Additional Information: William T. Grant Scholars Program; Limited Submission; William T. Grant Scholars Program; Internal Proposal due 9:00 a.m. on Tuesday, May 12, 2020; Each school may nominate one candidate to this program. This announcement is for faculty in Arts & Sciences and Mailman School of Public Health only.; What: The William T. Grant Scholars Program supports career development for promising early-career (Assistant Professor) researchers. The program funds five-year research and mentoring plans that significantly expand researchers’ expertise in new disciplines, methods, and content areas. Applicants should have a track record of conducting high-quality research and an interest in pursuing a significant shift in their trajectories as researchers.; The Foundation’s mission is to support research to improve the lives of young people ages 5-25 in the United States by supporting research within two focus areas: 1) Reducing inequality in youth outcomes, or 2) Improving the use of research evidence in decisions that affect young people. It is expected that supported research projects will build stronger theory and contribute empirical evidence in these two areas to inform change.; Each award recipient receives $350,000 distributed over 5 years, which can include up to 7.5 percent for indirect costs. Requests to fund the PI’s salary must not exceed 50 percent of the total salary received from the sponsoring institution.; Who: The following eligibility terms apply: [*] Applicants must have received their terminal degree within seven years of submitting their application. Degree date after July 1, 2013; [**] In medicine, the seven-year maximum is dated from the completion of the first residency. Completion date after July 1, 2013; [*] Applicants must hold a full-time, tenure-track position.; When: Internal proposal deadline – 9:00 a.m. on Tuesday, May 12, 2020; Sponsor deadline – July 1, 2020.; How: For more information, view the internal application instructions https://research.columbia.edu/william-t-grant-scholars.; Questions should be sent to Greg Culler at limitedsubmissions@columbia.edu.

New NIH Resource to Analyze COVID-19 Literature: The COVID-19 Portfolio Tool

**Sponsor:** NIH Office of Extramural Research; https://grants.nih.gov/grants/oer.htm

**Deadline(s):** 04/15/2020 (Release Date)

**Contact:** ExtramuralNexus@mail.nih.gov

**Additional Information:** [Spa News] FW: New NIH Resource to Analyze COVID-19 Literature: The COVID-19 Portfolio Tool; A new resource was just released from NIH to analyze COVID-19 literature. See announcement below. The tool can be found here https://nexus.od.nih.gov/covid19/search/; We have this and several other resources from our Health Sciences Library and University Libraries on our website to assist researchers conducting COVID-19 research available at https://research.columbia.edu/COVID-19_Research/Researchers; [brought to our attention by Stephanie Scott]; blog – NIH Extramural Nexus; George Santangelo; New NIH Resource to Analyze COVID-19 Literature: The COVID-19 Portfolio Tool; George Santangelo, Ph.D., Director of NIH Office of Portfolio Analysis; In the past few months, the scientific community has ramped up research in response to the SARS-CoV-2 pandemic; dozens of peer-reviewed articles and preprints on this topic are being added to the literature every day (Figure 1). This rapidly expanding effort has created a need for a human-curated resource to explore and analyze advances in SARS-CoV-2/COVID-19 research as they accumulate in real time. To address this need, the NIH Office of Portfolio Analysis (OPA) has assembled a comprehensive portfolio of COVID-19 publications and preprints that is freely available to the public. The COVID-19 portfolio is updated daily with new literature selected for inclusion by subject matter experts.; **Figure 1. Rapid growth of COVID-19 peer-reviewed articles and preprints (graph is updated daily);** https://icite.od.nih.gov/covid19/search/; This new resource is designed to provide maximum flexibility and ease-of-use for researchers. Users can take advantage of a full spectrum of Boolean, proximity, and other search methods to query full text and all available supplemental data, or they can limit their search to specific fields, including abstract, author affiliation, or last author. They can also drill down on data once a search is completed. Figure 2 shows a simple example: if a user is interested in analyzing only the peer-reviewed subset of search results, a single click on the “Peer Reviewed” option in the Source facet (circled in black, panel A) will return the desired results (panel B). Some facetable fields, including journal, article type, and author affiliation, are derived from the underlying source data; others, including chemicals & drugs, conditions, and targets, were generated by OPA machine learning/artificial intelligence methods. All data is downloadable as a CSV or Excel file and includes direct links to the publications and preprints. Also, all searches generate stable URLs that users can share with each other.; **Figure 2. Example of the use of facets to select a subset of search results. (A) Results can be limited to peer reviewed articles by clicking on the corresponding label in the Source facet; clicking on the “Multi” button allows multiple facets to be selected before refreshing search results. (B) Clicking on “Peer Reviewed” in (A) returns the desired results and creates a breadcrumb (green bar at the top) that facilitates backward navigation.**; The tool also includes a visualization feature that groups articles into clusters based on key terms. This allows users to obtain, at a glance, the topic areas returned by their search. The clusters in the visualization are also interactive, which allows narrowing of the results to focus on a specific topic of interest. As an example, Figure 3 shows the results of a search of titles, abstracts, full text, and supplemental text with the terms “protease inhibitor” AND ritonavir (search done at 5 pm 4/14/2020); note that a plurality of the results of this search can be found on the ChemRxiv preprint server. Both the visualization image and results can be exported for downstream applications.; **Figure 3. Search results in the COVID-19 portfolio tool for titles, abstracts, full text, or supplemental text that contain the terms “protease inhibitor” AND ritonavir. (A) Source facet showing the prevalence of ChemRxiv preprints on this topic; (B) Interactive foam tree visualization.**; We invite you to explore this resource and are excited to see how the research community will use it to gain insight into the
COVID-19 outbreak. OPA will continue to add publication sources and features to support the needs of users. Comments are welcome and can be provided directly through the Feedback button at the bottom left of the browser in the tool.

NIH COVID-19 Funding and Funding Opportunities

NIH Extramural Nexus

Sponsor: NIH

Deadline(s): 04/13/2020 (Release Date)

Contact: https://nexus.od.nih.gov/all/author/lauerm/ [NIH Extramural Nexus]; ExtramuralNexus@mail.nih.gov

Additional Information: COVID-19 Funding and Funding Opportunities; Mike Lauer posted: "As you can imagine, NIH is devoting significant resources to COVID-19. In addition to dedicating regularly appropriated funds, to date NIH has received emergency funding for COVID-19-related activities in two supplemental bills; New post on NIH Extramural Nexus; COVID-19 Funding and Funding Opportunities; https://nexus.od.nih.gov/all/2020/04/13/covid-19-funding-and-funding-opportunities/; by Mike Lauer; https://nexus.od.nih.gov/all/author/lauerm/; As you can imagine, NIH is devoting significant resources to COVID-19. In addition to dedicating regularly appropriated funds, to date NIH has received emergency funding for COVID-19-related activities in two supplemental bills available from the NIH Office of Budget website, https://officeofbudget.od.nih.gov/cy.html; that together provide: $1.532 billion for NIAID; $103.4 million for NHLBI; $60 million for NIBIB; $36 million for NCATS; $30 million for the NIH Office of Director; 10 million for NEIHS; $10 million for NLM; To get funding as quickly as possible to the research community, we are using Urgent and Emergency competing revisions and administrative supplements to existing grant awards. This approach allows us to leverage resident expertise, getting additional funding to those researchers who are already working with other organisms, models, or tools so that they can quickly shift focus to the novel coronavirus. These Urgent and Emergency competitive revision Funding Opportunity Announcements (FOAs) allow NIH to fund applications quickly, often in under three months, sometimes much quicker than that, because evaluation for scientific and technical merit is done by an internal review panel convened by staff of the NIH awarding institute or center rather than by our traditional peer review process. The Urgent and Emergency competing revision FOAs sound very similar and they are, but there is an important distinction.; The Emergency Competitive Revision FOA; https://grants.nih.gov/grants/guide/pa-files/PA-18-935.html; can only be used for funding available for applications based on a presidentially declared disaster under the Stafford Act, a public health emergency declared by the Secretary, HHS, or other local, regional or national disaster. This means that for COVID-19 funding, it can only be used by those NIH Institutes and Centers I listed above that received special emergency funding.; The Urgent Competitive Revision FOA can be used to meet immediate needs to help address a specific public health crisis that was unforeseen when the application or progress report was submitted. When responding to these types of funding opportunities, it is important that you understand how they work. They require applications to be submitted in response to an Emergency or Urgent Notice of Special Interest (NOSI). We are maintaining a list of COVID-19 specific Notices of Special Interest on our Coronavirus Disease 2019 (COVID-19): Information for NIH Applicants and Recipients of NIH Funding website; https://grants.nih.gov/grants/guide/pa-files/PA-18-935.html; You need to read the instructions in the NOSI and in the FOA it points to carefully. If the information in the NOSI differ from those in the FOA, follow those in the NOSI; There are specific review criteria specified in the FOA. Make sure you address those as well as any that might be mentioned in the NOSI. They are how NIH staff will evaluate your application for funding.; The NOSI will instruct you to include the NOSI number in the Agency Routing Identifier field (Box 4b) of the SF424 (R&R) Form. This information is very important for NIH tracking of spending of
emergency award funding. Applications without this information in Box 4b may not be considered for this type of funding.; Often the due dates are rolling, meaning you should submit the application as soon as it is ready to get it considered for funding as quickly as possible.; NIH is issuing new COVID-19 related NOSIs frequently. Please check back for these and other COVID-19-related information on our Coronavirus Disease 2019 (COVID-19): Information for NIH Applicants and Recipients of NIH Funding website.; https://grants.nih.gov/policy/natural-disasters/corona-virus.htm ; You can learn more about NOSI's in this quick 5 minute video.; NOSIs, Notices of Special Interest (NOSIs); Grants Administration; https://www.youtube.com/watch?v=LhXW67LNbfc&feature=youtu.be ; https://nexus.od.nih.gov/all/2020/04/13/covid-19-funding-and-funding-opportunities/

Columbia-IBM Center for Blockchain and Data Transparency: Special Call for COVID-19 Research

**Sponsor:** https://cu-ibm-blockchain-data.columbia.edu/

**Deadline(s):** 05/08/2020

**Contact:** jr2180@columbia.edu; Reply-To: datascience@columbia.edu

**Additional Information:** Columbia-IBM Center for Blockchain and Data Transparency: Special Call for COVID-19 Research;

Funding Opportunity for Faculty and Research Staff; The digital transformation of the economy is creating a new natural resource: Digital data. Businesses transform the data about their customers, suppliers, or partners, into profitable products and services. It is natural to ask: What is the value of this data? How can individuals or organizations whose data is being collected participate in this data marketplace and exercise control over the access and use of their data? Extrapolating further, the value of a collection of individual datasets is often far greater than the values of each of the individual datasets; for example, fraud detection is likely to be more effective when banks combine their data, the success of precision medicine is predicated on merging records across multiple hospitals across the world, etc. What incentives can we provide for organizations to share their data for social good? What policies and mechanisms can be implemented to avoid biases in such collection processes? How can one provide guarantees of security and privacy?; Advances in technologies such as blockchain, homomorphic encryption, secure multi-party computation, zero knowledge proofs, and even secure hardware now make it possible for mutually distrusting organizations to share their data with each other in a secure, privacy-preserving, and tamper-proof manner. Some of these technologies do not rely on a (centralized) trusted third-party. These capabilities are already leading to novel applications in supply-chain management and food security, but the potential to impact all sectors, such as health, finance, energy, legal, media and entertainment, is enormous.; The Columbia-IBM Center for Blockchain and Data Transparency aims to support research, educational, and entrepreneurial activities broadly in the area of data sharing, fair use of data, blockchains or related technologies.; Program Goal & Topics; The Columbia-IBM Center for Blockchain and Data Transparency brings together cross-disciplinary teams to advance innovation in blockchain & data transparency and closely associated topics for the good of society and industries that will drive new science and technology, develop thought leadership, and influence policy.; This is a special call focused on COVID-19 related research. The goal of this call is to support projects with a focused research program aimed at delivering tangible results in 6 months. The areas of interests include: Secure sharing of health data: Mass, distributed sharing is happening during the pandemic of essential health data. How can we create an efficient infrastructure to enable secure, tamper-proof and privacy-preserving sharing of data?; Privacy Preserving Contact Tracing: 
Privacy policies related to data that is being collected for monitoring and tracking the mobility of people. A study of various approaches and design of privacy preserving architectures to enable quick and scalable contact tracing; Security and Privacy of Virtual Meeting Spaces: A lot of work is going online with video conferencing solutions being used for classes, meetings, and conferences. A study of privacy policies of the various solutions and a recommendation on what should be the privacy guarantees provided by video conferencing solutions; Other: Any other topic that fits the mission of the center and is focused on a COVID-19 related issue.

Applicants need to be junior faculty (Instructors, Assistant Professors and in specific circumstances also Associate Research Scientists), who have already established or plan to establish an independent research group at CUIMC or CU. Women and underrepresented minorities are particularly encouraged to apply for these grants.; [brought to our attention by Stephanie Scott] Digestive Diseases Research Center Pilot Grants; Deadline: May 22; Columbia Digestive and Liver Disease Research Center announces a new funding opportunity. We anticipate funding two pilot grants annually at $25,000 each. This funding opportunity is open to junior investigators who have not yet obtained NIH R01 funding or equivalent. Eligibility. Applicants must be junior faculty (Instructors, Assistant Professors and, in specific circumstances, Associate Research Scientists), who have already established or plan to establish an independent research group at CUIMC or CU. Research areas. All areas of gastrointestinal, pancreatic and liver biology and pathophysiology are eligible for this proposal. Proposals should not, however, focus solely on cancer. Basic and clinical research projects that focus on SARS-CoV-2 are encouraged.; Letter of Intent (LOI). Applicants should submit a letter of intent by May 22, 2020. The LOI needs to include: 1. A brief description of the proposed research (<250 words); 2. A statement of how the applicant meets the eligibility criteria (<150
words); 3. An NIH biosketch. The LOI should be emailed to Seetha Srinivasan sv2113@cumc.columbia.edu. LOIs will be evaluated, and applicants notified if their LOI was selected to proceed to full applications, by June 1, 2020; The deadline for submitting applications will be July 1, 2020. **Additional Information:** The Herbert Irving Comprehensive Cancer Center (HICCC) is pleased to announce the launch of our HICCC 2020 Velocity Cancer Research Awards. The Cancer Center seeks to unite investigators with interests in cancers and to stimulate others in the biomedical community to enter cancer research. One important aspect of this effort is the funding of Pilot/Feasibility Projects that have direct relevance for cancers with high incidence or mortality in the HICCC catchment area. Research of diseases of high relevance to the HICCC catchment area are highly encouraged. These diseases include: prostate, liver and bile duct, lung and bronchus, colon and rectum, pancreas, brain and other nervous system cancers, lymphoma, leukemia, and breast cancers. More information on catchment area relevant cancers can be found on the HICCC’s Community Outreach and Engagement Office at url https://cancer.columbia.edu/community-outreach-engagement/; Up to five Velocity Fellows will be selected to lead teams consisting of one lead Principal Investigator and interdisciplinary co-investigators and/or collaborators with complimentary expertise. Interdisciplinary teams should be combinations of basic investigators and applied/clinical investigators who will use their combined expertise to design and implement the research project. Eligibility requirements can be found here https://columbia.infoready4.com/#competitionDetail/1807507 [this link may require CU uni and pw login]; The application deadline is Wednesday, May 1, 2020 11:59 pm.

**Additional Information:** V Foundation Robin Roberts Cancer Thrivership Research Grant Program; Deadline: May 7; This is a V Foundation initiative established in honor of Robin Roberts to support innovative biological research initiatives (not psychosocial services) to reduce long-term complications of cancer treatment. This fund will support research related to cancer survivorship with the goal of helping more patients not only survive cancer but thrive after treatment. This $600,000 grant is paid in three annual installments of $200,000. Indirect costs up to 10% are permitted. This grant opportunity will fund translational research to understand the underlying biological basis of health disparities in cancer survivorship with a goal to improve outcomes for patients, including: [*] observational studies focused on a population in which disparities exist to advance knowledge about etiology and to inform novel prevention strategies; [*] studies to identify the genetic contributors to cancer health disparities; [*] studies to understand the biologic mechanisms through which risk factors across different populations act (e.g. diet related microbiome effects); [*] studies of human population genetics to inform interpretations of disparate effects of cancer drugs and therapies across patient populations; HICCC will select ONE applicant as the nominee to submit a full application to the V Foundation for this award. To apply for the nomination, please submit: [a] A summary (no more than 1 page) outlining the proposed research and specific aims; [b] NIH formatted biosketch; Follow link here for applicant eligibility details and to apply: [https://columbia.infoready4.com/#competitionDetail/1813104](https://columbia.infoready4.com/#competitionDetail/1813104)

**Additional Information:** Faculty of Arts and Sciences - Herbert Irving Comprehensive Cancer Center Joint Pilot Award; Deadline: May 15; Columbia's Faculty of Arts and Sciences (FAS), specifically its Department of Biological Sciences, and the Herbert Irving Comprehensive Cancer Center (HICCC) are excited to announce a new joint seed funding opportunity. Two (2) FAS-HICCC joint seed grants in the area of cancer research will be supported this year. These resources have been developed to respond to a need articulated by faculty for funding to initiate and support interdisciplinary and collaborative research. The FAS-HICCC joint grant should include collaboration between faculty from both organizations; Areas of potential development include interdisciplinary research that provides new insight into fundamental mechanisms relevant to cancer (e.g., chemical reactions relevant to metabolism or signaling) as well as the development of new experimental or computational technologies for probing these mechanisms (e.g., high-throughput assays of molecular interactions or imaging). Faculty are encouraged to explore collaborating within these thematic areas, or on other topics in the intersection of biological and cancer research. Proposals are requested for one-year pilot studies. Two separate projects will be funded for one year at the level of $100,000 for each project;

Additional Information: American Association for Cancer Research Transformative Cancer Research Program; Deadline: May 5; AACR is inviting applications for its AACR NextGen Grants for Transformative Cancer Research program. Through the program, grants of up to $450,000 over three years will be awarded in support of young investigators engaged in creative, paradigm-shifting cancer research that has not be funded through conventional channels. The proposed research must represent a highly innovative approach to a major challenge in cancer and have the potential to lead to groundbreaking discoveries in the field and transform our understanding of the tumorigenesis process and/or our ability to treat, detect, or prevent cancer. The research can be in any area of basic, translational, or clinical science, but at least one AACR NextGen Grant will be awarded to a breast cancer-focused project.; Letters of Intent are due May 5. Upon review, selected applicants will be invited to submit a full application by August 7, 2020.; To be eligible, applicants must have a doctoral degree (PhD, MD, MD/PhD, or equivalent) in a related field and not currently be a candidate for a further doctoral degree. See the American Association for Cancer Research website for complete program guidelines and application instructions. Link to Complete RFP. **Additional Information:**

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about they the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.
• **4 weeks prior to submission deadline** — Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

• **2 weeks prior to submission deadline** — For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions (if the support services have not been utilized for the grant) of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@cumc.columbia.edu.

Best wishes,

Pam Factor-Litvak

**Additional Information:** Provost Teaching and Learning Grants: Deadline Extension; The deadline for proposal submissions for Provost Teaching and Learning Grants has been extended from April 20, 2020 to **May 18, 2020 at 5:00 PM**. Dear fellow members of the Columbia community: It is my pleasure to invite you to apply for the 2020 Provost's Teaching and Learning Grants. Teaching and Learning Grants, given in a range of categories, help faculty integrate new technology and educational approaches into their classrooms and develop jointly taught interdisciplinary courses. Grants are available to individual faculty as well as school and department-wide initiatives. This year, we are delighted to add a new category to our offerings: Emerging Technology Grants. Since 2014, 133 Provost's Teaching & Learning Grants have been awarded, involving faculty at all sixteen schools across the University. We look forward to expanding our impact through this next round of funding. Please submit applications to the Provost's Teaching and Learning Grants by 05/18/2020 (Extended Deadline). Request for Proposal (RFP) details and application instructions are available [here](https://vptli.columbia.edu/request-for-proposals); Applicants are strongly encouraged to meet with the Center for Teaching and Learning (CTL) team in advance to help develop the project plan and discuss the appropriate in-kind support level. Please contact ColumbiaCTL@columbia.edu to schedule a meeting. All teaching and learning grants are listed below: Innovative Course
Design (full course) grants support the redesign of courses or the design of new courses to improve teaching and learning using innovative learning strategies. Designs advanced by technology or media-enhanced pedagogy are encouraged, but not required. Awardees will receive in-kind support from the CTL and funds up to $20,000; Innovative Course Module Design (Start Small!) grants support experimentation with a new pedagogical strategy or tool without attempting a full course redesign. Awardees will receive in-kind support from the CTL and receive up to $2,000 for a one-semester period; Large-Scale Teaching and Learning Grants support large-scale, coordinated efforts around teaching initiatives and exploration. These projects have the potential to make a significant, lasting impact within a department, school, or program beyond the funding period. Awards provide up to $20,000 per academic year plus in-kind support from the CTL; The Massive Open Online Courses (MOOCs) grant program provides support for open online courses taught by Columbia faculty. Columbia courses offered through MOOC platforms continue to reach a large global learning community, promote public engagement, and make teaching and research activities at the University more visible. A limited number of grants of up to $25,000, plus hands-on support from the CTL, will be awarded; The Interdisciplinary Teaching Awards (ITA) support collaborations between faculty from different disciplines on the design and launch of interdisciplinary courses. This program, which emerged from the recommendations of the Provost’s Interdisciplinary Faculty Working Group, will award up to $20,000 to teams of two or more faculty from different departments or schools; Emerging Technology Grants support faculty members who want to experiment with new pedagogical strategies using emerging technologies in their classrooms to improve student engagement and outcomes. These grants are designed to promote innovative approaches with emerging technologies specifically involving augmented/virtual/mixed reality and 3D scanning/printing. Awardees will receive in-kind support from CUIT and funds of up to $20,000; Please visit vpli.columbia.edu/request-for-proposals for the full request for proposals and to learn about the resources available to applicants; The Provost and I look forward to continuing to support Columbia faculty as they develop new and exciting ways to enhance teaching and learning across the University and around the world.; Sincerely, Soulaymane Kachani; Vice Provost for Teaching, Learning, and Innovation.

RWJF; Pioneering Ideas: Exploring the Future to Build a Culture of Health

**Sponsor:** RWJF  
**Deadline(s):** Open  
**Contact:** pioneeringideas@rwjf.org  

**Additional Information:** What can we do today to create a better, more equitable tomorrow? Through this new funding opportunity, RWJF seeks to understand and anticipate what dramatic changes we might see in the next five to 15 years in four areas: 1) Future of Evidence; 2) Future of Social Interaction; 3) Future of Food; and Future of Work. Additionally, this call for proposals seeks to support unconventional approaches and breakthrough ideas outside of these areas that could improve health equity and well-being for generations to come. We welcome proposals from scientists, anthropologists, artists, urban planners, community leaders—anyone, anywhere who has a cutting edge idea that could alter the trajectory of health and increase opportunities for everyone in the United States to live their healthiest life possible. Please note, while this CFP is focused on broader and longer-term societal trends and shifts that were evolving prior to the COVID-19 outbreak, we recognize the unique circumstances and learning created by the COVID-19 pandemic may inform your response. It is at your discretion whether you propose a project related to the pandemic directly or indirectly.

**Additional Information:** NIH High-End Instrumentation (HEI) Grant (S10) Program; Funding Opportunity

NIH High-End Instrumentation (HEI) Grant (S10) Program; What: The High-End Instrumentation (HEI) Grant (S10) Program encourages applications from groups of NIH-supported investigators to purchase or upgrade a single item of expensive, specialized, commercially available instruments or integrated systems that cost at least $600,000. The maximum award is $2,000,000. Over the last 10 years, the average award amount is $1,352,000. Important Information: [*] Under the S10 mechanism, funding requests are limited to the purchase cost of the instrument only. Support is not allowable for technical personnel, service contracts, extended warranties, or supplies.; [*] This program does not provide facilities and administrative (F&A) costs, or support, construction, alterations, or renovations.; [*] Matching funds are not required; however, commitment of an appropriate level of institutional support to insure the associated infrastructure is expected (building alterations, or renovations, post-award service contracts and technical personnel).; [*] The NIH requires all applicants to secure institutional support toward the maintenance and operation of the instrument. In particular, confirmation that the institution will commit to provide backup of the financial plan for five years from installation of the instrument or for its effective/usable lifetime.; Who: The following eligibility requirements apply.; [*] PI - The PD/PI for this application should have documented (in the biographical sketch) technical expertise directly related to the type of the chosen instrument. The PD/PI does not need to have an NIH research grant or any other research support, but is expected to be an expert on the requested instrument. The PD/PI may be a Core director or non-tenured faculty member of the applicant organization; he/she must be affiliated with the applicant organization, and must be registered on eRA Commons.; [*] Major User Group - A Major User group composed of three individuals who have substantial need for the instrument must be identified. Each member of this group must be a PD/PI on a distinct NIH-funded research grant or cooperative agreement award in an area of basic, translational, or clinical research. (The requirement is at least one award per investigator. An award given to multi-PDs/PIs is counted only once towards the fulfillment of this requirement.) PDs/PIs on NIH training or fellowship grants (e.g., T and F mechanisms) and other non-research grants such as conference grants are not eligible to be Major Users. Once the eligibility requirement has been met, additional users with active research awards from NIH or other sources may be added as Major or Minor Users.; [**] To demonstrate the clear need for the requested instrument, the projects supported by NIH research grants should together require at least 75 percent of the Accessible User Time (AUT). Major Users supported by NIH grants should together require at least 35 percent of the AUT. ; [***] Accessible User Time (AUT) is the number of annual hours the instrument can be used for any research purpose.; When: Internal deadline – 9:00 a.m. on Tuesday, April 14, 2020; NIH deadline – Monday, June 1, 2020; How: S10 programs will not allow multiple requests for the same type of instrumentation from the same institution. Therefore, anyone who plans to request instrumentation funding through either of these programs must submit an internal proposal that includes the following 3 parts.; [1] Cover Page; [*] PI name and contact information.; [*] Instrumentation Program (High-End Instrumentation OR Shared...
Instrumentation); [*] Major User Group – Provide name of each individual who is PI of a qualifying grant; [**] A Major User group composed of three individuals who have substantial need for the instrument must be identified. Each member of this group must be a PD/PI on a distinct NIH-funded research grant or cooperative agreement award in an area of basic, translational, or clinical research. (The requirement is at least one award per investigator. An award given to multi-PDs/PIs is counted only once towards the fulfillment of this requirement.) PDs/PIs on NIH training or fellowship grants (e.g., T and F mechanisms) and other non-research grants such as conference grants are not eligible to be Major Users.; [2] Instrumentation Plan: [*] Describe the instrument requested including manufacturer and model number; [*] Financial Plan. Submit a specific financial plan for long-term operation and maintenance of the instrument. Explain how various operational costs will be met; specifically, costs associated with routine operation of the instrument, the maintenance, support personnel, and service costs associated with effective use of the instrument must be described.; [3] Institutional Commitment: [*] Describe the institutional infrastructure (space, environment and utilities) available to support the instrumentation.; [*] Letter of Institutional Commitment. Please provide a letter of support that includes an explicit commitment to provide backup for the proposed financial plan. Specifically, the letter must state that if the financial plan should fall short of its projected income, funds are available to replace the shortfall and maintain operation of the instrument.; Please combine all three parts of the internal proposal in a single PDF file and email to limitedsubmissions@columbia.edu by 9:00 a.m. on Tuesday, April 14, 2020. The subject line of the email should be "NIH HEI S10".; Questions should be sent to limitedsubmissions@columbia.edu.; Program Announcement: https://grants.nih.gov/grants/guide/pa-files/PAR-20-114.html Award History: https://orip.nih.gov/construction-and-instruments/s10-instrumentation-programs.; For a list of current limited submission programs please visit: https://research.columbia.edu/content/limitedsubmissions

**Additional Information:** William T. Grant Scholars Program; Limited Submission; William T. Grant Scholars Program; Internal Proposal due 9:00 a.m. on Tuesday, May 12, 2020; Each school may nominate one candidate to this program. This announcement is for faculty in Arts & Sciences and Mailman School of Public Health only.; What: The William T. Grant Scholars Program supports career development for promising early-career (Assistant Professor) researchers. The program funds five-year research and mentoring plans that significantly expand researchers’ expertise in new disciplines, methods, and content areas. Applicants should have a track record of conducting high-quality research and an interest in pursuing a significant shift in their trajectories as researchers.; The Foundation’s mission is to support research to improve the lives of young people ages 5-25 in the United States by supporting research within two focus areas: 1) Reducing inequality in youth outcomes, or 2) Improving the use of research evidence in decisions that affect young people. It is expected that supported research projects will build stronger theory and contribute empirical evidence in these two areas to inform change.; Each award recipient receives $350,000 distributed over 5 years, which can include up to 7.5 percent for indirect costs. Requests to fund the PI’s salary must not exceed 50 percent of the total salary received from the sponsoring institution.; Who: The following eligibility terms apply: [*] Applicants must have received their terminal degree within seven years of submitting their application. **Additional Information:** New NIH Funding Announcement: Firearm Injury and Mortality Prevention Research (R61 Clinical Trial Optional); NIH National Institutes of Health; Office of Behavioral and Social Sciences Research; OBSSR Updates; Notice Number: PAR-20-143; **Key Dates:** Open Date (Earliest Submission Date): April 15, 2020; Application Due Date: May 15, 2020; Expiration Date: May 16, 2020; **Purpose:** Nearly 40,000 people in the U.S. die from firearm-related deaths each year, primarily from suicide (60%) or homicide (37%), and many more have experienced non-fatal firearm injuries, both intentional and unintentional. The Joint Explanatory Statement accompanying the FY2020 Further Consolidated Appropriations Act (H.R. 1865) included funding for the NIH to conduct research on firearm injury and mortality prevention and recommended that NIH take a comprehensive approach to studying the underlying causes and evidence-based methods of prevention of firearm injury, including crime prevention. Within the legislative mandates and limitations of NIH funding (NOT-OD-20-068, NOT-OD-20-066), the NIH encourages research to improve understanding of the determinants of firearm injury, the identification of those at risk of firearm injury (including both victims and perpetrators), the development and evaluation of innovative interventions to prevent firearm injury and mortality, and the examination of approaches to improve the implementation of existing, evidence-based interventions to prevent firearm injury and mortality.

**Required Application Instructions:** It is critical that applicants follow the Research (R) Instructions in the SF424 (R&R) Application Guide, except where instructed to do otherwise (in this FOA or in a Notice from the NIH Guide for Grants and Contracts). NIH eSubmission Items of Interest - July 31, 2018

Additional Information: NIH eSubmission Items of Interest - July 31, 2018; NIH sent the newsletter below the other day, which contains a lot of tips on the new PHS Human Subjects and Clinical Trial Information Form. In addition, they address Fellowship applications, and some things to keep in mind if the fellow is seeking clinical research experience. Since the fellowship deadline is next week (August 8th), I wanted to bring this to your attention.; I highlighted what I thought were the key points below. [brought to our attention by] Stephanie Scott; NIH eSubmission Items of Interest - July 31, 2018; Happy National Mutt Day! Yep, it's a real thing. And, why shouldn't it be? I vividly remember bringing my mutt home from a pet adoption event years ago and introducing her to her new "daddy." "She's two dogs long and one dog tall and looks like she's made from spare parts," Jeff said. All true. An emaciated basset-beagle-ish dog with ears longer than her bowed-little-legs isn't going to win any beauty contests. But, our Dixie is the most lovable hound on the planet and we wouldn't trade her for the world.; Mutts are amazing but what do they have to do with grant application submission? Not much actually, but if you love your mutt as much as I love mine, then I’ve at least got your attention. Besides, who passes up the opportunity to celebrate? More wag, less bark! Hopefully you’ll find this edition to have an interesting mix … not unlike your favorite mutt.; Where Do I Put the Information I Know You’d Want, But Didn’t Ask For?; You want to give staff and reviewers ALL the information you think they need to provide a thorough review of your proposal. There is certainly nothing wrong with that – right? Well, actually it depends. The application guide and funding opportunity announcement provide very specific guidance on what to include in your application and, in some cases, there are page limits you must stay within to convey the requested information.; If you have information that doesn’t fit in page-limited attachments like your Specific Aims and Research Strategy, rework those attachments until you tell the best story possible within the confines of the page limits. Do not try to stuff that extra information into other non-limited fields of the application forms. Similarly, if you have information that doesn’t have a “natural home” based on our instructions, don’t include it.; There are several form fields with tempting names like “Appendix,” “Other Attachments,” “Other Requested Information,” and “Other Clinical Trial-related Attachments.” DO NOT use those fields unless requested to do so in the application guide or announcement.; Why not? Even if you have the best of intentions, you need to resist the temptation to force fit information into your application where it doesn’t belong. The page limits and guidance are there for fairness and you may find your application pulled from consideration if you try to get around them NOT-OD-11-099; The Duplication Balancing Act: The application guide statement “do not duplicate information between the Research Strategy attachment and the PHS Human Subjects and Clinical Trials Information form” appears to be causing some angst in the community. In fact, our new human subjects form is meant to provide structured, supporting information that doesn’t fit in page-limited attachments like your Specific Aims and Research Strategy. It would be difficult, for example, to provide a “Brief Summary of a protocol without talking about information captured elsewhere in the application.; The point we were actually trying to make is that we don’t want you to copy and paste blocks of text into multiple places in your application. Your Specific Aims and Research Strategy should include enough human subjects and clinical trial information to tell a cohesive and complete story. The human subjects form is meant to provide structured, supporting details for the study (sorry, it isn’t just extra space to expand on the research strategy). The Brief Summary in the Protocol Synopsys section of the human subjects form aligns with what the...
public would see in ClinicalTrials.gov without the benefit of the full application. It should hit the key points at a very high level in as close to plain language as possible. The bottom line is there will be some overlap of information within your application, but reviewers should not be reading blocks of text copied verbatim into multiple sections of the application; Space-Fill Compulsion: My mother, an interior designer, never saw a horizontal surface she didn’t want to decorate. For years I encouraged her to declutter and often she’d begrudgingly remove a knick-knack from a table of shelf. But the next time I’d visit a new knick-knack was sitting right it its place. My dad calls it space-fill compulsion.; Our new human subjects form has several text fields with large character limits (e.g., Eligibility Criteria - 15,000 characters; Brief Summary - 5,000 characters; Narrative Study Description - 32,000 characters). These character limits match those in ClinicalTrials.gov and were set artificially high so the system could accommodate more characters than are actually needed.; Here is a fun little tidbit we’ve learned … folks who are already funded and entering information into ClinicalTrials.gov tend to be more picky than folks applying for funding. Could it be that while composing your response you see the character count is well below the available space and assume NIH wants more? Space-fill compulsion, perhaps?; If you’ve covered what you need to say in a few paragraphs, then stop. You don’t need to fill the entire allotted space. Eligibility criteria is typically quite succinct. A Brief Summary typically runs 2,000 characters or less and the Project Narrative typically 5,000 characters or less. It would be unusual to come even close to the character limits for those fields. It’s, OK. Cover the topics using only the space you need.; Remember, this is the supporting detail for your story, not the story itself. Less is more. Don’t bury your main point under unnecessary information.; Do Fellowship Awards Allow Clinical Trials?: We encourage fellows to receive training in clinical research, including clinical trials. NIH-supported fellows just can’t independently lead them. The career stage of a fellow may not yet align with the responsibilities of navigating all the components, complexities and reporting requirements associated with a clinical trial. In addition, fellowship grants do not include sufficient research funds to support the majority of clinical trials. Consequently, all Fellowship opportunities are posted as independent Clinical Trials Not Allowed.; The sponsor is the responsible individual of record for oversight of the trial. He or she is ultimately responsible for tasks like interacting with relevant Institutional Review Board (IRB) staff, reviewing all informed consent documents, reporting potential serious adverse events, and maintaining responsibility for patient safety. But there are no restrictions on the responsibilities the fellow can assume with the sponsor’s oversight.; If you plan on submitting a fellowship application, clearly delineate the roles both the sponsor and the fellow are undertaking. This can be done in the Sponsor and Co-Sponsor attachment for the sponsor and the Research Strategy for the fellow. It needs to be clear that the fellow is not the responsible individual. Overselling their role to the point where it looks like they are leading the trial can hurt more than it helps. It’s fine to show the fellow working side-by-side with his or her sponsor through every aspect of the trial. It’s not OK for them to be off on their own shouldering all the responsibility themselves.; Dog Days of Summer: "Be the person your dog thinks you are."; ~ George Eliot aka Mary Ann Evans; Stay cool and if you’re lucky enough to have one, give your mutt an extra hug.; Take care, Sheri; [brought to our attention by] Sheri Cummins; Communications & Outreach; NIH Office of Extramural Research; cumminsrr@mail.nih.gov

**Link(s):** https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-212.html

**Additional Information:** NIH Guide Notice on Delayed Enforcement for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants; As I previously announced a few weeks ago, NIH will be delaying enforcement for some requirements affecting prospective basic science studies that also meet NIH’s definition of a clinical trial. NIH just released the official notice stating this, along with their future plans: https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-212.html; Please read the notice in its entirety. The Council on Governmental Relations (COGR) provided a summary below. Here are some highlights: (*) **Registration and Reporting:** NIH still expects the registration and reporting of these prospective basic science studies, but is giving flexibility to allow reporting on existing basic science portals, and expects the data to eventually be transported to ClinicalTrials.gov. Flexibility given through September 24, 2019. They are issuing a Request for Information (RFI) to collect stakeholder feedback on this topic; (*) **Funding Opportunity Announcements (FOAs):** NIH will not administratively reject any proposal application for submission to an incorrect FOA based on study-type designation, and they plan to issue an FOA specifically for prospectively basic science studies in November for due dates starting on January 25th, 2019; (*) **The PHS Human Subjects and Clinical Trial Information Form (new in FORMS-E):** they still expect that form for all applications involving prospective basic science studies; (*) **Good Clinical Practice (GCP) training** is still being enforced for all personnel involved in the conduct, oversight, or management of prospective basic science studies involving human participants. As a reminder, Columbia offers GCP training in Rascal through Course TC3450. For more information, see https://research.columbia.edu/content/good-clinical-practice-training or email NIH-GCP@columbia.edu.; Please read the notice in its entirety for more information, and stay tuned for more updates from me on this topic.; [brought to our attention by] **Stephanie F. Scott, MS, CRA:** Director of Policy and Research Development; Columbia | Research; Sponsored Projects Administration; Email: stephanie.scott@columbia.edu; or sifs2110@cumc.columbia.edu; Website: https://spa.columbia.edu/; NIH Guide Notice on Delayed Enforcement for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants; Dear COGR Members, NIH issued the following Guide Notice this morning, Delayed Enforcement and Short-Term Flexibilities for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants.; As you know, COGR and other organizations have expressed concern that the NIH clinical trial case studies broadened the agency’s definition of “clinical trial” to include basic science studies involving human participants, NIH, in response to report language in the Consolidated Appropriations Act of 2018, has released this notice NOT-OD-18-212 which delays enforcement of registration and reporting policies for prospective basic science studies involving human participants under NOT-OD-16-149. Per the notice, “through September 24, 2019, NIH will continue to expect registration and reporting for prospective basic science studies involving human participants, with additional flexibility to allow reporting on existing basic science portals, with the expectation that data will eventually be transported to ClinicalTrials.gov.” NIH will issue a Request for Information (RFI) to seek additional input “on registration and results reporting standards best suited for prospective basic science studies involving human participants.”; The notice also provides a period of “leniency for applications submitted to the incorrect FOA based on the study type designation” during which time NIH will not “administratively reject any application for submission to an incorrect FOA based on study-type designation.” The notice also indicates that the agency “plans to issue FOAs specifically for prospective basic science studies involving human participants.” Please see the notice for details.; Lisa Nichols, Ph.D.; Council on Governmental Relations; 1200 New York Avenue, N.W., Suite 460; Washington, D.C. 20005; lnichols@cogr.edu; 202-289-6655

NIH Salary Cap: Guidance on Salary Limitation for Grants and Cooperative Agreements FY 2018; NIH issued guidance on the use of a new NIH salary cap, to increase from $187,000 to $189,600. See https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-137.html. The effective date of this increase is January 7th, 2018.; NIH has not received the final Fiscal Year (FY) 2018 appropriation and is operating under a continuing resolution through March 23rd, 2018 (see NOT-OD-18-136 also a very important notice). However, NIH issued this guidance until a budget is passed.; In summary, this is how the $189,600 salary cap can be applied: (*) NIH proposal budgets may be submitted using the new cap; (**) Active NIH awards may rebudget to the new cap if restricted to Executive Level II, and adequate funds are available, and the salary cap increase is consistent with the institutional base salary. The new cap should be prorated for the applicable months: (*) Cap is $187,000 through 1/6/18; (**) Cap is $189,600 from 1/7/18 – present; If you have any questions, please feel free to reach out to your SPA Project Officer. We will keep you posted on any developments. Please note I am currently out of the office, returning on Monday.; Stephanie F. Friday Newsletter 05/01/20

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about they the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

- **2 weeks prior to submission deadline**—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us **prior to these deadlines**.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions (if the support services have not been utilized for the grant) of R01, P, K, Center and T32 grants, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types (such as R21s) that are ineligible for the services.

NIH single IRB (sIRB) policy

**Sponsor:** NIH  
**Deadline(s):** (for NIH application submissions on or after) 01/25/2018  
**Contact:** If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites; If Columbia University is being proposed as one of the participating sites in an application to be submitted this month or soon after by another applicant organization, you must also contact the HRPO immediately. Moving forward, it is recommended that you contact the HRPO as soon as a decision is made to participate in a multi-site study to which the NIH sIRB Policy applies.; An official process that details the requirements for addressing the NIH sIRB Policy is being finalized, to be released shortly. In the meantime, PIs and/or departments can reach out to irboffice@columbia.edu to inform the HRPO about these applications. Upon receipt of your email, HRPO will send you an online form to be completed, and you will be provided with next steps.; In addition, we are offering several options to learn more about the sIRB process. Note: Protocols that address the same research questions, involve the same methodologies, and evaluate the same outcomes are considered to be the “same research protocol.” Additionally, sites that are accruing research participants for studies that are identical except for variations due to local context consideration would be considered to be conducting the “same research protocol.”; If you have any questions, please contact irboffice@columbia.edu.; Our website contains resources to help you while you get accustomed to all of the policy changes impacting proposal preparation. We have an Excel checklist to help you complete the new PHS NIH Human Subjects and Clinical Trials Information Form. We also have a one-page reference guide (thank you Katherine Rochmat of School of Social Work for the initial template);

**COVID-19:** On January 17, 2018, an Interim Final Rule was released on November 1, 2018, which was released on November 1, 2018, with an effective and compliance date of January 19, 2018 for the majority of the regulations or requirements that may affect IRB activities and requirements.

**American Board of Internal Medicine:** On January 25, 2018, and contract solicitations issued on or after January 25, 2018. It is applicable to NIH-funded multi-site domestic studies involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program.

**Tuition:** If you are preparing an NIH application that is due on or before March 5, 2018, it is important that you contact the HRPO immediately if your application proposes to: (*) Conduct non-exempt human subjects research; AND (*) The same research protocol will be conducted at multiple domestic sites; The HRPO and SPA have developed tools to facilitate implementation of this policy. These tools, including an overview of our process and template language that can be used in your grant applications, can be accessed here. The HRPO’s web page will continue to be updated with additional resources as more information becomes available to facilitate compliance with this policy.

**Upcoming HRPO Education Sessions: Monthly IRB:**

- Investigation Monthly Meetings: (*) February 22, 3:30-4:30pm, P&S Amphitheatre 1; (*) March 22, 3:30-4:30pm, P&S Amphitheatre 1; (*) April 26, 3:30-4:30pm, P&S Amphitheatre 1; (*) May 24, 3:30-4:30pm, P&S Amphitheatre 1; We want to hear from you! Please send us your questions as well as suggestions for topics for future education sessions!
- We look forward to hearing from you!

**Additional Information:** The Final (revised) Common Rule, i.e., revisions to Subpart A of the DHHS regulations for the Protection of Human Subjects (45 CFR 46), were published on January 19, 2017, with an effective and compliance date of January 19, 2018 for the majority of the revisions. On January 17, 2018, an Interim Final Rule was released that delays the effective date for 6 months, to July 19, 2018. Certain federal departments and agencies are in the process of developing a proposed rule to further delay implementation.

**The HRPO is developing guidance for preparing for the transition to the Revised Common Rule. Stay tuned for more information...**

**Revised Policies:** Revisions have been made to the new IRB Policy on the Privacy Rule and the Use of Health Information in Research (IRB HIPAA & Research Policy) and the IRB Data Security Plans Involving the Use, Storage or Transmission of Electronic Research Data Constituting Sensitive Data (IRB Data Security Policy). The IRB HIPAA & Research Policy, which was released on November 1, 2017, was revised to provide clarifications of definitions, scope, and when a Data Use Agreement is necessary. In addition, several case studies were added to assist with implementation of this policy. The IRB Data Security Policy was revised to include new terminology and definitions that are included in the IRB HIPAA & Research Policy. Sessions to explain the policy and review the examples will be scheduled. In addition, please let us know if you would like to have us come to your departmental meeting to review the policy!

**Revised Standard Operating Procedures (SOPs):** Version 5.0 of the IRB’s SOPs were recently released. Included in this version: (*) Comprehensive information on Expanded Access; (*) Incorporation of Columbia’s Institutional Conflict of Interest Policy; (*) Clarifications on when Unanticipated Problems are reported to federal agencies; (*) Updates to the sections regarding recruitment of inpatients at NYP; (*) Addition of the new Single IRB processes; (*) Clarification on the process for IRB disapproval.

**Process for Implementing the NIH Single IRB Policy:** The NIH Single IRB (sIRB) Policy is applicable to new and competing renewal applications/proposals for NIH funding that are due on or after January 25, 2018, and contract solicitations issued on or after January 25, 2018. It is applicable to NIH-funded multi-site domestic studies involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program.

**Revisions:** The Revised Policies include:

- (*): May 24, 3:30-4:30pm, P&S Amphitheatre 1; We want to hear from you! Please send us your questions as well as suggestions for topics for future education sessions!

Additional Information: I wanted to pass along this email we received from NICHD. Regardless of whether you receive funding from NICHD, I thought it was a great summary of the recent NIH policies concerning human subjects research and the definition of a clinical trial. It also highlights contacting the NIH Program Officials when you are uncertain if your study meets the NIH clinical trial definition.; I promise you will see more communications from me as we prepare you for these proposal application changes in effect for proposals due January 25th, 2018 or later.; Stephanie Scott Changes to NIH policies and procedures related to human subjects research; Dear NICHD Investigator, NIH has broadened its definition of clinical trial, and it may impact your future applications (new, resubmission, or revision) and awards.; NIH’s definition of clinical trial now includes some research approaches not traditionally considered clinical trials. For example, many behavioral or biobehavioral studies that focus on underlying mechanisms of development may now be considered clinical trials. Also, conducting experiments that involve human subjects may be considered a clinical trial. If you are conducting studies involving human subjects, it is very important that you understand this definition and determine whether it applies to your research.; How do I know if my study is a clinical trial?; NIH has four questions that researchers need to answer to determine whether their study is a clinical trial. These questions may use terminology that has a different meaning than the typical meanings understood by certain research communities. It’s important to review the FAQs and case studies provided by the NIH Office of Extramural Research. If you answer “yes” to each of these four questions, your research will be considered a clinical trial by NIH: (1) Does the study involve human participants?; (2) Are the participants prospectively assigned to an intervention?; (3) Is the study designed to evaluate the effect of the intervention on the participants?; (4) Is the effect being evaluated a health-related biomedical or behavioral outcome?; Here is a link that can help you determine if your research is a clinical trial: https://grants.nih.gov/ct-decision/index.htm.; Why is this important? What are the implications if my study is considered a clinical trial?; Beginning with applications submitted on or after January 25, 2018, if your application involves a clinical trial, you must: (*) Submit the application through a Funding Opportunity Announcement (FOA) that accepts clinical trials.; (*) Provide additional information in the application, which will be subject to different and distinct review criteria for clinical trials.; If selected for funding, you will need to designate individual(s) to serve as the responsible party for the trial and to register and post results in the ClinicalTrials.gov system.; NIH has also issued other policy updates involving Good Clinical Practice training requirements and the use of Single Institutional Review Board (sIRB) approaches for domestic, multisite human subjects research. Details about all updates/changes are available at https://grants.nih.gov/policy/clinical-trials.htm.; Note: These policy updates/changes also apply to individuals conducting research through contracts.; Why is NIH making these changes?; As stewards of public funding, NIH is implementing these changes in support of our scientific and ethical obligation to ensure that the burden and risk that volunteers assume as research participants ultimately contributes to scientific knowledge. In addition, these changes facilitate transparency in how NIH conducts and supports human subjects and clinical trials research and increases dissemination of data and conclusions derived from NIH-conducted or -supported clinical trials. More discussion of the reasons for the policy changes is at: https://grants.nih.gov/policy/clinical-trials/why-changes.htm.; We know this is a lot to process, but we are here to answer your questions. Please contact your Program Officer with any questions. If you’re uncertain who your Program Officer is, this information is available in your Commons account.; Kind regards,

Meredith D. Temple-O’Connor, Ph.D.; Senior Policy Advisor for Clinical Research; Division of Extramural Research; Eunice Kennedy Shriver National Institute of Child Health and Human Development; National Institutes of Health / DHHS; Bethesda, MD 20892; NICHDTrials.nih.gov. Friday Newsletter 05/01/20

has re-issued the Funding Opportunity Announcements (FOAs) for the Parent R01, R03, R21, and most Career Development Awards (K-series) with FORMS-E to be used with application due dates January 25th, 2018 or before. Before initiating an application package, you must first determine whether the study meets the definition of a clinical trial, and then select the appropriate FOA: https://grants.nih.gov/grants/guide/parent_announcements.htm; If submitting an application with a due date before January 25th, 2018 (such as an AIDS-related application due January 7th), you must select an opportunity that supports FORMS-D. For example, if preparing an R01 application: (*) Use PA-16-160 (FORMS-D) for the January 7th, 2018 AIDS-related deadline. (*) Use PA-18-345 (FORMS-E) for the R01 clinical trial February 5th deadline; (*) Use PA-18-484 (FORMS-E) for an R01 application that is NOT a clinical trial due February 5th; Due to the complexity of FORMS-E, in particular the new PHS Human Subjects and Clinical Trials Information Form, we very strongly suggest that you submit your proposals early to SPA and encourage submission five days prior to the NIH deadline.; Further guidance will be provided soon. Please feel free to reach out to me, or your assigned SPA Senior Project Officer, with questions. We will continue to update you.; For more information on the release of Parent Announcements, see NIH Plans for Clinical Trial Specific Parent R01 and Parent R21 Funding Opportunity Announcements.; [brought to our attention by] Stephanie F. Be Careful to Pick the Right Funding Opportunity Announcement (FOA)

Additional Information: Be Careful to Pick the Right Funding Opportunity Announcement (FOA); In follow-up to the announcement I sent last night, Update: NIH FOAs with FORMS-E, Dr. Mike Lauer of NIH just wrote a blog on the importance of selecting the correct Funding Opportunity Announcement (FOA). See full blog post.; Key takeaways: (*) If any part of your study (the specific aims, components, studies, etc) meets NIH’s definition of a clinical trial, then you must select an FOA that allows for clinical trials.; (*) If none of the aims or studies within your project meet the definition, select an FOA that says “Clinical trials not allowed” or “Clinical trials optional”; (*) The participating organizations may vary between the “clinical trial not allowed” parent FOA and the “clinical trial required” parent FOA for the same activity code. Read the details of each FOA carefully.; (*) “Note that some institutes that participate on a “Clinical Trial Required” parent may limit their participation to mechanistic studies.”; If you are unsure whether your study meets the definition of a clinical trial, I highly encourage you to reach out to the Program Official named on the FOA to help you make the appropriate determination, and to clarify the appropriate FOA to be selected. Include in your application cover letter the name of the Program Official who assisted you, and confirmed, the selection of the FOA.; [brought to our attention by] Stephanie Scott, sfs2110@columbia.edu

**Link(s):** http://finance.columbia.edu/content/fringe-benefit-rates

**Additional Information:** To Principal Investigators, Sponsored Projects Administrators; From: Barbara Hough, Vice President, Controller and Treasurer, Rudi Odeh-Ramadan, Associate Vice President for Research Administration; We are writing to inform you that, based on the approval obtained from the Federal government, the fringe rate applicable to government grants and contracts will increase from 28.9% to 30.3%, effective July 1, 2017. For all funding sources other than government grants and contracts, the fringe benefit rate will be 29.75%. The increase in the rate is primarily driven by the significant increase in medical costs the University has experienced over the past several years.; Please note that you may wish to take this opportunity to review the impact the change in the fringe benefits recovery rate may have on the allocation of personnel related costs for the remainder of the grant life cycle.; For information regarding student employees working during the academic year or summer, refer to http://finance.columbia.edu/content/fringe-benefit-rates.; For grants administrators: FY17 Cost Transfers involving sponsored projects will continue to be processed with the FY17 fringe rates through the July 7th deadline. The new FY18 fringe rates will be introduced with FY18 payroll runs.; The rate agreement is available on the SPA website on the Institutional Information page and on the Finance Gateway at http://finance.columbia.edu/content/fringe-benefit-rates.; Any questions about the government fringe rate should be directed to AskRPIC@columbia.edu.

**NIH to Limit Total Grant Support to PIs**
**Sponsor:** NIH
**Deadline(s):** NA
**Contact:** National Institutes of Health; Office of Extramural Research; ExtramuralNexus@mail.nih.gov
[https://nexus.od.nih.gov/all/2017/06/06/nih-grant-support-index/](https://nexus.od.nih.gov/all/2017/06/06/nih-grant-support-index/)

**Additional Information:** NIH to Limit Total Grant Support to PIs; NIH announced on Tuesday that it will implement a limitation on the total grant support it will provide to principal investigators (PIs) who have multiple awards. The agency will use a "Grant Support Index" that assigns point values to various types of grants. PIs who exceed a set point, linked to having three or more awards with a single PI, will be forced to adjust their portfolio with reduced resources. NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH says that it believes 6 percent of PIs will be affected and that resources will be freed up to fund about 1,600 additional awards. NIH insists that no existing awards will be rescinded.; An article posted by *Nature* reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.

When the system is available again, you will see new features and functionality have been added to the system; Highlights of ASSIST’s January Software Release; (*) New Access Maintainer Role; (**) A new role called “ASSIST_ACCESS_MAINTAINER_ROLE” with Access Maintainer Privileges has been added to the Account Management System (AMS); (**) Only the Signing Official (SO) has the authority to provide this role to whomever they want to manage access to applications in ASSIST on behalf of the organization.; (**) By providing this role, the SO is delegating the authority to manage access to all applications at the organization level, rather than application by application level.; (**) Access Management within ASSIST for individual applications has not changed.; (*) Multi-Employment Functionality; (**) Senior Key Persons who are affiliated with multiple organizations will be able to select from their current employments so they can choose the most appropriate organization as it relates to their application.; (**) When the user provides their eRA Commons User ID and multiple active employments are associated with the account, the system displays the organization, the state, the city of each employment organization. The user can select the appropriate appointment and click the “Select” button.; (*) New Link for SOs from ASSIST to Commons Status Screen; (**) When SOs access the Application Information page, they will find a new link titled “To view Commons post submission actions” in the Agency section of the page.; (**) The link will take them to the Commons Status search page. From here they can search for the application under the Recent/Pending Submissions option so they can quickly reject the application if so desired/needed.; (**) This link is only available to Signing Officials.; (*) A Warning if Appendix Material is Submitted in Applications.; (**) Per the policy outlined in NOT-OD-16-129, the submission of most appendix materials has been eliminated from NIH applications.; (**) If the system detects the submission of appendix materials, a new warning will advise the applicant to closely review the Funding Opportunity Announcement to confirm that these materials are requested as part of the application.; (*) Form Lock Message Includes User Name; (**) When a user opens a form screen in ASSIST to edit or add information, the system locks that form so others cannot simultaneously edit the same form.; (**) ASSIST displays a message indicating the form you are trying to access is locked by another user and now includes the name of the user who holds the lock.; Highlights of eRA Commons January Software Release; (*) Final RRPR Section D.1 Added; (**) As part of the transition to the use of the Final Research Performance Progress Report (FRPPR), Section D.1 of Participants is now included.; (**) Section D.1 asks “What individuals have worked on the project?” This information will be the list of people who have worked on the project since the previous progress report. It does not include all the individuals during the lifetime of the award.; (*) New Design of the Status Information Screen for PIs and SOs; The Status Information screen will have a new look and feel. The screen is an important source of information for Principal Investigators (PIs) and Signing Officials (SOs) for such things as scores, summary statements, NIH contacts, reference letter status, etc.; [a] provided picture has been linked at; https://r2report.files.wordpress.com/2014/04/nihannouncementspicinpdfformat.pdf; New Status Information screen with some sections expanded, other collapsed.; (**) The new design is similar to other updated screens, such as the Personal Profile and the Institution Profile; (**) Categories of information are organized into collapsible/expandable sections; (§) Expand All (default view) and Collapse All buttons show and hide the information on the screen.; (**) New Text Filter; (§) A new field will allow you to enter text and display the results on those sections with matches; (§) Matching text will be highlighted, allowing you to quickly locate the information.; (*) Important information is displayed along the left side: (§) Warnings; (§) Contact information; (*) Scientific Review Officer (SRO); (*) Grants Management Specialist (GMS); (*) Program Official (PO); (§) Latest Updates; (§) eRA Service Desk contact information; (*) New Print Capabilities; (§) New formatting capabilities allow you to print all the information with the click of a single button.; (§) Organized by category; (§) Includes warnings; (§) Includes NIH contacts; NOTE: The ability to submit help tickets online will not be available during the downtime listed above.; Joe Schumaker; eRA Communications; Division of Communications and Outreach; NIH Office of Extramural Research; Questions? The Fringe Rate Applicable to Government Grants and Contracts will Increase from 27.1% to 28.9%, effective July 1, 2016

Sponsor: NA
Deadline(s): 07/01/2016 (effective)
Contact: Any questions about the government fringe rate should be directed to Carl Sparano at email cs16@columbia.edu or voice 212-854-1049.

Additional Information: To: Principal Investigators, Sponsored Projects Administrators; From: Anne Sullivan, Executive Vice President for Finance; Rudi Odeh-Ramadan, Associate Vice President for Research Administration; We are writing to inform you that, based on the approval obtained from the Federal government, the fringe rate applicable to government grants and contracts will increase from 27.1% to 28.9%, effective July 1, 2016. For all funding sources other than government grants and contracts, the fringe benefit rate will be 29.5%. The increase in the rate is primarily driven by the significant increase in medical costs the University has experienced over the past year.; Please note that you may wish to take this opportunity to review the impact of the change in the fringe benefits recovery rate may have on the allocation of personnel related costs for the remainder of the grant life cycle.; With respect to students, the fringe benefit rate applicable to salaries funded by government projects will not change and will remain at 8.15%. For all funding sources other than government projects, the fringe benefit rate will be 8.15%; For grants administrators: FY16 Cost Transfers involving sponsored projects will continue to be processed with the FY16 fringe rates through the July 15 deadline. The new FY17 fringe rates will be introduced with FY17 payroll runs.; The rate agreement is available on the SPA website on the Institutional Information page. It will be posted on the Finance website shortly.; Any questions about the government fringe rate should be directed to Carl Sparano at email cs16@columbia.edu or voice 212-854-1049.

Two items NIH fellowship applicants should be aware of

Sponsor: NIH
Deadline(s): NA
Contact: If you have any questions, please contact Grants Information at grantsinfo@od.nih.gov.; Sheri; Sheri Cummins; Chief, Grants Information; Division of Communications and Outreach; NIH Office of Extramural Research; cummins@mail.nih.gov; 301-496-3405;

Additional Information: Please pass this on to anyone you know whom may be preparing an NIH individual fellowship application (pre- or postdoc); Anyone who started a grant application for any of these fellowship opportunities prior to June 8, 2016 must return to the funding opportunity announcement and begin again.; There were problems in the fellowship forms packages attached to the funding announcements. NIH has since corrected the problem. See below for details, and https://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-106.html. Impacts the Parent fellowship funding announcements as well as PA-16-130 from NIGMS and PAR-16-210 from NIDCD. [forwarded to our attention by] Stephanie Scott, SPA Communications and Outreach Director, sfs2110@columbia.edu; NIH Fellowship applicants, I’d like to bring two issue to your attention: (1) Anyone who started a fellowship application between June 3 and June 7 must return to their funding opportunity announcement to get an updated application package (NOT-OD-16-106); (2) If you use Grants.gov downloadable forms or Workspace to prepare your application, be aware that the “View Attachment” button associated with the 23. Resource Sharing Plan attachment on the PHS Fellowship Supplemental form displays the 22. Select Agent Research attachment instead of the expected one. This is simply an issue with the Grants.gov form interface. It does not impact how the attachments are sent to NIH or how we assemble your application image in eRA Commons; We are working with Grants.gov to address the issue. In the meantime, do not rely on...
the “View Attachment” feature for the Resource Sharing Plan. Instead, carefully check your attachments prior to uploading them and again when viewing your application image in eRA Commons. This issue only impacts the PDF version of the form. If you use ASSIST or a system-to-system solution to prepare your application, then you are not impacted; If you have any questions, please contact Grants Information at grantsinfo@od.nih.gov; Sheri Shari Cummins; Chief, Grants Information; Division of Communications and Outreach; NIH Office of Extramural Research; cumminss@mail.nih.gov; 301-496-3405;

Change is Coming: Updates to NIH Application Forms and Instructions; Summary from the NIH “Open Mike” Blog Regarding the Many Changes Taking Place with NIH Application Forms and New Policy Requirements;
Sponsor: NIH; Extramural Nexus Blog;
Deadline(s): 01/25/2016; effective for applications submitted on or after January 25, 2016;
Contact: Please see appropriate links;
Electronic Research Administration: https://era.nih.gov/;

Additional Information: Below is a nice summary from the NIH “Open Mike” blog [provided by Stephanie] Scott regarding the many changes taking place with NIH application forms and new policy requirements. I reviewed these changes this week with departmental/grants managers during the Research Administration Forums. I will certainly continue to provide updates and summaries of these changes for faculty and the rest of the research community. Stay tuned for more.; Step; We periodically need to update our application forms and instructions to accommodate changing policy, new business needs, and sometimes (not often enough) to reduce the amount of information we ask of you. Given our constraints, we have been working to provide systems support to make the mechanics of these transitions easier for you. This particular set of changes implements a number of policy changes impacting applications submitted in 2016, which we announced in a series of recent NIH Guide notices. We would like to give you a quick overview of what is happening; We will be rolling out the changes in two phases, as summarized in our notice published in the NIH Guide, since our new application forms will not be ready until the spring; You may want to pay particular attention to the following changes, effective for applications submitted on or after January 25, 2016: (*) There will be new application requirements and review language regarding enhanced rigor and reproducibility (We’ll be elaborating on these requirements in a separate upcoming post); (*) We will ask for less information in the vertebrate animal section of the application, to remove redundancy with information already included in IACUC reviews. (Some of this
information will be shifted to the research strategy section.; (*) We are updating the NIH policy on inclusion of children to lower the age designation for children to include those under 18 years old. (The current age designation for children includes all research subjects under 21 years old.); (*) For training grants, information requirements will change and lower applicant burden; For due dates of May 25, 2016 and beyond, we will require use of new application forms (FORMS-D). We will remind you again this spring, but please understand that it is imperative that you submit your application on the right form package to ensure successful submission.; We will reissue fellowship, career development, training and all parent funding opportunity announcements this spring, to ensure the announcements include instructions that match the form requirements. We’ll also make a variety of resources available this spring to help ensure you submit using the right forms.; If you have been using the Grants.gov downloadable forms and haven’t tried ASSIST yet, members of my staff (the electronic Research Administration or eRA) are working on enhancing the copy application feature to make it easier to move your application (including attachments) from one form version to another. During the last round of grant applications, over 25% of the applicants switched from using downloadable forms to ASSIST. They successfully submitted their applications on the first try over 90% of the time compared with only 60% of the time for those still using the standard downloadable forms.; So be on the lookout for new application instructions we will release at the end of November, and for more communications from us as we get closer to the time we move to FORMS-D.;

**Simplification of the Vertebrate Animals Section of NIH Grant Applications and Contract Proposals;**

**Sponsor:** National Institutes of Health;  
**Deadline(s):** NA Release Date: 10/13/2015;  
**Contact:** For questions or further information, contact: Office of Laboratory Animal Welfare (OLAW); Telephone: 301-496-7163;  
**Email:** olaw@od.nih.gov;  
**Link(s):** http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-007.html;  
**Additional Information:** This Notice is to inform potential applicants and offerors that the requirements of the Vertebrate Animals Section (VAS) of grant applications, cooperative agreements and contract proposals has changed. The changes have been made to remove redundancy with Institutional Animal Care and Use Committee review while meeting the requirements of the Public Health Service Policy on Humane Care and Use of Laboratory Animals.; Updated VAS Requirements: If live vertebrate animals are to be used, federal policy requires applicants to address the following criteria: (*) Description of Procedures. Provide a concise description of the proposed procedures to be used that involve vertebrate animals in the work outlined in the application or proposal. Identify the species, strains, ages, sex and total number of animals by species to be used in the proposed work. If dogs or cats are proposed, provide the source of the animals.; (*) Justifications. Provide justification that the species are appropriate for the proposed research. Explain why the research goals cannot be accomplished using an alternative model (e.g., computational, human, invertebrate, in vitro); (*) Minimization of Pain and Distress. Describe the interventions including analgesia, anesthesia, sedation, palliative care and humane endpoints to minimize discomfort, distress, pain and injury.; (*) Euthanasia. State whether the method of euthanasia is consistent with the recommendations of the American Veterinary Medical Association (AVMA) Guidelines for the Euthanasia of Animals. If not, describe the method and provide a scientific justification;

**NIH & AHRQ Announce Transition to New Research Training Table Formats for 2016 and Upcoming Release of the xTRACT System;**

**Sponsor:** National Institutes of Health; Agency for Healthcare Research and Quality;  
**Deadline(s):** NA Release Date: 10/13/2015;  
**Contact:** Please direct all inquiries to: NIHTrain@mail.nih.gov;  
**Link(s):** http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-007.html;  
**Additional Information:** This Notice serves to announce the availability of new research training data tables for use with FY 2016 institutional training grant applications and research performance progress reports (RPPRs). Table formats, instructions, and a completed set of tables with sample data may be found on the NIH website at: http://grants.nih.gov/grants/funding/424/datatables.htm; Where specified in the Funding Opportunity Announcement for a program, these tables may also be used in institutional career development and research education applications and RPPRs.; Background and Related Information: In keeping with the recommendations of NIH’s Advisory Committee to the Director’s Working Group on the Biomedical Research Workforce, we plan to introduce an electronic system, xTRACT, for creating research training data tables and storing the information reported in those tables. xTRACT is expected to be available for users to access via the eRA Commons beginning October 16, 2015.; In conjunction with the development of xTRACT, and to implement related recommendations from the Working Group, we have revised existing research training data tables to: (*) Reduce the number of tables from 12 to 8; (*) Minimize the reporting of individual-level information; (*) Extend the tracking of trainee outcomes from 10 to 15 years; Where possible, existing data will be used to pre-populate the xTRACT system, including trainee names and selected characteristics, institutions, grant numbers, and subsequent NIH, AHRQ and other HHS awards.;

**NIH & AHRQ Announce New Form for PHS Awarding Component and Peer Review Requests;**
**Inclusion of Children in Clinical Research: Change in NIH Definition;**

**Sponsor:** National Institutes of Health; Agency for Healthcare Research and Quality;

**Deadline(s):** NA Release Date: 10/13/2015;

**Contact:** Please direct all inquiries to: NIH Inclusion Policy Officer; Office of Extramural Research (OER); Telephone: 301-435-7124; Email: inclusion.od.nih.gov;

**Link(s):** http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-010.html;

**Additional Information:** The purpose of this notice is to notify NIH applicants/offerors and grantees/contractors about a change related to the NIH policy on the inclusion of children in clinical research. NIH’s long-standing policy has been that children must be included in all human subjects’ research, conducted or supported by the NIH, unless there are scientific and ethical reasons not to include them. The policy was developed because medical treatments applied to children are often based upon testing done only in adults, and scientifically evaluated treatments are less available to children due to barriers to their inclusion in research studies. Therefore, applicants / offerors conducting human subjects’ research must include a description of plans for including children. If children (or a subset of children) will be excluded from the research, the application or proposal must present an acceptable justification.

**What’s Changing:** Starting with applications/proposals submitted for due dates on or after January 25, 2016, for the purposes of inclusion policy, the age of a child will be defined as individuals under 18 years old instead of under 21 years old, the current NIH definition of a child for inclusion policy considerations. Applicants / offerors for NIH funding will still be expected to justify the age range of the proposed participants in their clinical research, with particular attention paid to addressing the inclusion (or exclusion) of children (or subsets of children). However, now that threshold applies to individuals under the age of 18 rather than under the age of 21.;

**Reason for:**
Change: Consideration of children as a vulnerable population for human protections from research risk and the NIH child inclusion policy are often conflated. While these are distinct policies, many think of children as under 18 years of age, typically the age of consent. This has sometimes led to confusion on the part of applicants/offerors, peer reviewers, grantees/contractors, and even NIH staff about how to ensure compliance with the child inclusion policy. By aligning the NIH definition for the age of a child with the typical age of consent and the common perception of the age of adulthood, the NIH can continue to implement this policy in a manner that focuses on the group of children that need particular attention; The NIH recognizes that development continues well beyond 18 (and even 21, the current age); however, there is particular concern about ensuring the appropriate inclusion of individuals under 18 while also safeguarding this vulnerable group. NIH policies on inclusion are aimed at ensuring that appropriate individuals are included in clinical research and clinical trials. Results need to be generalizable to individuals that comprise the population under study. This includes consideration of age as a factor in the scientific design.; For more information on the child inclusion policy: https://grants.nih.gov/grants/funding/children/children.htm;

Implementing Rigor and Transparency in NIH & AHRQ Research Grant Applications;
Sponsor: National Institutes of Health; Agency for Healthcare Research and Quality;
Deadline(s): NA Release Date: 10/09/2015;
Contact: Please direct all inquiries to: reproducibility@nih.gov;

Additional Information: This notice informs the biomedical research community of updates to application instructions and review language intended to enhance the reproducibility of research findings through increased scientific rigor and transparency. These updates will take effect for most* research grant applications (including small business and complex research grant applications) submitted for due dates on or after January 25, 2016. For research contracts, this policy will be effective for proposals received on/after January 25, 2016 and expected to result in contract awards in Fiscal Year 2017 and beyond.; Updates include: (*) Revisions to application guide instructions for preparing your research strategy attachment; (*) Use of a new "Authentication of Key Biological and/or Chemical Resources" attachment; (*) Additional rigor and transparency questions reviewers will be asked to consider when reviewing applications; These updates focus on four areas deemed important for enhancing rigor and transparency: (1) the scientific premise forming the basis of the proposed research; (2) rigorous experimental design for robust and unbiased results; (3) consideration of relevant biological variables, and (4) authentication of key biological and/or chemical resources.; The basic principles of rigor and transparency and the four areas of focus apply to the full spectrum of research, from basic to clinical.

Investigators will need to consider how all four areas apply to their proposed research. Likewise, reviewers will assess whether these areas have been appropriately addressed by the applicant through revised language defining the peer review criteria. (*)

*Notes & Exceptions: (*) Research grant activity codes excluded from this policy include C06, G08, G11, G12, G13, G20, R13, S06, S10, S21, SB1, U13, U55, UB1, UC6, UC7, UG4, UH4, X02, and 333; (*) Research Resource andRelated grants or components (P30, P40, P41, P2C, R24, R28, U24, U41, U42, and U2C) may have slightly revised review language; please refer to the Funding Opportunity Announcement; (*) Refer to NOT-OD-16-012 for updates to Career Development Award application instructions and review language.; (*) Fellowship and Training grant applications submitted for the May 25, 2016 due date and beyond will include new instructions and review criteria to address this policy. Details on these changes will be available by December 2015.;

NIH Releases Protocol Template for Behavioral and Social Sciences Research Involving Humans

**Sponsor:** National Institutes of Health  
**Deadline(s):** 03/26/2019 (Release Date)
Additional Information: Purpose: The National Institutes of Health (NIH) has released a clinical trial protocol template with instructional and example text for NIH funded investigators to use in writing protocols for behavioral and social sciences clinical trials. This template was developed in response to changes in NIH policies that expanded the requirements associated with clinical trials beyond FDA-regulated clinical trials to those studies including behavioral or social interventions. Use of the template is recommended, but not required.

Additional Information: Dear Colleagues, By now, many of you have learned that a New York Presbyterian physician, Dr. Craig Spencer, who recently returned from treating patients in Guinea, has tested positive for Ebola. I ask you all to keep Dr. Spencer, who is a 2013 Mailman School graduate, in your thoughts, and to acknowledge that the extraordinary efforts of our alumni, current students, and faculty continue to play a critical role in the containment, treatment, and understanding of this outbreak. At a moment of global distress, public health knowledge is vital. It is important to recognize that this crisis will continue, and that all available scientific information suggests the risk of transmission here is extremely low; Dr. Spencer’s commitment is among many noteworthy examples of our colleagues passing seamlessly from science to service. As we move through this global crisis, we must all take pride in that commitment.; Sincerely, Linda; Linda P. Fried, MD, MPH; Dean and DeLamar Professor of Public Health; Mailman School of Public Health; Senior Vice President; Columbia University Medical Center; Professor of Epidemiology and Medicine;

CLARIFICATION - RE: 3rd Reminder-eRA Commons IDs and Complete Profiles Required for Students and Postdocs; The requirement for NIH eRA Commons IDs, as per notice NOT-OD-13-097;

Sponsor: NIH;

Deadline(s): Starting in October 2014;
Contact: Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;
Link(s): NOT-OD-13-097;
http://spa.columbia.edu;

Additional Information: This is to clarify the requirement for NIH eRA Commons IDs, as per notice NOT-OD-13-097. The Commons IDs, and complete Personal Profiles, are required for postdocs, graduate and undergraduate students when: (*) They have participated at least one person month on an NIH award, regardless if they were paid from the grant; and (*) Their participation is required to be included in Participants Section (D.1) in the Research Performance Progress Report (RPPR) – (*) note some select NIH grant mechanisms may be exempt from reporting in this section. (*) The RPPR Instruction Guide contains Supplemental Instructions for Specific Grant Types (such as training awards and multi-project awards), which can be found at: http://grants.nih.gov/grants/rppr/rppr_instruction_guide.pdf; TIP – when preparing your RPPR, click “Check for Errors” prior to routing the report to your SPA Project Officer. You will be alerted of missing eRA Commons IDs and incomplete profiles. This is the best time to contact SPA-eBiz to request IDs, or to alert individuals to complete their Commons profiles; If you are requesting an eRA Commons ID from SPA-eBiz@columbia.edu, please include the following information with your request: (*) Full Name; (*) UNI; (*) Email address; (*) Campus (Morningside or CUMC); SPA-eBiz will work with you to determine the appropriate eRA Commons role; Please feel free to ask me, or your assigned SPA Project Officer, any questions. Thank you for your patience! Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

Reminder-eRA Commons IDs and Complete Profiles Required for Students and Postdocs;
Sponsor: NIH;
Deadline(s): Starting in October 2014;
Contact: Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

Additional Information: This is a reminder that beginning October 2014, Research Performance Progress Reports (RPPRs) lacking an eRA Commons ID for graduate and undergraduate students will receive an error and the RPPR will not be accepted by the NIH without this information. RPPRs that are not accepted could delay issuance of Notice of Grant Awards. See full NIH notice at NOT-OD-13-097. Currently, warnings appear in the eRA Commons screens to alert individuals identified as undergraduate students, graduate students, and postdoctoral researchers that the following fields should be completed in their eRA Commons profiles: date of birth, gender, race, ethnicity,
disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Beginning on October 1, 2014, those fields in the eRA Commons screens will be required for individuals identified in any of those three roles. If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at spa-eBiz@columbia.edu. In addition, graduate and undergraduate students, and postdoctoral researchers should complete their Personal Profiles in the eRA Commons, ensuring all fields listed above are complete. Tutorials on the Personal Profile can be found at eRA Commons Manage Personal Profile. RPPRs will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPRR format, resources are available at http://grants.nih.gov/grants/pprr/. Therefore, if you have students supported on non-SNAP awards, now is the time to ensure they have eRA Commons profiles completed.; Please share this information with your students and postdocs who are supported on NIH grants. If you have any questions, you may contact me, or your assigned SPA Project Officer.; Stephanie F. Additional Information: NIH: The View From 10,000 Feet: Posted on July 24, 2014 by Sally Rockey; Here on the blog we discuss many different aspects of NIH’s research program – policies, funding trends, workforce issues. A few weeks ago, while I was preparing to give the opening talk at the NIH Regional Seminar on Program Funding and Grants Administration, I realized some Rock Talk readers might be interested in learning more about how these topics fit into the big picture of NIH. So, I asked my colleagues to tape this talk, “NIH: The View from 10,000 Feet”, so I could share it with you on the blog

The Columbia University Medical Center IRB Office has a standing "IRB Consultation Hour". This service provides an opportunity for researchers to stop in at the IRB office and meet with an IRB professional to discuss regulatory, policy, and procedural questions. The sessions are scheduled for **every Tuesday from 10 am to 11 am**. No appointment is necessary. The IRB office is located at **154 Haven Avenue, 1st Floor**. Attendees should sign in at the IRB receptionist desk, and will meet with IRB staff in the order of arrival. If situations warrant, individual consultations may be limited to 15 minutes. Important Note: If you have questions about a protocol that has already been submitted to the IRB, please contact the staff members who administer the IRB to which the protocol is assigned rather than bringing those questions to a Consultation Hours session. Staff contact information may be obtained on the IRB website: [http://www.cumc.columbia.edu/dept/irb/](http://www.cumc.columbia.edu/dept/irb/)

Researchers may also call in during these times, to the IRB main number, for consultation: 212.305.5883. Email: irboffice@columbia.edu;

**Additional Information:** Dear Colleagues: The Office of the Executive Vice President of Research (EVPR), including the Office of Postdoctoral Affairs, and the Graduate School of Arts and Sciences (GSAS) are pleased to announce the introduction of an individual development plan (IDP) program for National Institutes of Health (NIH)-funded graduate students and postdoctoral researchers (postdocs). An IDP consists of a self-assessment of skills, interests and values that guides the development of short and long term plans to achieve career goals. In 2012, the NIH published a task force report on the current state of the biomedical workforce which found, among other things, that universities need to better prepare biomedical graduate students and postdocs for a broad range of career opportunities beyond academia. As one of a number of initiatives designed to address the recommendations of the task force, the NIH issued a policy, released on July 23, 2013 and revised on August 4, 2014 ([http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-113.html](http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-113.html)), that does not require, but strongly encourages recipients of NIH awards to develop and use IDPs for graduate students and postdocs supported by the NIH. In addition, the revised policy provides that, beginning on October 1, 2014, annual progress reports relating to NIH awards must include a description of whether or not the institution uses IDPs and how they are employed to help manage the training and career development of graduate students and postdocs associated with such awards. The University’s IDP program will begin later this month and will include seminars on topics relating to the development of an IDP. Optional workshops will assist participants in completing an IDP. Career panels and networking events will be held to offer opportunities for participants to learn more about potential career options and the skills and experiences needed to gain employment in a wide array of fields. Complete IDP program details, including registration information, can be found at [https://www2.gsas.columbia.edu/idp](https://www2.gsas.columbia.edu/idp). Faculty members should strongly encourage their NIH-funded graduate student and postdocs to register and participate in the IDP program. A description of the Columbia IDP program to be utilized in progress reports can be found at [https://www2.gsas.columbia.edu/idp/node/3#summary](https://www2.gsas.columbia.edu/idp/node/3#summary). Please contact Rory Flinn (rf2531@columbia.edu), Director of the Office of Postdoctoral Affairs, with any questions about the program;

Sincerely, G. Michael Purdy; Executive Vice President; Carlos J. Alonso; Dean, Graduate School of Arts and Sciences; Arthur G. Palmer III; Associate Dean for Graduate Affairs; College of Physicians & Surgeons;

**ADDITIONAL INFORMATION REQUIRED FOR F GRANT APPLICATIONS**

**REMEMBER & Clarification: New NIH Requirement for Fellowship Applications;**

**Sponsor: NIH;**

**Deadline(s):** Standard Dates;

**Contact:** Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

**Links:** NIH Notice of Clarification (F31s); NIH Notice of Clarification (F32s); NIH Notice of Clarification (Parent F31-Diversity); NIH Notice of Clarification (F30); FAQs for Fellowships; http://www.postdocs.columbia.edu/funding.html;

**Additional Information:** Just a reminder and a clarification of the new NIH requirement for fellowship applications (see original notice below). The new “Additional Educational Information” requirement also applies to the Individual Predoctoral Fellowship to Promote Diversity in Health-Related Research (Parent F31 - Diversity) and the Individual Predoctoral MD/PhD or Other Dual-Doctoral Degree Fellowship (F30). I added these two programs, with links clarifying their instructions, to the list below. As always, if you have any questions regarding this new requirement, please contact your SPA Project Officer. Please forward this email to predoctoral and postdoctoral fellows whom you are aware are applying for these fellowships. Thank you;

Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

As the next NIH deadline for Predoctoral (F31) and Postdoctoral (F32) Fellowship applications approaches August 8th, I wanted to take this opportunity to remind applicants, their mentors, and administrators of the new “Additional Educational Information” document required in the applications. **All applications lacking this attachment will be considered incomplete and will not proceed to review.** Please refer to the following notices regarding this new requirement:

NIH Notice of Clarification (F31s); NIH Notice of Clarification (F32s); FAQs for Fellowships; Columbia University’s Office of Postdoctoral Affairs (OPA) provides template language you can include in the “Additional Educational Information” document for F32s. This language can be obtained from the OPA website at: [http://www.postdocs.columbia.edu/funding.html](http://www.postdocs.columbia.edu/funding.html).

If you have any questions regarding this new requirement, please contact your SPA Project Officer. Thank you, Stephanie F. Personal Profiles. Reporting requirements require that all postdocs, graduate students, and under-graduate students supported on NIH grants must have eRA Commons IDs, with complete eRA Commons Personal Profiles. Beginning with NIH progress reports due October 2014, NIH will not accept progress reports that have missing eRA Commons IDs and incomplete profiles. As you are aware, if NIH rejects a progress report, that could delay issuance of the next year's funding.

Complete eRA Commons profiles are just as important as the ID itself. NIH can reject the progress report if the following fields are not complete in the profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have "I Do Not Wish to Provide" as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Tutorials on the eRA Commons Personal Profile can be found at eRA Commons Manage Personal Profile.

If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu.

The Research Performance Progress Report (RPPR):

Sponsor: NIH;
Deadline(s): starting October 17, 2014;
Contact: Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus; Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;
Link(s): NOT-OD-13-097; NOT-OD-14-092; eRA Commons Manage Personal Profile;

Additional Information: The Research Performance Progress Report (RPPR) format will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rppr/. Please share this information with your students and postdocs who are supported on NIH grants.

If you have any questions, you may contact me, or your assigned SPA Project Officer.; Step; Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus; Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu; This is a reminder that beginning October 2014, Research Performance Progress Reports (RPPRs) lacking an eRA Commons ID for graduate and undergraduate students will receive an error and the RPPR will not be accepted by the NIH without this information. RPPRs that are not accepted could delay issuance of Notice of Grant Awards. See full NIH notice at NOT-OD-13-097.

Currently, warnings appear in the eRA Commons screens to alert individuals identified as undergraduate students, graduate students, and postdoctoral researchers that the following fields should be completed in their eRA Commons profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have "I Do Not Wish to Provide" as one of the acceptable responses. For those who have
completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Beginning on October 1, 2014, those fields in the eRA Commons screens will be required for individuals identified in any of those three roles; If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu. In addition, graduate and undergraduate students, and postdoctoral researchers should complete their Personal Profiles in the eRA Commons, ensuring all fields listed above are complete. Tutorials on the Personal Profile can be found at eRA Commons Manage Personal Profile; RPPRs will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rrpr/. Therefore, if you have students supported on non-SNAP awards, now is the time to ensure they have eRA Commons profiles completed; Please share this information with your students and postdocs who are supported on NIH grants. NIH-Investigators FW: NIH eSubmission Items of Interest – Sponsor: NIH
Deadline(s): June 4, 2014
From Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); "NIH eSubmission Items of Interest" (June 4, 2014) (see below). In particular, it addresses the new Biosketch Pilot program, tips on using non-standard characters in form fields, and the cover letter attachment.

Don’t Forget the eSubmission Basics: I had the privilege of spending some time last week with the eRA Commons Help Desk and posed the question - "If you could tell the applicant community one thing about application submission what would it be?" I was a bit surprised to hear the same key messages that we have been pushing for years. On the other hand, that’s why we consider them ‘the eSubmission basics’.

So, here’s a quick reminder...

• Watch out for form fields required by NIH that are not marked required on federal-wide forms (e.g. Credential for PD/PIs and Organization for all entries on R&R Sr/Key Person Profile form; primary site DUNS on Project/Performance Sites form).
• Use PDF format for all attachments. Follow PDF Guidelines.
• Submit early – days, not minutes – to allow time to correct unforeseen errors.
• Track your submission in eRA Commons. Email can be unreliable.
• Check your entire assembled application image in eRA Commons. If you can’t view it, we can’t review it!
• If federal system issues threaten your on-time submission you need to notify the help desk and follow the Guidelines for Applicants Experiencing System Issues.

Impact of Biosketch Pilot on Non-pilot Applications: Did you see in the NIH Guide (NOT-OD-14-091) or in Rock Talk (Changes to the Biosketch) that NIH is piloting a new biosketch format? The pilot directly impacts applicants applying to a few Funding Opportunity Announcements (FOAs) (e.g., RFA-NR-15-001), but there is an immediate indirect impact to all applicants as well. In order to accommodate the pilot applications, eRA has changed the way we systematically validate the biosketch page limit for all applications. Specifically, a warning will fire if you submit a 5 page biosketch and an error will fire if your biosketch is over 5 pages. Applicants to pilot FOAs can ignore the 5 page biosketch rejection of their applications. After your application moves forward to NIH staff, we will do a manual check of the biosketches in applications to FOAs not participating in the pilot. If your non-pilot FOA requires 4 pages, but you included 5 and ignored the warning, then your application may not be reviewed. Applicants must read and follow all FOA and application guide instructions – even those that aren’t enforced by electronic systems.

Non-standard Characters in Form Fields: Although NIH systems now support a broader character set including Greek and other non-standard characters, Grants.gov systems currently do not.
R²report
Friday Newsletter 05/01/20

When completing application form fields type content directly from your keyboard. Avoid cutting and pasting from Word and other word processors- they often convert your plain text to rich text (e.g. Word converts quotes to ‘smart quotes’ that curve towards the text between them and combines two dashes into one long em-dash.) Also, keep your text as simple as possible. The following characters are typically ‘safe’: letters, numbers, spaces, underscores, periods, dashes (not em-dashes), quotes (not smart quotes), parentheses, brackets, ampersands, tilde, exclamation points, commas, colons, semicolons, at signs, number signs, dollar signs, percent signs, plus signs, equal signs, and asterisks. Limit your use of fancier characters to the body of your PDF attachments.

**Submitting Applications with more than 5 Budget Periods:**
Although NIH typically allows only 5 budget periods to be submitted with grant applications, from time to time you will come across a FOA that allows more than 5 budget periods. Most NIH FOAs include the R&R Budget form which only accommodates data collection for 5 budget periods leaving applicants wondering what to do with the rest of the data.

Applicants have been forced to use a rather clunky ‘workaround’ that includes adding the additional budget period information in the budget justification. eRA has just added system support for Grants.gov’s R&R Budget 10YR form that will allow for the collection of up to 10 budget periods of data. Going forward, this form will be included with the few, special FOAs that allow more than 5 budget periods. The bulk of NIH FOAs will continue to use the standard R&R Budget form.

**Transition to FORMS-C To Complete in August:**
If it seems like I’ve been talking about transitioning to FORMS-C for a year – I have. On May 30, 2013, we announced our first transition to updated application forms (FORMS-C) for application due dates on/after September 25, 2013 (NOT-OD-13-074). The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs are our last remaining programs to use the older forms. These programs are scheduled to transition to FORMS-C for due dates on/after August 5, 2014 (NOT-OD-14-089) marking the end of a rather lengthy transition. Believe it or not, this summer my friends in policy will start pulling together requirements for the next OMB clearance of the PHS (agency-specific) forms used in our applications (they expire in August 2015). Before you know it we’ll be talking about ‘FORMS-D’ forms. For now, let’s celebrate getting through this one. Woo-hoo!

**CYA: Cover Your Application – that’s what you thought I was talking about – right? NIH form packages no longer use a separate, agency-specific PHS Cover Letter form. The version of the SF424 (R&R) cover form included in FORMS-C packages has a new Cover Letter Attachment (item #21 at the very bottom of the form). If you plan to include a cover letter with your application – use this Cover Letter Attachment only! The eRA systems know to keep this attachment separate from your assembled application image and to limit access to it. If you attach it someplace else (e.g., Pre-application attachment on the SF424 (R&R) cover form, Other Attachments on the R&R Other Project Information form) it will become part of your assembled application image and will be visible to everyone with access to your application including reviewers.**

**NIH-Investigators Reminder-eRA Commons IDs and Complete Profiles Required for Students and Postdocs**

This is a reminder that beginning October 2014, Research Performance Progress Reports (RPPRs) lacking an eRA Commons ID for graduate and undergraduate students will receive an error and the RPPR will not be accepted by the NIH without this information. RPPRs that are not accepted could delay issuance of Notice of Grant Awards. See full NIH notice at NOT-OD-13-097.

Currently, warnings appear in the eRA Commons screens to alert individuals identified as undergraduate students, graduate students, and postdoctoral researchers that the following fields should be completed in their eRA Commons profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Beginning on October 1, 2014, those fields in the eRA Commons screens will be **required** for individuals identified in any of those three roles.

If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu. In addition, graduate and undergraduate students, and postdoctoral researchers should complete their Personal Profiles in the eRA Commons, ensuring all fields listed above are complete. Tutorials on the Personal Profile can be found at eRA Commons Manage Personal Profile.

RPPRs will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rppr. Therefore, if you have students...
supported on non-SNAP awards, now is the time to ensure they have eRA Commons profiles completed. Please share this information with your students and postdocs who are supported on NIH grants. If you have any questions, you may contact me, or your assigned SPA Project Officer.

RPPR Required for Non-SNAP Progress Reports Beginning October 17, 2014

NIH currently requires use of the fed-wide progress reporting format — known as the RPPR (Research Performance Progress Report) — to submit progress reports for Streamlined Non-Competing Award Process (SNAP), fellowship, and multi-year funded awards. In April we opened the RPPR for use for all Type 5 Non-SNAP progress reports in anticipation of an October 2014 requirement for RPPR use. Now, it’s official — all type 5 non-SNAP progress reports submitted on or after October 17, 2014 need to be submitted through the RPPR module of eRA Commons. .... Continue reading →

Promoting Research Integrity: Building the Foundation of Trust

Exemplifying and promoting the highest level of scientific integrity, public accountability, and social responsibility in the conduct of science are among NIH’s main goals as an agency. Research integrity is not about being flawless. It is about conducting science using honest and verifiable methods, complying with rules and regulations and adhering to professional standards. Ultimately, it is also about trust, the foundation upon which the scientific research enterprise is built. We’ve recently updated our website on research integrity, .... Continue reading →

New Website for iEdison Invention Reporting Information:

You Ask, We Answer:

Can I Resubmit My Grant Application While It Is Under Appeal of the Initial Peer Review Results?

What is the Deadline for Resubmitting My Unfunded Application?

NIH REVISED SUBMISSION RULES

NIH & AHRQ just released more clarifications on the new resubmission policy. In this announcement are clarifications on due dates, applicability, time limits, and the various options PIs have. See NOT-OD-14-082: http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-082.html; I know this revised policy is important to you and has many implications. Please feel free to me or your assigned Project Officer questions. I am following up with additional information on the important announcement I sent last week regarding NIH and AHRQ’s new resubmission policy (see below). NIH just posted extensive FAQs describing various scenarios when you may submit applications as ‘new’ that were previously submitted, resubmitted and not funded (including competing renewal applications that were not funded). Refer to the following resources and articles: FAQs: http://grants.nih.gov/grants/policy/resubmission_q&a.htm; The policy announcement: NOT-OD-14-074; A Change in Our Resubmission Policy – Rock Talk article explaining the reasons for the change; NIH Policy on Resubmission Applications; Science Magazine article: NIH to Relax ‘Two Strikes’ Grant Submission Policy; Deciding whether to submit an application as a resubmission or as a new submission can sometimes be complex. You may need to speak with an NIH Program Official or Program Director regarding your specific situation. Please feel free to ask me, or your SPA Project Officer,
questions as they arise. Please read full announcement, NOT-OD-14-074 at http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-074.html Effective immediately, for NIH and AHRQ applications due after April 16, 2014, following an unsuccessful resubmission (A1) application, applicants may submit the same idea as a new (A0) application for the next appropriate due date. The NIH and AHRQ will not assess the similarity of the science in the new (A0) application to any previously reviewed submission when accepting an application for review. Although a new (A0) application does not allow an introduction or responses to the previous reviews, the NIH and AHRQ encourage applicants to refine and strengthen all application submissions. Please read the full announcement for more details on the background of this policy change and the policy details. The NIH time limit for accepting resubmission (A1) applications remains in effect, as does the policy for New Investigator R01 resubmission deadlines. Stephanie F. Scott, M.S., CRA

Additional Information for the two above mentioned announcements: This Notice alerts grantees to a change in the implementation timeline, previously announced in NOT-OD-13-120 and NOT-OD-14-093, for the NIH transition to new U.S. Department of Health and Human Services (HHS) payment policies for domestic, non-competing continuation awards and use of Payment Management System (PMS) subaccounts. It also announces a change in how competitive revisions/administrative supplements (Type-3s) awards will be processed. This Notice only applies to domestic non-competing continuation awards that have not yet transitioned to PMS subaccounts. In response to critical feedback from the grantee community, NIH requested an amendment to its subaccount implementation plan to delay the transition of domestic, non-competing continuation awards to PMS subaccounts for an additional year; e.g., now beginning October 1, 2015. HHS’s Office of the Assistant Secretary for Financial Resources recently approved the request. This additional time is provided to allow grantees to prepare their systems to accommodate the changes. Grantee with inadequate systems in place to appropriately manage this transition by October 1, 2015, may be unable to appropriately access PMS accounts and risk losing their ability to draw down funding. Grantees are advised that there will be no additional implementation delays considered and no exceptions granted to the deadline. As of October 1, 2015, NIH will utilize only subaccounts for awarding grant funds. Every grant that is awarded funding in FY 2016 (whether it be in the first, second, third or fourth quarter of FY 2016) will be in a subaccount. NIH will continue transitioning payment of grant awards with new document numbers to domestic institutions to PMS subaccounts in FY 2015 as announced in Notice NOT-OD-13-120. The administrative changes announced in NOT-OD-14-093 will now apply to the transition that will occur between October 1, 2015 and September 30, 2016. This Notice reiterates those administrative changes for non-competing continuation awards and highlights the revised implementation timelines and T-3 award process for all domestic awards. - See more at: http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-103.html#ssh.0l3doSVZ.dpuf;
