**Additional Information:** [This Opportunity was previously posted in our Newsletter, and will require internal review with a deadline of 07/18/17] Internal CUMC Call for Ideas for an SU2C Dream Team - SUBMIT BY TUESDAY, JULY 18; NEW; Internal CUMC Call for Ideas for an SU2C Dream Team; SUBMIT BY Tuesday, JULY 18; es3551@cumc.columbia.edu; Dear Colleagues, Stand Up To Cancer (SU2C) recently released a new Call for Ideas for a Dream Team Translational Research Grant (attached and linked here). The grant, described in detail in the attached Program Guidelines, will provide $10m over 3 years to support a collaborative, multi-institutional team focused on innovative translational cancer research that will lead to patient involvement within 2-3 years. The Dream Team must include at least three, and no more than six, collaborating institutions.; This is the first unrestricted Call (i.e. no restriction on disease site, patient population, focus on prevention or treatment etc...) from SU2C since their inception in 2008. We know that SU2C would like to expand their disease portfolio (you can click here for a list of past and current Dream Teams), while maintaining their emphasis on translational research with near-term patient benefit. In that regard, the following are major areas where there is little or no SU2C-funded research: (*) Bladder (likely to be of particular interest to SU2C); (*) Blood (AML/MDS are part of the current Epigenetics Dream Team); (*) Sarcoma; (*) GI (not colorectal);
(*) Brain; (*) Thyroid; (*) Renal; Alternatively, a proposal could be thematically focused, e.g. a systems biology approach to rare cancers. Note that this Dream Team funding opportunity also includes access to OptumLabs’ proprietary database of de-identified claims and electronic health record data, analytic tools, and research support (more information is provided in the Appendix at the end of the Program Guidelines). We hope to put together one or more strong Letters of Intent with CUMC as the Lead Institution. To achieve this goal, we are calling on members of the CU community to submit ideas, no more than 1-page, for an SU2C Dream Team, including the following information: (1) **Focus of the Dream Team proposal**, e.g. disease site, biological pathway, research approach.; (2) **Translational nature of the research** – how will the research deliver near-term patient benefit (i.e. involve patients within 2-3 years)?; (3) **Optimal configuration of the proposed Dream Team** – with Columbia as the Lead Institution, what other institutions (at least two others are required) and key investigators will be invited to participate?. To be considered, please submit your Idea (1-page maximum) by Tuesday, July 18, 2017 via email; es3551@cumc.columbia.edu

An HICCC leadership committee will consider the Ideas and select one or more for formal submission as a Letter of Intent to the AACR. Key dates are as follows: (*) Internal CU submission of an SU2C Dream Team Idea (1-page maximum) to es3551@cumc.columbia.edu Tuesday, July 18, 2017; (*) Formal Letter of Intent (2-pages) submission to the AACR: Tuesday, September 5, 2017; (*) Full proposal submission (by invitation from the SU2C Scientific Advisory Committee; Tuesday, January 16, 2018; We look forward to receiving your ideas for this important funding opportunity. Please let me know if you would like to discuss further by email or in person.; Best, Emer; Emer M. Smyth, PhD; Director, Cancer Research Alliances; Assistant Dean for Cancer Research; Assistant Professor, Pathology and Cell Biology; Herbert Irving Comprehensive Cancer Center; Irving Cancer Research Center; 1130 St. Nicholas Ave, Ste. 201; New York, NY 10032; Phone: 212-851-4878; Cell: 267-234-1342; es3551@cumc.columbia.edu

NIH’S Next Generation Researchers Initiative

Additional Information: NIH’S Next Generation Researchers Initiative; At the Advisory Committee to the Director meeting last week, NIH Principal Deputy Director Dr. Larry Tabak presented a new NIH initiative to strengthen the biomedical workforce. This presentation followed extensive discussions with stakeholders both here through this blog, at stakeholder meetings, and at NIH advisory council meetings over the last month. We heard unequivocal endorsements for supporting early-career and mid-career researchers given the hypercompetitive funding environment — a challenge we have addressed many times in our blog posts. However, many voiced concerns about our taking a formulaic approach to capping grant funding and called on us to be more direct in enabling greater support for the next generation of biomedical researchers.; For this reason, we have shifted our approach to a focused initiative to support early- and mid-career investigators. As described in a June 8 NIH Director’s statement, and in recognition of the call for such action in the 21st Century Cures Act, we are naming this effort the Next Generation Researchers
Initiative. We will take a multi-pronged approach to increase the number of NIH-funded early-stage and mid-career investigators and stabilize the career trajectory of scientists. We describe these approaches on a new web page that we will continue to update. Our activities address both research workforce stability, and evaluation of our investments in research. In brief, NIH will: (*) commit substantial funds from NIH's base budget, beginning this year with about $210 million, and ramping to approximately $1.1 billion per year after five years (pending availability of funds) to support additional meritorious early-stage investigators and mid-career investigators; (*) create a central inventory and track the impact of NIH institute and center funding decisions for early- and mid-career investigators with fundable scores to ensure this new strategy is effectively implemented in all areas of research; (*) place greater emphasis on current NIH funding mechanisms aimed at early- and mid-career investigators; (*) aim to fund most early-career investigators with R01 equivalent applications that score in the top 25th percentile; (*) encourage multiple approaches to develop and test metrics that can be used to evaluate the effectiveness of our research portfolio, and assess the impact of NIH grant support on scientific progress, to ensure the best return on investment.; Applicants do not need to do anything special to be eligible for this funding consideration. Beginning this fiscal year, the NIH institute or center (IC) who would fund the grant will give your application special consideration for support if you are: (*) an early-stage investigator (within 10 years of completing your terminal research degree or medical residency and have not previously received a substantial independent NIH research award) and receive a score in the top 25th percentile (or an impact score of 35 if the application is not percentiled); (*) a mid-career investigator (within 10 years of receiving your first NIH R01 equivalent award) who scores in the 25th percentile, and either: (**) are at risk of losing all support, or, (**) are a particularly promising investigator currently supported by a single ongoing award (i.e, NIH will prioritize funding an additional concurrent research project grant award); NIH ICs make funding decisions to support their mission, and this plan provides flexibility in how ICs will meet the NIH-wide goal of supporting highly scoring early-stage and mid-career researchers. Each IC will make its decisions about how it will prioritize funding to support this initiative.; As further details are announced, we will be updating the Next Generation Researchers Initiative web page with this information. In the meantime, we encourage you to read the NIH Director’s statement, and look at the Advisory Committee to the Director presentation and webcast recording.; We appreciate your feedback in addressing the very important issue of stabilizing the biomedical research workforce. Your comments to this blog (or via email, if preferred) are welcome. With the continued input from individuals at every career stage, as well as research institutions and other stakeholders, we can work together to make changes that ensure the long-term stability and strength of the U.S. biomedical research enterprise, and that advance science to improve health for all. **Additional Information:** APHA, American Public Health Association, Public Health Fellowship in Government; Dear Dr.: On behalf of the American Public Health Association, I am thrilled to announce the call for applications for the 2018 APHA Public Health Fellowship in Government. This is the tenth year APHA is offering this fellowship, which has been described as an “amazing,” “phenomenal” and “life altering” experience by previous fellows. Candidates must have strong public health credentials and be able to spend one year in Washington, D.C. The fellow will have the option of working in the House or Senate on legislative and policy issues such as creating healthy communities, improving health equity, addressing environmental health concerns, population health or the social determinants of health. Training for the fellowship will begin in January 2018 so you must be able to move to the Washington, D.C., area. The fellowship provides a unique learning experience and demonstrates the value and need for basing policy on sound science. Throughout the year, the fellow will gain a practical knowledge of government and how the public policy process works. All candidates must: (1) be an APHA member; (2) have a graduate degree in public health or a related discipline; (3) have at least five years’ experience as a public health professional beyond graduate or medical training; and; (4) be a citizen of the U.S. or its territories or have permanent residence status in the U.S.; Applications, additional information and brief articles from the previous fellows are available on APHA’s website. The application, including a CV and three letters of recommendation, is due to APHA by **August 14, 2017**. Please forward this email to anyone you believe may be eligible and interested. For more information, please feel free to contact us at aphafellowship@apha.org or 202-777-2510.; Sincerely, [brought to our attention by] Susan L. Polan, PhD; Associate Executive Director, Public Affairs and Advocacy; *This fellowship is sponsored by an unrestricted grant from the Aetna Foundation*.

This National Aeronautics and Space Administration (NASA) Research Announcement (NRA), entitled Human Exploration Research Opportunities (HERO)–2017, solicits research in support of NASA’s Human Research Program (HRP). The HRP contains six Elements: Space Radiation, Human Health and Countermeasures, Exploration Medical Capability, Behavioral Health and Performance, Space Human Factors and Habitability, and International Space Station Medical Project. Fourteen disciplines or areas support the Program: Behavioral Health and Performance, Bone, Cardiovascular, Extravehicular Activity, Immunology, Medical Capabilities, Muscle, Nutrition, Pharmacology, Radiation, Sensorimotor, Advanced Food Technology, Advanced Environmental Health, and Space Human Factors Engineering.; Awards generally range from under $100K per year for focused, limited efforts (e.g., data analysis) to $1M per year for extensive activities (e.g., development of scientific hardware). The funds available for awards in each program element offered in this solicitation range from less than one to several million dollars, which allows NASA to select a few to numerous proposals depending on the program objectives and the submission of proposals of merit. This solicitation may result in grant, cooperative agreement, and contract awards. The period of performance for an award is one to five years. Any changes or modifications to any of these guidelines will be specified in the descriptions of the relevant program elements in the solicited research response area appendices of this solicitation; Details of the solicited research opportunities are given in the solicited research response area appendices of this NRA, and it is anticipated that several response area appendices will be issued throughout the year as needed. Most program elements will require a Notice of Intent (NOI) and a full proposal to be submitted; however, some program elements may require a Step-1 proposal in order to be considered to be invited to submit a Step-2 proposal. Proposals that do not conform to the standards outlined in this solicitation will be declared noncompliant and will be handled in accordance with the NASA Federal Acquisition Regulation Supplement http://www.hq.nasa.gov/office/procurement/regs/nfstocA.htm Proposal due dates are given in each solicited research response area appendix.
of this NRA, which will be posted at http://nspires.nasaprs.com/. Interested proposers should monitor http://nspires.nasaprs.com/ and are encouraged to subscribe to the HEOMD electronic notifications system through their NSPIRES account subscription services for additional new solicited research response area appendices or amendments to this NRA through July 2018, at which time release of a subsequent HERO NRA is planned.; On or about July 31, 2017, this NRA will be available electronically through NASA Solicitation and Proposal Integrated Review and Evaluation System (NSPIRES) by going to http://nspires.nasaprs.com/; All categories of United States (U.S.) institutions are eligible to submit proposals in response to this NRA. Principal Investigators may collaborate with universities, Federal Government laboratories, the private sector, and state and local government laboratories. In all such arrangements, the applying entity is expected to be responsible for administering the project according to the management approach presented in the proposal. NASA's policy is to conduct research with non-U.S. organizations on a cooperative, no-exchange-of-funds basis; Electronically submitted Notices of Intent to propose are requested.; This is a broad agency announcement as specified in FAR 6.102 (d) (2).; Notwithstanding the posting of this opportunity at https://www.fbo.gov/, http://www.grants.gov/, or at both sites, NASA reserves the right to determine the appropriate award instrument for each proposal selected pursuant to this announcement.; Direct questions specifically regarding this solicitation to: Sophia Mo Contracting Officer Phone: 281.792.7877 Email: sophia.mo@nasa.gov; Or Vance Benton Contract Specialist Phone: 281-792-7978 Email: vance.benton@nasa.gov; CITE: https://www.fbo.gov/notices/fc6a459eb6e8de72a687368cc8eda6c6

Additional Information: To: Principal Investigators, Sponsored Projects Administrators; From: Barbara Hough, Vice President, Controller and Treasurer, Rudi Odeh-Ramadan, Associate Vice President for Research Administration; We are writing to inform you that, based on the approval obtained from the Federal government, the fringe rate applicable to government grants and contracts will increase from 28.9% to 30.3%, effective July 1, 2017. For all funding sources other than government grants and contracts, the fringe benefit rate will be 29.75%. The increase in the rate is primarily driven by the significant increase in medical costs the University has experienced over the past several years.; Please note that you may wish to take this opportunity to review the impact the change in the fringe benefits recovery rate may have on the allocation of personnel related costs for the remainder of the grant life cycle.; For information regarding student employees working during the academic year or summer, refer to http://finance.columbia.edu/content/fringe-benefit-rates. ; For grants administrators: FY17 Cost Transfers involving sponsored projects will continue to be processed with the FY17 fringe rates through the July 7th deadline. The new FY18 fringe rates will be introduced with FY18 payroll runs.; The rate agreement is available on the SPA website on the Institutional Information page and on the Finance Gateway at http://finance.columbia.edu/content/fringe-benefit-rates. ; Any questions about the government fringe rate should be directed to AskRPIC@columbia.edu.

Additional Information: Dear Colleagues, We believe we can both help Columbia faculty and staff strengthen the outreach component of their research proposals and extend the impact and longer-term stability of our existing excellent outreach programs by creating a centralized database of such programs for researchers to consult when crafting their proposals. Leveraging our experience base and established partners as well as citing outcomes data of existing programs may strengthen the outreach components of new research grant proposals, and may create an opportunity to share mutual administrative costs.; However, at present no centralized source exists for PIs to identify programs to consider when developing extramural proposals. From community service, to public lectures, to tutoring and mentorship, we wish to catalogue information about all the ways in which Columbians directly interact with the outside community.; Please report the outreach programs that you administer via the following form by Monday, July 31st:

NIH to Limit Total Grant Support to PIs

**Sponsor:** NIH  
**Deadline(s):** NA

http://www.nature.com/news/nih-grant-limits-rile-biomedical-research-community-1.21949

**Additional Information:** NIH to Limit Total Grant Support to PIs; NIH announced on Tuesday that it will implement a limitation on the total grant support it will provide to principal investigators (PIs) who have multiple awards. The agency will use a “Grant Support Index” that assigns point values to various types of grants. PIs who exceed a set point, linked to having three or more awards with a single PI, will be forced to adjust their portfolio with reduced resources. NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH says that it believes 6 percent of PIs will be affected and that resources will be freed up to fund about 1,600 additional awards. NIH insists that no existing awards will be rescinded.; An article posted by Nature reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.

A Potential, New NIH Policy that Stands to Affect all PIs:

1. **Implementing Limits on Grant Support to Strengthen the Biomedical Research Workforce**
2. **Research Commitment Index: A New Tool for Describing Grant Support**

The Fringe Rate Applicable to Government Grants and Contracts will Increase from 27.1% to 28.9%, effective July 1, 2016  
**Sponsor:** NA  
**Deadline(s):** 07/01/2016 (effective)  
**Contact:** Any questions about the government fringe rate should be directed to Carl Sparano at email cs16@columbia.edu or voice 212-854-1049.  
**Link(s):** http://spa.columbia.edu/proposals/institutional-information  
**Additional Information:** (To: Principal Investigators, Sponsored Projects Administrators; From: Anne Sullivan, Executive Vice President for Finance; Rudi Odeb-Ramadan, Associate Vice President for Research Administration; We are writing to inform you that, based on the approval obtained from the Federal government, the fringe rate applicable to government grants and contracts will increase from 27.1% to 28.9%, effective July 1, 2016. For all funding sources other than government grants and contracts, the fringe benefit rate will be 29.5%. The increase in the rate is primarily driven by the significant increase in medical costs the University has experienced over the past year.; Please note that you may wish to take this opportunity to review the impact the change in the fringe benefits recovery rate may have on the allocation of personnel related costs for the remainder of the grant life cycle.; With respect to students, the fringe benefit rate applicable to salaries funded by government projects will not change and will remain at 8.15%. For all funding sources other than government projects, the fringe benefit rate will be 8.15%.; For grants administrators: FY16 Cost Transfers involving sponsored projects will continue to be processed with the FY16 fringe rates through the July 15 deadline. The new FY17 fringe rates will be introduced with FY17 payroll runs.; The rate agreement is available on the SPA website on the Institutional Information page. It will be posted on the Finance website shortly.; Any questions about the government fringe rate should be directed to Carl Sparano at email cs16@columbia.edu or voice 212-854-1049.)

Two items NIH fellowship applicants should be aware of  
**Sponsor:** NIH  
**Deadline(s):** NA  
**Contact:** If you have any questions, please contact Grants Information at grantsinfo@od.nih.gov; Sheri; Sheri Cummins; Chief, Grants Information; Division of Communications and Outreach; NIH Office of Extramural Research; cumminsS@mail.nih.gov; 301-496-3405;  
**Additional Information:** Please pass this on to anyone you know whom may be preparing an NIH individual fellowship application (pre- or postdoc); Anyone who started a grant application for any of these fellowship opportunities prior to June 8, 2016 must return to the funding opportunity announcement and begin again.; There were problems in the fellowship forms packages attached to the funding announcements. NIH has since corrected the problem. See below for details, and https://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-106.html. Impacts the Parent fellowship funding announcements as well as PA-16-130 from NIGMS and PAR-16-210 from NIDCD. [forwarded to our attention by Stephanie Scott, SPA Communications and Outreach Director, sfs2110]; NIH Fellowship applicants, I’d like to bring two issue to your attention: (1) Anyone who started a fellowship application between June 3 and June 7 must return to their funding opportunity announcement to get an updated application package (NOT-OD-16-106); (2) If you use
Grants.gov downloadable forms or Workspace to prepare your application, be aware that the “View Attachment” button associated with the 23. Resource Sharing Plan attachment on the PHS Fellowship Supplemental form displays the 22. Select Agent Research attachment instead of the expected one. This is simply an issue with the Grants.gov form interface. It does not impact how the attachments are sent to NIH or how we assemble your application image in eRA Commons. We are working with Grants.gov to address the issue. In the meantime, do not rely on the “View Attachment” feature for the Resource Sharing Plan. Instead, carefully check your attachments prior to uploading them and again when viewing your application image in eRA Commons. This issue only impacts the PDF version of the form. If you use ASSIST or a system-to-system solution to prepare your application, then you are not impacted. If you have any questions, please contact Grants Information at grantsinfo@od.nih.gov; Sheri; Sheri Cummins; Chief, Grants Information; Division of Communications and Outreach; NIH Office of Extramural Research; cumminss@mail.nih.gov; 301-496-3405;

I reviewed these changes this week with
departmental/grants managers during the Research Administration Forums. I will certainly continue to provide updates and summaries of these changes for faculty and the rest of the research community. Stay tuned for more; Steph; We periodically need to update our application forms and instructions to accommodate changing policy, new business needs, and sometimes (not often enough) to reduce the amount of information we ask of you. Given our constraints, we have been working to provide systems support to make the mechanics of these transitions easier for you. This particular set of changes implements a number of policy changes impacting applications submitted in 2016, which we announced in a series of recent NIH Guide notices. We would like to give you a quick overview of what is happening; We will be rolling out the changes in two phases, as summarized in our notice published in the NIH Guide, since our new application forms will not be ready until the spring. You may want to pay particular attention to the following changes, effective for applications submitted on or after January 25, 2016: (*) There will be new application requirements and review language regarding enhanced rigor and reproducibility (We'll be elaborating on these requirements in a separate upcoming post); (*) We will ask for less information in the vertebrate animal section of the application, to remove redundancy with information already included in IACUC reviews. (Some of this information will be shifted to the research strategy section.); (*) We are updating the NIH policy on inclusion of children to lower the age designation for children to include those under 18 years old. (The current age designation for children includes all research subjects under 21 years old.); (*) For training grants, information requirements will change and lower applicant burden; For due dates of May 25, 2016 and beyond, we will require use of new application forms (FORMS-D). We will remind you again this spring, but please understand that it is imperative that you submit your application on the right form package to ensure successful submission.; We will reissue fellowship, career development, training and all parent funding opportunity announcements this spring, to ensure the announcements include instructions that match the form requirements. We'll also make a variety of resources available this spring to help ensure you submit using the right forms; If you have been using the Grants.gov downloadable forms and haven't tried ASSIST yet, members of my staff (the electronic Research Administration or eRA) are working on enhancing the copy application feature to make it even easier to move your application (including attachments) from one form version to another. During the last round of grant applications, over 25% of the applicants switched from using downloadable forms to ASSIST. They successfully submitted their applications on the first try over 90% of the time compared with only 60% of the time for those still using the standard downloadable forms.; So be on the lookout for new application instructions we will release at the end of November, and for more communications from us as we get closer to the time we move to FORMS-D.;

**Simplification of the Vertebrate Animals Section of NIH Grant Applications and Contract Proposals**
**Sponsor:** National Institutes of Health; **Deadline(s):** NA Release Date: 10/13/2015; **Contact:** For questions or further information, contact: Office of Laboratory Animal Welfare (OLAW); Telephone: 301-496-7163; Email: olaw@od.nih.gov; 
**Link(s):** [http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-006.html](http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-006.html); **Additional Information:** This Notice is to inform potential applicants and offerors that the requirements of the Vertebrate Animals Section (VAS) of grant applications, cooperative agreements and contract proposals has changed. The changes have been made to remove redundancy with Institutional Animal Care and Use Committee review while meeting the requirements of the Public Health Service Policy on Humane Care and Use of Laboratory Animals.; Updated VAS Requirements: If live vertebrate animals are to be used, federal policy requires applicants to address the following criteria: (*) Description of Procedures. Provide a concise description of the proposed procedures to be used that involve vertebrate animals in the work outlined in the application or proposal. Identify the species, strains, ages, sex and total number of animals by species to be used in the proposed work. If dogs or cats are proposed, provide the source of the animals.; (*) Justifications. Provide justification that the species are appropriate for the proposed research. Explain why the research goals cannot be accomplished using an alternative model (e.g., computational, human, invertebrate, in vitro); (*) Minimization of Pain and Distress. Describe the interventions including analgesia, anesthesia, sedation, palliative care and humane endpoints to minimize discomfort, distress, pain and injury.; (*) Euthanasia. State whether the method of euthanasia is consistent with the recommendations of the American Veterinary Medical Association (AVMA) Guidelines for the Euthanasia of Animals. If not, describe the method and provide a scientific justification;

**NIH & AHRQ Announce Transition to New Research Training Table Formats for 2016 and Upcoming Release of the xTRACT System**
**Sponsor:** National Institutes of Health; Agency for Healthcare Research and Quality; **Deadline(s):** NA Release Date: 10/13/2015; **Contact:** Please direct all inquiries to: NIHTrain@mail.nih.gov;
 NIH & AHRQ Announce New Form for PHS Awarding Component and Peer Review Requests;

**Sponsor:** National Institutes of Health; Agency for Healthcare Research and Quality;

**Deadline(s):** NA Release Date: 10/13/2015;

**Contact:** Please direct all inquiries to: Division of Receipt and Referral; Center for Scientific Review (CSR); Telephone: 301-435-0715; Email: csdr@mail.nih.gov;

**Link(s):** http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-009.html;

**Additional Information:** Applicants who want to communicate requests pertinent to the assignment and initial peer review of applications must use a new PHS Assignment Request Form beginning with applications for due dates on or after May 25, 2016. Use of this form will ensure applicant requests are effectively communicated to agency staff and may be used to expedite the processing and assignment of applications.; Fields included in the new form: (*) PHS Awarding Component (including NIH Institute/Center (IC) Requests), both positive (“assign to”) and negative (“do not assign to”); (*) Study Section or Special Emphasis Panel Requests, both positive and negative; (*) List of potential reviewers in conflict, and why; (*) List of scientific expertise needed to review the application; The form is optional, and use of the form does not require completion of all fields in the form. For example, an applicant may wish only to request a specific awarding component or study section assignment and leave the other fields on the form blank.; The PHS Assignment Request Form complements the Cover Letter Attachment on the SF 424 (R&R) form. Although NIH will no longer check the Cover Letter Attachment for requests pertinent to the assignment and review of applications, the Cover Letter Attachment still may be used to communicate a variety of other issues, as specified in application guides (e.g., reason for late submission.);

NIH & AHRQ Change Font Guidelines for Applications to Due Dates On or After May 25, 2016

**Sponsor:** National Institutes of Health; Agency for Healthcare Research and Quality;

**Deadline(s):** Release Date: 10/13/2015; For Applications to Due Dates On or After May 25, 2016; 05/25/2016;

**Contact:** Please direct all inquiries to: NIH Grants Information; Email: grantsinfo@od.nih.gov (preferred method of contact); Telephone: 301-435-0714;

**Link(s):** http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-009.html;

**Additional Information:** This notice informs the biomedical and health services research communities of additional flexibility regarding the fonts used in PDF attachments included in grant applications.; For applications submitted for due dates on or after May 25, 2016, the following new guidelines apply: Text in PDF attachments must follow these minimum requirements: (*) Font size: must be 11 points or larger (smaller text in figures, graphs, diagrams and charts is acceptable as long as it is legible when the page is viewed at 100%); (*) Type density: must be no more than 15 characters per linear inch (including characters and spaces); (*) Line spacing: must be no more than six lines per vertical inch; (*) Text Color: must be black (color text in figures, graphs, charts, tables, footnotes and headings is acceptable as long as it is legible); Since some PDF converters may reduce font size, it is important to confirm that the final PDF document complies with the font requirements.; The following fonts are recommended, although other fonts (both serif and non-serif) are acceptable if they meet the above requirements: (*) Arial; (*) Garamond; (*) Georgia; (*) Helvetica; (*) Palatino Linotype; (*) Times New Roman; (*) Verdana; Legibility is of paramount importance. Applications that include PDF attachments that do not conform to the minimum requirements listed above may be withdrawn from consideration.;
Inclusion of Children in Clinical Research: Change in NIH Policy;
Sponsor: National Institutes of Health;
Deadline(s): NA Release Date: 10/13/2015;
Contact: Please direct all inquiries to: NIH Inclusion Policy Office; Office of Extramural Research (OER); Telephone: 301-435-7124; Email: inclusion@od.nih.gov;
Link(s): http://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-010.html;
For more information on the child inclusion policy: https://grants.nih.gov/grants/funding/children/children.htm;
Additional Information: The purpose of this notice is to notify NIH applicants/offerors and grantees/contractors about a change related to the NIH policy on the inclusion of children in clinical research. NIH's long-standing policy has been that children must be included in all human subjects' research, conducted or supported by the NIH, unless there are scientific and ethical reasons not to include them. The policy was developed because medical treatments applied to children are often based upon testing done only in adults, and scientifically evaluated treatments are less available to children due to barriers to their inclusion in research studies. Therefore, applicants/offorers conducting human subjects' research must include a description of plans for including children. If children (or a subset of children) will be excluded from the research, the application or proposal must present an acceptable justification.;
What's Changing: Starting with applications/proposals submitted for due dates on or after January 25, 2016, for the purposes of inclusion policy, the age of a child will be defined as individuals under 18 years old instead of under 21 years old, the current NIH definition of a child for inclusion policy considerations. Applicants/offorers for NIH funding will still be expected to justify the age range of the proposed participants in their clinical research, with particular attention paid to addressing the inclusion (or exclusion) of children (or subsets of children). However, now that threshold applies to individuals under the age of 18 rather than under the age of 21.;
Reason for Change: Consideration of children as a vulnerable population for human protections from research risk and the NIH child inclusion policy are often conflated. While these are distinct policies, many think of children as under 18 years of age, typically the age of consent. This has sometimes led to confusion on the part of applicants/offorers, peer reviewers, grantees/contractors, and even NIH staff about how to ensure compliance with the child inclusion policy. By aligning the NIH definition for the age of a child with the typical age of consent and the common perception of the age of adulthood, the NIH can continue to implement this policy in a manner that focuses on the group of children that need particular attention.; The NIH recognizes that development continues well beyond 18 (and even 21, the current age); however, there is particular concern about ensuring the appropriate inclusion of individuals under 18 while also safeguarding this vulnerable group. NIH policies on inclusion are aimed at ensuring that appropriate individuals are included in clinical research and clinical trials. Results need to be generalizable to individuals that comprise the population under study. This includes consideration of age as a factor in the scientific design.; For more information on the child inclusion policy: https://grants.nih.gov/grants/funding/children/children.htm;

Implementing Rigor and Transparency in NIH & AHRQ Research Grant Applications;
Sponsor: National Institutes of Health; Agency for Healthcare Research and Quality;
Deadline(s): NA Release Date: 10/09/2015;
Contact: Please direct all inquiries to: reproducibility@nih.gov;
Additional Information: This notice informs the biomedical research community of updates to application instructions and review language intended to enhance the reproducibility of research findings through increased scientific rigor and transparency. These updates will take effect for most* research grant applications (including small business and complex research grant applications) submitted for due dates on or after January 25, 2016. For research contracts, this policy will be effective for proposals received on/after January 25, 2016 and expected to result in contract awards in Fiscal Year 2017 and beyond.; Updates include: (*) Revisions to application guide instructions for preparing your research strategy attachment; (*) Use of a new "Authentication of Key Biological and/or Chemical Resources" attachment; (*) Additional rigor and transparency questions reviewers will be asked to consider when reviewing applications; These updates focus on four areas deemed important for enhancing rigor and transparency: (1) 1) the scientific premise forming the basis of the proposed research; (2) rigorous experimental design for robust and unbiased results; (3) consideration of relevant biological variables, and (4) authentication of key biological and/or chemical resources.; The basic principles of rigor and transparency and the four areas of focus apply to the full spectrum of research, from basic to clinical. Investigators will need to consider how all four areas apply to their proposed research. Likewise, reviewers will assess whether these areas have been appropriately addressed by the applicant through revised language defining the peer review criteria. (*)
*Notes & Exceptions: (*) Research grant activity codes excluded
from this policy include C06, G08, G11, G12, G13, G20, R13, S06, S10, S21, SB1, U13, U55, UB1, UC6, UC7, UG4, UH4, X02, and 333; (*) Research Resource and Related grants or components (P30, P40, P41, P2C, R24, R28, U24, U41, U42, and U2C) may have slightly revised review language; please refer to the Funding Opportunity Announcement; (*) Refer to NOT-OD-16-012 for updates to Career Development Award application instructions and review language; (*) Fellowship and Training grant applications submitted for the May 25, 2016 due date and beyond will include new instructions and review criteria to address this policy. Details on these changes will be available by December 2015;

The new DHHS Rate Agreement, dated 9/21/2015, has been posted to the Sponsored Projects Administration (SPA) website, and can be found at http://spa.columbia.edu/proposals/institutional-information; If you are currently working with your Project Officer on an upcoming proposal submission, (s)he can advise on the budget preparation for the submission. If you are currently working on a proposal in Proposal Development (PD) in InfoEd, the new fringe rate will be reflected in the system next Monday. Budgets will automatically adjust in InfoEd to reflect the new rate for proposals submitted Monday and thereafter.; As always, please feel free to contact your assigned Project Officer, or SPA-eBiz@columbia.edu; if you have specific questions concerning InfoEd.; Thanks; Rosa [Rivera, Director, Sponsored Projects Administration]; To all Budget Tool users, FY16 Fringe Rates: (*) For salaries charged to government grants and contracts, the FY16 fringe rate is 27.1%; (**) For salaries charged to all other funding sources, the FY16 fringe rate is 30.5%; (**) For student employees (less than half-time or matriculated enrolled in a degree-granting program), the FY16 fringe rate is 8.15%; [emphasis added]; The Budget Tool has been updated with the new government fringe rates and the new fringe benefit assessments have been calculated in the Payroll module. Although the overall fringe assessment on non-government grant accounts is not changing, the split between accounts 59010 and 59020 will shift; The lower fringe rate for government grants and contracts will require users to review their grant projections and make necessary adjustments [emphasis added]; Users will need to apply these changes to update their FY16 current estimate and future year budgets; Next Steps: When you open the Budget Tool, a message that says “You have unapplied payroll changes” will appear. You must apply and confirm these amounts from the Payroll module and then have them approved before the transaction will post to AR.; If you have any questions, please contact the Finance Service Center. You can log an incident or request a service by using a self-service web form, or you can contact the Service Center by phone at (212) 854-2122 Monday, Tuesday and Thursday, 9:00 am – 5:00 pm; Wednesday 9:30 am – 5:00 pm; Friday 9:00 am – 4:00 pm.; Thank you; The Budget Tool Team;

Spencer is being treated for Ebola at Bellevue Hospital in New York City, the same hospital that treated Dr. Craig Spencer, an emergency department physician at NewYork-Presbyterian/Columbia University Medical Center, recently returned from a humanitarian mission with Doctors Without Borders to one of the outbreak areas in Western Africa. We admire and appreciate all of those willing to do this vital and selfless public health work around the globe. It’s critical to bear in mind what our public health and infectious disease experts have emphasized – that the risk to people in New York City and at Columbia remains extremely low. If you or anyone has any concerns, please visit the University’s Ebola Preparedness site or the New York City Department of Health Ebola update page. You may also contact Student Health Services at 212-854-2284 or Workforce Health and Safety for Faculty/Staff with Hospital Responsibilities at 212-305-7590.; We must keep Dr. Spencer in our thoughts and wish him a full and speedy recovery, as we do the vulnerable populations he serves. We will also continue to keep the Columbia community informed as we learn more from City, State, and Federal health officials.; Sincerely, Lee C. Bollinger;

Additional Information: Dear Colleagues, By now, many of you have learned that a New York Presbyterian physician, Dr. Craig Spencer, who recently returned from treating patients in Guinea, has tested positive for Ebola. I ask you all to keep Dr. Spencer, who is a 2013 Mailman School graduate, in your thoughts, and to acknowledge that the extraordinary efforts of our alumni, current students, and faculty continue to play a critical role in the containment, treatment, and understanding of this outbreak.; At a moment of global distress, public health knowledge is vital. It is important to recognize that this crisis will continue, and that all available scientific information suggests the risk of transmission here is extremely low.; Dr. Spencer’s commitment is among many noteworthy examples of our colleagues passing seamlessly from science to service. As we move through this global crisis, we must all take pride in that commitment.; Sincerely, Linda; Linda P. Fried, MD, MPH ; Dean and DeLamar Professor of Public Health; Mailman School of Public Health; Senior Vice President; Columbia University Medical Center; Professor of Epidemiology and Medicine;

**Additional Information:** This is to clarify the requirement for NIH eRA Commons IDs, as per notice NOT-OD-13-097. The Commons IDs, and complete Personal Profiles, are required for postdocs, graduate and undergraduate students when: (*) They have participated at least one person month on an NIH award, regardless if they were paid from the grant; and (* *) Their participation is required to be included in Participants Section (D.1) in the Research Performance Progress Report (RPPR) – (*) note some select NIH grant mechanisms may be exempt from reporting in this section. (*) The RPPR Instruction Guide contains Supplementary Instructions for Specific Grant Types (such as training awards and multi-project awards), which can be found at: http://grants.nih.gov/grants/rppr/rppr_instruction_guide.pdf; TIP – when preparing your RPPR, click “Check for Errors” prior to routing the report to your SPA Project Officer. You will be alerted of missing eRA Commons IDs and incomplete profiles. This is the best time to contact SPA-eBiz to request IDs, or to alert individuals to complete their Commons profiles.; If you are requesting an eRA Commons ID from SPA-eBiz to request IDs, or to alert individuals to complete their Commons profiles.; If you are requesting an eRA Commons ID from SPA-eBiz please include the following information with your request: (*) Full Name; (*) UNI; (*) Email address; (*) Campus (Morningside or CUMC); SPA-eBiz will work with you to determine the appropriate eRA Commons role.; Please feel free to ask me, or your assigned SPA Project Officer, any questions. Thank you for your patience!; Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Campus Phone: 212-854-0606; Medical Center (CUMC) Phone: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

**Additional Information:** As we get closer to October 2014, I wanted to remind investigators and administrators of the new NIH progress reporting requirement regarding eRA Commons IDs. Postdocs, graduate and undergraduate students supported on NIH awards must have eRA Commons IDs, with complete eRA Commons Personal Profiles. Beginning with NIH progress reports due October 2014, NIH will not accept progress reports that have missing eRA Commons IDs and incomplete profiles. As you are aware, if NIH rejects a progress reports, that could delay issuance of the next year’s funding: Complete eRA Commons profiles are just as important as the ID itself. NIH can reject the progress report if the following fields are not complete in the

**Link(s):** NOT-OD-13-097; NOT-OD-14-092; http://grants.nih.gov/grants/ppr;  
**Additional Information:** This is a reminder that beginning October 2014, Research Performance Progress Reports (RPPRs) lacking an eRA Commons ID for graduate and undergraduate students will receive an error and the RPPR will not be accepted by the NIH without this information. RPPRs that are not accepted could delay issuance of Notice of Grant Awards. See full NIH notice at NOT-OD-13-097. Currently, warnings appear in the eRA Commons screens to alert individuals identified as undergraduate students, graduate students, and postdoctoral researchers that the following fields should be completed in their eRA Commons profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Beginning on October 1, 2014, those fields in the eRA Commons screens will be required for individuals identified in any of those three roles. If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu. In addition, graduate and undergraduate students, and postdoctoral researchers should complete their Personal Profiles in the eRA Commons, ensuring all fields listed above are complete. Tutorials on the Personal Profile can be found at eRA Commons Manage Personal Profile;  
**Additional Information:** This is a reminder that beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/ppr/. Additional Information: Formula for Innovation: People + Ideas + Time: Posted on July 17, 2014 by Sally Rockey and Francis Collins; In these times of tight budgets and rapidly evolving science, we must consider new ways to invest biomedical research dollars to achieve maximum impact—to turn scientific discoveries into better health as swiftly as possible. We do this by thinking strategically about the areas of research that we support, as well as the process by which we fund that research. ... We often hear from investigators at all career stages that they spend a significant portion of their careers writing grant applications, consuming precious time that could otherwise be spent conducting research. .... Dear PIs and Administrators, If you are planning to prepare and submit an NIH multi-project application over the next several months, please let me know. Examples of multi-project grant mechanisms include, but are not limited to, P01, P30, P50, and U19. All multi-project Funding Opportunity Announcements (FOAs) now require proposals to be submitted electronically using ASSIST (Application Submission System and Interface for Submission Tracking). For a listing of all multi-project FOAs, go to http://grants.nih.gov/searchGuide/ComplexOnly.cfm. If you plan to submit a multi-project application in the coming months, please contact me and your SPA Project Officer and we will schedule a time to meet to provide you with training and guidance. Please feel free to contact me if you have any questions. Our website contains many ASSIST resources: http://spa.columbia.edu/electronic-systems/assit. Thank you; Stephanie F. The Columbia University Medical Center IRB Office has a standing “IRB Consultation Hour”. This service provides an opportunity for researchers to stop in at the IRB office and meet with an IRB professional to discuss regulatory, policy, and procedural questions. The sessions are scheduled for every Tuesday from 10 am to 11 am. No appointment is necessary. The IRB office is located at 154 Haven Avenue, 1st Floor. Attendees should sign in at the IRB receptionist desk, and will meet with IRB staff in the order of arrival. If situations warrant, individual consultations may be limited to 15 minutes. Important Note: If you have questions about a protocol that has already been submitted to the IRB, please contact the staff members who administer the IRB to which the protocol is assigned rather than bringing those questions to a Consultation Hours session. Staff contact information may be obtained on the IRB website: http://www.cumc.columbia.edu/dept/irb/; Researchers may also call in during these times, to the IRB main number, for consultation: 212.305.5883. New Program for NIH-funded Grad Students and Postdocs;
Sponsor: NIH; Deadline(s): Open Ended;
Contact: Please contact Rory Flinn (rf2531@columbia.edu); Director of the Office of Postdoctoral Affairs, with any questions about the program.;
Additional Information: Dear Colleagues: The Office of the Executive Vice President of Research (EVPR), including the Office of Postdoctoral Affairs, and the Graduate School of Arts and Sciences (GSAS) are pleased to announce the introduction of an individual development plan (IDP) program for National Institutes of Health (NIH)-funded graduate students and postdoctoral researchers (postdocs). An IDP consists of a self-assessment of skills, interests and values that guides the development of short and long term plans to achieve career goals. In 2012, the NIH published a task force report on the current state of the biomedical workforce which found, among other things, that universities need to better prepare biomedical
graduate students and postdocs for a broad range of career opportunities beyond academia. As one of a number of initiatives designed to address the recommendations of the task force, the NIH issued a policy, released on July 23, 2013 and revised on August 4, 2014 (https://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-113.html), that does not require, but strongly encourages recipients of NIH awards to develop and use IDPs for graduate students and postdocs supported by the NIH. In addition, the revised policy provides that, beginning on October 1, 2014, annual progress reports relating to NIH awards must include a description of whether or not the institution uses IDPs and how they are employed to help manage the training and career development of graduate students and postdocs associated with such awards. The University’s IDP program will begin later this month and will include seminars on topics relating to the development of an IDP. Optional workshops will assist participants in completing an IDP. Career panels and networking events will be held to offer opportunities for participants to learn more about potential career options and the skills and experiences needed to gain employment in a wide array of fields. Complete IDP program details, including registration information, can be found at https://www2.gsas.columbia.edu/idp. Faculty members should strongly encourage their NIH-funded graduate student and postdocs to register and participate in the IDP program. A description of the Columbia IDP program to be utilized in progress reports can be found at https://www2.gsas.columbia.edu/idp/#summary. Please contact Rory Flinn (r2531@columbia.edu), Director of the Office of Postdoctoral Affairs, with any questions about the program.

**NEW ITEMS FROM THE NIH**

[NIH-Investigators] Reminder for NIH-Investigators: eRA Commons IDs and Complete Profiles;

**Sponsor:** NIH eRA Commons IDs and Complete Profiles;

**Deadline(s):** Starting in October 2014;

**Contact:** Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Ph: 212-854-0606; CUMC Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

**Link(s):** eRA Commons Manage Personal Profile;

http://era.nih.gov/reg_accounts/manage_personal_profile.cfm;

**Additional Information:** Complete Profiles Required for Students and Postdocs; As we get closer to October 2014, I wanted to remind investigators and administrators of the new NIH progress reporting requirement regarding eRA Commons IDs. Postdocs, graduate and undergraduate students supported on NIH awards must have eRA Commons IDs, with complete eRA Commons Personal Profiles. Beginning with NIH progress reports due October 2014, NIH will not accept progress reports that have missing eRA Commons IDs and incomplete profiles. As you are aware, if NIH rejects a progress report, that could delay issuance of the next year’s funding. Complete eRA Commons profiles are just as important as the ID itself. NIH can reject the progress report if the following fields are not complete in the profiles: date of birth, gender, race, ethnicity, disabilities, US citizenship status and country of citizenship. Some fields have “I Do Not Wish to Provide” as one of the acceptable responses. For those who have completed undergraduate or graduate degrees (graduate students and postdoctoral researchers), the highest educational degree, the degree date, and the institution where it was earned also should be completed. Tutorials on the eRA Commons Personal Profile can be found at eRA Commons Manage Personal Profile. If you have graduate and undergraduate students supported on NIH grants who do not have eRA Commons IDs, please have them request an eRA Commons account from SPA at SPA-eBiz@columbia.edu. ;

**The Research Performance Progress Report (RPPR);**

**Sponsor:** NIH;

**Deadline(s):** starting October 17, 2014;

**Contact:** Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); Columbia University; Morningside Ph: 212-854-0606; CUMC Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu;

**Link(s):** NOT-OD-13-097; NOT-OD-14-092; eRA Commons Manage Personal Profile;

**Additional Information:** The Research Performance Progress Report (RPPR) format will be required for all Type 5 non-SNAP progress reports beginning October 17th, 2014 (the paper PHS 2590 forms are being phased out). See NOT-OD-14-092. If you are not yet familiar with the RPPR format, resources are available at http://grants.nih.gov/grants/rppr/. Please share this information with your students and postdocs who are supported on NIH grants. If you have any questions, you may contact me, or your assigned SPA Project Officer.; Step; Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects; Administration (SPA); Columbia University; Morningside Campus Ph: 212-854-0606; Medical Center (CUMC) Ph: 212-305-1641; Email: sfs2110@columbia.edu; Website: http://spa.columbia.edu/; This is a reminder that beginning October 2014, Research Performance Progress Reports (RPPRs) lacking an eRA Commons ID for graduate and undergraduate students will receive an error and the RPPR will not be accepted by the NIH without this information. RPPRs that are not accepted could delay issuance of Notice of Grant Awards. **[NIH-Investigators] FW: NIH eSubmission Items of Interest - June 4, 2014** From Stephanie F. Scott, M.S., CRA; Communications and Outreach Director; Sponsored Projects Administration (SPA); "NIH eSubmission Items of Interest" (June 4, 2014) (see below). In particular, it addresses the new Biosketch Pilot program, tips on using non-standard characters in form fields, and the cover letter attachment.

**Don’t Forget the eSubmission Basics** I had the privilege of spending some time last week with the eRA Commons Help Desk and posed the question - "If you could tell the applicant community one thing about application submission what would it be?" I was a bit surprised to hear the same key messages that we have been pushing for years. On the other hand, that’s why we consider them ‘the eSubmission basics’.

So, here’s a quick reminder...

- Watch out for form fields required by NIH that are not marked required on federal-wide forms (e.g. Credential for PD/PIs and Organization for all entries on R&R Sr/Key Person Profile form; primary site DUNS on Project/Performance Sites form).
- Use PDF format for all attachments. Follow PDF Guidelines.
- Submit early – days, not minutes – to allow time to correct unforeseen errors.
- Track your submission in eRA Commons. Email can be unreliable.
- Check your entire assembled application image in eRA Commons. If you can’t view it, we can’t review it!
- If federal system issues threaten your on-time submission you need to notify the help desk and follow the Guidelines for Applicants Experiencing System Issues.

**Impact of Biosketch Pilot on Non-pilot Applications:** Did you see in the NIH Guide (NOT-OD-14-091) or in Rock Talk (Changes to the Biosketch) that NIH is piloting a new biosketch format? The pilot directly impacts applicants applying to a few Funding Opportunity Announcements (FOAs) (e.g. RFA-NR-15-001), but there is an immediate indirect impact to all applicants as well. In order to accommodate the pilot applications, eRA has changed the way we systematically validate the biosketch page limit for all applications. Specifically, a warning will fire if you submit a 5 page biosketch and an error will fire if your biosketch is over 5 pages. Applicants to pilot FOAs can ignore the 5-page warning, but everyone else should take action or risk post-submission rejection of their applications. After your application moves forward to NIH staff, we will do a manual check of the biosketches in applications to FOAs not participating in the pilot. If your non-pilot FOA requires 4 pages, but you included 5 and ignored the warning, then your application may not be reviewed. Applicants must read and follow all FOA and application guide instructions – even those that aren’t enforced by electronic systems.

**Non-standard Characters in Form Fields:** Although NIH systems now support a broader character set including Greek and other non-standard characters, Grants.gov systems currently do not. When completing application form fields type content directly from your keyboard. Avoid cutting and pasting from Word and other word processors- they often convert your plain text to rich text (e.g. Word converts quotes to ‘smart quotes’ that curve towards the text between them and combines two dashes into one long em-dash.) Also, keep your text as simple as possible. The following characters are typically ‘safe’: letters, numbers, spaces, underscores, periods, dashes (not em-dashes), quotes (not smart
Submitting Applications with more than 5 Budget Periods: Although NIH typically allows only 5 budget periods to be submitted with grant applications, from time to time you will come across a FOA that allows more than 5 budget periods. Most NIH FOAs include the R&R Budget form which only accommodates data collection for 5 budget periods leaving applicants wondering what to do with the rest of the data. Applicants have been forced to use a rather clunky ‘workaround’ that includes adding the additional budget period information in the budget justification. eRA has just added system support for Grants.gov’s R&R Budget 10YR form that will allow for the collection of up to 10 budget periods of data. Going forward, this form will be included with the few, special FOAs that allow more than 5 budget periods. The bulk of NIH FOAs will continue to use the standard R&R Budget form.

Transition to FORMS-C To Complete in August: If it seems like I’ve been talking about transitioning to FORMS-C for a year – I have. On May 30, 2013, we announced our first transition to updated application forms (FORMS-C) for application due dates on/after September 25, 2013 (NOT-OD-13-074). The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs are our last remaining programs to use the older forms. These programs are scheduled to transition to FORMS-C for due dates on/after August 5, 2014 (NOT-OD-14-089) marking the end of a rather lengthy transition. Believe it or not, this summer my friends in policy will start pulling together requirements for the next OMB clearance of the PHS (agency-specific) forms used in our applications (they expire in August 2015). Before you know it we’ll be talking about ‘FORMS-D’ forms. For now, let’s celebrate getting through this one. Woo-hoo!

CTA: Cover Your Application - that’s what you thought I was talking about – right? NIH form packages no longer use a separate, agency-specific PHS Cover Letter form. The version of the SF424 (R&R) cover form included in FORMS-C packages has a new Cover Letter Attachment (Item #21 at the very bottom of the form). If you plan to include a cover letter with your application – use this Cover Letter Attachment only! The eRA systems know to keep this attachment separate from your assembled application image and to limit access to it. If you attach it someplace else (e.g., Pre-application attachment on the SF424 (R&R) cover form, Other Attachments on the R&R Other Project Information form) it will become part of your assembled application image and will be visible to everyone with access to your application including reviewers.

**RPPR Required for Non-SNAP Progress Reports Beginning October 17, 2014**

NIH currently requires use of the fed-wide progress reporting format — known as the RPPR (Research Performance Progress Report) — to submit progress reports for Streamlined Non-competing Award Process (SNAP), fellowship, and multi-year funded awards. In April we opened the RPPR for use for all Type 5 Non-SNAP progress reports in anticipation of an October 2014 requirement for RPPR use. Now, it’s official — all type 5 non-SNAP progress reports submitted on or after October 17, 2014 need to be submitted through the RPPR module of eRA Commons. .... Continue reading →

Can I Resubmit My Grant Application While It Is Under Appeal of the Initial Peer Review Results?

What is the Deadline for Resubmitting my Unfunded Application?

**NIH REVISED SUBMISSION RULES**

NIH & AHRQ just released more clarifications on the new resubmission policy. In this announcement are clarifications on due dates, applicability, time limits, and the various options PIs have. See NOT-OD-14-082: http://grants.nih.gov/grants/guide/notice-files/NOT-OD-14-082.html; I know this revised policy is important to you and has many implications. Please feel free to me or your assigned Project Officer questions. I am following up with additional information on the important announcement I sent last week regarding NIH and AHRQ’s new resubmission policy (see below). NIH just posted extensive FAQs describing various scenarios when you may submit applications as ‘new’ that were previously submitted, resubmitted and not funded (including competing renewal applications that were not funded). Additional Information for the two above mentioned announcements: This Notice alerts grantees to a change in the implementation timeline, previously announced in NOT-OD-13-120 and NOT-OD-14-093, for the NIH transition to new U.S. Department of Health and Human Services (HHS) payment policies for domestic, non-competing continuation awards and use of Payment Management System (PMS) subaccounts. It also announces a change in how competitive revisions/administrative supplements (Type-3s) awards will be processed. This Notice only applies to domestic non-competing continuation awards that have not yet transitioned to PMS subaccounts. In response to critical feedback from the grantee community, NIH requested an amendment to its subaccount implementation plan to delay the transition of domestic, non-competing continuation awards to PMS subaccounts for an additional year; e.g., now beginning October 1, 2015. HHS’s Office of the Assistant Secretary for Financial Resources recently approved the request. This additional time is provided to allow grantees to prepare their systems to accommodate the changes. Grantee with inadequate systems in place to appropriately manage this transition by October 1, 2015, may be unable to appropriately access PMS accounts and risk losing their ability to draw down funding. Grantees are advised that there will be no additional implementation delays considered and no exceptions granted to the deadline. As of October 1, 2015, NIH will utilize only subaccounts for awarding grant funds. Every grant that is awarded funding in FY 2016 (whether it be in the first, second, third or fourth quarter of FY 2016) will be in a subaccount. NIH will continue transitioning payment of grant awards with new document numbers to domestic institutions to PMS subaccounts in FY 2015 as announced in Notice NOT-OD-13-120. The administrative changes announced in NOT-OD-14-093 will now apply to the transition that will occur between October 1, 2015 and September 30, 2016. This Notice reiterates those administrative changes for non-competing continuation awards and highlights the revised implementation timelines and T-3 award process for all domestic awards. - See more at:
FEDERAL FUNDING TRAVEL POLICY

[NIH-Investigators] New Policy on Fly America Act; Sponsored Projects Administration (SPA) and the Accounts Payable (AP) department is happy to announce the release of an updated version of the Fly America Act policy, effective immediately. SPA and AP have partnered together on this effort, resulting in a clearer, more comprehensive policy to ensure compliance with the Fly America Act. You can find the full policy in the Administrative Policy Library at:
http://policylibrary.columbia.edu/fly-america-act. This link contains: * Full policy text, including links to resources; * FAQs; * A Decision Tree Diagram; * A new form, the Fly America Exception Checklist; These resources can also be found on the SPA website at:

The Fly America Act is a Federal regulation that states that any foreign air travel that is financed by Federal funds must be booked on U.S. Flag Air Carriers, regardless of cost or convenience. Only Federally funded sponsored projects are subject to this policy. The Fly America Act is not a new policy. Rather, our offices updated our existing policies, which now live in a central location in the Policy Library. There are specific exceptions to the Fly America Act that allow travelers to use Federal funds on foreign carriers, but only under certain circumstances. These exceptions can be quite complex to interpret. Therefore, our offices created a Fly America Exception Checklist and Decision Tree Diagram to assist travelers when booking flights internationally as part of the work to be done on a Federal sponsored project. In cases of exceptions, the Fly America Exception Checklist Form will need to accompany the Columbia Travel & Business Expense Report (TBER) to be submitted to AP. Appropriate back-up documentation should accompany the Checklist. The full policy and FAQs outline this process.

Anyone planning to travel internationally as part of work to be done on a Federally sponsored project is responsible for knowing and adhering to this policy. Please share this information with all faculty, administrators, postdocs and students who may be traveling internationally.

When questions arise that are related to the Fly America Act (for example, what is allowable vs. unallowable, Open Skies...
Agreement exceptions, etc.) you may contact your SPA Project Officer or myself. However, if you have specific questions about reimbursement of travel expenses or regarding your supporting travel documentation, you should contact AP through the Finance Service Center or call 212-854-2122. Thank you.

Major Regulatory and Policy Changes Related to Clinical Trials Announced

**Sponsor:** NIH

**Deadline(s):** NA; Released 09/16/2016; Effective Date: The target effective date for the NIH Policy on Funding Opportunity
Announcement (FOA) for Clinical Trials is September 27, 2017. All applications with receipt dates on or after the effective date with plans to conduct clinical trials must be submitted in response to a clinical trial-specific FOA. After that date, applications planning a clinical trial that are submitted to a non-clinical trial FOA will be returned without review.

**Policy on Charging and Documentation of Personnel Costs Charged to Sponsored Projects** 
**Sponsor:** COLUMBIA UNIVERSITY
Dear Colleague, We are writing to announce the release of the revised Sponsored Project Subawards Policy, which can be found in the Administrative Policy Library here. This Policy was recently revised to reflect the provisions of the Uniform Guidance. Principal Investigators (PIs) are required to properly monitor the progress and spending of subrecipients as specified under the rules in the Uniform Guidance. To ensure compliance with these provisions, key changes in the revised Policy include new forms to be submitted to Sponsored Projects Administration (SPA) during proposal review, and a new process to determine a subrecipient’s risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward. The following sections summarize the key changes to the Policy; however, those who are governed by the Policy should read it in its entirety.

**Forms to be submitted to the SPA Project Officer**, accompanied with the grant proposal, if subrecipients are included: (*) Sub recipient/Contractor Classification Form - NEW FORM; (*) Sub award Face Page - REVISED FORM; (*) Pre-award Assessment of the Proposed Subawards, if applicable - REVISED FORM; (*) International Research Questionnaire (IRQ), if applicable; (*) Sub awardee Financial Conflict of Interest Policy Form –
