- The Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application.
- The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications.
- All other materials listed in NOT-OD-19-083 as acceptable post-submission materials will continue to be accepted if submitted 30 days before the study section meeting.

Funding opportunities and announcements listed in the “New this Week” section will be moved to the main body of the newsletter in the following weeks. They are presented (in the posted .pdf version of the newsletter) in the following order:
[NTW] [WEEKLY HIGHLIGHT/NYCEF 2022]

New York City Epidemiology Forum (NYCEF) 2022 05/23/2022

**Sponsor:** Columbia University Mailman School of Public Health (Host), Albert Einstein College of Medicine, CUNY Graduate School of Public Health and Health Policy, Hofstra Northwell School of Medicine, Icahn Medical School at Mount Sinai, Memorial Sloan-Kettering Cancer Center, New York Academy of Medicine, New York City Department of Health and Mental Hygiene, New York University Grossman School of Medicine, New York University School of Global Public Health, Rutgers Cancer Institute of New Jersey, Rutgers School of Public Health, SUNY Downstate School of Public Health, SUNY Stony Brook Medicine, Weill Cornell Medical College

**Deadline[s]:** Monday 05/23/2022 (Event Date)

**Contact:** nycef2022@cumc.columbia.edu

**Additional Information:** Abstracts due [Extended Deadline] Sunday May 1 at: [https://tinyurl.com/2p9edfnp](https://tinyurl.com/2p9edfnp) The annual New York City Epidemiology Forum (NYCEF) conference provides a forum for epidemiologists working in the New York City area to present their work and discuss opportunities for collaborations. The conference includes oral presentations, posters, and discussion sessions. The conference is expected to lead to new collaborative activities, such as networks with shared resources and joint educational programs. NYCEF provides a forum for regular contact and exchanges between epidemiologists working in academic and other institutions in the New York City Metropolitan Area, with a special focus on junior researchers, including junior faculty, post-docs, fellows, and students. NYCEF fosters increased awareness about research conducted in other institutions in New York City and surrounding areas, and provide opportunities for researchers to present their work, with the overall goals of promoting bilateral or multi-site collaborative projects and enhancing career opportunities for junior investigators. For questions and inquiries, please contact nycef2022@cumc.columbia.edu; location Alumni Auditorium 630 West 168th Street, William Black Building & Ballroom, 50 Haven Ave.

**Additional Information:** The Research Performance Progress Report (RPPR) Module in eRA Commons is moving to the new visual appearance being adopted by other eRA modules, because of a required technology upgrade that enhances the security and stability of the module. The upgrade includes adding the new unique entity identifier (UEI) fields where applicable and required FORMS-G changes, including updated budget forms. These upgrades are expected to be released on June 23, 2022.; NIH & AHRQ issued a recent announcement NOT-OD-22-130, as well as the announcement below containing details about upcoming changes to RPPRs. The modules in the eRA Commons are currently being modernized with a new visual appearance and enhances to security.; The Research Performance Progress Report (RPPR) Module in eRA Commons is expected to be upgraded by Thursday, June 23, 2022. Please note the following as some of you may need to take action prior to the release date of the upgrade: 

- **Non-SNAP awards only:** Budget forms will be updated to a new format. Users with in-progress RPPR forms will be required to re-enter budget form data if the in-progress RPPR is not submitted by June 22, a day before the release. NIH recommends that in-progress RPPRs be submitted by Wednesday, June 22 to avoid having to redo budget forms after the cutover. If that is not possible, they recommend you delay completing the budget forms until after Thursday, June 23 to avoid re-work.; NIH published an interim RPPR instruction guide that incorporates critical changes to align with recently issued guide notices and policy changes. They include: Modified instruction language to align with the updated Other Support and Biosketch format pages and associated instructions.; Modified Question G.4. Human Subjects to incorporate Human Subjects System and Clinical Trials reporting language in line with NOT-OD-20-125.; For institutional research training, career development and research education awards: Question B.4 text modified to incorporate the electronic submission requirement for the Trainee Diversity Report.; Added instructional language for Ruth L. Kirschstein National Research Service Award (NRSA) childcare costs reporting and requests in the RPPR, as per NOT-OD-21-074 and NOT-OD-21-177. AHRQ NRSA recipients should refer to NOT-HS-22-013 (Individual Fellows) and NOT-HS-22-014 (Institutional Research Training Awards).; A final RPPR Instruction Guide will be published on June 23, 2022, to reflect the revised screenshots accompanying the new look and feel of the RPPR module.; Due dates for submission of the RPPR remain unchanged.; For questions, please contact your SPA Project Officer. **PROPOSALS DUE APRIL 29, 2022** The global burden of cancer is rapidly increasing, particularly in low- and middle-income countries (LMICs). Innovative interdisciplinary research is urgently needed to identify and address gaps in global cancer education, treatment, and prevention. ICAP and the Herbert Irving Comprehensive Cancer Center (HICCC) have launched an initiative to meet that need.; As part of this new initiative, HICCC and ICAP are soliciting applications for pilot funds to support innovative cancer-related research in LMICs, to inform or to generate preliminary data for future larger grant applications. The relevant research categories are: Analysis of existing data or repository specimens; Translational research; Clinical studies; Behavioral studies; Epidemiological studies; Health policy research; **Timeline and Deadlines:** Proposal submission April 29, 2022, 11:59 PM EST; Award notifications May 27, 2022; Funding period starts July 1, 2022; Funding period ends June 30, 2023;

**Award Amounts and Selection Process:** Columbia University faculty or research scientists are eligible to apply for the pilot awards. Applicants may request up to $30,000 to support a single pilot research project that is cancer-related and will be conducted in an LMIC as defined by the World Bank. Up to three awards in total will be funded. Interdisciplinary research is encouraged.; **Proposal Preparation:** If the proposal calls for specific areas of expertise not available to an applicant, ICAP and HICCC leadership can assist in identifying potential experts. Potential applicants are encouraged to submit a letter of intent describing, in 1-2 paragraphs, the proposal concept and, if necessary, requests for introduction to a relevant expert who might collaborate with the applicant on the research. Letters of intent are encouraged but not required and can be e-mailed to Joey Platt, jp4056@cumc.columbia.edu; Contacts: Investigators interested in submitting applications may also discuss them in advance with the leadership of the ICAP-HICCC partnership: Dr. Wafaa El-Sadr wme1@cumc.columbia.edu and Dr. Alfred Neugut ain1@columbia.edu; Submission Instructions: Applicants should email their applications as a single PDF to Joey Platt, jp4056@cumc.columbia.edu, by 11:59 PM EST on Friday, April 29, 2022.; Proposals must meet the following format and content requirements, including the specified page limits.

Additional Information: Faculty of Arts and Sciences - Herbert Irving Comprehensive Cancer Center Joint Pilot Adward; Deadline: May 16; Columbia’s Faculty of Arts and Sciences FAS, specifically its Department of Biological Sciences, and the Herbert Irving Comprehensive Cancer Center HICCC are excited to announce a third cycle of their joint seed funding opportunity. Two (2) FAS-HICCC joint seed grants in the area of cancer research will be supported this year in order to initiate and support interdisciplinary and collaborative research. The FAS-HICCC joint grant should include collaboration between faculty from both organizations. A firm expectation is that the pilot grants will catalyze multi-PI grant proposal submissions to the NCI/NIH (multi-PI R01, U, or P mechanisms). Proposals are requested for one-year pilot studies. Two separate projects will be funded for one year at the level of $100,000 for each project; Areas of potential development include interdisciplinary research that provides new insight into fundamental mechanisms relevant to cancer (e.g., chemical reactions relevant to metabolism or signaling) as well as the development of new experimental or computational technologies for probing these mechanisms (e.g., high-throughput assays of molecular interactions or imaging). Faculty are encouraged to explore collaborating within these thematic areas, or on other topics in the intersection of biological and cancer research.; Previous Awardees: 2021-2022; Angela Christiano, PhD (Dermatology) & Lewis Brown, PhD (Biological Sciences); Detection of Tumor Neoantigens after Induction of PTC Readthrough and Inhibition of Nonsense Mediated mRNA Decay using Immunopeptidome Analysis; Yiping Han, PhD (Microbial Sciences in Dental Medicine) & Ann E. McDermott, PhD (Biological Chemistry); Investigation of amyloid-like FadA adhesin by solid phase NMR; 2020-2021; Laura Kaufman, PhD (Chemistry) & Carol Prives, PhD (Biological Sciences); Identification of p53-dependent pro-metastatic metabolic pathways in 3D invasive cancer cells; Jellert Gaublomme, PhD (Biological Sciences) & Raul Rabadan, PhD (Systems Biology); Single-cell and Spatial Transcriptomic Analysis of Intercellular Networks in the Tumor Microenvironment in Glioblastoma; Questions: contact Tanisha Jackson at tj2325@cumc.columbia.edu; For more information on applicant eligibility, and to apply, follow the link below; FAS-HICCC Joint Pilot RFP; Apply FAS-HICCC Joint Pilot Award

**Additional Information:** As a reminder, effective January 25, 2022, PIs and other senior/key personnel must electronically sign the NIH Other Support form to certify the accuracy of the information provided, and adhere to Columbia University’s Electronic Signature Policy. A typed name is not an electronic signature and is not acceptable. Certification cannot be delegated to
administrators or other staff. NIH will not accept wet signatures, or pictures of wet signatures. The University recommends using DocuSign to electronically sign the Other Support forms. DocuSign is cloud-based and automatically retains the originally signed documents. Both faculty and administrators can use DocuSign. CUIT is in the process of creating DocuSign accounts for PIs who have current active or pending NIH grants. Administrators who support faculty in creating and organizing Other Support forms and wish to have access to DocuSign will need to request an account. Please complete this Qualtrics form as soon as possible in order for CUIT to create an account. We only need the person's name and UNI, and one person can complete forms for multiple individuals. DocuSign training will be offered next week by CUIT and SPA, and will be recorded if you are unable to attend. A quick desktop reference guide and instructional video resources will also be forthcoming. Please register for the trainings by using a Columbia-affiliated email address here: [brought to our attention by] Stephanie F. **Link(s):**

**Additional Information:** You are receiving this email because you were recently given access to DocuSign in order to meet NIH's Other Support form electronic signature requirements. Researchers can use DocuSign to electronically sign the NIH Other Support forms. Administrators who assist researchers with NIH Other Support forms can use DocuSign to obtain electronic signatures from researchers. All PIs and other senior/key personnel must electronically sign their NIH Other Support forms, prior to their submission to NIH, certifying that the information is accurate and complete. You are encouraged to use DocuSign to meet
these requirements. In addition, administrators who assist researchers with NIH Other Support forms can use DocuSign to obtain electronic signatures from researchers. As a reminder, a typed name is not an electronic signature and is not acceptable. Certification cannot be delegated to administrators or other staff. NIH will not accept wet signatures, or pictures of wet signatures; Access to DocuSign has already been given to the following individuals: PIs with active NIH grants; Administrators who requested access, using our DocuSign Request Form; Researchers, who are not NIH-funded PIs (i.e., other senior/key personnel), who requested access using our DocuSign Request Form; If you are an administrator or other senior/key personnel who has not yet requested DocuSign and needs it for the purposes of NIH Other Support only, please use the DocuSign Request Form. Newly awarded PIs without prior NIH funding, and PIs transferring to Columbia from another institution will need to request access using the request form.; In order to use DocuSign you will need to follow the login steps outlined in the user guides below: DocuSign User Guide for Researchers; DocuSign User Guide for Administrators; Other training materials: Slide deck; DocuSign Training Video (1/19/2022); DocuSign Training Video (repeat session, 1/21/2022); If you have any technical difficulties accessing DocuSign, please email DocuSign-Support@columbia.edu.; For questions concerning the NIH requirements for electronic signature of Other Support, email Stephanie Scott at sfs2110@cumc.columbia.edu.; For more information about the NIH disclosure requirements, including guidance documents and FAQs, see NIH Researcher Disclosure Requirements: Other Support, Biosketches, and Foreign Components; Stephanie F. Additional Information: Opportunity related to NIH Other Support; I am writing to inform you that NIH recently developed a way for you to create your Other Support forms using SciENcv. It is not yet available to the research community. However, they are looking for volunteers to work directly with them to test it out. They want faculty and research administrators, but they especially want faculty from different scientific disciplines and career stages. This is a great opportunity for you to directly provide them with feedback. I do not yet know what kind of functionality they built in, but I do know the purpose of SciENcv is to streamline the creation of these forms and reduce burden. I also know that researchers will have the ability to electronically sign their Other Support forms in SciENcv (rather than use DocuSign).; Here are the details: When: Between April 4-15 (projected), approximately 45 minute sessions; Who: Faculty and Research Administrators, with priority to Faculty from different disciplines, career stages; What: Test the new SciENcv interface and NIH Other Support forms, and provide feedback directly to the developers and NIH staff; Email your interest to me, and I will share your contact information with the person coordinating these efforts who is in direct contact with the SciENcv team. They will reach out directly to you to schedule a testing session. If you are interested but not able to participate during the testing window, your name will be added to the list for future opportunities. This is not the first and only time we will be able to test SciENcv as they make improvements to the system and further develop it.; I learned of this opportunity through the Federal Demonstration Partnership (FDP), whose mission is to identify ways to reduce administrative burden for researchers receiving federal funding. Columbia is a member and very active in the FDP, and I am on the FDP Executive Committee.; Thank you.; [brought to our attention by]; Stephanie F. Additional Information: NIH recently released new clarifications for the Other Support format pages and Biographical Sketches. Key clarifications include:
Signatures are not required on the Other Support format pages until January 25, 2022, regardless of whether you use the old or new formats.
Completed support from the last three years is no longer required in Other Support. Only include active and pending projects. Awardees must report significant changes in Other Support in RPPRs, such as a change in status of previously reported current or pending projects, or access to a new resource/in-kind contribution.
Only unique, high-value materials and data received within the past three years, that are still in use, must be included as in-kind contributions in Other Support.
Only current positions and scientific appointments are required in the Biosketch. Applicants may choose to include past appointments that they wish to highlight.
Consulting agreements must be included in Other Support only when the PD/PI or other senior/key personnel will be conducting research as part of the consulting activities. Non-research consulting activities are not Other Support. Include estimates for the amount paid, rather than time and effort reflected in calendar months, for consulting that is disclosed in Other Support.
Rather than simply updating a previously submitted Other Support form, we strongly recommend that you create a new form from scratch, to ensure that you are able to implement all changes.
To assist you further, we created additional FAQs based on questions collected from researchers and administrators at Columbia University. They are meant to supplement NIH’s FAQs. This includes titled academic, professional, or institutional appointments whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary).”; This is critical. The senior/key personnel, and mentors for training grants, have to include all positions and appointments, not just select ones, or ones relevant to the proposal. It’s not just the heading of Section B that changed, it’s the instructions to Section B.; The changes as outlined in the announcement are as follows:

Additional Information: COVID-19 Updates for the Research Community: January 3, 2022; Dear Members of the Research Community, We write to highlight key COVID-19 updates for the research community: First, as stated in the Provost’s (Update on the Start of the Spring Semester) December 22 message, faculty, researchers, staff, and students involved in research, administration and all other non-instructional activities should work remotely, if feasible, during the first two weeks of
January. All in-person, indoor gatherings of any kind are prohibited during the first two weeks of January.; Second, research is not being paused or suspended at this time. However, to the extent feasible, research activities, including human subjects research, should be conducted virtually. Individual units and principal investigators may determine which team members are required to be in person versus remote. They should also take into account the needs and safety of research participants and study-specific requirements. As always when making such determinations, a precautionary approach is warranted and strongly recommended.; Third, the Research page of the University's COVID-19 Resource Guide contains updated information specific to the research community. This page includes a new FAQ for principal investigators regarding steps to consider in the event that a team member tests positive for COVID-19.; Finally, below are important reminders: [1] If you are eligible, get a vaccine booster as soon as possible. Upload documentation no later than January 31, 2022 (details on upload to follow); [2] Wear a properly-fitting face covering for all indoor activity on campus and outdoors in large gatherings.; [3] Comply with University testing requirements, including new recommendations as of December 29, 2021. Those who are returning to campus will please note that: all faculty and staff that have traveled, have been away for a period of time, or have participated in social events and gatherings are strongly recommended to get a PCR test from a local testing site 48 hours prior to returning to University facilities. There is no need to provide proof of this test, unless it is positive.; [4] All visitors, including those who enter any campus facility for any period of time, must be vaccinated and show proof of vaccination as part of visitor attestation. This vaccination policy does not apply to individuals accessing a facility for research screening or research participation.; [5] For in-person human subject procedures, research participants must comply with these guidelines and complete an attestation before entering campus spaces. The attestation is available in English and Spanish. As noted above, the visitor vaccine requirement is not applicable to research participants.; [6] If you have COVID-19 symptoms or test positive for COVID-19, you must stay home and isolate as directed by your provider or contact tracing outreach. If you test positive, irrespective of location of the testing, please notify covid19trace@columbia.edu.; [7] Close contacts who are fully vaccinated do not have to quarantine and can continue to work in-person, but should test between 5-7 days of exposure/notification.; [8] The Research Ramp-up Ambassadors continue to be a resource for individuals with concerns about on-campus research activities. If you have questions, please feel free to send them to COVID19_research@columbia.edu; As always, we thank you for your continued care and commitment to safety and to our research enterprise, and we look forward to a productive 2022.; Sincerely, Jeannette M. Wing; Executive Vice President for Research, Professor of Computer Science, and Chair, Research Working Group*; *The Research Working Group advises the President’s Task Force on COVID-19 and the Council of Deans and includes: Rui Costa, Director and Chief Executive Officer, The Mortimer B. Zuckerman Mind Brain Behavior Institute, Professor of Neuroscience; Garud Iyengar, Vice Dean of Research, The Fu Foundation School of Engineering and Applied Science, Tang Family Professor of Industrial Engineering and Operations Research; Arthur Lerner-Lam, Senior Advisor to the Co-Deans, Columbia Climate School, Lamont Research Professor; Robert Mawhinney, Dean of Science, Faculty of Arts and Sciences, Professor of Physics; Gerald Rosberg, Senior Executive Vice President; Naomi Schrag, Vice President for Research Compliance, Training and Policy; Michael Shelanski, Senior Vice Dean for Research, Vagelos College of Physicians and Surgeons, Henry Taub Professor of Alzheimer’s Disease and the Aging Brain

Additional Information: Dear fellow members of the Columbia community, We are writing to provide updates on our December messages regarding Columbia University COVID-19 policies and procedures. We are carefully monitoring the COVID-19 pandemic status in the New York City metro area and among our affiliates. While Columbia is doing its own asymptomatic testing on campus, we also urge you to report any outside positive test results you do receive to covidtesttrace@columbia.edu so that we have an accurate picture of COVID-19 positive cases amongst our affiliates and can provide you with information on available resources. As you are aware, the Omicron variant has been shown to be more transmissible than prior virus variants. However, there are reassuring data suggesting that this variant causes less severe illness and that our vaccines, and particularly once boosted, also protect against symptomatic and severe COVID-19. We have three important updates to share with you; Changes in isolation and quarantine guidelines: New York State, acting on guidance from the CDC, has modified isolation and quarantine as follows; Isolation: All individuals who test positive for COVID-19 can end their isolation after 5 days if they are asymptomatic. Day 0 is considered the first day of symptom onset and/or the day of a positive test result.; Quarantine: Individuals who are fully vaccinated and have received booster dose do not need to quarantine. Such individuals are recommended to get tested on day 5-7 after last exposure.; Individuals who are not vaccinated or not fully vaccinated or are eligible for a booster but have not yet received one should quarantine for 5 days – where day 0 is the last day of exposure – provided symptoms do not appear. Such individuals are recommended to get tested on day 5-7.; Full details can be found on the New York State Department of Health website.; Changes in gathering/events and dining policies: In addition to the policies that were announced on December 20 and December 22, Columbia-related non-academic gatherings on and off campus are prohibited until the end of January.; In all dining halls, only grab-and-go food will be available for the first week of the undergraduate return beginning January 18th.; All affiliates are strongly urged to avoid indoor social gatherings wherever they are located, unless aware of vaccination and testing status of all attendees. Masking in these locations is also strongly recommended as well as in crowded outdoor social gatherings.; Masking indoors at Columbia will continue through March 31, and we urge wearing of masks indoors in all public settings as well as in crowded settings when outdoors.; Columbia athletic events will permit no fans for the first two weeks of January.; Uploading vaccine and booster information: Next week, we will provide you with the links to be able to upload your booster information. New hires seeking to upload any vaccine (not booster) information may do so on our ReopenCU website.; Students can currently upload their vaccine and booster information. For CUIMC students go here. For all other students, go here.; Sincerely,

**Additional Information:** The purpose of the FIRST Cohort is to transform culture at NIH-funded extramural institutions by building a self-reinforcing community of scientists committed to diversity and inclusive excellence (defined below). Implementing and sustaining cultures of inclusive excellence within the program has the potential to be transformational for biomedical research at the awardee institutions and beyond. This community will be built through recruitment of a diverse group of individuals who are competitive for an advertised research tenure-track or equivalent faculty position (positions must be at the Assistant Professor (or equivalent) level, meet the criteria for NIH-defined Early Stage Investigators, and have demonstrated a strong commitment to promoting diversity and inclusive excellence.

NIDDK Encourages Research on Sex/Gender Differences, Sexual and Gender Minority-Related Research and Race/Ethnic Diversity

**Sponsor:** National Institute of Diabetes and Digestive and Kidney Diseases  
**Deadline(s):** 01/25/2022 (Release Date)  
**Contact:** Christine Maric-Bilkan, Ph.D.; National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK); Telephone: 301-435-0486; Email: christine.maric-bilkan@nih.gov  

**Additional Information:** Many different factors—biological, social, and environmental—affect human health. It is also increasingly recognized that interactions between these factors play a significant role in prevention, pathophysiology, and management of human disease. Sex/gender differences, being a member of a sexual and/or gender minority group, and race/ethnicity are among those factors with a significant impact on human health and disease. However, consideration of these factors in research projects remains limited.

Deadline(s): NA, re upcoming K Award Deadlines
Hello, all. With the standard due date coming up for NIH Research Career Development awards (K-awards), due Monday, February 14th (moved from the 12th since that falls on a weekend), our office has received a lot of questions about the requirements for Other Support forms for mentors and co-mentors, given the new NIH Other Support requirements that took effect January 25, 2022. The instructions for Current & Pending Support (which is what it is called for mentors in K-awards, as opposed to Other Support) remain unchanged, with the exception of the change from ‘annual direct costs’ to ‘total costs’, and the addition of the electronic signature. There is still a 3-page limit for each mentor, and it is limited to the mentor’s/co-mentor’s current and pending research support relevant to the candidate’s research plan. In other words, the mentor includes selected projects and in-kind contributions in their Current & Pending Support that are relevant to the candidate’s research plan. In addition, “percent effort/person months” and “overlap” should not be included. See page 61 of the new FORMS-G instructions for K-awards, which outlines what should be included in Current & Pending Support; The new Other Support format pages should be used to create Current & Pending Support in K-award applications. Do not reuse and recycle old Other Support forms.; We recommend the use of DocuSign to meet NIH’s electronic signature requirement. User guides and training videos on the use of DocuSign are on our website here. NIH will request full Other Support forms, to include all resources made available to a researcher in support of and/or related to all of their research endeavors, during just-in-time (JIT), upon request.; Should you have any questions, please reach out to your SPA Project Officer.; *Important* Are you ready for the new NIH Biosketch and Other Support requirements, effective January 25, 2022? Please click the “Columbia University Login” button to view instructions and begin your application.; **What:** The Schmidt Science Fellows program supports postdoctoral fellows who are interested in broadening their horizons, pivoting away from their PhD research area (see **Important** below) and pursuing a challenging and rewarding period of study in an alternative discipline. Schmidt Science Fellows are encouraged and supported to take an ambitious scientific risk when considering their postdoctoral placement. Their proposed research pivot should represent a genuine and innovative disciplinary departure from their PhD studies, with a clear goal towards gaining new skills in a new area and establishing field-leading interdisciplinary lines of research with potential for high reward and societal impact.; **Important:** Applicants **must** be planning to pursue postdoctoral training in a discipline outside that of their PhD. Applicants should consider the following: Schmidt requires a flexible approach towards postdoc placements.; It is possible to have already begun a postdoctoral position, but candidates will be expected to consider at least three options.; All placements are subject to discussion and mentorship with the Schmidt Academic Council, and approval by program leadership.; Candidates should not assume that any pre-existing position will be automatically approved, or automatically denied, but will be subject to the same review and approval process as any new position.; Applicants are required to outline their future research plans, and

Additional Information: Announcing 2022 Pew-Stewart Scholars for Cancer Research; We are pleased to announce the launch of 2022 Pew-Stewart Scholars for Cancer Research. Click on the link below to view more information. Thank you!; Internal Submission Deadline: Friday, April 22, 2022; Funding Organization’s Deadline: Wednesday, May 18, 2022; Cycle: 2022; Discipline/Subject Area: cancer research; Funding Available: 300000; Description: Pew-Stewart Scholars for Cancer Research; The Pew-Stewart Scholars for Cancer Research supports assistant professors of outstanding promise in science relevant to the advancement of a cure for cancer. The award provides $300,000 in flexible support—$75,000 per year for a four-year period. For the 2023 award, one nomination will be invited from each of the participating institutions listed at the bottom of this page.; Applications are invited from nominees conducting cancer research that is innovative, cutting-edge cancer research that may accelerate and advance progress toward a cure for cancer.; Eligibility for the 2023 Award; Candidates must meet all of the following eligibility requirements: Hold a doctorate in biomedical sciences, medicine, or a related field.; As of Sept. 1, 2022, hold a full-time appointment at the rank of assistant professor. (Appointments such as research assistant professor, adjunct assistant professor, assistant professor research track, visiting professor, or instructor are not eligible.). Must not have been appointed as an assistant professor at any institution prior to June 13, 2018, whether or not such an appointment was on a tenure track. Time spent in clinical internships, residencies, in work toward board certification, or on parental leave does not count as part of this four-year limit. Candidates who need an exception on the four-year limit should contact Pew’s program office to ensure that application reviewers are aware an exception has been given.; Please note that the eligibility criteria above have been temporarily expanded to account for COVID-related lab shutdowns. Please direct any questions to the program office at Pew-Stewart@pewtrusts.org.; May apply to the program a maximum of two times. All applicants must be nominated by their institution and must complete the 2023 online application.; If applicants have appointments at more than one eligible nominating institution or affiliate, they may not reapply in a subsequent year from a different nominating entity.; May not be
nominated for the Pew Scholars Program and the Pew-Stewart Scholars Program for Cancer Research in the same year.; Based on their performance during their education and training, candidates should demonstrate outstanding promise as contributors in science relevant to the field of cancer. This program does not fund clinical trials research. Strong proposals will incorporate particularly creative and pioneering approaches to basic, translational, and applied cancer research. Candidates whose work is based on biomedical principles but who bring in concepts and theories from more diverse fields are encouraged to apply.; Ideas with the potential to produce an unusually high impact are encouraged. Selection of the successful candidates will be based on a detailed description of the work that the applicant proposes to undertake, evaluations of the candidate’s performance, and notable past accomplishments, including honors, awards, and publications. In evaluating the candidates, the National Advisory Committee gives considerable weight to both the project proposal and the researcher, including evidence that the candidate is a successful independent investigator and has the skill set needed to carry out their high-impact proposal; Funding from the NIH, other government sources, and project grants from nonprofit associations do not pose a conflict with the Pew-Stewart program. If you have questions concerning eligibility, please contact Jennifer Villa, officer, Pew Biomedical Programs at 215-575-4851 in advance of applying.; Funding terms; An award of $75,000 per year for four years will be provided to the sponsoring institution for use by the Pew-Stewart scholar, subject to annual review of his or her progress. Grant agreements will be issued in August of the award year. The awarded funds may be used at the discretion of the Pew-Stewart scholar, for personnel, equipment, supplies, or travel directly related to the Pew-Stewart scholar’s research and as to best advance his or her research and career.; The amount of the award that may be used for the principal investigator’s salary is limited to $12,500 per year (including benefits) or $50,000 over the duration of the grant. There are no limits on student or postdoctoral salaries.; Not more than 8 percent ($24,000) of the total award value may be allocated for facilities and administration (F&A) charges or indirect costs (IDCs).; Should the funds not be immediately required, they may be accumulated and carried over through the four years of the grant period and, with written approval of the program office, the grant may receive a no-cost extension for one additional (fifth) year (without additional funds).; Subawards are allowed.; Check the Program Details here for more information on investigator effort, annual meeting attendance, and annual reports required by the awardee.; HOW TO APPLY FOR THE INTERNAL COMPETITION FOR THE NOMINATION; HICCC will complete a limited submission competition in order to identify and select one nominee. We Will submit the name and contact information of the nominee to the Pew Foundation by the nomination deadline of May 18, 2022.; Application Requirements; Applicants must provide the following information in their application: Summary (1-page) of the proposed outlining the proposed research, specific aims and objectives, innovation and significance; References cited in the summary (not counted toward the page limit); NIH Biosketch; Letter of Support (1-page) from your department or division chair; List of Current and Pending Grants; Application Review; Applications will be evaluated during peer review based on the following criteria: Scientific merit of the grant application; Strength of the candidate: likelihood that the project will attract external funding; Overall enthusiasm of the application; Strength of letter of support; Key dates: Early April: Institutional invitation distributed and nomination solicited; Wednesday, May 18: Institutional nomination due Monday, June 13: Pew-Stewart Scholars application portal opens; Thursday, September 1: Pew-Stewart Scholars application due

The goal is to foster a dynamic workforce equipped to use novel approaches to address the intersection of HIV and substance use, prevention, treatment, and cure, including a special emphasis on underrepresented racial and ethnic groups. See, Notice of NIH's Interest in Diversity. In addition, three specific areas of training have been identified for emphasis: Strong applications will include a team of mentors in 1 or more of the research areas listed below:

**Data Science:** The goal is to prepare trainees to apply data science strategies including computational modeling, machine learning, analysis of large data sets, and artificial intelligence to substance use questions.

**Translational Science:** The goal is to move from discovery science to the development of medications and devices (including regulatory science).

**Human Immunodeficiency Virus (HIV) and Drug Use/Addiction:** The goal is to foster a dynamic workforce equipped to use novel approaches to address the intersection of HIV and substance use, prevention, treatment, and cure, including a special emphasis on addressing health inequities.

**Contact:** Questions regarding adjustments applied to individual grant awards may be directed to the Grants Management Specialist identified in the Notice of Award.

**Additional Information:** The Department of Health and Human Services (HHS), including National Institutes of Health (NIH), operates under the Further Extending Government Funding Act (Public Law 117-70) signed by President Biden on December 3, 2021. This Act (CR) continues government operations through February 18, 2022 at the FY 2021 enacted level, with no reduction. Continuing the procedures identified under NOT-OD-21-058 and consistent with NIH practices during the CRs of FYs 2006 - 2021, NIH Institutes and/or Centers may, at their discretion, issue non-competing research grant awards at a level below that indicated on the most recent Notice of Award. Upward adjustments to awarded levels will be considered after FY 2022 appropriations are enacted, but NIH expects institutions to monitor their expenditures carefully during this period. All legislative mandates that were in effect in FY 2021 (see NOT-OD-21-056) remain in effect under this CR, as well as the salary
limitation set at Executive Level II of the Federal Pay Scale (see NOT-OD-21-057) and the Ruth L. Kirschstein National Research Service Award predoctoral and postdoctoral stipend levels and tuition/fees as described in NOT-OD-21-049.

Policy and Regulation on ClinicalTrials.gov Registration and Reporting | grants.nih.gov

Additional Information: Last week, the NIH implemented new system validations for Research Performance Progress Reports (RPPR) for clinical trial registration and results reporting. RPPRs that have associated clinical trials that are non-compliant with these requirements will receive errors preventing submission of the RPPR. See NOT-OD-22-008 for more details. As a reminder, failure to register or report results data for an Applicable Clinical Trial (ACT) as per FDAAA 801 and the Final Rule or the NIH Policy on the Dissemination of NIH-Funded Clinical Trial Information can result in immediate suspension or termination of funding, monetary civil penalties of up to $10,000 per day of non-compliance, criminal or civil prosecution, and/or a permanent notice of non-compliance publicly posted on the ClinicalTrials.gov record for a study. Of note, the FDA issued its first Notice of Noncompliance to an individual investigator conducting a trial sponsored by an academic institution. The Principal Investigator (PI) failed to submit required results data to ClinicalTrials.gov. As a result of this noncompliance, the ClinicalTrials.gov record for the study will be permanently marked with and searchable by the "FDAAA 801 Violations" field, even though results were posted a day after the Notice was issued. The requirements for registration and results reporting are as follows: Applicable studies must be registered no later than 21 days after enrollment of the 1st participant (i.e., date of when the 1st participant signs a study consent form); Results information for applicable studies must be submitted to ClinicalTrials.gov no later than one year after primary completion date (with limited exceptions) for the primary outcome measure, and one year after the study completion date for all other outcome measures, including safety data; If you require assistance with ClinicalTrials.gov registration or results reporting, please contact the University’s system administrators at ClinicalTrialsGov@cumc.columbia.edu. **Additional Information:** Many medical schools across the US have initiated anti-racism efforts in the wake of the murder of George Floyd in the summer of 2020. These efforts mirror broader civic discourse on racism in US society, seen by some as overdue but positive, and by others with skepticism, especially those in Black or other minoritized communities. Will these medical school efforts fundamentally change the nature of medical training and medicine itself? The answer lies in the degree to which so-called anti-racism initiatives authentically address deep-seated barriers that have thwarted all such efforts in the past, and that loom larger as the prospect for fundamental change increases. Dr. Clarence Braddock will discuss five substantial barriers that threaten anti-racism goals in medical education. Following his talk, Dr. Braddock will join a conversation with Dr. Monica Lypson moderated by Dr. Sandra Soo-Jin Lee.

**Additional Information:** By Mike Lauer; When the public health emergency was first declared, NIH, working with OMB and HHS, quickly identified a long list of flexibilities to support the research community. The list has evolved since the pandemic began, so we would like to take this opportunity to remind the community of many of the current flexibilities we have in place.

Additional Information: By Mike Lauer: There has been a lot of focus on early stage investigator (ESI) extension requests in the community recently. And we certainly understand why. The experience of the COVID-19 public health emergency has brought into sharp focus that the effects of the pandemic on careers and life in general may continue for years to come. This fact has led us to revisit our approach to granting ESI extension requests.

[brought to our attention by Stephanie Scott]  
NIH Extramural Nexus – 2021; Posted: Wednesday, February 9, 2022 by Marie A. Bernard;  
Subject: New NIH Administrative Supplements Available to Support Diversity Mentorship  
Marie A. Bernard, M.D., NIH Chief Officer for Scientific Workforce Diversity;  
I am pleased to announce the availability of a new NIH administrative supplement that recognizes the crucial role outstanding mentors play in fostering future leaders in the biomedical research enterprise.;  
Qualified investigators can now submit proposals in response to the Chief Officer for Scientific Workforce Diversity (COSWD)-led xxx, Notice of Special Interest (NOSI) NOT-OD-22-057: Administrative Supplements to Recognize Excellence in Diversity, Equity, Inclusion, and Accessibility (DEIA) Mentorship. **Proposals are due by April 7, 2022.**;  
Mentorship is a critical part of recruiting and retaining an inclusive scientific workforce. Evidence suggests that mentorship helps foster scientific identity and career progression in science, technology, engineering, mathematics, and medicine (STEMM) disciplines. For example, research shows that grant-writing mentorship for early-career biomedical investigators from underrepresented groups can foster increased publication productivity, a key contributor to scientific career advancement.;  
Based on this evidence, one goal of my office is to support and amplify the impact of programs that develop scientific talent through training and mentorship. Thus, this new NOSI is part of our commitment to enhancing mentorship within NIH-supported research, with an emphasis on scientists from underrepresented groups.;  
The participating NIH Institutes and Centers will supplement the existing awards of scientists who have demonstrated a commitment to exceptional training and mentorship, especially to individuals from groups identified as underrepresented in the biomedical sciences.;  
Supplements are available for various grant types, including career development, training, cooperative, and Research Project Grants (R01). They will provide up to $250,000 in **direct costs**, not to exceed the direct costs of the parent award. Investigators may use the funds to perform additional research within the parent grant’s scope, develop curricula or training activities to strengthen mentor training, or help foster the research career development of additional students, post-doctorates, or other trainees.;  
The NIH has an array of mentorship initiatives and resources, and I am excited about this addition to the agency’s offerings. I encourage all eligible investigators to take advantage of this opportunity to be recognized for outstanding mentoring, and for promoting inclusive excellence.

[NTW] [NIH ANNOUNCEMENTS/COVID-19]

Clarification and Guidance for Applicants Preparing Applications for the Fall 2021 Due Dates During the COVID-19 Pandemic

**Sponsor:** Office of the Director, NIH
Deadline(s): 08/25/2021 (Release Date)
Contact: NIH Review Policy Officer; ReviewPolicyOfficer@mail.nih.gov

Additional Information: Last week, NIH issued announcement NOT-OD-21-180, which provides additional guidance related to COVID-19 for applicants preparing applications for the May 2022 Council round, beginning with the September 25, 2021 due date for Spring 2022 initial peer review meetings. Please see text of the announcement below, especially highlighted section.

Purpose: The NIH remains firmly committed to supporting the biomedical research enterprise as the nation implements the President's Guidelines for Re-Opening America Again. The purpose of this Notice is to clarify the guidance provided earlier NOT-OD-21-026, for applicants preparing applications for the May 2022 Council round, beginning with the September 25, 2021 due date for Spring 2022 initial peer review meetings. Reviewers will continue to receive instructions to assume that constraints arising from the COVID-19 pandemic (e.g., lab occupancy restrictions, declines in patient accrual, etc.) will be resolved during the project period and thus should not affect their scores. Therefore, NIH grant applications should NOT include contingency or recovery plans for problems resulting from the COVID-19 pandemic. However, applicants may address effects due to the pandemic on productivity or other scoreable issues in their Personal Statement in the NIH Biosketch. Reviewers will be instructed to take these pandemic-related circumstances into account when assessing applicants’ productivity and other score-driving factors. As with previous instructions, if needed, NIH staff will request and assess plans to resolve specific problems arising from the COVID-19 pandemic prior to funding.

Additional Information: NIH-Wide Strategic Plan for FY 2021-2025 Now Available; We are pleased to announce that the NIH-Wide Strategic Plan for Fiscal Years (FYs) 2021-2025 is now available. This updated plan articulates NIH's highest priorities over the next 5 years, outlining our vision for the future direction, capacity, and stewardship of biomedical and behavioral research.; The plan is organized around a framework of three key objectives: [1] Advancing Biomedical and Behavioral Sciences; [2] Developing, Maintaining, and Renewing Scientific Research Capacity; [3] Exemplifying and Promoting the Highest Level of Scientific Integrity, Public Accountability, and Social Responsibility in the Conduct of Science.; The plan weaves five cross-cutting themes across these objectives, centered around minority health and health disparities, women's health, public health challenges across the lifespan, collaborative science, and data science. The plan also mentions several achievements made during the previous FY 2016-2020 plan, but please recognize that this plan is not meant to describe everything NIH does.; As Dr. Francis Collins, the NIH Director, notes in the opening statement, "NIH will [invest] efficiently and effectively in a wide range of basic, translational, clinical, and applied research, while at the same time supporting the workforce and infrastructure required for a sustainable research enterprise. As outlined in this Strategic Plan, this approach will enable NIH to build a solid foundation of fundamental knowledge about living systems that will serve to accelerate research aimed at addressing our most pressing health needs."; We appreciate members from the research community, professional societies, advocacy groups, and the public who worked with us and provided feedback throughout the process to develop this plan.

Additional Information: NSF announced today a number of system enhancements for proposals submitted in Research.gov and FastLane, and upcoming revisions to the NSF-approved Biographical Sketch and Current and Pending Support format pages. In addition, NSF announced significant improvements to the NSF Funding Opportunity Search functionality with enhanced features to help you identify opportunities quickly and easily.; Please see below for the details. I highlighted in yellow a few key points. We’ll be sure to provide more information about these changes soon, and as always, please feel free to ask questions to your SPA Project Officer.; [brought to our attention by] Stephanie F. Scott, MS, CRA; Director of Policy and Research Development; Columbia | Research; Sponsored Projects Administration; sfs2110@cumc.columbia.edu ; Website: https://spa.columbia.edu/; New Proposal Functionality, NSF Website Enhancements, and Updates to the Biographical Sketch and Current and Pending Support Formats; Dear Colleagues: The National Science Foundation (NSF) has enabled a number of enhancements for proposals submitted in Research.gov, FastLane, and Grants.gov. In addition, the updated NSF-approved biographical sketch and current and pending support SciENcv and fillable PDF formats that fall under the revised Proposal & Award Policies & Procedures Guide (PAPPG) NSF 22-1 will be available to preview by September 17, 2021.; We are also excited to announce enhanced NSF Funding Opportunity Search functionality and revamped program pages on nsf.gov and beta.nsf.gov, the new version of the NSF website. As NSF builds its new nsf.gov website in small, iterative pieces using the https://beta.nsf.gov/ platform, we are not simply moving existing content from nsf.gov to the new site. Rather, the new website will improve how information is presented for use by various audiences including prospective proposers, grantees, and the general public.; Here’s what to know.; Research.gov Proposal Submission System Enhancements; Research.gov proposal features continue to expand to support the transition of all proposal preparation and submission functionality from FastLane to Research.gov by a target date of December 31, 2022. Many NSF funding opportunities are supported in Research.gov and clearly specify whether submission via Research.gov is available or required.; Effective August 30, 2021, Conference and Ideas Lab proposal types, renewal and accomplishment-based renewal submission types, and preliminary proposals for Ideas Lab solicitations are all now available for submission in Research.gov. FastLane must be used to submit preliminary proposals for proposal types other than Ideas Lab until that functionality is available in Research.gov.; The proposal preparation landing page has been revised, and Principal Investigators will now first select the proposal submission type from the drop-down options and then will follow the proposal setup wizard to initiate a new proposal. In progress and submitted proposals are accessible from the tiles on the revised proposal preparation landing page, after first selecting the submission type from the drop-down options.; New automated compliance checks and associated error and warning messages for the enabled proposal and submission types were also implemented. Error messages will prohibit proposal submission to NSF, whereas warning messages still permit proposal submission.; New Frequently Asked Questions (FAQs) were added to the Research.gov About Proposal Preparation and Submission page, and the Proposal Submission Capabilities page has been updated to reflect the latest development updates.; All supported proposal and submission types as well as associated compliance checks are also enabled in the Research.gov Proposal Preparation Demo Site.; Refer to the PAPPG NSF 20-1 for current proposal requirements. Guidelines in the revised PAPPG NSF 22-1 will apply for proposals submitted or due on or after October 4, 2021.; NSF-approved Biographical Sketch and Current and Pending Support Format Updates; Current and Pending Support Fillable PDF Updates; Based on feedback from the research community and NSF Program Officers, NSF has incorporated functionality as of August 30, 2021, in FastLane and Grants.gov to remove any pages which do not contain data entered by users (i.e., blank pages) from the NSF-approved current and pending support fillable PDF. This trimming functionality will be integrated in Research.gov on October 4, 2021, in coordination with implementation of the revised PAPPG NSF 22-1 for proposals submitted in Research.gov and project reports submitted in the Research.gov Project Reporting
The trimming service only applies to the NSF-approved current and pending support fillable PDF and not to any other uploaded PDFs. Current and pending support PDFs generated in SciENcv do not include blank pages.; The current and pending support fillable PDF document is paginated, and the PDF page numbers will not be updated during the trimming process. This means that it is possible for the trimmed PDF to have skipped page numbers corresponding to the blank pages removed from the fillable PDF. NSF Program Officers are aware of this potential occurrence in proposals submitted to NSF.; Proposers with in progress proposals as of August 30, 2021, can delete previously uploaded current and pending support fillable PDFs from their FastLane or Grants.gov proposals and then re-upload them to trigger the trimming service.; Updated Biographical Sketch and Current and Pending Support SciENcv and Fillable PDF Formats; The updated NSF-approved biographical sketch and current and pending support formats will be available in September 2021 to preview before they are required on October 4; The updated fillable PDF formats will be available for download from the NSF biographical sketch and current and pending support websites by September 3rd. Updated SciENcv formats will be available on the SciENcv Create a New Document screen by September 17th.; Biographical sketch format updates include increasing the page limit from two to three pages; Current and pending support format updates include the addition of new sections for information on objectives and overlap with other projects to help NSF and reviewers assess overlap/duplication.; Although submission of the updated NSF-approved formats is not permitted (i.e., Research.gov, FastLane, and Grants.gov will not allow the 22-1 forms to be uploaded) until implementation of the revised PAPPG NSF 22-1 on October 4, 2021, NSF is encouraging proposers and grantees to begin familiarizing themselves with the updated NSF-approved formats when they are available.; Enhanced Funding Opportunity Search Functionality and Revamped Program Pages; Based on extensive research with external and internal stakeholders, NSF has made significant improvements to the NSF Funding Opportunity Search functionality to help researchers and prospective researchers quickly and easily find relevant programs and NSF-funded projects in specified disciplines. Funding Search results now include short program descriptions, programs incorporated in core program solicitations with links to the relevant guidelines, and Dear Colleague Letters.; The revamped program pages include significant content and navigation improvements including information previously only viewable in solicitations.; For more information about NSF’s beta site, please visit https://beta.nsf.gov/about-beta. NSF will continue to enhance the site, and ongoing feedback from external and internal stakeholders is vital to the process. Feedback on the updated Funding Search and program page enhancements or any other aspect of the site may be directed to beta-nsf-feedback@nsf.gov.; Questions? If you have IT system-related questions, please contact the NSF Help Desk at 1-800-381-1532 (7:00 AM - 9:00 PM ET; Monday - Friday except federal holidays) or to rgov@nsf.gov. Policy-related questions should be directed to policy@nsf.gov.; Regards, National Science Foundation

**Additional Information**: Please see announcement from NSF below regarding important Research.gov enhancements, as well as NSF Public Access Repository (NSF-PAR) enhancements that took effect today. As a reminder, FastLane will no longer be an option for proposal preparation and submission beginning January 2023.; Questions concerning NSF policies should be directed
Dear Colleague:

We are excited to share the latest Research.gov proposal preparation functionality updates, together with information about NSF Public Access Repository (NSF-PAR) enhancements. Beginning in January 2023, all new proposals must be prepared and submitted in Research.gov or Grants.gov. FastLane will no longer be a preparation and submission option. The National Science Foundation strongly urges proposers to prepare and submit all eligible proposals in Research.gov now, to support a smooth transition from FastLane proposal preparation and submission to Research.gov in January 2023.

New Research.gov Proposal Preparation Functionality Available May 2nd; New Postdoctoral Fellowship Proposal Type; The Postdoctoral Fellowship proposal type is available in Research.gov for proposals submitted in response to postdoctoral fellowship solicitations that do not contain reference letter requirements. The postdoctoral fellowship solicitations will be updated to include information about proposal preparation and submission in Research.gov.

· To initiate a postdoctoral fellowship proposal in Research.gov, the proposer must first have the Postdoctoral Scholar/Principal Investigator (PI) role, which is different from the PI role.;
· Refer to the Postdoctoral Fellowship Proposals Frequently Asked Questions (FAQs) on the Research.gov About Proposal Preparation and Submission page for instructions to add the Postdoctoral Scholar/PI role. Additional guidance is available in the Add a New Role – Postdoctoral Fellowship Principal Investigator section of the Account Management Guide on the Research.gov About Account Management page.;
· Postdoctoral fellowship program solicitations will only display in Research.gov and be available for selection for proposers preparing a proposal as a Postdoctoral Scholar/PI.;
· New Research.gov Proposal Features; Expanded Where to Apply Options: Proposers now have the ability to choose additional Directorate/Division/Program options (i.e., secondary units of consideration) to direct proposals to NSF. Refer to the Managing Where to Apply topic FAQs on the Research.gov About Proposal Preparation and Submission page for additional information.;
· Project Data Form: The Project Data Form is now available in Research.gov and must be included in proposals for selected funding opportunities in the Directorate for Education and Human Resources (EHR)/Division of Undergraduate Education (DUE). See the Project Data Form topic FAQs on the Research.gov About Proposal Preparation and Submission page for details.;
· Separate Uploads of Multiple Supplementary Documents: Proposers can now upload multiple PDF documents in the Other Supplementary Documents proposal section and will no longer need to combine documents into a single PDF prior to uploading.;
· NSF Public Access Repository (NSF-PAR) Enhancements Effective May 2nd; PIs and co-PIs can now remove research datasets from NSF-PAR without assistance from the NSF Help Desk by disassociating the NSF award(s) from the dataset. Disassociating all NSF awards from a dataset removes the dataset from the NSF-PAR publicly facing search.; Deposit of dataset information in NSF-PAR remains optional, and there are no changes at this time to NSF’s Public Access policy or project reporting requirements.; Training resources are available on the Research.gov About Public Access page. Information about the NSF Public Access Initiative including FAQs is available on the NSF Public Access Initiative page. Feedback about the PAR 2.0 pilot may be submitted to publicaccess@nsf.gov.; For information about Research.gov proposal functionality planned for release in the coming months, please see the Proposal Submission Capabilities on the Research.gov About Proposal Preparation and Submission page. All enabled proposal and submission types are also available to try out on the Research.gov Proposal Preparation Demo Site (you will be prompted to sign in to Research.gov if you are not already signed in). Demo site FAQs can be found on the Research.gov About Proposal Preparation and Submission page left navigation menu.; Questions? If you have IT system-related questions regarding the new functionality and enhancements, please contact the NSF Help Desk at 1-800-381-1532 (7:00 AM - 9:00 PM ET; Monday - Friday except federal holidays) or via email to rgov@nsf.gov. Policy-related questions should be directed to policy@nsf.gov.; Regards, National Science Foundation.

Additional Information: Please see this important announcement from NSF regarding the required use of Research.gov, and the decommission of FastLane. Policy-related questions should always be directed to your SPA Project Officer. [brought to our attention by Stephanie Scott]; NSF sent the announcement below reminding the research community that FastLane will be decommissioned at the end of this calendar year. NSF currently requires the use of Research.gov for many program solicitations. See Program Descriptions that Require Proposal Preparation and Submission in Research.gov or Grants.gov, a document that identifies program descriptions requiring Research.gov preparation and submission and the associated effective date. This document will be updated on an ongoing basis.; Please see NSF's full announcement below, which contains training resources to assist you. For questions, please contact your SPA Project Officer.; [brought to our attention by Stephanie Scott]; Required Use of Research.gov for Preparation and Submission of Proposals in Response to Program Descriptions; System Update; Dear Colleague: In accordance with Important Notice No. 147, many National Science Foundation (NSF) program solicitations now require the use of Research.gov for the preparation and submission of proposals. Please be advised that NSF will now start requiring the use of Research.gov for the preparation and submission of proposals in response to program descriptions. As a reminder, FastLane is targeted to be removed as a submission option from all funding opportunities by December 31, 2022. Grants.gov will remain a submission option for most NSF proposals.; To assist the research community, NSF developed a dynamic listing of program descriptions that require submission in Research.gov. Follow these steps to determine if your proposal for a specific program description must be prepared and submitted in Research.gov: Access the relevant NSF.gov program description page (e.g., Magnetospheric Physics, PD 98-5750); View the advisory in the Program Guidelines section on the right side of the program description page and click on the link in the advisory: Alert: Many NSF programs are only accepting proposals in Research.gov or Grants.gov. FastLane may no longer be a submission option. For more information, please visit Program Descriptions that Require Proposal Preparation and Submission in Research.gov or Grants.gov.; The document will identify program descriptions requiring Research.gov preparation and submission and the associated effective date. This document will be updated on an ongoing basis as FastLane will be removed from all program descriptions as a proposal preparation and submission option by December 31, 2022.; Since many program solicitations also require submission in Research.gov, proposers should pay close attention to the requirements identified in those specific funding opportunities.;
Transition from FastLane Proposal Preparation; Nearly all FastLane proposal preparation and submission capabilities are now available in Research.gov. For details about the remaining proposal features that will soon be added to Research.gov, please see the Proposal Submission Capabilities table on the Research.gov About Proposal Preparation and Submission page. To stay informed about Research.gov and FastLane changes, we invite you to join our System Updates listserv. Sign up by sending a blank email to: system_updates-subscribe-request@listserv.nsf.gov. NSF strongly encourages proposers to prepare and submit all supported proposals in Research.gov now, to facilitate a smooth transition from FastLane proposal preparation to Research.gov over the next several months. In addition, NSF relies on your vital feedback to help ensure the system is working as intended and to identify areas of improvement. **Additional Information:** See NSF update below regarding system updates that were made yesterday in Research.gov and FastLane to align with the latest Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1); We’ll be reviewing some of these changes during next week’s Research Administration Forum, taking place on Wednesday, October 13th at 11am (click link for more information about the Forum); As always, please feel free to reach out to your SPA Project Officer should you have any questions.; [brought to our attention by Stephanie Scott] ; Now Available: New Proposal and Submission Types and System Enhancements to Support the Revised PAPPG (NSF 22-1); Dear Colleague: Effective October 4, 2021, the National Science Foundation (NSF) made a number of system updates for proposals submitted in Research.gov, FastLane, and Grants.gov in accordance with the implementation of the Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1). Please see the list of PAPPG (NSF 22-1) significant changes and clarifications for all of the updates. New proposal and submission types were also enabled in the Research.gov Proposal Submission System.; New Proposal Types in the PAPPG; The PAPPG (NSF 22-1) incorporates two new "Other Types of Proposals": Planning Proposals; Planning proposals must be prepared and submitted in Research.gov.; Refer to PAPPG Chapter II.E.1. for Planning proposal requirements.; Career-Life Balance (CLB) Supplemental Funding Requests; CLB supplemental funding requests must be prepared and submitted in FastLane.; Refer to PAPPG Chapter II.E.8. for CLB supplemental funding request requirements.; Updates to NSF-approved Biographical Sketch and Current and Pending Support Formats; The NSF-approved biographical sketch and current and pending support formats were updated to incorporate revisions in the PAPPG (NSF 22-1) and must be used for proposals submitted or due on or after October 4, 2021.; The current formats are posted on the NSF biographical sketch and current and pending support websites. Updated system-related Frequently Asked Questions (FAQs) are also available: FAQs on using SciENcv and FAQs on using NSF fillable PDF. SciENcv documents created using the previous version (i.e., NSF 20-1) prior to October 4th are automatically converted in SciENcv to the current version after October 4th.; Biographical sketch format updates include increasing the page limit from two to three pages.; Current and pending support format updates include the addition of new sections for information on objectives and overlap with other projects to help NSF and reviewers assess overlap/duplication.; Biographical sketches and current and pending support information also must be uploaded with Change and Planning Proposals must be prepared and submitted in Research.gov.; When notifying NSF that active other support has changed since the award was made, or since the most recent annual report, current and pending support information must be uploaded in annual and final project reports in the Research.gov Project Reporting System.; Research.gov, FastLane, and Grants.gov will generate a compliance error message if a proposer or grantee attempts to upload a prior version of the biographical sketch or current and pending support formats on or after October 4th.; Removal of Blank Pages from the Current and Pending Support Fillable PDF; Research.gov, FastLane, and Grants.gov will remove any pages which do not contain data entered by users (i.e., blank pages) from the NSF-approved current and pending support fillable PDF.; The trimming service is triggered in Research.gov and FastLane during document upload and during proposal submission in Grants.gov.; The trimming service only applies to the NSF-approved current and pending support fillable PDF and not to any other uploaded PDFs. Current and pending support PDFs generated in SciENcv do not include blank pages.; The current and pending support fillable PDF page is paginated, and the PDF page numbers will not be updated during the trimming process. This means that it is possible for the trimmed PDF to have skipped page numbers corresponding to the blank pages removed from the fillable PDF.; Research.gov Proposal Submission System Enhancements; The Grant Opportunities for Academic Liaison with Industry (GOALI) and Planning proposal types and the Letter of Intent submission type are now available for submission in Research.gov.; New automated compliance checks and associated error and warning messages for the enabled proposal and submission types were also implemented. Error messages will prohibit proposal submission to NSF, whereas warning messages still permit proposal submission.; All supported proposal and submission types as well as associated compliance checks are also enabled in the Research.gov Proposal Preparation Demo Site.; New FAQs were added to the Research.gov About Proposal Preparation and Submission page, and the Proposal Submission Capabilities page has been updated to reflect the latest development updates.; Research.gov proposal features continue to expand to support the transition of all proposal preparation and submission functionality from FastLane to Research.gov by a target date of December 31, 2022. Many NSF funding opportunities are supported in Research.gov and clearly specify whether submission via Research.gov is available or required.; Questions? If you have IT system-related questions, please contact the NSF Help Desk at 1-800-381-1532 (7:00 AM - 9:00 PM ET; Monday - Friday

**Additional Information:** NSF recently issued an announcement, **Coming February 2022: Implementation of the New SAM UEI to Replace DUNS in NSF Systems.** In summary, there is a government-wide initiative to phase out Dun & Bradstreet (DUNS) numbers, to be replaced with Unique Entity Identifier (UEI) numbers. These numbers are entity registration numbers required by the federal government in order to receive federal funds. Most electronic proposal submission systems request our DUNS numbers, either upon registering in that system, or on the cover page of a grant application. These systems will now require UEI numbers. Columbia already has UEI numbers for the Morningside and CUIMC campuses. This information can be obtained on our **Institutional Information webpage,**; NSF’s announcement provides an overview of how their proposal systems are transitioning to accommodate the new UEI numbering system. While these changes do not directly impact Columbia because we already have UEI numbers, any proposed subrecipients in NSF grant applications will need to have either DUNS or UEI numbers if they don’t already have them. **Beginning February 28th, subrecipients need to have UEI numbers and be registered in NSF systems, or you will be unable to include them as subawardees in the budget when preparing a proposal.**  

Attached you will find a two-page guidance document to assist you when preparing an NSF proposal containing subrecipients.; The second important item related to this is we have updated our outbound and inbound Subawards Face Pages to include the UEI numbers, with additional minor revisions. Please begin using these forms anytime you propose subrecipients, regardless of sponsor. These updated forms can be found on our Internal Forms webpage, or you can access the following webpages containing the updated forms with more specific instructions about subawards: Subawards - Proposal Preparation (Columbia as Prime Recipient); Inbound Subawards (Columbia as Subrecipient); If you have questions concerning the attached guidance document, you can contact me.; If you have IT system-related questions regarding NSF's transition to the SAM UEI, please contact the NSF Help Desk at 1-800-381-1532 or rgov@nsf.gov.; Questions concerning grants policies and required subaward forms for proposals should be directed to your SPA Project Officer.

Significant changes include: A new section covering requests for reasonable and accessibility accommodations regarding the proposal process or requests for accessibility accommodations to access NSF’s electronic systems, websites and other digital content; A table entitled, NSF Pre-award and Post-award Disclosures Relating to the Biographical Sketch and Current and Pending Support. This table identifies where pre- and post-award current and pending support disclosure information must be provided. Proposers and awardees may begin using this table immediately; Increasing the page limit for the biographical sketch from two to three pages; Updates to the current and pending support section of NSF proposals to require that information on objectives and overlap with other projects is provided to help NSF and reviewers assess overlap/duplication; Adding planning proposals and Career-Life Balance supplemental funding requests as new proposal types; Updates to travel proposals will require that AORs certify that prior to the proposer’s participation in the meeting for which NSF travel support is being requested, the proposer will assure that the meeting organizer has a written policy or code-of-conduct addressing harassment; You are encouraged to review the by-chapter summary of changes provided in the Introduction section of the PAPPG.; NSF plans to conduct a webinar covering these changes. Visit the NSF policy outreach website to sign up for notifications about this and other outreach events.; While this version of the PAPPG becomes effective on October 4, 2021, in the interim, the guidelines contained in the current PAPPG (NSF 20-1) continue to apply.; If you have any questions regarding these changes, please contact the DIAS/Policy Office at policy@nsf.gov.; Regards, Jean Feldman; Head, Policy Office; Division of Institution and Award Support; Office of Budget, Finance & Award Management

Additional Information: May 28, 2021; Statement by NSF Director Sethuraman Panchanathan on the President’s FY22 Budget Request; President Proposes Crucial Investments to Advance the Frontiers of U.S. Science and Technology; The Biden-Harris Administration today submitted to Congress the President’s Budget for fiscal year 2022. As the Administration continues to make progress defeating the pandemic and getting our economy back on track, the Budget makes historic investments that will help the country build back better and lay the foundation for shared growth and prosperity for decades to come; “This request will bolster the U.S. economy and our leadership in critical and emerging areas of research and technological advancements, which are essential to our long-term economic and national security,” said NSF Director Sethuraman Panchanathan. “NSF’s mission is unique in supporting research across all fields of science, technology, engineering, and mathematics, and all levels of STEM education. Seven decades of experience building the necessary partnerships between federal, state, and local government, academia, and industry have produced remarkable results for the country. With this budget, we can rapidly scale our investments and build even stronger bridges between discovery, innovation, and commercialization.”; The Budget includes more details on what is proposed in the two historic plans the President has already put forward — the Americans Jobs Plan and the American Families Plan – and reinvests in education, research, public health, and other foundations of our country’s strength. At the U.S. National...
Science Foundation, the Budget would: **Enhance Fundamental Research and Development.** $9.43 billion, an increase of $1.55 billion above 2021 enacted level will support research across the spectrum of science, engineering and technology. This includes biological sciences; computer and information sciences; engineering; geosciences; math and physical sciences; social, behavioral, and economic sciences; and education. With this additional funding, NSF will continue to be the champion of basic and fundamental research and will strengthen it at speed and scale.; **Strengthen U.S. Leadership in Emerging Technologies.** Includes the establishment of a new directorate for technology, innovation and partnerships within NSF to help translate research into practical applications. The directorate will work with programs across NSF and with other federal and non-federal entities to expedite technology development in emerging areas that are crucial for the United States’ technological leadership.; **Advances Equity in Science and Engineering.** +$100 million, an increase of about 50 percent, in funding for programs that aim to increase participation in science and engineering of individuals from racial and ethnic groups underrepresented in these fields. Funding will support curriculum design, research on successful recruitment and retention methods, development of outreach or mentorship programs, fellowships, and building science and engineering research and education capacity at historically black colleges and universities, and other minority-serving institutions.; **Advances Climate Science and Sustainability Research.** $1.2 billion for climate and clean energy-related research will fund a broad portfolio of research related to climate science and clean energy, including research on atmospheric composition, water and carbon cycles, modeling climate systems, renewable energy technologies, materials sciences, and social, behavioral, and economic research on human responses to climate change.; **Continues Construction of Forefront Research Infrastructure.** Invests in the continued construction of major NSF research facilities, including long-term upgrades of NSF’s major Antarctic infrastructure. It also supports construction of the Vera C. Rubin Observatory to enable astronomy research. In addition, the budget request seeks funding for the construction and procurement of smaller research facilities and equipment across the nation.; Enacting the Budget policies into law this year would strengthen our Nation’s economy and lay the foundation for shared prosperity, while also improving our Nation’s long-term fiscal health.; For more information on the President’s FY22 Budget, please visit: https://www.whitehouse.gov/omb/budget/ ; For more information on the NSF budget, please visit: https://beta.nsf.gov/budget ; -NSF- [brought to our attention by Stephanie Scott / SPA]

**[NTW] [NATIONAL SCIENCE FOUNDATION] NSF Faculty Early Career Development Program (CAREER) Deadline: 07/27/2022 ; FAQ; Contacts **

**Sponsor:** National Science Foundation  
**Deadline(s):** 07/27/2022  
**Contact:** https://www.nsf.gov/crssprgm/career/contacts.jsp  

**Additional Information:** NSF Faculty Early Career Development Program (CAREER); Funding Opportunity; NSF Faculty Early Career Development Program (CAREER); Funding: The CAREER award, including indirect costs, is expected to total a minimum of $400,000 ; for the 5-year duration; **Deadline:** 07/27/22; **Limit:** A Principal Investigator (PI) may submit only one CAREER proposal per annual competition.; In addition, a Principal Investigator may not participate in more than three CAREER competitions.; **Eligibility:** PIs must meet all of the following at the time of submission: Hold a doctoral degree in a field supported by NSF; Be engaged in research in an area of science, engineering, or education supported by NSF; Hold at least a 50% tenure-track (or tenure-track-equivalent) position as an assistant professor (or equivalent title); Be untenured; and Have not previously received a CAREER award.; See Program Solicitation for full details ; https://www.nsf.gov/pubs/2022/nsf22586/nsf22586.htm ;
Important: Proposers are strongly encouraged to communicate with the CAREER contact or cognizant Program Officer in the Division closest to their area of research to discuss the expectations and approaches that are most appropriate for that area; (see https://www.nsf.gov/crssprgm/career/contacts.jsp for a list of CAREER contacts by division). Summary: This program is a Foundation-wide activity that offers the National Science Foundation's most prestigious awards for faculty members beginning their independent careers. The intent of the program is to provide stable support at a sufficient level and duration to enable awardees to develop careers not only as outstanding researchers but also as educators demonstrating commitment to teaching, learning, and dissemination of knowledge. NSF encourages submission of CAREER proposals from eligible early-career faculty at all CAREER-eligible organizations, especially women, members of underrepresented minority groups, and persons with disabilities; All CAREER proposals should describe an integrated path that will lead to a successful career as an outstanding researcher and educator. NSF recognizes that there is no single approach to an integrated research and education plan, but encourages all applicants to think creatively about the reciprocal relationship between the proposed research and education activities and how they may inform each other in their career development as both outstanding researchers and educators.

These plans should reflect the proposer's own disciplinary and educational interests and goals, as well as the needs and context of his or her organization. Because there may be different expectations within different disciplinary fields and/or different organizations, a wide range of research and education activities may be appropriate for the CAREER program. In addition, NSF recognizes that some investigators, given their individual disciplinary and career interests, may wish to pursue an additional activity such as entrepreneurship, industry partnerships, or policy that enhances their research and education plans; FAQ: https://www.nsf.gov/pubs/2020/nsf20025/nsf20025.jsp; Program Solicitation: https://www.nsf.gov/pubs/2022/nsf22586/nsf22586.htm ; NSF Presidential Early Career Awards for Scientists and Engineers (PECASE); The Presidential Early Career Award for Scientists and Engineers (PECASE) is the highest honor bestowed by the United States Government on outstanding scientists and engineers beginning their independent research careers. Selection for this award is based on three important criteria: The criteria are 1) performance of innovative research at the frontiers of science, engineering, and technology that is relevant to the mission of the sponsoring organization or agency, 2) community service demonstrated through scientific leadership, education or community outreach, and 3) commitment to STEM equity, diversity, accessibility, and/or inclusion. These awards foster innovative developments in science and technology, increase awareness of careers in science and engineering, give recognition to the scientific missions of the participating agencies, enhance connections between fundamental research and national goals, and highlight the importance of science and technology for the Nation's future. Please note that individuals cannot apply for a PECASE. Rather, these awards are initiated by participating federal agencies. At NSF, up to twenty-six nominees for this award are selected each year from among recent CAREER awardees deemed most likely to become the leaders of academic research and education for the twenty-first century. The White House Office of Science and Technology Policy (OSTP) makes the final selection and announcement of the awardees. As all NSF PECASE awardees are also CAREER awardees, no additional funds will be allocated when the PECASE is announced.; Research Initiatives; Office of the Executive Vice President for Research; Columbia University in the City of New York; https://research.columbia.edu/content/researchinitiatives; C O L U M B I A | R E S E A R C H

**Additional Information:** This FOA invites basic and/or methodological research projects that seek to illuminate or measure independent and interdependent health-related effects within dyads. For the purpose of this FOA, a dyad is a unit of two individuals whose interactions and influences on one another are nested within larger social contexts and networks. Both animal and human subjects research projects are welcome. Types of projects submitted under this FOA include but are not limited to, observational studies involving humans, or existing/synthesized datasets studies. Researchers proposing basic science experimental studies involving human participants (i.e., experimentally manipulate independent variables) should consider the companion FOA PAR-21-280 “Dyadic Interpersonal Processes and Biopsychosocial Outcomes (R01 Basic Experimental Studies with Humans).”

**Additional Information:** NIH NOSI supports returning biomedical researchers; NIH Office of Research on Women’s Health; NIH NOSI Supports Returning Biomedical Researchers; NIH has announced a new supplements program for researchers returning to biomedical careers after a qualifying absence. Under “Notice of Special Interest (NOSI): Research Supplements to Promote Reentry and Reintegration into Health-Related Research Careers” (NOT-OD-21-134), successful applicants will be able to participate in full- or part-time mentored research experiences through existing NIH research grants. Eligible for these reentry supplements are individuals whose research careers have been interrupted for at least 6 months because of family responsibilities or other qualifying circumstances. The reintegration supplements will enable individuals to find supportive scientific environments after departure from an unsafe or discriminatory environment resulting from unlawful harassment.; Most candidates for the reentry supplements will have a doctoral degree or equivalent; however, some awarding NIH Institutes and Centers may enable
predoctoral students, including those enrolled in dual-degrees, to apply. Postdoctoral and predoctoral students are eligible to apply for reintegration supplements to allow them to transition to a safe, supportive research environment and complete their graduate degrees. (See more information, including detailed eligibility requirements and staff contacts. The first available due date for submissions is August 26, 2021, and the supplements program is set to expire on October 7, 2023.) Additional Information: Join the NARS Data Analysis Innovation Challenge; EPA; Now Open: NARS Data Analysis Innovation Challenge; National Aquatic Resource Surveys; Assessing the Nation’s Waters; EPA is inviting students, scientists and other stakeholders to examine questions using data from the National Aquatic Resource Surveys (NARS) relating to national priorities including climate change, environmental justice, nutrient management, and other water quality challenges.; Water is one of the most precious resources on earth yet its quantity and quality is threatened by numerous factors. EPA's NARS program assesses the quality of the nation's coastal waters, lakes and reservoirs, rivers and streams, and wetlands and provides a point in time assessment of the condition of these resources, identifies key stressors, and track changes over time.; EPA is inviting applicants to assess NARS datasets to address key environmental questions. Each winner or winning team will receive a prize of $5,000. Winners may receive national recognition for their university or organization as well as for the students, scientists, and project activities by being featured on the NARS Data Challenge webpage. Winners may be invited to present at webinars, conferences and/or other events including reaching EPA, state/tribal, and other water quality specialists.; Apply Here; Opens: January 31, 2022; Closes: September 30, 2022; Informational Webinar: February 9, 2022; 3:00 p.m. ET; Learn more about EPA National Aquatic Resource Surveys.

The goal of this NOSI is to not replace or compete with the various COVID-related funding opportunities currently available. Instead, the purpose is to complement them by offering a funding opportunity to address key issues in a most timely manner not currently covered by available COVID-related funding announcements among these populations. Research projects addressing issues that are the focus of currently available or future COVID funding opportunity announcements will be encouraged to submit to those announcements. Also, applicants responding to this NOSI are strongly encouraged to describe plans for the rapid sharing of data and results as well as innovative data analytics approaches. The sharing of COVID-related data and resources and effective communication of results are a high priority of the NIH.; [view NOT-HD-22-002](http://grants.nih.gov/grants/guide/notice-files/NOT-HD-22-002.html)

**Additional Information:** NIH releases NOSI on COVID-19’s impact on underserved and vulnerable populations; View it as a Web page.; NIH NOSI to Support Studies on COVID-19’s Impact on Underserved and Vulnerable Populations; ORWH has announced its
participation in Notice of Special Interest (NOSI): Social, Behavioral, and Economic Impact of COVID-19 in Underserved and Vulnerable Populations (NOT-MH-21-330). The COVID-19 pandemic has demonstrated that prevention and mitigation strategies for the pandemic are uneven—for a range of reasons, including a lack of trust in health systems, economic circumstances, and challenges in sustaining long-term adherence, especially for underserved and vulnerable populations. By increasing our understanding of the multifaceted effects of the COVID-19 pandemic and public health interventions that mitigate risk and promote resilience in high-risk populations, we can improve the long-term response to the pandemic and prepare more effectively for future public health emergencies. To strengthen the understanding and response to social, behavioral, and economic effects of the COVID-19 pandemic, NIH is encouraging the submission of applications that will: Address the roles and effects of interventions, particularly those under the umbrella of digital health, as well as community-engaged and multilevel interventions in health care settings to address access, reach, delivery, engagement, effectiveness, scalability, and sustainability of services that are utilized during and following the pandemic; Encourage the leveraging of existing large-scale data sources with broad population coverage to improve prediction of various mitigation efforts (including vaccinations, masking, and physical distancing) on transmission reduction and on social and economic effects and assess the downstream health and health care access effects, with an emphasis on underserved and vulnerable populations; The first submission date is October 5, 2021, and subsequent receipt dates will extend through September 8, 2024.

Please view these slides and feel free to register for anything applicable to you. I will still be sending separate emails announcing some of these upcoming events.; As always, please feel free to reach out to your SPA Project Officer should you have any questions.; During yesterday's Research Administration Forum, I provided an overview of transitioning to two-factor authentication (2FA) using Login.gov and or InCommon Federated accounts (your Columbia UNI and password) in order to be able to access the NIH eRA Commons and other NIH modules. NIH is requiring everyone to transition to 2FA, but is taking a phased approach.; I recorded this segment of the Forum. You can watch the
video here, and follow along with yesterday's slide deck, see slides 61-76. I cover: Who needs to transition; When you need to transition; The two different options (Login.gov vs InCommon Federated); Essential tips for doing it correctly; Where to go for help; NIH also has their own videos and resources, but I do think listening to me explain it first will assist you in making decisions faster.; NIH Resources: NIH videos on transitioning to Login.gov; Overview of NIH eRA and 2FA; NIH FAQs on both Login.gov and InCommon Federated; If after watching my video and reading NIH's FAQs you feel you are in a unique situation then feel free to contact me.; [brought to our attention by] Stephanie F. Additional Information: HHEAR public data available! The HHEAR Data Center’s public data repository has recently been updated; To benefit the broader research community, the HHEAR Data Center hosts a public data repository that contains both de-identified original study and de-identified harmonized data from all studies accepted into the CHEAR and HHEAR program that have passed the embargo period. The goal of this repository is to promote the secondary analysis of pooled environmental health data by providing data in a manner that is findable, accessible, interoperable and reusable. The repository is searchable by a number of features and users are able to compile and download customized datasets from CHEAR and HHEAR research studies. The repository is updated periodically as studies come off embargo. To access both types of data, go to HHEAR Data Center website; Thank you, The HHEAR Coordinating Center

NIH Request for Information (RFI) on Integrating Environmental Data into the All of Us Research Program

Sponsor: Office of the Director, NIH
**Deadline(s):** 05/31/2022 [Response Date]

**Contact:** AoUEnvironmentalRFI@nih.gov

**Additional Information:** NOT-PM-22-001: NIH Request for Information (RFI) on Integrating Environmental Data into the All of Us Research Program. FYI: This Request for Information NOT-PM-22-001 seeks input on how to best collect and integrate environmental health data into the All of Us Research Program dataset. Please visit the NIH website on how to submit a response. Apologies for cross-posting; Best, Yuxia; **Subject:** RFI Announcement: Integrating environmental exposure data into All of Us; **All of Us** has announced a Request for Information (RFI) on integrating environmental data into the All of Us Research Program, which will be critically important for making discoveries on how the environment influences health and disease. Responses on specific categories of environmental exposure, as well as valid and reliable measures, are sought for consideration in shaping how the environmental data, particularly when paired with other data types, can be most beneficial to researchers. We hope you will take part in the RFI. Also, please share this opportunity with your broader scientific research community. The RFI responses will be accepted through **May 31**, **2022**; **Information Requested:** We are seeking information about innovative ways to collect environmental data from the All of Us cohort; 1. “Environmental exposure” can mean many things to different people. For your own research interests, please use the following broad categories of environmental exposure to describe the most important categories of data for All of Us to collect as part of its core data collection protocol (Section 7); 2. For your own research, what are one or two environmental measures that would be most important for All of Us to collect?; a. Why should this measure be a priority?; b. What research will it enable you to answer, and what impact could this research have on human health?; c. What method/tools/sensors should be used?; d. How often should these data be collected?; e. What is the estimated cost of the collection at scale (500,000–1,000,000 people)?; f. What would be the participant burden of collecting this measure?; g. Are there any relevant ethical, legal, or social considerations for this measure?; h. What evidence is there for the validity and reliability of the measure or method in population-based research settings?; i. Are the measures, tools, or sensors validated and widely available and used by the research community?; j. Is this measure available as an extant data source that can be linked into the All of Us Research Program database? If so, specify the source of the data.

**Additional Information:** VELOCITY Cancer Research Awards; Deadline: May 16; HICCC seeks to support investigators actively involved in cancer research and to encourage others in the biomedical community to enter cancer research. One important aspect of this effort is the funding of Pilot/Feasibility Projects that have direct relevance for cancers with high incidence or mortality in the HICCC catchment area. Up to five Velocity Fellows will be selected to lead teams consisting of one lead Principal Investigator and co-investigators and/or collaborators with complimentary expertise. Interdisciplinary teams are strongly encouraged. At least one population science or community based project will be awarded. Proposals must include a description of the interdisciplinary team. For example, combinations can include basic investigators and clinical investigators who will use their combined expertise to design and implement the research project.; This program is funded through Velocity-Columbia’s Ride to End Cancer. The focus is bi-directional translational research that drives basic, translational, clinical trials, clinical care, and population science generating novel hypothesis-testing research questions. The one year $100,000.00 grant can be used to support personnel and supplies.; We are particularly interested in proposals that: directly relate to the cancer burden in the HICCC catchment area; address cancer health disparities through reduction of risk and mortality in cancers relevant to the HICCC catchment area.; Potential applicants are expected to reach out to the HICCC Community Outreach and Engagement (COE) office in writing the proposal. Catchment area relevant cancers include: prostate/bladder/kidney, liver and bile duct, lung and bronchus, colon and rectum, pancreas, upper GI, brain and other nervous system cancers, lymphoma, leukemia, multiple myeloma, endometrial/ovarian/cervical, breast, melanoma and sarcoma. More information on catchment area relevant cancers can be found on the COE Office website here.; Purely basic proposals are not be eligible. Preclinical projects must indicate clearly how the work will drive novel clinical research and enable new clinical trials. Proposals for correlative studies leveraging existing clinical trials must define how the proposed research will generate novel hypotheses and how the findings will drive new research questions.; For more information and to apply, follow the link below.; VELOCITY Cancer Research Award RFP; Apply VELOCITY Cancer Research Awards.; Up to five Velocity Fellows will be selected to lead teams consisting of one lead Principal Investigator and co-investigators and/or collaborators with complimentary expertise. Thank you! ; Internal Submission Deadline: Wednesday, April 13, 2022; Funding Organization's Deadline: Wednesday, April 13, 2022; Cycle: 2022; Discipline/Subject Area: adult cancer; Funding Available: 200000; Description: V Scholar Cancer Research Grant; 2022 Request for Applications; PURPOSE OF AWARD: The V Scholar Award supports young tenure-track faculty early in their cancer research career by funding projects that are either laboratory-based fundamental research or translational research.; SPECIAL FOCUS AREA: ANY area of adult cancer research that is focused on laboratory research that increases our understanding of cancer biology or translational research that improves cancer detection, prevention, treatment, and survivorship. While not required, we encourage applications proposing research to develop better methods for earlier detection of cancers since this research area is a focus of fundraising in 2022. Research areas not included in this scope are epidemiology, behavioral science, and health services research. As in previous years, we encourage applications from underrepresented minorities in cancer research.; GRANT SPECIFICS: The total amount of the grant is $200,000, paid in two annual installments of $100,000. Only direct costs of the research are supported by this award.; WHO MAY APPLY? Each invited institution may submit up to two nominees to apply for this call if at least one of the two nominees identifies as someone from an underrepresented in science minority ethnic group. We continue to raise funds to support the Stuart Scott Memorial Cancer Research Fund which supports V Scholars from minority ethnic groups that tend to be underrepresented in the scientific community. For the purposes of this application: Blacks or African Americans, Hispanics or Latinos (non-European), American Indians or Alaska Natives, Native Hawaiians, and other Pacific Islanders are minority groups eligible for this funding. Among our highly ranked finalists for the 2022 V Scholar Award, we will designate at least one minority applicant to be supported by this fund.; APPLICANT ELIGIBILITY: Inclusion: Nominees must be all of the following: Either a US Citizen or a permanent legal resident in the US.; POSSESS at least 2 years post-doctoral (MD or PhD) fellowship training. For MDs, a minimum of one year is acceptable if only one year is required for their specialty.; Clinical scientists are eligible if the research institution demonstrates that it will fully support the research applicant (e.g., dedicated lab space, committed research time, start-up funds); By the Due Date of the Application (May 16, 2022), applicants must: Hold a tenure-track faculty position as an assistant professor at their cancer research institution. Non-promotable, adjunct, affiliated, temporary, part-time, or acting faculty positions are not eligible.; Have been appointed to their first full-time tenure track Assistant Professor position for no more than 5 years, and not yet been promoted to Associate Professor.; Exclusion: By the Due Date of the Application, nominees must: NOT already hold an R01 or R01-equivalent grants as a PI or co-leader.; NOT be a co-leader on projects such as SPORE or
NIH grant. Mechanisms like U01, DP1, DP2, R37, and R23.; Note: The V Scholar award is intended to support research to leverage these larger awards; so, the nominee should not have already received such awards.; INTERNAL APPLICATIONS INSTRUCTIONS: To apply for the nomination, please submit: A summary (no more than 1 page) outlining the proposed research and specific aims; NIH formatted biosketch; INTERNAL SUBMISSION DEADLINE: Wednesday, April 13, 2022 11:59pm.; HICCC senior leadership will review research summaries and select a nominee. Reviewers will consider various criteria in their evaluation, including the following: The scientific merit of the project; The strength of the candidate; The overall enthusiasm for the research summary; The HICCC will submit the Nomination to the V Foundation. The nominee will be invited to complete the online application by the due date. The Nominee will be asked to upload a letter of recommendation from Dr. Anil Rustgi, the HICCC Director.; IMPORTANT DATES: Nomination Due Date: by 5:00 PM Eastern Time on April 28, 2022; Application Due Date: by 5:00 PM Eastern Time on May 16, 2022; Questions: contact Dr. Emer Smyth es3551@cumc.columbia.edu or Dr. Tanisha Jackson tj2325@cumc.columbia.edu

Additional Information: American Institute for Cancer Research; LOI Deadline: January 21; The AICR Investigator-Initiated Research Grant Program welcomes proposals for research addressing the effects of diet, nutrition, body composition and physical activity on cancer risk and outcomes. The burden of cancer is predicted to rise significantly in the coming years and cancer mortality is predicted to become the leading cause of death in developed nations. However, most cancers are highly preventable and lifestyle factors can also have profound impacts on cancer-associated outcomes. The mission of the American Institute for Cancer Research (AICR) is to eradicate preventable cancers attributable to diet, nutrition, body composition and physical inactivity and improve outcomes in cancer survivors. Our Investigator-Initiated Research Grant Program is a vital element in how we fulfill that mission.

DoD/CDMRP - COVID-19 Impact on Research Awards
[No Link Provided]
CDMRP continues to be concerned about the impacts of COVID-19 on Service Members and the public. We are aware of the challenges it poses and are tracking some of the impacts to current awardees and ongoing research. While not every program will have financial resources available to assist, awareness of any significant unresolved issues affecting current research awards is important.; The intent of this notice is to remind recipients of the requirements in 32 CFR Part 1134, Subpart E Other Reporting. This provision specifies the requirement for recipients to disclose significant developments as soon as they become known. These include problems, delays, or adverse conditions that will materially impair your ability to meet the objectives of your awards.; Disclosures of significant developments may be made on your next interim performance report or at any point between scheduled performance reporting dates by contacting the Science Officer or Grant Specialist assigned to your award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation

See important notes about this program below: Per their help desk, “Topic areas and strategic goals are found specifically within the Program Announcement for the mechanism you are interested in applying under the PRMRP funding opportunity. Please note, as the topic areas and strategic goals may differ between mechanisms, we recommend reviewing the Program Announcement under each mechanism you may be interested in. You can find the page to this section of the Program Announcement under the index to the Program Announcement.” Resources for all the CDMRP programs: Synopsis of Open Program Funding Opportunities; How to Apply; Avoiding Research Duplication; Webinar Series; ; *Per the instructions, “All applications for FY22 PRMRP funding must specifically address one of the FY22 PRMRP Topic Areas as directed by the U.S. Congress and have direct relevance to military health. Additionally, the PRMRP implements a portfolio-driven approach by grouping related Topic Areas with Strategic Goals as a framework within which to address critical gaps in major research areas. All applications must address one of the FY22 PRMRP Strategic Goals as it relates to the portfolio-assigned FY22 PRMRP Topic Area. If the proposed research does not specifically address one FY22 PRMRP Topic Area and one FY22 PRMRP Strategic Goal, then the government reserves the right to administratively withdraw the application. The government reserves the right to reassign the application’s Topic Area if submitted to an incorrect Topic Area.”; Should you have any questions about the application process, please reach out to your SPA Project Officer.; [brought to our attention by] Stephanie F. **Additional Information:** Earlier today, NIH issued corrected instructions to request childcare costs for recipients of NRSA individual fellowships. See [NOT-OD-21-074](https://grants.nih.gov/grants/guide/notice-files/NOT-OD-21-074.html), which replaces to announcement NOT-OD-21-069 referenced below. NIH also updated its FAQs.; If you have any questions regarding how to make the request in a fellowship application, RPPR, or administrative
supplement, please contact your SPA Project Officer. We’ll provide you with any updates [brought to our attention by] Stephanie Scott, Announcement of Childcare Costs for Ruth L. Kirschstein National Research Service Award (NRSA) Supported Individual Fellows; This week NIH announced a new policy to allow for childcare support costs to recipients of NRSA individual fellowships (i.e., F31, F32, etc). These costs must be specifically requested in new, continuation applications or through administrative supplements beginning on or after April 8, 2021. Please read the full announcement at NOT-OD-21-069, the FAQs, and supplementary information below.; **Some key takeaways:** The policy applies to full-time NIH-NRSA supported individual fellowship applicants and awardees. However, additional information is forthcoming later this year regarding expanding the policy to trainees on institutional training grants, anticipated for FY2022.; Each fellow is eligible to receive $2,500 per budget period for childcare costs. The childcare cost amount is not determined by number of children.; Childcare costs are permitted for dependent children living in the eligible fellow’s home from birth under the age of 13, or children who are disabled and under age 18.; Eligible childcare is care that is licensed and/or regulated by state and/or local authorities. See FAQs for more details.; At a minimum, recipients must obtain and retain documentation verifying that a childcare provider is licensed and/or regulated by state and/or local authorities, and must document that the fellow is eligible to receive the childcare costs and has eligible dependents.; The childcare cost is restricted for that purpose and cannot be rebudgeted without prior written approval from the NIH awarding IC.; If you have any questions regarding how to make the request in the fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. The announcement NOT-OD-21-069, and the FAQs, provide instructions on how to make the childcare support request.; We’ll provide further guidance on these new costs at a later date.; Feed: blog – NIH Extramural Nexus; Posted on: Tuesday, March 2, 2021 11:40 AM; Author: Mike Lauer; Subject: Announcement of Childcare Costs for Ruth L. Kirschstein National Research Service Award (NRSA) Supported Individual Fellows; View article.; Subsequently, NIH posted this blog, with screen shot, to assist applicants with the request for childcare costs. If you have any questions regarding how to make the request in a fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. Additional Information: In April 2021, NIH began providing childcare cost support to recipients of full-time NRSA fellowships in recognition that the high cost of childcare impacts graduate students and post-doctorates funded through NRSA fellowships, and hinders their ability to successfully complete their training and fully participate in the extramural research workforce. As Phase 2 of this initiative, anticipated for awards made beginning in Fiscal Year 2022, NIH will begin providing childcare cost support to full-time predoctoral and postdoctoral trainees appointed on NRSA institutional research training awards.

The proposed research must address at least one objective from strategic goal 1, 2, or 3 of Advancing Science for the Health of Women: The Trans-NIH Strategic Plan for Women's Health Research.
internal (e.g., genetics) and external institutional and structural forces (e.g., social determinants of health and experiences of trauma) that play a role in the health status, disease presentation, treatment responses, and health-related quality of life of women across the life course. These administrative supplements will support projects highlighting common sources of disparities in the health of women and girls, with an emphasis on projects that propose to integrate measures beyond the individual level and consider perspectives from multiple disciplines. A broad range of research topics studied at the preclinical, clinical, behavioral, and translational levels are encouraged. Proposals incorporating multilevel interventions, using community-engaged approaches, and focusing on one or more NIH-designated health disparity populations are also desired.; Applications are due January 31, 2022.

**Additional Information:** NIH issues funding opportunity for studies on mitigating sexual harassment in the biomedical research enterprise; National Institutes of Health; Office of Research on Women’s Health; NIH issues funding opportunity for studies on mitigating sexual harassment in the biomedical research enterprise (govdelivery.com) ; NIH NOSI to Support Studies on Mitigating Sexual Harassment in the Biomedical Research Enterprise NOT-OD-21-150. The cumulative effect of sexual harassment has a devastating and costly impact on individuals and the Nation. There are emotional, physical, mental, and legal consequences, which may have a direct impact on individual performance and career advancement, as well as social and financial effects on institutional settings, students, and co-workers.; The National Academies of Sciences, Engineering, and Medicine report titled Sexual Harassment of Women: Climate, Culture, and Consequences in Academic Sciences, Engineering, and Medicine demonstrates the urgent need to develop new partnerships to address this challenging problem. NIH is encouraging applications to test interventions that would be designed to change the culture and mitigate or eliminate sexual harassment in the biomedical research enterprise.; The first available due date for funding opportunity submissions is October 13, 2021, and subsequent receipt dates will extend through October 14, 2023.

Additional Information: Pharmacotherapies for Alcohol and Substance Use Disorder Alliance (PASA) Announcement of Research Funding Opportunities; The PASA Consortium is funded by the Alcohol and Substance Use Disorder Research Program (ASUDRP), formally known as the ASADRP, and managed by the Congressionally Directed Medical Research Program (CDMRP). The goal of the PASA Consortium is to fund research projects for developing new medications that can be brought to therapeutic use to improve treatment outcomes for alcohol and substance use disorders (ASUD), especially as related to post-traumatic stress disorder (PTSD) and other psychological disorders.; The PASA Consortium is administered by a Management Core led by RTI International in collaboration with the Baylor College of Medicine. The Management Core is responsible for soliciting and prioritizing applications. Successful applications will be selected by the ASUDRP Programmatic Panel.; The Management Core contains multidisciplinary expertise and experience in support of Alcohol and Substance Use Disorders (ASUD) research and will provide infrastructure and resources to facilitate rapid development of research. PASA Management Core resources include but are not limited to: general coordination and oversight of projects, protocol development and review, regulatory coordination and drug development strategies, statistical expertise, and data management capabilities. Additional information about PASA is available on its website: https://pasa.rti.org/; This PASA Request for Application (RFA) #6 cycle includes has three aims: o **Aim 1:** Discover: Test new chemical entities and repurpose existing medications in strictly pre-clinical and non-clinical models of ASUD with comorbid PTSD and other psychological disorders.; o **Aim 2:** Phase 1 First-in-Human Safety: Conduct clinical trials of potential medications that include assessment of medical safety and doses for potential efficacy in subjects with ASUD and comorbid PTSD and other psychological disorders.; o **Aim 3:** Phase 2 Efficacy: Conduct multiple site clinical trials to test preliminary efficacy and safety of potential medications or medication combinations in humans with ASUD and comorbid PTSD and other psychological disorders, and to also explore precision medicine tools for matching patients to these medications.; **RFA 6a/Planning Grant:** o Small-cost and short-duration planning grant concerning a specific compound or combination of compounds; to determine the clinical development plan and associated clinical trial(s) needed to advance the compound (or combination of compounds) to FDA approval for ASUD treatment; For this RFA (6a/Planning Grant): § Soliciting for planning grants under Aims 2 and 3 human participant clinical trials.

o **Timeline:** § Letter of Intent (LOI)* 27-May-22; § Full Application Deadline: 08-Jul-22; **RFA 6b/Pre-Clinical:** o Full study implementation awards for proof-of-principle pre-clinical animal research to determine which compounds are most appropriate for human research trials. Using animal models, medications will be assessed to determine if they reduce the aberrant behaviors in models of ASUD comorbid with PTSD or other psychological disorders and potential dosages of these medications can then be estimated for human studies.; o For this RFA (6b/Pre-Clinical): § Soliciting for research grants under Aim 1 pre-clinical animal research studies.; o **Timeline:** § Letter of Intent (LOI)* 27-May-22; § Full Application Deadline: 2-Jul-22; **RFA 6c/Non-Clinical:** o Full study implementation awards for proof-of-principle non-clinical research to identify a pool of compounds most appropriate for additional research. The non-clinical research is intended to increase the potential pool of compounds for investigation in subsequent pre-clinical studies and clinical trials. Approaches to identifying promising compounds for development or repurposing studies that leverage large-scale data through computational-based analysis include but are not limited to in silico and augmented intelligence research.; o For this RFA (6c/Non-Clinical): § Soliciting for research grants under Aim 1 non-clinical research studies focused on ASUD comorbid with PTSD and other psychological disorders; o **Timeline:** § Letter of Intent (LOI)* 27-May-22; § Full Application Deadline: 22-Jul-22; *The LOIs are for planning purposes; no response from PASA is required to proceed with the full application.; The RFAs are available from the PASA Consortium website at: https://pasa.rti.org/About/Grant-Program

haplotypes that are associated with vulnerability to addiction and that potentially inform the likelihood of responsiveness to treatment. Data may be collected from the general population, special populations, recent admixed populations, and/or electronic medical records (EMR). Secondary data analysis of data collected from the general population, special populations, recent admixed populations, and/or animal models is also appropriate for this notice. Investigators are encouraged to include functional characterization, gene x gene interactions, gene x environment interactions, and gene x environment x development interactions.

**Additional Information:** Brain Research Foundation (BRF) Scientific Innovations Award (SIA); Limited Submission Funding; Brain Research Foundation (BRF) Scientific Innovations Award (SIA); Internal Deadline – 9:00 a.m. on Wednesday, May 25, 2022; **Internal Application and Instructions** – Internal Applications must be completed on our InfoReady Review site at . Please click the “Columbia University Login” button to view instructions and begin your application.; **Program:** The Scientific Innovations Award provides funding for innovative science research in both basic and clinical neuroscience. This funding mechanism is designed to support creative, exploratory, cutting-edge research in well-established research laboratories, under the direction of established investigators (Professors and Associate Professors). Funding should lead to successful grant applications with NIH and other public and private funding entities. Studies should be related to either normal human brain development or specifically identified disease states, including molecular and clinical neuroscience as well as studies of neural, sensory, motor, cognitive, behavioral and emotional functioning in health and disease. The grant proposal must detail a new research project that is not funded by other sources. This grant is not to be used as a source of bridge funding. Each total award is limited to $150,000 (direct costs) for a two-year grant period. Exact dates will be provided by the BRF upon application approval.; **Allowable Costs:** 100% of these SIA funds must be utilized for direct costs. These costs may include: Purchase and care of laboratory animals; Small pieces of laboratory equipment, totaling $5,000 or less; Laboratory supplies; Salary for scientific (including postdoctoral fellows) and technical staff (including laboratory technicians); Un-allowable Costs: Facilities and administrative costs; Salary recovery for the PI; Domestic and foreign travel; Conference or seminar fees; Personal computers, computer hardware or software; Large laboratory equipment (anything over $5,000); Tuition reimbursement; Graduate student stipends; Indirect costs, including university fees associated with salary, equipment, etc.; Charges or other costs that support the infrastructure an institution provides researchers; **Eligibility:** This funding mechanism is designed to
support creative, exploratory, cutting-edge research in well-established research laboratories, under the direction of established researchers. Applicants must meet the following requirements: · Hold a full-time appointment at Columbia as Associate Professor or Professor; · Current major NIH or other peer-reviewed funding is preferred but evidence of such funding in the past three years is essential; · Previous recipients of BRF Scientific Innovations Award are not eligible, unless 5 or more years have passed since the start date of the prior award and all grant requirements were met; When: Internal deadline – 9:00 a.m. on Wednesday, May 25, 2022; Sponsor deadline – June 23, 2022 at 5:00 p.m. EST; How: To apply, please visit the internal application and instructions on our InfoReady Review site at: https://columbia.infoready4.com/#competitionDetail/1871038.; BRF LOI form, including the following information: Name and academic title of PI; Contact information, including mailing address, telephone number, and email address; Title of program project; Brief summary of program project (2 page maximum, 10 pt. font minimum). References may be included on an additional page; Include closing paragraph that explains how this research will develop (next steps); List of current grants (include specific aims, and indicate if there is any overlap); NIH Style Biographical sketch with other support page (5 page maximum); Questions: Greg Culler at limitedsubmissions@columbia.edu.; BRF Program: https://www.thebrf.org/scientific-innovations-award/; Research Initiatives; Office of the Executive Vice President for Research; Columbia University in the City of New York; To view current limited submission programs please; visit: https://columbia.infoready4.com/#limitedsubmissions; COLUMBIA | RESEARCH

Additional Information: Sending this funding opportunity on my listservs due to the broad topic areas they are interested in funding, focused on basic and interdisciplinary translational research that leads to the development of effective therapeutics to mitigate the core disabilities in autism, and improve the functioning of individuals with Autism Spectrum Disorder (ASD);
Deadline: May 31, 2022; Eligibility: anyone PI-eligible per our Columbia policy; Budget: Up to $90K per year, for a maximum 2-year grant. Institutional overheads are not supported by the BRAIN Foundation and cannot be included in the budget.; Website: https://brainfoundation.org/how-to-apply/. For any questions, and to obtain an application, you must contact the foundation directly at brainfoundationfunds@gmail.com. Our primary focus is fostering basic and interdisciplinary translational research that leads to the development of effective therapeutics to mitigate the core disabilities in autism, and improve the functioning of individuals with Autism Spectrum Disorder (ASD). This includes research leading to breakthroughs in understanding and characterization of pathophysiology of autism, basic research, discovery of biomarkers and therapeutic targets for one or more core symptoms, drug repurposing and development of novel drug compounds, devices, and other related areas.; Basic Science: animal models, tissue cultures, organoids, and others.; Translational research/human studies leading to new therapeutics, FDA approval of repurposed drugs or new protocols in clinical care.; Biomarkers that will help measure treatment response in one or more core symptoms; Translational clinical trials that will catalyze a therapeutic towards FDA approval (possible academic/industry collaboration); Devices for therapy; Specific areas of focus include: Immunology: testing and characterization; Neurology, specifically epilepsy, novel EEG/MEG studies; Mitochondrial testing and treatment; GI basic science and treatment, including IBD and microbiome studies; Any promising new areas that have remained unfunded.

**Additional Information:** Longevity Impetus Grant Announcement; FYI Below. Yousin shared this. Applications open on 9/13: https://www.impetusgrants.com/; Impetus Grants provides funding for scientists to start working on what they consider the most important problems in aging biology, without delay; www.impetusgrants.com. September 7, 2021; Dear AGE Member, I’d like to bring to your attention a new source of grant funding for bold ideas in aging research: the Longevity Impetus Grants. These grants will support bold ideas with the potential to change how the field thinks and works, including high-risk projects. For more information about the program and to apply, please visit the website; The applications are ~1 page, and decisions are made within three weeks. Impetus Grants range from $10K to $500K, with a maximum of 10% institutional overhead. There’s no restriction on project period, and no strings attached.; The ideal application is able to explain how the project would broadly impact the field, by developing/validating new tools and/or changing how we think about aging biology. Such proposals could seek to prove or disprove common assumptions in the field, discover new ways to reverse aging processes, synthesize isolated manifestations of aging into a systemic perspective, and/or develop widely applicable methodologies.; Please consider sharing this email within your institution, and with anyone else you think should apply.; I highly encourage you to consider applying for a Longevity Impetus Grant.; Sincerely, [brought to our attention by] Matt Kaeberlein; CEO and Chair, American Aging Association; Impetus Grants provides funding for scientists to start working on what they consider the most important problems in aging biology, without delay. Such work should not be held up by red tape: we offer grants of up to $500K, with decisions made within 3 weeks. Our review process asks "what's the potential for impact" rather than "could this go wrong".; Our goal is to have a broad impact on the field, by supporting projects that challenge assumptions, develop new tools and methodologies, discover new ways to reverse aging processes, and/or synthesize isolated manifestations of aging into a systemic perspective. To ensure that we learn from every project, we’re organizing a special issue of GeroScience to provide an opportunity to publish both positive and negative results from funded studies.; Applications will open on September 13, 2021.

**Additional Information:** PAR-22-072: Measures and Methods to Advance Research on Minority Health and Health Disparities-Related Constructs (R01 Clinical Trial Not Allowed)

The purpose of this Funding Opportunity Announcement (FOA) is to support research that will advance the measurement and methodology of complex constructs relevant to minority health and health disparities; The NIEHS seeks applications that advance innovative development of new measures and methods, or validation and adaptation of existing measures and approaches, to address the complex interplay of the physical, chemical, cultural, social, and built environmental factors that contribute to or exacerbate environmental health disparities. Applications of interest may include, but are not limited to: The use of mixed methods approaches that integrate qualitative and quantitative data collection methods and measures of factors that contribute to environmental health disparities, including how qualitative methods can inform the development and validation of quantitative surveys and instruments that evaluate these factors; Application and testing of methods and measures of SDOH, and structural racism and discrimination, to the study of environmental health disparities; Establishment of novel interdisciplinary collaborations (including, but not limited to, methodologists, behavioral scientists, exposure scientists, epidemiologists, bioinformaticians, biostatisticians, data scientists, social scientists) to incorporate concomitant chemical and built environmental factors with existing or developed measures of structural and individual racism into a multilevel assessment of environmental health disparities.; Development, testing and adaptation of methods and measures that capture the lived experience of intersectionality to identify structural factors contributing to disproportionate exposures to chemical and non-chemical stressors at the community and individual level.; Application of community engaged approaches to identify or develop measures that are based on the interests and primary concerns identified by multiple community stakeholders, such as parents, schools, organizations, and fence-line residents, particularly for communities that are under resourced and populations that have historically been combating environmental injustices and disparate rates of adverse health outcomes.; Examination of the ethical issues related to methods and measurement approaches in the study of environmental health disparities, including issues around data harmonization and the collection of common data elements.; Enhancement of existing place-based indices, environmental exposures models and geocoded data to account for social level factors, to explain environmental health disparities at the regional or community level. Of interest are the extent to which these measures demonstrate how placed-based structural racism and discrimination exacerbate environmental risk factors and/or limit protective factors.; Novel use of SDOH and structural racism and discrimination methods and measures to guide the development of multi-level, evidence-based prevention and intervention strategies to reduce environmental health disparities.; NIEHS Program Contacts: Lindsey Martin lindsey.martin@nih.gov and Melissa Smarr melissa.smarr@nih.gov

**Additional Information:** NOT-HL-23-001 Notice of Special Interest (NOSI): Epidemiologic studies in Asian Americans, Native Hawaiians, and Pacific Islanders (Parent R01 Clinical Trial Not Allowed) The purpose of this Notice of Special Interest (NOSI) is to stimulate novel epidemiological research to address key knowledge gaps within and between subpopulations of Asian Americans, Native Hawaiians, and Pacific Islanders. These populations are frequently aggregated in research, potentially masking important social and health differences. Given clear heterogeneity in ancestry, culture, immigration patterns among Asian Americans, socioeconomic position, and acculturation into American life, a critical need exists for epidemiological research to enhance our understanding of the interplay of environmental exposures, lifestyle, behavioral, genomics, social, neighborhood, and biological factors that impact the health of Asian American, Native Hawaiian, and Pacific Islander subpopulations.; The National Institute of Environmental Health Sciences encourages submissions of applications that are within the mission of NIEHS, which is to discover how the environment affects people to promote healthier lives. Exposures of interest include, but are not limited to, chemicals that people are exposed to via air, water, food, or direct dermal exposure (e.g., personal care products), including air pollutants, pesticides, metals, industrial chemicals, nanomaterials, environmental tobacco smoke, certain microbial products, and certain physical agents, such as environmental radiation. Applications examining the impacts of climate change on health are encouraged and could include a focus on weather extremes (e.g., prolonged or excessively high heat waves, droughts, severe unseasonal cold spells) and extreme weather-related disasters (e.g., hurricanes, storm surges, floods, wildfires) attributed to our changing climate.; Specific topics of interest include but are not limited to environmental epidemiology studies: Characterizing environmental health disparities among Asian American, Native Hawaiian and Pacific Islander subpopulations.; Investigating exposures at the intersection of the physical, chemical, built, and social environments, including social determinants of health, and how these exposures affect health outcomes in Asian American, Native Hawaiian and Pacific Islander subpopulations.; Examining the linkages between structural racism and discrimination, environmental exposures, and health outcomes in Asian American, Native Hawaiian and Pacific Islander subpopulations.; Examining resilience among Asian American, Native Hawaiian and Pacific Islander subpopulations in the context of climate change and climate change-related disasters.; The NIEHS strongly supports research conducted in partnership with communities. Studies that utilize community engaged and/or citizen science approaches done in partnership with Asian American, Native Hawaiian and Pacific Islander communities and/or community-based organizations are strongly encouraged. Applications that utilize report-back methods to increase the environmental health literacy within these subpopulations are also strongly encouraged.; NIEHS Program Contact: Lindsey Martin lindsey.martin@nih.gov

**Additional Information:** NIH Announces Funding Opportunity to Study the Role of Work in Health Disparities in the U.S.; ORWH recently announced its participation in The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional) (PAR-21-275). The funding opportunity will support innovative population-based research designed to identify and characterize pathways and mechanisms through which work or occupation influences health outcomes and health status among populations with health and/or health care disparities. The main objective of this initiative is to determine the extent and mechanisms by which work, as a social determinant of health, both contributes to and helps alleviate disparities related to health and health
Of particular interest are: Projects designed to examine pathways and mechanisms using conceptual model(s) grounded in minority health and health disparities theories that recognize that health disparities arise by multiple and overlapping contributing factors acting at multiple levels of influence; Intersectional approaches that consider different social identities and the embeddedness of individuals within families, households, and communities; Projects that explore whether work can explain the health or health care disparities seen within diseases or conditions (e.g., COVID-19, opioid use disorder, mental/behavioral health, diabetes, cancer, heart disease, asthma, and maternal and infant health); Projects that explore how work contributes to health care disparities—including, but not limited to, disparities in access to preventive, specialty, and emergency care in health insurance coverage and disparities in quality of health care; Applications for The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional) will open on September 5, 2021.

Additional Information: Dear Colleagues, Thank you for attending our recent CUIMC Town Hall, celebrating our fourth CTSA Award from NIH. We take great pride in offering over 70 services and programs including training, study design, research support services, funding, and mentoring. We support all stages of clinical and translational science research including planning, analyses, implementation and dissemination. Watch the recording of our Town Hall for a wonderful overview of all the ways that the Irving Institute for Clinical and Translational Research can support YOU. It is our responsibility and our privilege to provide the vision and stewardship that accelerates translation of biomedical discoveries to improve societal health. At the Irving Institute, it is our passion to empower and enable our outstanding clinical and translational research communities to achieve their goals.

- Participant-level Data Template

**Additional Information:** [SPA News] FW: eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; NIH sent this announcement yesterday after they had already made the changes in their Human Subjects System (HSS).

Please see below, it outlines the changes made to the HSS and its integration with the updated FORMS-F PHS Human Subjects and Clinical Trials Form. [brought to our attention by] Stephanie Scott ; eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; Monday, June 15, 2020; As of Saturday, June 13, 2020, all applicants and recipients submitting post-submission updates in the Human Subjects System (HSS) will use the updated FORMS-F PHS Human Subjects and Clinical Trials Information Form. These updates address new requirements for participant-level data on sex/gender, race, ethnicity, and age at enrollment for projects subject to the NIH Policy and Guidelines on the Inclusion of Individuals Across the Lifespan as Participants in Research Involving Human Subjects.

Users with records currently in progress will need to modify the records to meet new FORMS-F requirements.; The changes listed below include items released by eRA in March and items released on June 13.; Key FORMS-F Changes to the PHS Human Subjects and Clinical Trials Information Form; [*] A new Inclusion Enrollment Report title field is now available. The human subjects study title will appear by default for all existing studies and may be changed by the user. For new studies and those with a work in progress study, the title will be blank and need to be filled by the grantee. See Figure 1.; **Figure 1: Inclusion Enrollment Report Title Field; [*]** For clinical trials, the “Brief Summary” field will no longer appear in Section 4. Information in this field prior to June 13, 2020 will continue to be available in the PDF images of applications and Research Performance Progress Reports (RPPRs) submitted prior to this change.; [*] Question 1.4.a. “Does the study involve human subjects/participants” now has a default value of yes and cannot be changed unless the user changes their response to the question “Are Human Subjects Involved?” on the Other Projects Information form. As a study record should be completed only for research involving human participants, the “No” option is no longer available for this question. See Figure 2.; **Figure 2: Question 1.4.a of the Clinical Trial Post Submission Study Record; [*]** In Section 2.8 of the Study Record: PHS Human Subjects and Clinical Trials Information screen, the language has been changed from 'Enrollment of First Participant:' to ‘Enrollment of First Participant.’; [*] A new question has been added to the Study Record: PHS Human Subjects and Clinical Trials Information screen — Section 4.6 asks ‘Is this an applicable clinical trial under FDAAA.; [*] For a full list of significant FORMS-F changes, see the High-level Grant Application Form Change Summary: FORMS-F PDF.; Key Inclusion Across the Lifespan Changes; [*] Recipients reporting actual enrollment progress for a grant application submitted for due dates January 25, 2019 or later must provide participant-level...
data on sex/gender, race, ethnicity, and age at enrollment in the Inclusion Enrollment Report of the PHS Human Subjects and Clinical Trials Information Form using HSS; [*] Users must use the spreadsheet template available in HSS to submit participant-level data. The column titles must not be altered, and data should be provided using the values modeled in the template. Changes to the template may result in a submission error. See Figure 3.; [Figure 3: Download Participant Level Data Template button on the Inclusion Enrollment Report] [*] Participant-level data must be uploaded in .csv format. Users do not need to separately enter the individual numerical fields in the Actual (Cumulative) Inclusion Enrollment Report table once the .csv file is successfully uploaded. The data provided will populate the actual (cumulative) enrollment table within the system. See Figure 4.; [Figure 4: Upload Participant Level Data Attachment button on the Inclusion Enrollment Report] [*] For more information on the requirement of individual-level participant data on sex/gender, race, ethnicity, and age at enrollment in progress reports for research supported by NIH projects, please see NOT-OD-18-116; For more information, see: [*] Entering Inclusion Data Using the Participant Level Data Template (video and transcript); Participant-level Data Template; [*] The eRA Human Subjects System (HSS) information page; [*] Information about the PHS Human Subjects and Clinical Trials Information form; electronic Research Administration (eRA); NIH Office of Extramural Research; Questions? Additional Information: Data Tables for training grants; NIH just posted the latest Data Tables for FORMS-F required institutional training grant proposals. These tables will be required for applications due May 25th, 2020 or later. Go to: https://grants.nih.gov/grants/forms-f/data-tables.htm ; They did not post a significant changes document yet, so I took the instructions from the previous tables and did a comparison to the new tables. See attached “Changes from FORMS-E to FORMS-F”; I have an email to NIH to clarify the significant changes, and any impact they may have in xTRACT. Upon first glance, the changes appear to be more of clarifications of the instructions, rather than anything drastically different; I know a number of you are preparing training grant proposals for May. Please feel free to take a look at these changes, and let me know if you have questions. This way I can collect them all and send them to NIH for clarification. As every training grant program is different, you may also need to go to your Program Officials for direction on how they want the table completed for your specific set of circumstances.; As soon as I have more information from NIH I will pass it along; [brought to our attention by] Stephanie F. [NTW] [COVID-19]
Extending the Special Exception to the NIH/AHRQ/NIOSH Post-Submission Material Policy During the COVID-19 Pandemic

Sponsor: National Institutes of Health
Deadline(s): This Notice extends the special exception for post-submission material (see NOT-OD-20-123) to applications submitted for the May 2021 Council round.; For applications submitted for the May 2021 council (beginning with applications
submitted for the September 25, 2020 due date for Spring 2021 review meetings), the NIH, AHRQ, and NIOSH will accept a one-page update with preliminary data as post-submission materials for applications submitted under all activity codes, ONLY if the Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application.; The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications.; All other materials listed in NOT-OD-19-083 as acceptable post-submission materials will continue to be accepted if submitted 30 days before the study section meeting.

**Additional Information:**

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:
5 weeks prior to submission deadline—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

4 weeks prior to submission deadline—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

2 weeks prior to submission deadline—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@cumc.columbia.edu.

Best wishes,

Pam Factor-Litvak

**Additional Information:** Columbia University Coordination on CZ Biohub Letter of Intent; Dear Faculty: The Chan Zuckerberg Initiative recently announced a competition for a new Chan Zuckerberg Biohub to focus on developing new technologies to measure and observe human biology in ways that help deepen our understanding of human health and disease. The ideal scientific themes should be interdisciplinary in nature, have large engineering challenges to conquer, and should be wildly ambitious. The focus area of this new CZ Biohub should further diversify CZI’s existing research portfolio, which includes: infectious disease and quantitative cell science (San Francisco CZ Biohub); neuroscience and artificial intelligence (Kempner Institute for the Study of Natural and Artificial Intelligence at Harvard University); and the Chan Zuckerberg Institute for Advanced Biomedical Imaging.; The Letter of Intent (LOI) requires a minimum of three geographically proximate institutions collectively to propose a concept
for the CZ Biohub. As an organizational structure, the CZ Biohub will be a nonprofit medical research organization that will enter into a collaboration agreement with its institutional partners, enabling the new CZ Biohub to support research at its partner Institutions. Funding is anticipated in the $200–250 million range, over an initial ten-year period, with the possibility for an additional five-year commitment of funds.; Columbia plans to endorse only one institutional partnership application for this opportunity. The EVP’s Office is working with schools to determine the theme and institutional partners for our Chan Zuckerberg Biohub LOI. I will appoint and convene a faculty committee to coordinate with relevant deans, Provost Boyce, and colleagues in Development on next steps. ; Please direct any questions to EVPR@columbia.edu with “CZ Biohub” in the subject line.; Sincerely, Jeannette M. **Deadline(s):** Open  
**Contact:** pioneeringideas@rwjf.org  

**Additional Information:** What can we do today to create a better, more equitable tomorrow? Through this new funding opportunity, RWJF seeks to understand and anticipate what dramatic changes we might see in the next five to 15 years in four areas: 1) Future of Evidence; 2) Future of Social Interaction; 3) Future of Food; and Future of Work. Additionally, this call for proposals seeks to support unconventional approaches and breakthrough ideas outside of these areas that could improve health equity and well-being for generations to come. We welcome proposals from scientists, anthropologists, artists, urban planners, community leaders-anyone, anywhere who has a cutting edge idea that could alter the trajectory of health and increase opportunities for everyone in the United States to live their healthiest life possible. Please note, while this CFP is focused on broader and longer-term societal trends and shifts that were evolving prior to the COVID-19 outbreak, we recognize the unique circumstances and learning created by the COVID-19 pandemic may inform your response. It is at your discretion whether you propose a project related to the pandemic directly or indirectly.

Understanding Suicide Risk and Protective Factors among Black Youth (R01 Clinical Trial Not Allowed)

**Sponsor:** National Institute of Mental Health; National Institute on Minority Health and Health Disparities; Office of Behavioral and Social Sciences Research

**Deadline(s):** 10/19/2022; 06/20/2023; 06/21/2023 (Expiration)

**Contact:** Scientific/Research Contact(s); Eric R. Murphy, Ph.D.; National Institute of Mental Health (NIMH); Telephone: 301-443-9230; Email: eric.murphy@nih.gov

**Additional Information:** Understanding Suicide Risk and Protective Factors among Black Youth; (R01 Clinical Trial Not Allowed); FOA Number: RFA-MH-22-140; **Key Dates:** Open Date (Earliest Submission Date): September 18, 2022; Expiration Date: June 21, 2023; **Purpose:** This FOA aims to advance translational research to better understand factors that confer risk and resilience for suicide among Black youth. This FOA encourages research that is designed to identify neurobiological, behavioral, social, and structural/systemic mechanisms underlying risk and protective factors for suicide among Black youth, with consideration for identification of novel targets for future development of prevention and intervention efforts. This FOA is intended to support R01 research project grants that are adequately powered and of sufficient scope to examine the impact of empirically and theoretically suggested risk and protective factors on suicide and STB among Black youth, and the pathways by
which these factors uniquely contribute to suicide related outcomes in this population. These studies should be adequately powered to definitively answer the primary research question(s), with well-justified hypotheses supported by pilot data. Support for earlier-stage exploratory developmental projects is provided via a companion FOA, RFA-MH-22-141; View RFA-MH-22-140.

**Deadline(s):** 10/19/2022; 06/20/2023; 06/21/2023 (Expiration)

**Contact:** Scientific/Research Contact(s); Eric R. Murphy, Ph.D.; National Institute of Mental Health (NIMH); Telephone: 301-443-9230; Email: eric.murphy@nih.gov

**Additional Information:** Understanding Suicide Risk and Protective Factors among Black Youth; (R21 Clinical Trial Not Allowed); **FOA Number:** RFA-MH-22-141; **Key Dates:** Open Date (Earliest Submission Date): September 18, 2022; Expiration Date: June 21, 2023; **Purpose:** This FOA aims to advance translational research to better understand factors that confer risk and resilience for suicide among Black youth. R21 exploratory grant awards in response to this FOA are intended to conduct preliminary work regarding the assessment and characterization of risk and protective factors, with consideration for the identification of novel targets for future development of prevention and intervention efforts. Studies may involve evaluating the relevance of risk and protective factors for Black youth and their families, identifying risk or protective factors (or their interactions) unique to Black youth (or subgroups of this population), developing new or adapted assessment methods that are developmentally and culturally appropriate, and/or examining the acceptability and utility of existing assessment methods. This FOA supports exploratory developmental projects focused on refining strategies for the assessment and characterization of risk and protective factors and collecting preliminary data needed as a pre-requisite to a larger-scale, definitive project. A companion R01 FOA RFA-MH-22-140 supports larger scale projects that are of sufficient scope and are powered to provide a definitive examination of risk/protective factors associated with suicide risk among Black youth.; RFA-MH-22-141

[Additional Information: ViCTER RFA Released!; Hello Colleagues, Just wanted to share information about the release of NIEHS’s Request for Applications (RFA) for the multi-disciplinary “Virtual Consortium for Translational/Transdisciplinary Environmental Research (ViCTER)” RFA-ES-21-007, which posted yesterday evening.; The purpose of the ViCTER program is to foster and promote early-stage transdisciplinary collaborations and/or translational research efforts to address fundamental research among basic (technology and mechanism oriented), clinical (patient-oriented) and population-based researchers in the environmental health field. The newly established collaborative teams will come together in common interest to investigate potential linkages between human health and one or more environmental stressor(s). The ViCTER program is intended to support innovative high-risk, high-reward transdisciplinary/translational research projects that are more difficult to achieve in a typical R01 application. Collaboration among investigators at different institutions through a virtual consortium arrangement is encouraged. The next due date is February 1, 2022. There will be a free informational webinar on November 18th from 2-3pm ET. Please visit the ViCTER webpage for a link to register to the webinar and for any updates related to this announcement: https://www.niehs.nih.gov/research/supported/translational/victer/index.cfm.; I invite you to share this announcement with teams of researchers who might be interested in this funding mechanism. Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I'm happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about they the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

- **2 weeks prior to submission deadline**—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions (if the support services have not been utilized for the grant) of R01, P, K, Center and T32 grants (if the services have not yet been utilized).

NIH single IRB (sIRB) policy

**Sponsor:** NIH

**Deadline(s):** (for NIH application submissions on or after) 01/25/2018

**Contact:** If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites

**Additional Information:** The NIH single IRB (sIRB) policy applies to the domestic sites of new and competing renewal applications/proposals with due dates of January 25, 2018 and beyond for NIH-funded multi-site studies where each site will conduct the same protocol involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program; If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites; If Columbia University is being proposed as one of the participating sites in an application to be submitted this month or soon after by another applicant organization, you must also contact the HRPO immediately. Moving forward, it is recommended that you contact the HRPO as soon as a decision is made to participate in a multi-site study to which the NIH sIRB Policy applies; An official process that details the requirements for addressing the NIH sIRB Policy is being finalized, to be released shortly. In the meantime, PIs and/or departments can reach out to irboffice@columbia.edu to inform the HRPO about these applications. Upon receipt of your email, HRPO will send you an online form to be completed, and you will be provided with next steps; In addition, we are offering several options to learn more about the sIRB process. **Note:** Protocols that address the same research questions, involve the same methodologies, and evaluate the same outcomes are considered to be the “same research protocol.” Additionally, sites that are accruing research participants for studies that are identical except for variations due to local context consideration would be considered to be conducting the “same research protocol.”; If you have any questions, please contact irboffice@columbia.edu; Our website contains resources to help you while you get accustomed to all of the policy changes impacting proposal preparation. We have an Excel checklist to help you complete the new PHS NIH Human Subjects and Clinical Trials Information Form. We also have a one-page reference guide (thank you Katherine Rochmat of School of Social Work for the initial template); [https://research.columbia.edu/content/nih-proposal-information](https://research.columbia.edu/content/nih-proposal-information) As always, feel free to contact your SPA Project Officer should you have any questions about NIH proposal preparation; [brought to our attention by] Stephanie F. **Additional Information:** HRPO and IRB Updates; Dear colleagues, This email provides updates from the Human Research Protection Office (HRPO) on recent new or revised policies, regulations or requirements that may affect IRB activities and requirements.; **Status of the Revised Common Rule:** The Final (revised) Common Rule, i.e., revisions to Subpart A of the DHHS regulations for the Protection of Human Subjects (45 CFR 46), were published on January 19, 2017, with an effective and compliance date of January 19, 2018 for the majority of the revisions. On January 17, 2018, an Interim Final Rule was released that delays the effective date for 6 months, to July 19, 2018. Certain federal departments and agencies are in the process of developing a proposed rule to further delay implementation.; The HRPO is developing guidance for preparing for the transition to the Revised Common Rule. Stay tuned for more information...; **Revised Policies:** Revisions have been made to the new IRB Policy on the Privacy Rule and the Use of Health Information in Research (IRB HIPAA & Research Policy) and the IRB Data Security Plans Involving the Use, Storage or Transmission of Electronic Research Data Constituting Sensitive Data (IRB Data Security Policy). The IRB HIPAA & Research Policy, which was released on November 1, 2017, was revised to provide clarifications of definitions, scope, and when a Data Use Agreement is necessary. In addition, several case studies were added to assist with implementation of this policy. The IRB Data Security Policy was revised to include new terminology and definitions that are included in the IRB HIPAA & Research Policy. Sessions to explain the policy and review the examples will be scheduled. In addition, please let us know if you would like to have us come to your departmental meeting to review the policy!; **Revised Standard Operating Procedures (SOPs):** Version 5.0 of the IRB’s SOPs were recently released. Included in this version: (*) Comprehensive information on Expanded Access; (*) Incorporation of Columbia’s Institutional Conflict of Interest Policy; (*) Clarifications on when Unanticipated Problems are reported to federal agencies; (*) Updates to the sections regarding recruitment of inpatients at NYP; (*) Addition of the new Single IRB processes; (*) Clarification on the process for IRB disapproval; **Process for Implementing the NIH Single IRB Policy:** The NIH Single IRB (sIRB) Policy is applicable to new and competing renewal applications/proposals for NIH funding that are due on or after January 25, 2018, and contract solicitations issued on or after January 25, 2018. It is applicable to NIH-funded multi-site domestic studies involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program.; If you are preparing an NIH application that is due on or before March 5, 2018, it is important that you contact the HRPO immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND (*) The same research protocol will be conducted at multiple domestic sites.; The HRPO and SPA have developed tools to facilitate implementation of this policy. These tools, including an overview
of our process and template language that can be used in your grant applications, can be access here. The HRPO’s web page will continue to be updated with additional resources as more information becomes available to facilitate compliance with this policy.;

**Additional Information:** [adapted from] A MESSAGE FROM DEAN FRIED [previously distributed] to Faculty; Dear Mailman School faculty; In acknowledgement of the increasingly competitive federal funding environment, the School’s administrative and academic leadership teams have been working to develop new resources to support faculty in preparing grant applications with the highest chance of success. In the fall, we will announce and begin rolling out a suite of such supports.; Given the initial fall NIH submission deadline of October 5, I write today to inform you about the first of these resources. The School is providing support for pre-submission external review and for scientific final editing of R01, P, K, Center or other complex NIH proposals for NIH’s October 5 submission deadline, for all full-time faculty with primary appointments in the School. These services will only apply to first submissions (not to resubmissions). Note that, at this time, other grant types such as R03 and R21 are not eligible for this service.; For the external review of applications, the PI will be requested to identify an external expert who they think would be willing to review the grant. Please remember that an individual who serves as a reviewer in this way would then become ineligible to review the proposal for NIH. The School will arrange for the review and provide reviewers a $750 honorarium for R01 review and $1,000 for review of P or other more complex proposals. This external review is independent of any departmental review of aims or entire proposals, is independent of review by R5, and is entirely optional.; For the final scientific editing an outside company that has already been used by several departments will be engaged as needed. The editing review will polish writing, help with organization and logical progression, and assist with the production of figures.; Below is the timeline and process for requesting and utilizing these supports: (*) To ensure an adequate amount of time for grant review and/or editing, faculty wishing to participate must first inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) at least five weeks before the grant is due; in the case of the 10/05/2017 deadline, 09/01/2017] that you will be requesting one or both of these services. This request must include: the title of the grant, type of grant, due date, and name of the suggested external reviewer with contact information.; (*) Research Resources will contact the external reviewer to ensure his/her willingness to review within one week. That office will also send the appropriate paperwork for paying the honorarium. Three to four weeks prior to submission; [in the case of the 10/05/2017 deadline],

RESEARCH RESOURCES
mailman.columbia.edu/ir2
09/14/2017 (3 weeks) or 09/07/2017 (4 weeks) the PI must send the draft of the science to Craig, who will forward it to the external reviewer to complete his/her review within one week. The external reviewer will return comments directly to Craig and the PI. If you think you cannot meet this timeline, please discuss with Pam Factor-Litvak, Associate Dean for Research Resources.; (*) For editing of grant proposals, Craig will send the revised manuscript to the scientific editor ten to 14 days prior to submission [in the case of the 10/05/2017 deadline], 09/21/2017 – 09/25/2017, and the editor’s comments will be returned to Craig and the PI for finalization and submission within a few days; If you have any questions about your eligibility or the above process, please contact Pam Factor-Litvak at prf1@columbia.edu. I hope you will consider taking advantage of these new services and that you find them helpful.; With best wishes, Linda P. NIH Drops “Grant Support Index” Proposal; Adopts an Even Larger Initiative to Support Early- and Mid-Career Investigators

**Additional Information:** NIH to Limit Total Grant Support to PIs; NIH announced on Tuesday that it will implement a limitation on the total grant support it will provide to principal investigators (PIs) who have multiple awards. The agency will use a “Grant Support Index” that assigns point values to various types of grants. PIs who exceed a set point, linked to having three or more awards with a single PI, will be forced to adjust their portfolio with reduced resources. NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH says that it believes 6 percent of PIs will be affected and that resources will be freed up to fund about 1,600 additional awards. NIH insists that no existing awards will be rescinded; An article posted by *Nature* reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.

NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH says that it believes 6 percent of PIs will be affected and that resources will be freed up to fund about 1,600 additional awards. NIH insists that no existing awards will be rescinded; An article posted by *Nature* reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.

Additional Information: Contacting Staff at the NIH Institutes and Centers; In today's NIH Extramural News blog, the NIH staff posted a handy chart of the major roles of NIH staff: Program Officials, Scientific Review Officers, Grants Management Officials, and staff of the Division of Receipt and Referral in NIH's Center of Scientific Review. It explains each role's responsibility, when it is appropriate to contact them, and where to find their contact information.; See Who At NIH Can answer My Question About….?

Remember that your Sponsored Projects Administration (SPA) Project Officer must communicate with NIH staff directly when submitting proposals, negotiating awards, submitting Just-in-Time information, submitting formal requests for prior approval, submitting progress reports, clarifying NIH policies, and discussing financial or administrative issues. However, there may be times when contacting NIH directly is appropriate, for example, to identify the right type of grant program and/or funding opportunity for you and your research, or to verify that your idea fits within the mission and priorities of an NIH Institute or Center. When in doubt, reach out to your SPA Project Officer.; [brought to our attention by] Stephanie F.
