (*) There will be new application requirements and review language regarding enhanced rigor and reproducibility (We’ll be elaborating on these requirements in a separate upcoming post.); (*) We will ask for less information in the vertebrate animal section of the application, to remove redundancy with information already included in IACUC reviews. (Some of this information will be shifted to the research strategy section.); (*) We are updating the NIH policy on inclusion of children to lower the age designation for children to include those under 18 years old. (The current age designation for children includes all research subjects under 21 years old.); (*) For training grants, information requirements will change and lower applicant burden; For due dates of May 25, 2016 and beyond, we will require use of new application forms (FORMS-D). We will remind you again this spring, but please understand that it is imperative that you submit your application on the right form package to ensure successful submission.; We will reissue fellowship, career development, training and all parent funding opportunity announcements this spring, to ensure the announcements include instructions that match the form requirements. We’ll also make a variety of resources available this spring to help ensure you submit using the right forms.; If you have been using the Grants.gov downloadable forms and haven’t tried ASSIST yet, members of my staff (the electronic Research Administration or eRA) are working on enhancing the copy application feature to make it even easier to move your application (including attachments) from one form version to another. During the last round of grant applications, over 25% of the applicants switched from using downloadable forms to ASSIST. They successfully submitted their applications on the first try over 90% of the time compared with only 60% of the time for those still using the standard downloadable forms.; So be on the lookout for new application instructions we will release at the end of November, and for more communications from us as we get closer to the time we move to FORMS-D.;

Simplification of the Vertebrate Animals Section of NIH Grant Applications and Contract Proposals;
**Sponsor:** National Institutes of Health;  
**Deadline(s):** NA Release Date: 10/13/2015;  
**Contact:** For questions or further information, contact: Office of Laboratory Animal Welfare (OLAW); Telephone: 301-496-7163; Email: olaw@od.nih.gov;  
**Additional Information:** This Notice is to inform potential applicants and offerors that the requirements of the Vertebrate Animals Section (VAS) of grant applications, cooperative agreements and contract proposals has changed. The changes have been made to remove redundancy with Institutional Animal Care and Use Committee review while meeting the requirements of the Public Health Service Policy on Humane Care and Use of Laboratory Animals.; Updated VAS Requirements: If live vertebrate animals are to be used, federal policy requires applicants to address the following criteria: (*) Description of Procedures. Provide a concise description of the proposed procedures to be used that involve vertebrate animals in the work outlined in the application or proposal. Identify the species, strains, ages, sex and total number of animals by species to be used in the proposed work. If dogs or cats are proposed, provide the source of the animals.; (*) Justifications. Provide justification that the species are appropriate for the proposed research. Explain why the research goals cannot be accomplished using an alternative model (e.g., computational, human, invertebrate, in vitro.); (*) Minimization of Pain and Distress. Describe the interventions including analgesia, anesthesia, sedation, palliative care and humane endpoints to minimize discomfort, distress, pain and injury.; (*) Euthanasia. State whether the method of euthanasia is consistent with the recommendations of the American Veterinary Medical Association (AVMA) Guidelines for the Euthanasia of Animals. If not, describe the method and provide a scientific justification.;

**Additional Information:** This Notice serves to announce the availability of new research training data tables for use with FY 2016 institutional training grant applications and research performance progress reports (RPPRs). Table formats, instructions, and a completed set of tables with sample data may be found on the NIH website at: [http://grants.nih.gov/grants/funding/424/datatables.htm](http://grants.nih.gov/grants/funding/424/datatables.htm); Where specified in the Funding Opportunity Announcement for a program, these tables may also be used in institutional career development and research education applications and RPPRs.; Background and Related Information: In keeping with the recommendations of NIH’s Advisory Committee to the Director’s Working Group on the Biomedical Research Workforce, we plan to introduce an electronic system, xTRACT, for creating research training data
Research and Quality; NIH & AHRQ Change Font Guidelines for applications submitted for due dates on or after May 25, 2016, the following new guidelines apply: Text in PDF attachments must follow these minimum requirements: (*) Font size: must be 11 points or larger (smaller text in figures, graphs, diagrams and charts is acceptable as long as it is legible when the page is viewed at 100%); (*) Type density: must be no more than 15 characters per linear inch (including characters and spaces); (*) Line spacing: must be no more than six lines per vertical inch; (*) Text Color: must be black (color text in figures, graphs, diagrams, charts, tables, footnotes and headings is acceptable as long as it is legible); Since some PDF converters may reduce font size, it is important to confirm that the final PDF document complies with the font requirements; The following fonts are recommended, although other fonts (both serif and non-serif) are acceptable if they meet the above requirements; (*) Arial; (*) Garamond; (*) Georgia; (*) Helvetica; (*) Palatino Linotype; (*) Times New Roman; (*) Verdana; Legibility is of paramount importance. Applications that include PDF attachments that do not conform to the minimum requirements listed above may be withdrawn from consideration.;

Inclusion of Children in Clinical Research: Change in NIH Definition; Sponsor: National Institutes of Health; Deadline(s): NA Release Date: 10/13/2015; Contact: Please direct all inquiries to: NIH Inclusion Policy Officer; Office of Extramural Research (OER); Telephone: 301-435-7124; Email: inclusion@od.nih.gov; Link(s): http://grants.nih.gov/grants/funding/children/children.htm; http://grants.nih.gov/grants/guide/notice-files/not96-024.html; Additional Information: The purpose of this notice is to notify NIH applicants/offerors and grantees/contractors about a change related to the NIH policy on the inclusion of children in clinical research. NIH’s long-standing policy has been that children must be included in all human subjects’ research, conducted or supported by the NIH, unless there are scientific and ethical reasons not to include them. The policy was developed because medical treatments applied to children are often based upon testing done only in adults, and scientifically evaluated treatments are less available to children due to barriers to their

NIH & AHRQ Change Font Guidelines for Applications to Due Dates On or After May 25, 2016; Sponsor: National Institutes of Health; Agency for Healthcare Research and Quality;
inclusion in research studies. Therefore, applicants/offerors conducting human subjects’ research must include a description of plans for including children. If children (or a subset of children) will be excluded from the research, the application or proposal must present an acceptable justification.; What’s Changing: Starting with applications/proposals submitted for due dates on or after January 25, 2016, for the purposes of inclusion policy, the age of a child will be defined as individuals under 18 years old instead of under 21 years old, the current NIH definition of a child for inclusion policy considerations. Applicants/offerors for NIH funding will still be expected to justify the age range of the proposed participants in their clinical research, with particular attention paid to addressing the inclusion (or exclusion) of children (or subsets of children). However, now that threshold applies to individuals under the age of 18 rather than under the age of 21.; Reason for Change: Consideration of children as a vulnerable population for human protections from research risk and the NIH child inclusion policy are often conflated. While these are distinct policies, many think of children as under 18 years of age, typically the age of consent. This has sometimes led to confusion on the part of applicants/offerors, peer reviewers, grantees contractors, and even NIH staff about how to ensure compliance with the child inclusion policy. By aligning the NIH definition for the age of a child with the typical age of consent and the common perception of the age of adulthood, the NIH can continue to implement this policy in a manner that focuses on the group of children that need particular attention.; The NIH recognizes that development continues well beyond 18 (and even 21, the current age); however, there is particular concern about ensuring the appropriate inclusion of individuals under 18 while also safeguarding this vulnerable group. NIH policies on inclusion are aimed at ensuring that appropriate individuals are included in clinical research and clinical trials. Results need to be generalizable to individuals that comprise the population under study. This includes consideration of age as a factor in the scientific design.; For more information on the child inclusion policy: https://grants.nih.gov/grants/funding/children/children.htm;

Implementing Rigor and Transparency in NIH & AHRQ Research Grant Applications;

Additional Information: This notice informs the biomedical research community of updates to application instructions and review language intended to enhance the reproducibility of research findings through increased scientific rigor and transparency. These updates will take effect for most* research grant applications (including small business and complex research grant applications) submitted for due dates on or after January 25, 2016. For research contracts, this policy will be effective for proposals received on/after January 25, 2016 and expected to result in contract awards in Fiscal Year 2017 and beyond.; Updates include: (*) Revisions to application guide instructions for preparing your research strategy; (*) Use of a new "Authentication of Key Biological and/or Chemical Resources" attachment; (*) Additional rigor and transparency questions reviewers will be asked to consider when reviewing applications; These updates focus on four areas deemed important for enhancing rigor and transparency: (1) the scientific premise forming the basis of the proposed research; (2) rigorous experimental design for robust and unbiased results; (3) consideration of relevant biological variables, and (4) authentication of key biological and/or chemical resources.; The basic principles of rigor and transparency and the four areas of focus apply to the full spectrum of research, from basic to clinical. Investigators will need to consider how all four areas apply to their proposed research. Likewise, reviewers will assess whether these areas have been appropriately addressed by the applicant through revised language defining the peer review criteria. (*) *Notes & Exceptions: (*) Research grant activity codes excluded from this policy include C06, G08, G11, G12, G13, G20, R13, S06, S10, S21, SB1, U13, U55, UB1, UC6, UC7, UG4, UH4, X02, and 333; (*) Research Resource and Related grants or components (P30, P40, P41, P2C, R24, R28, U24, U41, U42, and U2C) may have slightly revised review language; please refer to the Funding Opportunity Announcement; (*) Refer to NOT-OD-16-012 for updates to Career Development Award application instructions and review language.; (*) Fellowship and Training grant applications submitted for the May 25, 2016 due date and beyond will include new instructions and review criteria to address this policy. Details on these changes will be available by December 2015.;

Contact: Please direct all inquiries to: reproducibility@nih.gov;
Link(s): http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-012.htm;
Additional Information: This notice informs the biomedical research community of updates to application instructions and review language intended to enhance the reproducibility of research findings through increased scientific rigor and transparency. These updates will take effect for most* Career Development Award applications submitted for due dates on or after January 25, 2016. For research contracts, this policy will be effective for proposals received on/after January 25, 2016 and expected to result in contract awards in Fiscal Year 2017 and beyond.; Updates include: (*) Revisions to application guide
instructions for preparing your research strategy attachment; (*) Use of a new "Authentication of Key Biological and/or Chemical Resources" attachment; (*) Additional rigor and transparency questions reviewers will be asked to consider when reviewing applications; These updates focus on four areas deemed important for enhancing rigor and transparency: (1) the scientific premise forming the basis of the proposed research; (2) rigorous experimental design for robust and unbiased results; (3) consideration of relevant biological variables, and; (4) authentication of key biological and/or chemical resources; The basic principles of rigor and transparency and the four areas of focus apply to the full spectrum of research, from basic to clinical. Investigators will need to consider how all four areas apply to their proposed research. Likewise, reviewers will assess whether these areas have been appropriately addressed by the applicant through revised language defining the peer review criteria.; *Notes & Exceptions: (*) Career Development Award activity codes excluded from this policy include K02, K05, and K24, as candidates for these awards are expected to have independent, peer reviewed research support at the time the career award is made.; (*) Refer to NOT-OD-16-011 for updates to Research grant application instructions and review language; (*) Fellowship and Training grant applications submitted for the May 25, 2016 due date and beyond will include new instructions and review criteria to address this policy. Details on these changes will be available by December 2015.;

FY16 Fringe Rates;
Sponsor: http://spa.columbia.edu;
Deadline(s): FY16;
Contact: Please feel free to contact your assigned Project Officer, or SPA-eBi@columbia.edu; if you have specific questions concerning InfoEd;
Link(s): http://spa.columbia.edu/proposals/institutional-information;
Additional Information: Dear All, The federal fringe rate changed from 28.2% to 27.1% for FY16. Please see below for details. The new DHHS Rate Agreement, dated 9/21/2015, has been posted to the Sponsored Projects Administration (SPA) website, and can be found at http://spa.columbia.edu/proposals/institutional-information; If you are
currently working with your Project Officer on an upcoming proposal submission, (s)he can advise on the budget preparation for the submission. If you are currently working on a proposal in Proposal Development (PD) in InfoEd, the new fringe rate will be reflected in the system next Monday. Budgets will automatically adjust in InfoEd to reflect the new rate for proposals submitted Monday and thereafter. As always, please feel free to contact your assigned Project Officer, or SPA-eBiz@columbia.edu; if you have specific questions concerning InfoEd; Thanks; Rosa [Rivera], Director, Sponsored Projects Administration; To all Budget Tool users, FY16 Fringe Rates: (*) For salaries charged to government grants and contracts, the FY16 fringe rate is 27.1%; (*) For salaries charged to all other funding sources, the FY16 fringe rate is 30.5%; (*) For student employees (less than half-time or matriculated enrolled in a degree-granting program), the FY16 fringe rate is 8.15%; [emphasis added]; The Budget Tool has been updated with the new government fringe rates and the new fringe benefit assessments have been calculated in the Payroll module. Although the overall fringe assessment on non-government grant accounts is not changing, the split between accounts 59010 and 59020 will shift; The lower fringe rate for government grants and contracts will require users to review their grant projections and make necessary adjustments; [emphasis added]; Users will need to apply these changes to update their FY16 current estimate and future year budgets; Next Steps: When you open the Budget Tool, a message that says “You have unapplied payroll changes” will appear. You must apply and confirm these amounts from the Payroll module and then have them approved before the transaction will post to ARC; If you have any questions, please contact the Finance Service Center, You can log an incident or request a service by using a self-service web form, or you can contact the Service Center by phone at (212) 854-2122 Monday, Tuesday and Thursday, 9:00 am – 5:00 pm; Wednesday 9:30 am – 5:00 pm; Friday 9:00 am – 4:00 pm.; Thank you.; The Budget Tool Team;

**Additional Information:** Dear Colleagues, We were pleased to see so many faculty and staff members at the annual HIPAA Privacy and Information Security Briefing. Those of you who were unable to attend the briefing can watch a video of it here: [2016 HIPAA Privacy and Information Security Briefing](https://www.mailman.columbia.edu/information-for/research-administration/contact-us). The slides and video link are also on the CUMC HIPAA website under HIPAA Educational Information. Although the session was not mandatory, it outlined important information about CUMC’s privacy and information security programs. We encourage you to familiarize yourself with the material; Thank you for your commitment to safeguarding Protected Health Information at the medical center.

Your partnership in this endeavor helps make CUMC one of the nation’s leading medical centers; Sincerely, Karen Pagliaro-Meyer; Privacy Officer; Columbia University Medical Center

BEHAVIORAL SCIENCES
NIH Releases Protocol Template for Behavioral and Social Sciences Research Involving Humans

**Sponsor:** National Institutes of Health  
**Deadline(s):** 03/26/2019 (Release Date)  
**Contact:** Please direct all inquiries to: NIH Office of Science Policy  
**SciencePolicy@od.nih.gov**  

**Additional Information:** Purpose: The National Institutes of Health (NIH) has released a clinical trial protocol template with instructional and example text for NIH funded investigators to use in writing protocols for behavioral and social sciences clinical trials. This template was developed in response to changes in NIH policies that expanded the requirements associated with clinical trials beyond FDA-regulated clinical trials to those studies including behavioral or social interventions. Use of the template is recommended, but not required.

EBOLA and ZOONOTIC DISEASE

Message from President Bollinger relative to Ebola;
Sponsor: Columbia University;
Deadline(s): NA
Contact: If you or anyone has any concerns, please visit the University's Ebola Preparedness site or the New York City Department of Health Ebola update page. You may also contact Student Health Services at 212-854-2284 or Workforce Health and Safety for Faculty/Staff with Hospital Responsibilities at 212-305-7590;
Link(s): If you or anyone has any concerns, please visit the University’s Ebola Preparedness site or the New York City Department of Health Ebola update page.;
Additional Information: Dear fellow members of the Columbia community: As you may have seen in the media, Dr. Craig Spencer is being treated for Ebola at Bellevue Hospital in Manhattan. Dr. Spencer, an emergency department physician at NewYork-Presbyterian/Columbia University Medical Center, recently returned from a humanitarian mission with Doctors Without Borders to one of the outbreak areas in Western Africa. We admire and appreciate all of those willing to do this vital and selfless public health work around the globe. It’s critical to bear in mind what our public health and infectious disease experts have emphasized—that the risk to people in New York City and at Columbia remains extremely low. If you or anyone has any concerns, please visit the University’s Ebola Preparedness site or the New York City Department of Health Ebola update page. You may also contact Student Health Services at 212-854-2284 or Workforce Health and Safety for Faculty/Staff with Hospital Responsibilities at 212-305-7590; We must keep Dr. Spencer in our thoughts and wish him a full and speedy recovery, as we do all our colleagues passing seamlessly from science to service. As we move through this global crisis, we must all take pride in that commitment. Sincerely, Linda; Linda P. **CLARIFICATION - RE: 3rd Reminder-eRA Commons IDs and Complete Profiles Required for Students and Postdocs; The requirement for NIH eRA Commons IDs, as per notice NOT-OD-13-097;**

**Sponsor:** NIH

**Deadline(s): Starting in October 2014;**

**Contact:** Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu/

**Link(s): NOT-OD-13-097;**

http://spa.columbia.edu/

**Additional Information:** This is to clarify the requirement for NIH eRA Commons IDs, as per notice NOT-OD-13-097. The Commons IDs, and complete Personal Profiles, are required for postdocs, graduate and undergraduate students when: (*) They have participated at least one person month on an NIH award, regardless if they were paid from the grant; and (*) Their participation is required to be included in Participants Section (D.1) in the Research Performance Progress Report (RPPR) – (*) note some select NIH grant mechanisms may be exempt from reporting in this section. (*) The RPPR Instruction Guide contains Supplemental Instructions for Specific Grant Types (such as training awards and multi-project awards), which can be found at: http://grants.nih.gov/grants/rppr/rppr_instruction_guide.pdf; TIP – when preparing your RPPR, click “Check for Errors” prior to routing the report to your SPA Project Officer. You will be alerted of missing eRA Commons IDs and incomplete profiles. This is the best time to contact SPA-eBiz to request IDs, or to alert individuals to complete their Commons profiles; if you are requesting an eRA Commons ID from SPA-eBiz@columbia.edu, please include the following information with your request: (*) Full Name; (*) UNI; (*) Email address; (*) Campus (Morningside or CUMC); SPA-eBiz will work with you to determine the appropriate eRA Commons role; Please feel free to ask me, or your assigned SPA Project Officer, any questions. Thank you for your patience; Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

**Additional Information:** As we get closer to October 2014, I wanted to remind investigators and administrators of the new
NIH progress reporting requirement regarding eRA Commons IDs. Postdocs, graduate and undergraduate students supported on NIH awards must have eRA Commons IDs, with complete eRA Commons Personal Profiles. Beginning with NIH progress reports due October 2014, NIH will not accept progress reports that have missing eRA Commons IDs and incomplete profiles. As you are aware, if NIH rejects a progress report, that could delay issuance of the next year’s funding; Complete eRA Commons profiles are just as important as the ID itself. NIH can reject the progress report if the following fields are not complete in the profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Tutorials on the eRA Commons Personal Profile can be found at eRA Commons Manage Personal Profile; If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu ; Finally, the Research Performance Progress Report (RPPR) format will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rppr/; Please share this information with your students and postdocs who are supported on NIH grants. If you have any questions, you may contact me, or your assigned SPA Project Officer; Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu; Commons screens to alert individuals identified as undergraduate students, graduate students, and postdoctoral researchers that the following fields should be completed in their eRA Commons profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Beginning on October 1, 2014, those fields in the eRA Commons screens will be required for individuals identified in any of those three roles. If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu. In addition, graduate and undergraduate students and postdoctoral researchers should complete their Personal Profiles in the eRA Commons, ensuring all fields listed above are complete. Tutorials on the Personal Profile can be found at eRA Commons Manage Personal Profile; RPPRs will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rppr/. Therefore, if you have students supported on non-SNAP awards, now is the time to ensure they have eRA Commons profiles completed; Please share this information with your students and postdocs who are supported on NIH grants. A few weeks ago, while I was preparing to give the opening talk at the NIH Regional Seminar on Program Funding and Grants Administration, I realized some Rock Talk readers might be interested in learning more about how these topics fit into the big picture of NIH. So, I asked my colleagues to tape this talk, “NIH: The View from 10,000 Feet”, so I could share it with you on the blog

Additional Information: Formula for Innovation: People + Ideas + Time: Posted on July 17, 2014 by Sally Rockey and Francis Collins; In these times of tight budgets and rapidly evolving science, we must consider new ways to invest biomedical research dollars to achieve maximum impact—to turn scientific discoveries into better health as swiftly as possible. We do this by thinking strategically about the areas of research that we support, as well as the process by which we fund that research. .... We often hear from investigators at all career stages that they spend a significant portion of their careers writing grant applications, consuming precious time that could otherwise be spent conducting research. .... Dear PIs and Administrators, If you are planning to prepare and submit an NIH multi-project application over the next several months, please let me know. Examples of multi-project grant mechanisms include, but are not limited to, P01, P30, P50, and U19. All multi-project Funding Opportunity Announcements (FOAs) now require proposals to be submitted electronically using ASSIST (Application Submission System and Interface for Submission Tracking). For a listing of all multi-project FOAs, go to http://grants.nih.gov/grants/guide/notice-files/PAR-19-037.html. If you plan to submit a multi-project application in the coming months, please contact me and your SPA Project Officer and we will schedule a time to meet to provide you with training and guidance. Please feel free to contact me if you have any questions. Our website contains many ASSIST resources: http://spa.columbia.edu/electronic-systems/assist. Thank you; Stephanie F. The Columbia University Medical Center IRB Office has a standing "IRB Consultation Hour". This service provides an opportunity for researchers to stop in at the IRB office and meet with an IRB professional to discuss regulatory, policy, and procedural questions. The sessions are scheduled for every Tuesday from 10 am to 11 am. No appointment is necessary. The IRB office is located at 154 Haven Avenue, 1st Floor. Attendees should sign in at the IRB receptionist desk, and will meet with IRB staff in the order of arrival. If situations warrant, individual consultations may be limited to 15 minutes. Important Note: If you have questions about a protocol that has already been submitted to the IRB, please contact the staff members who administer the IRB to which the protocol is assigned rather than bringing those questions to a Consultation Hours session. Staff contact information may be obtained on the IRB website: http://www.cumc.columbia.edu/dept/irb/Researchers may also call in during these times, to the IRB main number, for consultation: 212.305.5883. New Program for NIH-funded Grad Students and Postdocs;
Sponsor: NIH;
Deadline(s): Open Ended;
Contact: Please contact Rory Flinn (rfl2531@columbia.edu); Director of the Office of Postdoctoral Affairs, with any questions about the program;
Additional Information: Dear Colleagues: The Office of the Executive Vice President of Research (EVPR), including the Office of Postdoctoral Affairs, and the Graduate School of Arts and Sciences (GSAS) are pleased to announce the introduction of an individual development plan (IDP) program for National Institutes of Health (NIH)-funded graduate students and postdoctoral researchers (postdocs). An IDP consists of a self-assessment of skills, interests and values that guides the development of short and long term plans to achieve career goals. In 2012, the NIH published a task force report on the current state of the biomedical workforce which found, among other things, that universities need to better prepare biomedical graduate students and postdocs for a broad range of career opportunities beyond academia. As one of a number of initiatives designed to address the recommendations of the task force, the NIH issued a policy, released on July 23, 2013 and revised on August 4, 2014 (http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-113.html), that does not require, but strongly encourages recipients of NIH awards to develop and use IDPs for graduate students and postdocs supported by the NIH. In addition, the revised policy provides that, beginning on October 1, 2014, annual progress reports relating to NIH awards must include a description of whether or not the institution uses IDPs and how they are employed to help manage the training and career development of graduate students and postdocs associated with such awards. The University’s IDP program will begin later this month and will include seminars on topics relating to the development of an IDP. Optional workshops will assist participants in completing an IDP. Career panels and networking events will be held to offer opportunities for participants to learn more about potential career options and the skills and experiences needed to gain employment in a wide array of fields. Complete IDP program details, including registration information, can be found at https://www2.gsas.columbia.edu/idp. Faculty members should strongly encourage their NIH-funded graduate student and postdoc to register and participate in the IDP program. A description of the Columbia IDP program to be utilized in progress reports can be found at https://www2.gsas.columbia.edu/idp/node/3#summary. Please contact Rory Flinn (rf2531@columbia.edu), Director of the Office of Postdoctoral Affairs, with any questions about the program.; Sincerely, G. Michael Purdy; Executive Vice President; Carlos J. Alonso; Dean, Graduate School of Arts and Sciences; Arthur G. Palmer III; Associate Dean for Graduate Affairs; College of Physicians & Surgeons;

Personal Profiles. Beginning with NIH progress reports due October 2014, NIH will not accept progress reports that have missing eRA Commons IDs and incomplete profiles. As you are aware, if NIH rejects a progress report, that could delay issuance of the next year's funding. Complete eRA Commons profiles are just as important as the ID itself. NIH can reject the progress report if the following fields are not complete in the profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Tutorials on the eRA Commons Personal Profile can be found at eRA Commons Manage Personal Profile; If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu.

NIH-Investigators FW: NIH eSubmission Items of Interest –
Sponsor: NIH
Deadline(s): June 4, 2014
Non-standard Characters in Form Fields: Although NIH systems now support a broader character set including Greek and other non-standard characters, Grants.gov systems currently do not. When completing application form fields type content directly from your keyboard. Avoid cutting and pasting from Word and other word processors - they often convert your plain text to rich text (e.g. Word converts quotes to ‘smart quotes’ that curve towards the text between them and combines two dashes into one long em-dash.) Also, keep your text as simple as possible. The following characters are typically ‘safe’: letters, numbers, spaces, underscores, periods, dashes (not em-dashes), quotes (not smart quotes), parentheses, brackets, ampersands, tilde, exclamation points, commas, colons, semicolons, at signs, number signs, dollar signs, percent signs, plus signs, equal signs, and asterisks. Limit your use of fancier characters to the body of your PDF attachments.

Submitting Applications with more than 5 Budget Periods: Although NIH typically allows only 5 budget periods to be submitted with grant applications, from time to time you will come across a FOA that allows more than 5 budget periods. Most NIH FOAs include the R&R Budget form which only accommodates data collection for 5 budget periods leaving applicants wondering what to do with the rest of the data. Applicants have been forced to use a rather clunky ‘workaround’ that includes adding the additional budget period information in the budget justification. eRA has just added system support for Grants.gov’s R&R Budget 10YR form that will allow for the collection of up to 10 budget periods of data. Going forward, this form will be included with the few, special FOAs that allow more than 5 budget periods. The bulk of NIH FOAs will continue to use the standard R&R Budget form.

Transition to FORMS-C To Complete in August: If it seems like I've been talking about transitioning to FORMS-C for a year – I have. On May 30, 2013, we announced our first transition to updated application forms (FORMS-C) for application due dates on/after August 5, 2014 (NOT-OD-14-089) marking the end of a rather lengthy transition. Believe it or not, this summer my friends in policy will start working on/after August 25, 2013 (NOT-OD-13-074). The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs are our last remaining programs to use the older forms. These programs are scheduled to transition to FORMS-C for due dates on/after August 5, 2014 (NOT-OD-14-089) marking the end of a rather lengthy transition. Believe it or not, this summer my friends in policy will start working on/after August 25, 2013 (NOT-OD-13-074). Before you know it we’ll be talking about ‘FORMS-D’ forms. For now, let’s celebrate getting through this one. Woo-hoo!

CYA: Cover Your Application - that's what you thought I was talking about – right? NIH form packages no longer use a separate, agency-specific PHS Cover Letter form. The version of
the SF424 (R&R) cover form included in FORMS-C packages has a
new Cover Letter Attachment (item #21 at the very bottom of the
form). If you plan to include a cover letter with your application –
use this Cover Letter Attachment only! The eRA systems know to
keep this attachment separate from your assembled application
image and to limit access to it. If you attach it someplace else (e.g.,
Pre-application attachment on the SF424 (R&R) cover form,
Other Attachments on the R&R Other Project Information form) it
will become part of your assembled application image and will be
visible to everyone with access to your application including
reviewers.

RPPR Required for Non-SNAP Progress Reports Beginning October 17,
2014

NIH currently requires use of the fed-wide progress reporting
format — known as the RPPR (Research Performance Progress
Report) — to submit progress reports for Streamlined Non-
Competing Award Process (SNAP), fellowship, and multi-year-
funded awards. In April we opened the RPPR for use for all Type
5 Non-SNAP progress reports in anticipation of an October 2014
requirement for RPPR use. Now, it’s official — all type 5 non-
SNAP progress reports submitted on or after October 17, 2014
need to be submitted through the RPPR module of eRA

Promoting Research Integrity: Building the Foundation of Trust
Exemplifying and promoting the highest level of scientific integrity, public accountability, and social responsibility in the conduct of science are among NIH’s main goals as an agency. You Ask, We Answer:
Can I Resubmit My Grant Application While It Is Under Appeal of the Initial Peer Review Results?

What is the Deadline for Resubmitting my Unfunded Application?

NIH REVISED SUBMISSION RULES

NIH & AHRQ just released more clarifications on the new resubmission policy. In this announcement are clarifications on due dates, applicability, time limits, and the various options PIs have. See NOT-OD-14-082: http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-082.html. I know this revised policy is important to you and has many implications. Please feel free to me or your assigned Project Officer questions. I am following up with additional information on the important announcement I sent last week regarding NIH and AHRQ’s new resubmission policy (see below). NIH just posted extensive FAQs describing various scenarios when you may submit applications as ‘new’ that were previously submitted, resubmitted and not funded (including competing renewal applications that were not funded). Refer to the following resources and articles: FAQs: http://grants.nih.gov/grants/policy/resubmission_qa.htm; The policy announcement: NOT-OD-14-074: A Change in Our Resubmission Policy – Rock Talk article explaining the reasons for the change; NIH Policy on Resubmission Applications; Science Magazine article: NIH to Relax ‘Two Strikes’ Grant Submission Policy; Deciding whether to submit an application as a resubmission or as a new submission can sometimes be complex. You may need to speak with an NIH Program Official or Program Director regarding your specific situation. Please feel free to ask me, or your SPA Project Officer, questions as they arise. Please read full announcement, NOT-OD-14-074 at http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-074.html Effective immediately, for NIH and AHRQ applications due after April 16, 2014, following an unsuccessful resubmission (A1) application, applicants may submit the same idea as a new (A0) application for the next appropriate due date. The NIH and AHRQ will not assess the similarity of the science in the new (A0) application to any previously reviewed submission when accepting an application for review. Although a new (A0) application does not allow an introduction or responses to the previous reviews, the NIH and AHRQ encourage applicants to refine and strengthen all application submissions. Please read the full announcement for more details on the background of this policy change and the policy details. The NIH time limit for accepting resubmission (A1) applications remains in effect, as does the policy for New Investigator R01 resubmission deadlines. Stephanie F. Scott, M.S., CRA

Link(s): (NOT-OD-14-103); Additional Information for the two above mentioned announcements: This Notice alerts grantees to a change in the implementation timeline, previously announced in NOT-OD-13-120 and NOT-OD-14-093, for the NIH transition to new U.S. Department of Health and Human Services (HHS) payment policies for domestic, non-competing continuation awards and use of Payment Management System (PMS) subaccounts. It also announces a change in how competitive revisions/administrative supplements (Type-3s) awards will be processed. This Notice only applies to domestic non-competing continuation awards that have not yet transitioned to PMS subaccounts. In response to critical feedback from the grantee community, NIH requested an amendment to its subaccount implementation plan to delay the transition of domestic, non-competing continuation awards to PMS subaccounts for an additional year; e.g., now beginning October 1, 2015. HHS's Office of the Assistant Secretary for Financial Resources recently approved the request. This additional time is provided to allow grantees to prepare their systems to accommodate the changes. Grantees with inadequate systems in place to appropriately manage this transition by October 1, 2015, may be unable to appropriately access PMS accounts and risk losing their ability to draw down funding. Grantees are advised that there will be no additional implementation delays considered and no exceptions granted to the deadline. As of October 1, 2015, NIH will utilize only subaccounts for awarding grant funds. Every grant that is awarded funding in FY 2016 (whether it be in the first, second, third or fourth quarter of FY 2016) will be in a subaccount. NIH will continue transitioning payment of grant awards with new document numbers to domestic institutions to PMS subaccounts in FY 2015 as announced in Notice NOT-OD-14-093. The administrative changes announced in NOT-OD-14-093 will now apply to the transition that will occur between October 1, 2015 and September 30, 2016. This Notice reiterates those administrative changes for non-competing, continuation awards and highlights the revised implementation timelines and T-3 award process for all domestic awards. - See more at: http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-103.html#sthash.0l3doSVZ.dpuf; http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-103.html#sthash.q3dTkMY2.dpuf;

FEDERAL FUNDING TRAVEL POLICY

NIH-Investigators New Policy on Fly America Act; Sponsored Projects Administration (SPA) and the Accounts Payable (AP) department is happy to announce the release of an updated version of the Fly America Act policy, effective immediately. SPA and AP have partnered together on this effort, resulting in a clearer, more comprehensive policy to ensure compliance with the Fly America Act. You can find the full policy in the Administrative Policy Library at: http://policylibrary.columbia.edu/fly-america-act. This link contains: * Full policy text, including links to resources; * FAQs; * A Decision Tree Diagram; * A new form, the Fly America Exception Checklist; These resources can be found on the SPA website at: http://spa.columbia.edu/policies/us-flag-carrier-policy.

The Fly America Act is a Federal regulation that states that any foreign air travel that is financed by Federal funds must be booked on U.S. Flag Air Carriers, regardless of cost or convenience. Only Federally funded sponsored projects are subject to this policy. The Fly America Act is not a new policy. Rather, our offices updated our existing policies, which now live in a central location in the Policy Library. There are
specific exceptions to the Fly America Act that allow travelers to use Federal funds on foreign carriers, but only under certain circumstances. These exceptions can be quite complex to interpret. Therefore, our offices created a Fly America Exception Checklist and Decision Tree Diagram to assist travelers when booking flights internationally as part of the work to be done on a Federal sponsored project. In cases of exceptions, the Fly America Exception Checklist Form will need to accompany the Columbia Travel & Business Expense Report (TBER) to be submitted to AP. Appropriate back-up documentation should accompany the Checklist. The full policy and FAQs outline this process.

Anyone planning to travel internationally as part of work to be done on a Federally sponsored project is responsible for knowing and adhering to this policy. Please share this information with all faculty, administrators, postdocs and students who may be traveling internationally.

When questions arise that are related to the Fly America Act (for example, what is allowable vs. unallowable, Open Skies Agreement exceptions, etc.) you may contact your SPA Project Officer or myself. However, if you have specific questions about reimbursement of travel expenses or regarding your supporting travel documentation, you should contact AP through the Finance Service Center or call 212-854-2122.

Additional Information: Department of Defense; Department of Defense Peer Reviewed Cancer Research Program; Funding Opportunities for Fiscal Year 2016 (FY16); The FY16 Defense Appropriations Act provides $50 million (M) to the Department of Defense Peer Reviewed Cancer Research Program (PRCRP) to support innovative, high-impact cancer research. As directed by the Office of the Assistant Secretary of Defense for Health Affairs, the Defense Health Agency, Research, Development, and Acquisition (DHA RDA) Directorate manages the Defense Health Program (DHP) Research, Development, Test, and Evaluation (RDT&E) appropriation. The managing agent for the anticipated Program Announcements/ Funding Opportunities is the Congressionally Directed Medical Research Programs (CDMRP); FY16 PRCRP Program Announcements and General Application Instructions for the following award mechanism is posted on the Grants.gov website.; Congressionally Directed Topic Areas: To be considered for funding applications for the FY16 PRCRP must address at least one of the Topic Areas as directed by Congress. Research applications in the areas of breast, prostate, lung (excluding mesothelioma), or ovarian cancer will not be accepted.; The FY16 PRCRP Topic Areas are: Bladder cancer (New for FY16); Liver cancer; Pancreatic cancer; Colorectal cancer; Lymphoma (New for FY16); Pediatric Brain Tumors (New for FY16); Immunotherapy* (New for FY16); Melanoma and other skin cancers; Stomach cancer; Kidney cancer; Mesothelioma; Listeria vaccine for cancer; Neuroblastoma; *As derived from the National Cancer Institute Dictionary of Cancer terms; Immunotherapy is a type of biological therapy that uses substances to stimulate or suppress the immune system to help the body fight cancer. Cancers studied under this topic area should be within the scope of the Congressional language and the intent of the Program Announcement(s); The FY16 PRCRP Military Relevance Focus Areas are: To address the cancer health needs of both deployed and non-deployed personnel, their dependents, retirees, and Veterans, the FY16 PRCRP seeks to support studies that are responsive to the Military Relevance Focus Areas listed below: (*) Militarily relevant risk factors associated with cancer (e.g., ionizing radiation, chemicals, infectious agents, and environmental carcinogens); (*) Gaps in cancer prevention, screening, early detection, diagnosis, treatment, and/or survivorship that may affect the general population but have a particularly profound impact on the health and well-being of military members, Veterans, and their...
beneficiaries; *Applications that address exposures, conditions, or circumstances that are unique to the military, or disproportionately represented in a military beneficiary population, are the highest priority, though any applications that address the above focus areas will be considered.*; [http://cdmrp.army.mil/funding/prcrp.shtml](http://cdmrp.army.mil/funding/prcrp.shtml);

**Additional Information:** JUST RELEASED! FY16 DOD BMFRP Program Announcement; This is to notify the research community of the recently released Fiscal Year 2016 (FY16) funding opportunities managed by the office of Congressionally Directed Medical Research Programs (CDMRP); Detailed descriptions of the funding opportunity, evaluation criteria, and submission requirements can be found in the Program Announcements. The Program Announcements are available electronically for downloading from the Grants.gov website http://www.grants.gov; CDMRP website (http://cdmrp.army.mil/funding/prgdefault.shtml) and the electronic Biomedical Research Application Portal (eBRAP) [https://eBRAP.org](https://eBRAP.org); All CDMRP funding opportunities, both recently and previously released, are available on the CDMRP website http://cdmrp.army.mil; Subsequent notifications will be sent when additional funding opportunities are released. A listing of all open CDMRP funding opportunities can be obtained on the Grants.gov website by performing a basic search using CFDA Number 12.420.;  
Submission is a two-step process requiring both (1) pre-application submission through the electronic Biomedical Research Application Portal (eBRAP) (https://eBRAP.org) and (2) application submission through Grants.gov (http://www.grants.gov/). Refer to the General Application Instructions, Section 2.A. for registration and submission requirements for eBRAP and Grants.gov; eBRAP is a multifunctional web-based system that allows PIs to submit their pre-applications electronically through a secure connection, to view and edit the content of their pre-applications and full applications, to receive communications from the CDMRP, and to submit documentation during award negotiations and period of performance. A key feature of eBRAP is the ability of an organization’s representatives and PIs to view and modify the Grants.gov application submissions associated with them. eBRAP will validate Grants.gov application files against the specific Program Announcement/Funding Opportunity requirements and discrepancies will be noted in an email to the PI and in the Full Application Files tab in eBRAP. It is the applicant’s responsibility to review all application components for accuracy as well as ensure proper ordering as specified in this Program Announcement/Funding Opportunity.; To be added or removed from this email list please use the "Subscribe/unsubscribe to program specific news and updates at [https://ebrap.org](https://ebrap.org);
