In need of a data scientist to support your research?; Large, complex datasets underlie research in all disciplines throughout the university. Whether you’re exploring ancient texts, image and sound libraries, public documents, genomes, chromatographs, bond yields, or social-media interactions, we can help you extract meaning and value from these and the myriad of other datasets housed at Columbia. This program aims to connect faculty and researchers with talented data scientists from across campus to support your data science needs | https://datascience.columbia.edu/ | 09/05/2022, 09/06/2022, 09/27/2022 |

CDMRP continues to be concerned about the impacts of COVID-19 on Service Members and the public. We are aware of the challenges it poses and are tracking some of the impacts to current awardees and ongoing research. While not every program will have financial resources available to assist, awareness of any significant unresolved issues affecting current research awards is important.

The intent of this notice is to remind recipients of the requirements in 32 CFR Part 1134, Subpart E Other Reporting. This provision specifies the requirement for recipients to disclose significant developments as soon as they become known. These include problems, delays, or adverse conditions that will materially impair your ability to meet the objectives of your awards.

Disclosures of significant developments may be made on your next interim performance report or at any point between scheduled performance reporting dates by contacting the Science Officer or Grant Specialist assigned to your award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation.

**Additional Information:** Newly Funded New York City Center Aims to Reduce Health Disparities in Multiple Chronic Diseases; A multi-institutional group in New York City has united to address health disparities in multiple chronic diseases through the Center to Improve Chronic Disease Outcomes through Multi-level and Multi-generational Approaches Unifying Novel Interventions and Training for Health Equity (COMMUNITY Center). The vision of the center is rooted in public health tenets, recognizing that medical advances alone can only partially reduce the inequitable burden of disease in people of color. Reducing health disparities in chronic diseases requires multi-faceted approaches that intervene on structural, community, family and individual level determinants of health and well-being.; Please note the Community Center’s website where students, faculty and doctors may be interested in reviewing. It has links in which information for the IDC (Investigator Development Core) can be found. We will be starting a next cycle phase in a few months, which will also be announced. The research funded application is found within this link and we welcome applications from early-stage investigators from CUMC, WE-CORN, Hunter or PAGNY that are post-doctoral fellows, junior faculty conducting research, or non-research track clinicians. **Additional Information:** Purpose: The Office of Research on Women’s Health (ORWH) is updating the NIH Strategic Plan for Research on the Health of Women. NIH is publishing this Notice to solicit input from the basic, clinical, and translational scientists; advocacy and patient communities; and the public on topics under consideration for the next strategic plan. Submit Input for the NIH-Wide Strategic Plan for Research on the Health of Women; NIH National Institutes of Health; Office of Research on Women’s Health; Submit Input for the NIH-Wide Strategic Plan for Research on the Health of Women; The National Institutes of Health (NIH) Office of Research on Women’s Health (ORWH) published a request for information (RFI), NOT-OD-22-186, to solicit input from stakeholders across the scientific research, advocacy, and patient communities, as well as the public, to inform the topics that will be included in the forthcoming NIH-Wide Strategic Plan for Research on the Health of Women.; ORWH plans on factoring in recent public health events (e.g., the COVID-19 pandemic) that have had a significant impact on the health of women. Several topics relevant to the health of women were reviewed by NIH and the Advisory Committee on Research on Women’s Health (ACRWH), through a congressionally directed and ORWH-led “Advancing NIH Research on the Health of Women: A 2021 Conference.” The recommendations that ACRWH made as a result of this conference, as well as recent scientific advances (new technologies, current health priorities, and feedback from this RFI), will be considered in the development of the NIH-Wide Strategic Plan for Research on the Health of Women, whose goal will be to guide future NIH research efforts to improve the health of all women throughout the life course.; ORWH is responsible for an NIH-wide strategic plan that promotes allocation of NIH resources for conducting and supporting research efforts on the health of women across NIH Institutes, Centers, and Offices (ICOs). The strategic plan for 2019–2023, Advancing Science for the Health of Women: The Trans-NIH Strategic Plan for Women’s Health Research, was developed by a collaborative group of leaders from the ICOS, external stakeholders, and the public. The plan incorporates the missions of the ICOS and ORWH’s mission to pave the way toward scientific and workforce efforts that ultimately benefit the health and biomedical research careers of women.; Input on the next strategic plan will be accepted through Thursday, September 29, 2022. All responses must be submitted electronically here. Send any inquiries to NIHWideSPWH@nih.gov.

Those circumstances are outlined in their [brought to our attention by Stephanie Scott] NIH issued announcement [NOT-OD-22-190, Adjustments to NIH and AHRQ Grant Application Due Dates Between September 22 and September 30, 2022], containing important information for applications due during that time. Please read the notice carefully.; In summary, NIH and AHRQ due dates that fall on or between Thursday, September 22 and Friday, September 30, 2022 will move to Monday, October 3, 2022 due to Grants.gov migrating their services to the cloud during that time. However, there are several important caveats that need to be considered (for example, those who are eligible under the Continuous Submission policy. Those circumstances are outlined in their NIH Extramural Nexus article below.; This change will now cause several NIH and AHRQ deadlines, including those for institutional training (T) and program project (P) mechanisms, to fall during the same week as the standard due date for R01 and U01s, due Wednesday, October 5th. If your application due date falls between September 22 and September 30, Sponsored Projects Administration (SPA) strongly advises that all application materials and attachments be uploaded into ASSIST prior to the downtime, with the goal of submitting prior to September 22.; It is important to communicate with your SPA Project Officer early and often about proposal submission plans. Should you have any questions, please reach out to your SPA Project Officer.; NIH Extramural Nexus; **Posted on:** Wednesday, August 3, 2022 5:11 PM; **Author:** NIH Staff; **Subject:** Extended Grants.gov Downtime Impacts September 22-30 Due Dates; Grants.gov will migrate their services to the cloud during an extended downtime from Friday, September 23, 2022 at 12:01 AM ET through Thursday, September 29, 2022 at 11:59 PM ET. We successfully migrated our own eRA systems to the cloud in April 2020 and understand the planning, coordination, and time required for the effort. The downtime, though necessary, will have significant impact on the preparation and submission of grant applications to NIH.; To mitigate the impact, NIH due dates that fall on or between Thursday, September 22 and Friday, September 30, 2022 will move to October 3, 2022, with the following caveats and considerations: The end of the application receipt period for applications submitted under the Continuous Submission policy for the September 7, 2022 AIDS due date remains Saturday, October 1, 2022 but automatically moves forward to Monday, October 3 since it falls on a weekend.; The two-week window of consideration associated with the NIH Late Application Policy (when applicable) will be calculated from the original due dates.; The two-day application viewing window in eRA Commons will continue to function as normal for applications successfully submitted through Grants.gov.; If a corrective submission is needed within the application viewing window and while Grants.gov is unavailable, reject your application in eRA Commons to prevent it from moving forward to NIH for processing and submit your changed/corrected application prior to the October 3 due date.; If the application viewing window has passed, you can officially Withdraw Your Application and submit a changed/corrected application prior to the October 3 due date.; [NOT-OD-22-190] serves as notification of the due date change for impacted funding opportunities (i.e., edits to due dates within the text of individual opportunities will NOT be made).; NIH FOAs are posted with a grace period which allows applications to be submitted through Grants.gov systems even if the submission deadline shifts beyond the expiration date of the FOA.; If you experience any issues with your submission following Grants.gov’s return to service, please contact the eRA Service Desk for assistance.; If you experience an impact not covered in [NOT-OD-22-190], our standard Dealing with System Issues policy applies.; Additional steps you can take to minimize impact: Check with your Office of Sponsored Research to understand any shifts in internal deadlines and processes.; Use the NIH Guide for Grants and Contracts to search for and access opportunities, while Grants.gov Search is unavailable.; Continue preparing your application.; ASSIST and some system-to-system solutions allow application initiation and preparation even when Grants.gov is offline.; If you typically use Grants.gov Workspace to prepare and submit applications to NIH, work on your application attachments and pull together all needed materials so you are ready to input your information as soon as Grants.gov returns to service.; The Application Form Instructions on the [How To Apply – Application Guide] page and our Annotated Form Sets include.
images of each form that can be used for reference.; Dealing with extended outages is never easy, but with flexibility and planning they’re certainly manageable.; View article

Additional Information: The article below is a reminder that Grants.gov will be unavailable beginning this Friday, September 23 through September 29, and will impact the NIH application due dates. NIH due dates that fall on or between Thursday, September 22 and Friday, September 30, 2022 will move to October 3, 2022; NIH provides different scenarios for applications targeting an impacted due date and how the two-business day application viewing window comes into play. For questions, reach out to your SPA Project Officer.; Reminder: Grants.gov Downtime Impacts; September 22-30 Application Due Dates; As indicated in an earlier article, Grants.gov services will go offline this Friday, September 23, and are planned to remain unavailable through Thursday September 29. To mitigate the impact, NIH due dates that fall on or between Thursday, September 22 and Friday, September 30, 2022 will move to October 3, 2022 (see NOT-OD-22-190 for caveats and considerations); So what does this mean for applications submitted just prior to the downtime? NIH’s application submission process has a two-business day application viewing window that allows administrators and investigators to check the assembled application image in eRA Commons before it moves on to our receipt and referral staff for further processing; Let’s look at a few scenarios for applications targeting an impacted due date and how the application viewing window comes into play.; Scenario 1: Applicant submits an application on Wednesday, September 20, for an impacted due date and receives a notification from eRA Commons that errors were identified.; Applications must be error-free before an application image is generated and placed in eRA Commons. Viewing window does not apply.; A corrective application addressing the errors must be submitted by 5 PM on October 3.; Scenario 2: Applicant submits an error-free application on Wednesday, September 20, for an impacted due date
and receives a notification from eRA Commons that the assembled application is available for viewing. They view the application in eRA Commons and like what they see; No action needed. At midnight ET on Friday, the application viewing window will close and the application will move to receipt and referral staff for further processing; **Scenario 3:** Applicant submits an error-free application on Wednesday, September 20, for an impacted due date and receives a notification from eRA Commons that the assembled application is available for viewing. Upon viewing the application they find the latest Research Strategy was not included and they want to make a corrective submission prior to the deadline.; The viewing window for applications submitted on Wednesday, September 20, would be Thursday and Friday.; Applicant has two possible options: Submit a corrective application on Thursday (prior to Grants.gov downtime on Friday); **Reject** the application in eRA Commons to prevent it from moving forward and submit a corrective application by 5 PM on October 3.; **Scenario 4:** Applicant submitted an application for an impacted due date. After the application viewing window in eRA Commons and during the Grants.gov downtime, they discovered a substantive issue with the application they want to correct prior to the extended due date.; The applicant can officially withdraw the application from processing and submit a corrective application by 5 PM on October 3.; The application viewing window is nothing new, but downtimes of this length are far from standard, causing us all to pay a little more attention.; If you experience any issues with your submission, please contact the eRA Service Desk for assistance.

Aug. 5th; FORMS-H Coming for January 2023 Due Dates – Aug. 8th: As a reminder, NIH is conducting a two-part webinar series on this topic, beginning this Thursday, August 11th at 1:30pm EDT. I highly recommend researchers and administrators who are planning to prepare NIH proposals register for these webinars to gain an understanding of the policy requirements. These webinars will be recorded and made available soon after the events.; We will be hosting more webinars and guidance later in the fall to prepare the research community.; To register: A Conversation with NIH: Implementing the New Data Management and Sharing Policy; [brought to our attention by Stephanie F. Scott, Director of Policy and Research Development; stephanie.scott@columbia.edu; Website: https://spa.columbia.edu/; Feed: NIH Extramural Nexus; Posted on: Friday, August 5, 2022 11:04 AM; Author: Mike Lauer; Subject: Implementation Updates for the New NIH Data Management and Sharing Policy; Dr. Lyric Jorgenson, Acting Associate Director for Science Policy and Acting Director of the NIH Office of Science Policy; As we work towards the January 25, 2023 effective date of the new NIH Data Management and Sharing (DMS) Policy, we continue to develop resources and implementation information to help the community prepare (see recently released NOT-OD-22-189. For some scientific communities, data sharing is already standard and things will largely be business as usual. For others, this policy may require some pretty big adjustments. We acknowledge that there will be a learning curve. We will be supporting you with additional resources and guidance through the change (see here and here for previous blogs.); The central tenets of the DMS Policy are: 1) that investigators and institutions prospectively plan for how they will manage and appropriately share data by developing a Data Management and Sharing Plan (DMS Plan), and 2) that they follow-through with this DMS Plan. Prospective planning is key. The goal of this policy is to get investigators thinking about and preparing for data management and data sharing as early as possible. We’ve seen many issues arise when data sharing is only addressed once research is already underway.; To aid researchers in establishing robust DMS Plans, NIH released an optional DMS Plan format page that walks investigators through the Elements of a DMS Plan. A preview version of this format page is available now as a reference. A final, fillable version of this format page along with detailed instructions for preparing DMS Plans will be incorporated into the FORMS-H NIH Application Instructions, available in the fall.; Additionally, to reduce burden on investigators also subject to the Genomic Data Sharing (GDS) Policy (see here for more details), NIH will no longer require submission of separate GDS Plans. Instead, one plan will be expected where applicants describe genomic data sharing within their DMS Plan elements (notice with details coming soon.); As a reminder, DMS Plans will be reviewed and assessed by NIH program staff, not by peer reviewers, so plans will not factor into the Overall Impact score of the application. Peer Reviewers may; however, comment on the reasonableness of proposed data management and sharing costs based on the information provided in the budget justification section (see NOT-OD-22-189 for details). NIH staff at the proposed NIH Institute or Center will determine if recommended DMS Plan elements are reasonably addressed, and applications will only be funded if the DMS Plan is found to be acceptable. If there are any concerns with the submitted DMS Plan, NIH staff may request additional information or modifications to the DMS Plan prior to award through the standard Just-in-Time process.; Interested in learning more? We invite you to bring your questions and join us for our 2-part webinar series titled A Conversation with NIH: Implementing the New Data Management and Sharing Policy. In this series, our policy experts will break down what the policy means for you and discuss key factors to consider when sharing data. Register now and submit your questions in advance!; In closing, we want to underscore that lasting change is critical to see real change. From researchers to institutional officials, to data librarians and data curators, to journal publishers to NIH staff, we all have an important role to play.; Be sure to visit the NIH Scientific Data Sharing website and subscribe for real-time updates on the latest news, resources, and policy information.; View article

Additional Information: NIH is going to host a series of webinars on various topics on a monthly basis (what they're calling 'pre-conference' events), as well as host the 2022-2023 Virtual NIH Grants Conference. You can register for these today! Go to their new NIH Grants Conference and PreCon Events webpage to register.; Below is their official announcement and schedule. It kicks off this month with a session on the NIH Loan Repayment Program (LRP) on Thursday, August 25th, from 2 – 3:30pm EDT.; These are open to anyone with all levels of experience: Research Administrators, Researchers, Grant Writers, PostDocs, Trainees, and others in the research community. See below for additional details. [brought to our attention by] Stephanie Scott; Mike Lauer; Subject: 2022-2023 Virtual NIH Grants Conference and PreCon Events: New Name! New Approach! Deeper Dive!;

Reimagine: to reinterpret (an event, work of art, etc.) imaginatively; rethink: If you have followed my blogs through the years, you know I am a huge fan of an NIH event focused on bringing the extramural research community together with NIH experts to share knowledge, perspectives, guidance, and resources on the NIH grants process and policies. The event has evolved through the years in format, reach, and trans-NIH involvement. Each year, I thought its success would be hard to top...yet somehow it happened. For decades it was known as the "NIH Regional Seminar on Program Funding and Grants Administration." We capped events at 900 attendees. In 2020, it was hosted online and became the "NIH Virtual Seminar." Last year, over 15,000 attendees participated, representing every state, and over 100 countries. Yet here we are again...reimagining what it could be...reimagining what it should be.; For the past two years, our virtual seminar has spanned four days and included 50 sessions. That is a lot of information for attendees to digest in a short period of time! This year, we thought participants would appreciate the opportunity to get the content over a longer period, allowing time for the information to digest. In addition, by pulling select topics out of the larger conference and sharing them in monthly preconference events, there is the opportunity to dive deeper into issues and build time for additional Q&A, case studies, and conversation.; To this end, I'd like to introduce you to our new, NIH Grants Conference and PreCon Events... all hosted within our virtual conference center. Visit the Conference Calendar of Events to view the times and descriptions for each: August 25: NIH Loan Repayment Programs: Supporting the Next Generation of Researchers; September 15: Navigating Early Career Funding Opportunities; October 14: Research Misconduct & Integrity; November 9:

Here are additional details about some of this year’s conference features.; All-Access Conference Pass: There are no fees for signing up. Once you register, your log-in and password provide you access to all of the PreCon Events, 2-Day Conference, On-Demand Library, Exhibit Hall, and additional opportunities to engage with NIH and your peers.; Virtual Conference Center: The conference and designated preconference events will take place on a single, online platform called vFairs, the same one used for the past two NIH Virtual Seminars. The Exhibit Hall will be available throughout the year for perusing NIH Institute and program booths and collecting valuable information; booths will be staffed for the 2-day conference.; Build Your Personalized Agenda. Once you register to access our conference center, you can add any of the on-demand videos, PreCon Events, or NIH Grants Conference sessions to your agenda, guaranteeing that you won’t miss out!; First Event: Thursday, August 25, from 2:00 – 3:30 PM ET – We are pleased to kick off the PreCon Events with experts from the NIH Loan Repayment Program (LRP). This informative and interactive virtual event will provide participants a valuable opportunity to gain program information on how NIH can help pay off a researcher’s student debt, as well as guidance on the LRP application process.; We hope you are as excited as we are about the opportunities the virtual conference center and the planned events offer participants. Additional Information: By 2060, the number of Americans over the age of 65 is projected to reach around 95 million, making up almost a quarter of the US population. Currently, the healthcare system is not well-equipped to address the complex care needs of the rapidly growing and diverse older adult population in the United States. This funding announcement will solicit applications for research studies that focus on different phases of the aging continuum and aim to achieve one or more of the following four goals: Facilitating chronic disease management; Maintaining function and independence; Reducing caregiving burden and improving quality of life; Supporting individuals with significant functional impairment; More about this funding opportunity

Synthesis Centers are an established mechanism used by the NSF Directorate for Biological Sciences (BIO) to catalyze new discoveries by leveraging existing data. It is important to note that Synthesis Centers do not directly support generation of new data, nor do they fund an individual research group, but rather are dedicated to facilitating synthesis of available data by multidisciplinary research teams to address compelling scientific questions. Proposals to generate new data or simply establish or update data repositories are not appropriate for this solicitation, nor are projects that are primarily concerned with human health.; The new Center will serve as a nexus for connections that elevate the utility of biological data from different modalities and varied spatial, temporal and/or hierarchical scales. The Center must enable use of the data beyond relatively narrow studies of molecular and cellular structure-function relationships or individual investigator-scale projects. To do so, the Center will help develop collaborative teams with complementary expertise and perspectives from different disciplines and will support development of theoretical foundations.

and technological platforms for data synthesis; The Center should have an overarching vision and plans to address complex questions in molecular and cellular bioscience by using contemporary approaches that are data-intensive, team-based, and promote open science. This vision should serve as the common ground for all its activities, including scientific inquiry, infrastructure design and development, education, training, and broadening participation; Specific objectives of the Center must: Address a compelling set of scientific questions in molecular and cellular biosciences that require or are ripe for breakthroughs from synthesis of available data.; Enable synthesis research, i.e., integration of diverse theories, methods, and data, bringing together cross-disciplinary expertise to advance mechanistic and predictive understanding of complex molecular and cellular systems.; Develop or provide the necessary resources to enable data management and integration; advance open science strategies that increase data access, sharing, and reuse; enhance access to existing infrastructure, e.g., computing power; foster collaboration and team science; and promote standards and best practices in the community for synthesis research; Build an effective and evidence-based training enterprise for the next generation of scientists.; Integrate efforts to broaden participation across demographic, geographic, institutional, and disciplinary lines in all activities.; BIO has previously supported several synthesis centers, e.g., the National Center for Ecological Analysis and Synthesis https://www.ncelas.ucsb.edu, the National Evolutionary Synthesis Center http://www.nescnet.org, the National Institute for Mathematical and Biological Synthesis http://www.nimbios.org/, and the National Socio-Environmental Synthesis Center http://www.sesync.org;

Fall 2022 Investigator Development Core Program
Request for Proposals

The new, multi-institutional, COMMUNITY Investigator Development Core Program will provide funding for pilot projects conducted by early-stage investigators (please see RFA for eligibility).

Pilot Projects should address three components:
- Two or more chronic diseases that commonly co-occur
- Health disparities and/or health equity
- Risk-reduction, treatment, and/or management of these chronic diseases.

Applications Due: 5 pm, Monday November 7, 2022
Award: $25,000 to $50,000 per pilot project

UPCOMING SESSION: There will be an Investigator Development Core Program-specific Network Event during the week of October 3, 2022. The purpose of this event will be to facilitate the creation of multi-PI teams for applications. Stay tuned for the date, time, and other details of the event.

Notice of Special Interest (NOSI): Advancing Research on Early Pregnancy Loss

Sponsor: Eunice Kennedy Shriver National Institute of Child Health and Human Development; Office of Research on Women's Health

Deadline(s): 07/05/2022 (Release Date)

Contact: Please direct all inquiries to: Clara Cheng, PhD; Fertility and Infertility Branch; Eunice Kennedy Shriver National Institute of Child Health and Human Development; Telephone: 301-435-6992; Email: clara.cheng@nih.gov

Additional Information: Early Pregnancy loss (EPL), defined as a pregnancy loss occurring up to 20 weeks gestation, is a very common pregnancy complication, occurring in 12-15% of clinically recognized pregnancies, with increased prevalence associated with increasing maternal age. The use of highly sensitive hCG assays allows the detection of pregnancy earlier in gestation than the time of clinical recognition, and gives an even higher estimated loss of 50-70% of conceptions prior to the second trimester. To achieve a successful pregnancy, a series of strict embryonic and maternal conditions must be met, that include high quality embryos, favorable conditions for embryo implantation, receptive maternal endometrium and optimal uterine environment to sustain the conceptus to term. In addition, maternal immune tolerance and hormonal factors play a critical role. While approximately half of all cases of EPL appear to be due to embryonic aneuploidy, very little is known about the physiologic and pathophysiologic processes that underlie non-aneuploid EPL. As a result, there is also a lack of understanding for the underlying causes of recurrent pregnancy loss (RPL). This NOSI seeks to address these critical knowledge gaps by encouraging basic, translational and clinical studies on biological processes that may uncover potential etiologies of EPL and RPL. This includes research to understand implantation mechanistically and identify a range of key factors, involved in implantation and placentation that are important for early pregnancy establishment, including abnormalities that contribute to sporadic EPL and recurrent pregnancy loss.

Additional Information: Below is a reminder of the new look and feel coming on June 23rd of the RPPRs in the eRA Commons module, along with screen shots. Please see below additional action items you may need to take. [brought to our attention by Stephanie Scott] ; eRA Enhancements: Reminder that a New Visual Appearance is Coming June 23 to Research Performance Progress Report (RPPR) Module in eRA Commons; eRA Collaborating for a Transformative Tomorrow; eRA Enhancements: Reminder that a New Visual Appearance is Coming June 23 to Research Performance Progress Report (RPPR) Module in eRA Commons; We would like to remind you that the Research Performance Progress Report (RPPR) Module in eRA Commons is moving to the new visual appearance being adopted by other eRA modules, as a result of a required technology upgrade. The functionality and content will remain the same, except for new unique entity identifier (UEI) fields where applicable and other FORMS-G changes (e.g., updated budget forms); see Actions Required below. ; Along with the screen refresh, a revised, updated RPPR Instruction Guide will be issued that builds on the instruction guide issued on May 13 and will reflect new screenshots as well as updated policy guidance on FORMS-G and UEI changes see NOT-OD-22-130 for details. ; All screens are being transitioned to the new look. The refreshed screens will be rolled out on Thursday, June 23, 2022. The release will take place with no downtime. The updates to the RPPR screens are designed to enhance the user experience. The new look is accompanied by changes that enhance the security and stability of the module.; Actions Required: See the prior messages appended at the bottom of this message for details on both actions below. ; Submit in-progress budget forms by June 22. Budget forms for non-SNAP awards that are started, but not submitted, by June 23 will have to be re-filled out.; Obtain UEI numbers for performance sites listed in Section G.8 Project/Performance Sites, as the DUNS field will be removed and replaced with a UEI field effective June 23.; Highlights of New Changes; The screens will adopt the new standard features being incorporated in eRA modules, such as: Apps menu icon — The apps menu, located in the upper left of the new blue header, shows a dropdown menu of other eRA modules available to the user.

Buttons — If multiple buttons exist in a row, the primary button will be prominent and the secondary ones will either be outlined or have no border, to help highlight the options that are more likely to be used.

Header and Footer — An elegant header and footer take up less space, leaving more real estate for the functionality of the module.; Action items — A three dot ellipsis icon, when clicked, displays a dropdown menu of action items. This icon replaces the action column. See Figure 3.; Enhanced Table Tools — A set of tools enhances the ability to work with table data.
Figure 2; For an explanation of all the new look and feel features, please see Navigating and Using the UI in eRA Modules in the eRA Commons online help; New UEI Fields Added; For grant applications due on or after January 25, 2022, applicants must have a unique entity identifier (UEI) at the time of application submission, because the federal government has transitioned away from DUNS numbers. DUNS and UEI fields will co-exist on some grant forms during the transition.; New UEI fields appear anywhere that DUNS numbers previously appeared, and in some cases the DUNS was removed; see Figure 1, Figure 3, and Figure 4.; Also see these two articles for more information on UEI numbers: Unique Entity Identifier Update; Goodbye DUNS, Hello UEI

Figure 1: The new Cover Page screen, showing a new UEI field.

New Table Tools on Lists of Information; On lists of information, you can use new table tools to filter, download/print data, set the number of rows per page, navigate through pages of list data, and sort by columns. All user interface (UI) elements below are explained in Navigating and Using the UI in eRA Modules in the eRA Commons online help.

Figure 2: The new table tools, with a new UEI column for Performance Sites (DUNS has been removed).

New Three-Dot Ellipsis Icon for Performing Actions on a Record; When actions are available on data, look for the new three-dot ellipsis icon, which shows available actions; see Figure 3. The three-dot ellipsis menu is dynamic and shows only those actions that are currently available.
Figure 3: The new three-dot ellipsis icon showing a menu of available actions.

Separate Popup Windows for Entering/Editing Details: To reduce screen clutter, data entry fields have been moved to separate popup windows, available by clicking a button or the Edit option on a three-dot ellipsis menu; see Figure 4.

Figure 4: A new popup window for entering or editing data, showing the new UEI option for identifier.

(Message below sent Monday, May 26, at 10:06 a.m.); eRA Alert: Performance Sites of Research Performance Progress Report (RPPR) Require UEI Effective June 23; As of April 4, 2022, the unique entity identifier (UEI) replaced the Dun &
Bradstreet (DUNS) number as the official identifier required for an organization/institution to apply for and receive federal funding from NIH and other federal agencies. See NIH Guide Notice NOT-OD-21-170. The UEI, a 12-character alpha numeric identifier, is issued as part of the System for Award Management (SAM) registration process; As communicated in NOT-OD-22-130, the Research Performance Progress Report (RPPR) Module in eRA Commons is moving to the new visual appearance being adopted by other eRA modules, as a result of a required technology upgrade. The refreshed screens will be rolled out on Thursday, June 23, 2022; All screens are being transitioned to the new look. The release includes the addition of the new UEI fields where applicable and required FORMS-G changes, including updated budget forms (see appended message); We would like to inform you that RPPR Section G.8 Project/Performance Sites will no longer have a DUNS number field and will require a UEI instead of a DUNS number. This change will be effective on June 23; If your organization is currently working on an RPPR with performance sites, please obtain the UEIs of the performance sites. Performance sites that do not have a UEI can obtain one through SAM.gov; Resources: DUNS to Unique Entity ID (UEI) Transition; Reminder: Unique Entity ID (UEI) Required Starting January 2022

These upgrades are expected to be released on June 23, 2022; NIH & AHRQ issued announcement **NOT-OD-22-130**, as well as the announcement below containing details about upcoming changes to
RPPRs. The modules in the eRA Commons are currently being modernized with a new visual appearance and enhances to security.; The Research Performance Progress Report (RPPR) Module in eRA Commons is expected to be upgraded by Thursday, June 23, 2022. Please note the following as some of you may need to take action prior to the release date of the upgrade: **Non-SNAP awards only**: Budget forms will be updated to a new format. Users with in-progress RPPR forms will be required to re-enter budget form data if the in-progress RPPR is not submitted by June 22, a day before the release. NIH recommends that in-progress RPPRs be submitted by Wednesday, June 22 to avoid having to redo budget forms after the cutover. If that is not possible, they recommend you delay completing the budget forms until after Thursday, June 23 to avoid re-work.; **NIH published an interim RPPR instruction guide** that incorporates critical changes to align with recently issued guide notices and policy changes. They include: Modified instruction language to align with the updated Other Support and Biosketch format pages and associated instructions.; Modified Question G.4. Human Subjects to incorporate Human Subjects System and Clinical Trials reporting language in line with NOT-OD-20-125; For institutional research training, career development and research education awards: Question B.4 text modified to incorporate the electronic submission requirement for the Trainee Diversity Report.; Added instructional language for Ruth L. Kirschstein National Research Service Award (NRSA) childcare costs reporting and requests in the RPPR, as per NOT-OD-21-074 and NOT-OD-21-177. AHRQ NRSA recipients should refer to NOT-HS-22-013 (Individual Fellows) and NOT-HS-22-014 (Institutional Research Training Awards).; **A final RPPR Instruction Guide will be published on June 23, 2022, to reflect the revised screenshots accompanying the new look and feel of the RPPR module.**; Due dates for submission of the RPPR remain unchanged.; For questions, please contact your SPA Project Officer. See more details below.; **eRA Alert: Action Required for In-Progress RPPR Budget Forms Due to RPPR Update June 23; Updated RPPR Instruction Guide Available**; **era Collaborating for a Transformative Tomorrow; eRA Alert: Action Required for In-Progress RPPR Budget Forms Due to RPPR Update June 23; Updated RPPR Instruction Guide Available**; The Research Performance Progress Report (RPPR) Module in eRA Commons is moving to the new visual appearance being adopted by other eRA modules, because of a required technology upgrade that enhances the security and stability of the module. The refreshed screens will be rolled out on Thursday, June 23, 2022.; **All screens are being transitioned to the new look.** The upgrade includes the addition of the new unique entity identifier (UEI) fields where applicable and required FORMS-G changes, including updated budget forms.; An updated, initial **RPPR Instruction Guide** was issued on Friday, May 13 to reflect changes associated with recently issued guide notices on Other Support and Biosketch format pages, human subjects, Trainee Diversity Report and NRSA childcare costs reporting (see NOT-OD-22-130 for details). A final RPPR Instruction Guide will be published on June 23, 2022, to reflect the revised screenshots accompanying the new look and feel of the RPPR module.; **Action Required for Budget Forms**; Users need to be aware that budget forms (applicable to non-SNAP awards only) will be updated to a new format. As a result of this update, users with in-progress RPPR forms will be required to redo budget form data if the in-progress RPPR is not submitted by June 22, a day before the release.; We recommend that in-progress RPPRs be submitted by Wednesday, June 22 to avoid having to redo budget forms after the cutover.; If that is not possible, we recommend you delay completing the budget forms until after Thursday, June 23 to avoid re-work.; RPPRs submitted on or before June 22 will reflect the FORMS-F budget forms. Due dates for submission of the RPPR remain unchanged. **Additional Information:** NIH recently updated its NIH Pre-award and Post-award Disclosures Relating to the Biographical Sketch and Other Support table (rev. June 8, 2022). It contains additional clarifications of where certain types of activities should be disclosed on NIH forms (i.e. the Biographical Sketch, Other Support, Annual Project Reports, etc.). In addition, we recently posted new Columbia-specific FAQs to clarify the requirements for uploading supporting documentation to accompany NIH Other Support forms and be uploaded into Rascal’s COI Module. Please see FAQs: Supporting Documentation Requirements for Rascal and Other Support. As a reminder, we have several resources to assist you with completing the NIH Biographical Sketches, Other Support forms, and the certification requirements: NIH Researcher Disclosure Requirements: Columbia’s FAQs on NIH Other Support and Biosketches; NIH’s FAQs - Other Support and Foreign Components; NIH’s FAQs - Biosketches; SciENV – currently optional, a tool for creating NIH Biosketches; Request DocuSign in order to complete the certification requirements for NIH Other Support; Note that most NIH-funded PIs were already given access to DocuSign. If you are other senior key personnel on an NIH grant, or an administrator assisting with Other Support forms, you will need to request DocuSign. DocuSign user guides and videos are available on the NIH Researcher Disclosure Requirements webpage. To request DocuSign, use this Request DocuSign Qualtrics form. **Email:** MIRA2019RESEARCH@NIGMS.NIH.GOV  

**Additional Information:** The Maximizing Investigators’ Research Award (MIRA) provides support for the program of research in an investigator’s laboratory that is within the mission of NIGMS. The goal of MIRA is to increase the efficiency and efficacy of NIGMS funding. This FOA allows applications from eligible NIGMS-funded investigators and from New Investigators proposing research within the scientific mission of NIGMS. The FOA also allows renewal applications from all current MIRA grantees (established investigators and those previously funded as early-stage investigators). PD/PIs who are currently Early Stage Investigators (ESIs) should apply through the ESI MIRA FOA and should not apply through this FOA.

Additional Information: As a reminder, effective January 25, 2022, PIs and other senior/key personnel must electronically sign the NIH Other Support form to certify the accuracy of the information provided, and adhere to Columbia University’s Electronic Signature Policy. A typed name is not an electronic signature and is not acceptable. Certification cannot be delegated to administrators or other staff. NIH will not accept wet signatures, or pictures of wet signatures.; The University recommends using DocuSign to electronically sign the Other Support forms. DocuSign is cloud-based and automatically retains the originally signed documents. Both faculty and administrators can use DocuSign.; CUIT is in the process of creating DocuSign accounts for PIs who have current active or pending NIH grants. Administrators who support faculty in creating and organizing Other Support forms and wish to have access to DocuSign will need to request an account. Please complete this Qualtrics form as soon as possible in order for CUIT to create an account. We only need the person’s name and UNI, and one person can complete forms for multiple individuals.; DocuSign training will be offered next week by CUIT and SPA, and will be recorded if you are unable to attend. A quick desktop reference guide and instructional video resources will also be forthcoming. Please register for the trainings by using a Columbia-affiliated email address here: Friday, January 21st, 2 - 3pm; [brought to our attention by] Stephanie F. **Additional Information:** I wanted to point you to new FAQs and guidance related to requesting NIH Other Support forms from subrecipients and other external collaborators. Please see the Columbia FAQs: NIH Other Support & Biosketches, specifically the section on Subawards. Subawards FAQ#4 includes suggested language you can use when requesting Other Support forms from subrecipients and external collaborators. In general, both domestic and foreign subrecipients are subject to the same NIH Other Support disclosure requirements as we are. Subrecipients must electronically sign their Other Support forms, prior to their inclusion in the flattened PDF, certifying that the information is accurate and complete, and they must also include supporting documentation, as applicable. However, SPA will accept any form of electronic signature method that is in alignment the subrecipient’s institutional practices to meet the NIH requirements. They do not have to use DocuSign, but they must use an
electronic signature. Wet signatures, typed signatures, and pictures of signatures will not be accepted.; Please read the FAQs for more details. Feel free to reach out to your SPA Project Officer and myself with any questions.; Stephanie F. Additional Information: Opportunity related to NIH Other Support; I am writing to inform you that NIH recently developed a way for you to create your Other Support forms using SciENcv. It is not yet available to the research community. However, they are looking for volunteers to work directly with them to test it out. They want faculty and research administrators, but they especially want faculty from different scientific disciplines and career stages; This is a great opportunity for you to directly provide them with feedback. I do not yet know what kind of functionality they built in, but I do know the purpose of SciENcv is to streamline the creation of these forms and reduce burden. I also know that researchers will have the ability to electronically...
sign their Other Support forms in SciENcv (rather than use DocuSign). **Here are the details:**

**When:** Between April 4-15 (projected), approximately 45 minute sessions;  
**Who:** Faculty and Research Administrators, with priority to Faculty from different disciplines, career stages;  
**What:** Test the new SciENcv interface and NIH Other Support forms, and provide feedback directly to the developers and NIH staff; Email your interest to me, and I will share your contact information with the person coordinating these efforts who is in direct contact with the SciENcv team. They will reach out directly to you to schedule a testing session.; If you are interested but not able to participate during the testing window, your name will be added to the list for future opportunities.

This is not the first and only time we will be able to test SciENcv as they make improvements to the system and further develop it.; I learned of this opportunity through the Federal Demonstration Partnership (FDP), whose mission is to identify ways to reduce administrative burden for researchers receiving federal funding. Columbia is a member and very active in the FDP, and I am on the FDP Executive Committee.; Thank you.; [brought to our attention by]: Stephanie F. **Additional Information:** NIH recently released new clarifications for the Other Support format pages and Biographical Sketches. Key clarifications include:

- Signatures are not required on the Other Support format pages until January 25, 2022, regardless of whether you use the old or new formats.
- Completed support from the last three years is no longer required in Other Support. Only include *active and pending* projects. Awardees must report *significant changes* in Other Support in RPPRs, such as a change in status of previously reported current or pending projects, or access to a new resource/in-kind contribution.
- Only unique, high-value materials and data received *within the past three years, that are still in use*, must be included as in-kind contributions in Other Support.
- Only *current* positions and scientific appointments are required in the Biosketch. Applicants may choose to include past appointments that they wish to highlight.
- Consulting agreements must be included in Other Support only when the PD/PI or other senior/key personnel will be conducting research as part of the consulting activities. Non-research consulting activities are not Other Support.

Rather than simply updating a previously submitted Other Support form, we strongly recommend that you create a new form from scratch, to ensure that you are able to implement all changes.

To assist you further, we created additional FAQs based on questions collected from researchers and administrators at Columbia University. They are meant to supplement NIH’s FAQs. In addition, we will be hosting monthly webinars to walk you through the forms. Stay tuned for a separate communication with the webinar schedule.

**NOT-OD-21-073** - Upcoming Changes to the Biographical Sketch and Other Support Format Page for Due Dates on or after May 25, 2021;  
**NOT-OD-19-114** - Reminders of NIH Policies on Other Support and on Policies related to Financial Conflicts of Interest and Foreign Components; It is important for all NIH applicants and awardees, including PIs, senior/key personnel, and grants administrators, to read it in its entirety.; The updated Biographical Sketch and Other Support format pages will be required for applications and Research Performance Progress Reports (RPPRs) submitted for due dates on or after May 25, 2021. It is advisable that you bookmark these pages: NIH Biosketch format pages and instructions and FAQs; NIH Other Support format pages and FAQs; Please note: PIs and senior/key personnel will be required to certify that their Other Support information is true, complete and accurate to the best of their knowledge.; Our office is in the process of reviewing the updated forms and instructions. We are scheduling webinars in the coming weeks to provide an overview of these changes. NIH is also planning to release additional resources and training materials in the coming weeks. If you are in the process of creating either a Biosketch or Other Support format page for applications and RPPRs due on or after May 25, 2021; Updated Biosketch resources, including FAQs and sample Biosketch format pages can be found here.; Updated Other Support resources, including FAQs and sample Other Support format pages can be found here.; One of the most important changes in the Biosketch instructions is Section B: “List in reverse chronological order all positions and scientific appointments both domestic and foreign, including affiliations with foreign entities or governments. This includes titled academic, professional, or institutional appointments whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary).”; This is critical. The senior/key personnel, and mentors for training grants, have to include all positions and appointments, not
just select ones, or ones relevant to the proposal. It’s not just the heading of Section B that changed, it’s the instructions to Section B.; The changes as outlined in the announcement are as follows:

<table>
<thead>
<tr>
<th>Format Page</th>
<th>Changes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biographical Sketch Format Page</td>
<td>Section B ‘Positions and Honors’ has been renamed ‘Positions, Scientific Appointments, and Honors’.</td>
</tr>
<tr>
<td></td>
<td>For the non-Fellowship Biosketch, Section D. has been removed. For the Fellowship Biosketch, Section D has been updated to remove ‘Research Support.’ As applicable, all applicants may include details on ongoing and completed research projects from the past three years that they want to draw attention to within the personal statement, Section A.</td>
</tr>
<tr>
<td>Other Support Format Page</td>
<td>The format page has been re-organized to separate funded projects from in-kind contributions.</td>
</tr>
<tr>
<td></td>
<td>Signature block added, for Program Director/Principal Investigator or Other Senior/Key Personnel to certify the accuracy of the information submitted. Each PD/PI or senior/key personnel must electronically sign their respective Other Support form as a PDF prior to submission.</td>

Additional Information: COVID-19 Updates for the Research Community: January 3, 2022; Dear Members of the Research Community, We write to highlight key COVID-19 updates for the research community: First, as stated in the Provost’s (Update on the Start of the Spring Semester) December 22 message, faculty, researchers, staff, and students involved in research, administration and all other non-instructional activities should work remotely, if feasible, during the first two weeks of January. All in-person, indoor gatherings of any kind are prohibited during the first two weeks of January.; Second, research is not being paused or suspended at this time. However, to the extent feasible, research activities, including human subjects research, should be conducted virtually. Individual units and principal investigators may determine which team members are required to be in person versus remote. They should also take into account the needs and safety of research participants and study-specific requirements. As always when making such determinations, a precautionary approach is warranted and strongly recommended.; Third, the Research page of the University's COVID-19 Resource Guide contains updated information specific to the research community. This page includes a new FAQ for principal investigators regarding steps to consider in the event that a team member tests positive for COVID-19.; Finally, below are important reminders: [1] If you are eligible, get a vaccine booster as soon as possible. Upload documentation no later than January 31, 2022 (details on upload to follow); [2] Wear a properly-fitting face covering for all indoor activity on campus and outdoors in large gatherings; [3] Comply with University testing requirements, including new recommendations as of December 29, 2021. Those who are returning to campus will please note that: all faculty and staff that have traveled, have been away for a period of time, or have participated in social events and gatherings are strongly recommended to get a PCR test from a local testing site 48 hours prior to returning to University facilities. There is no need to provide proof of this test, unless it is positive.; [4] All visitors, including those who enter any campus facility for any period of time, must be vaccinated and show proof of vaccination as part of visitor attestation. This vaccination policy does not apply to individuals accessing a facility for research screening or research participation.; [5] For in-person human subject procedures, research participants must comply with these guidelines and complete an attestation before entering campus spaces. The attestation is available in English and Spanish. As noted above, the visitor vaccine requirement is not applicable to research participants.; [6] If you have COVID-19 symptoms or test positive for COVID-19, you must stay home and isolate as directed by your provider or contact tracing outreach. If you test positive, irrespective of location of the testing, please notify covidtesttrace@columbia.edu.; [7] Close contacts who are fully vaccinated do not have to quarantine and can continue to work in-person, but should test between 5-7 days of exposure/notification.; [8] The Research Ramp-up Ambassadors continue to be a resource for individuals with concerns about on-campus research activities. ;If you have questions, please feel free to send them to COVID19_research@columbia.edu; As always, we thank you for your continued care and commitment to safety and to our research enterprise, and we look forward to a productive 2022.; Sincerely, Jeannette M. I copied the notice, and highlighted the key points below.; Purpose: The NIH remains firmly committed to supporting the biomedical research enterprise as the nation implements the President's Guidelines for Re-Opening America Again. The purpose of this Notice is to extend the guidance provided earlier NOT-OD-22-046 for applicants preparing applications for the January 2023 Council round, beginning with the May 25, 2022 due date.; Reviewers will continue to receive instructions to assume that constraints arising from the COVID-19 pandemic (e.g., lab occupancy restrictions, declines in patient accrual, etc.) will be resolved during the project period and thus should not affect their scores.; Therefore, NIH grant applications should NOT include contingency or recovery plans for problems resulting from the COVID-19 pandemic. However, applicants may address effects due to the pandemic on productivity or other scoreable issues in their Personal Statement in the NIH Biosketch; Reviewers will be instructed to take these pandemic-related circumstances into account when assessing applicants’ productivity and other score-driving factors.; As with previous instructions, if needed, NIH staff will request and assess plans to resolve specific problems arising from the COVID-19 pandemic prior to funding.; Inquiries, Please direct all inquiries to: NIH Review Policy Officer; ReviewPolicyOfficer@mail.nih.gov ; [brought to our attention by] Stephanie F. Additional Information: Dear fellow members of the Columbia community, We are writing to provide updates on our December messages regarding Columbia University COVID-19 policies and procedures. We are carefully monitoring the COVID-19 pandemic status in the New York City metro area and among our affiliates. While Columbia is doing its own asymptomatic testing on campus, we also urge you to report any outside positive test results you do receive to covidtesttrace@columbia.edu so that we have an accurate picture of COVID-19 positive cases amongst our affiliates and can provide you with information on available resources. As you are aware, the Omicron variant has been shown to be more transmissible than prior virus variants. However, there are reassuring data suggesting that this variant causes less severe illness and that our vaccines, and particularly once boosted, also protect against symptomatic and severe COVID-19. We have three important updates to share with you:

Changes in isolation and quarantine guidelines: New York State, acting on guidance from the CDC, has modified isolation and quarantine as follows:

Isolation: All individuals who test positive for COVID-19 can end their isolation after 5 days if they are asymptomatic. Day 0 is considered the first day of symptom onset and/or the day of a positive test result.

Quarantine: Individuals who are fully vaccinated and have received booster dose, do not need to quarantine. Such individuals are recommended to get tested on day 5-7 after last exposure.

Individuals who are not vaccinated or not fully vaccinated or are eligible for a booster but have not yet received one should quarantine for 5 days – where day 0 is the last day of exposure – provided symptoms do not appear. Such individuals are recommended to get tested on day 5-7.

Full details can be found on the New York State Department of Health website.

Changes in gathering/events and dining policies: In addition to the policies that were announced on December 20 and December 22, Columbia-related non-academic gatherings on and off campus are prohibited until the end of January. In all dining halls, only grab-and-go food will be available for the first week of the undergraduate return beginning January 18th. All affiliates are strongly urged to avoid indoor social gatherings wherever they are located, unless aware of vaccination and testing status of all attendees. Masking in these locations is also strongly recommended as well as in crowded outdoor social gatherings. Masking indoors at Columbia will continue through March 31, and we urge wearing of masks indoors in all public settings as well as in crowded settings when outdoors. Columbia athletic events will permit no fans for the first two weeks of January.

Uploading vaccine and booster information: Next week, we will provide you with the links to be able to upload your booster information. New hires seeking to upload any vaccine (not booster) information may do so on our ReopenCU website. Students can currently upload their vaccine and booster information. For CUIMC students go here. For all other students, go here.

Sincerely,
Donna Lynne; Senior Vice President and Chief Operating Officer, CUIMC; University COVID Director; Gerry Rosberg; Senior Executive Vice President

**Additional Information:** NHLBI Funded Training and Mentoring Summer Institute with Possibility for Seed Funding; My name is Jenna Noray and I am the Program Manager for the Program to Increase Diversity Among Individuals Engaged In Cardiovascular Health-Related Research (PRIDE-CVD). PRIDE-CVD is a research career advancing opportunity sponsored by the National Heart, Lung, and Blood Institute (NHLBI) since 2006 at the State University of New York Downstate Health Sciences University at Brooklyn, NY. This mentored research program addresses the difficulties experienced by junior investigators in establishing independent research programs and negotiating through the academic ranks. The desired outcome is to accelerate the path to become independent investigator and improve the recruitment and retention of faculty from disabled, disadvantaged, and underrepresented minority groups in the study of heart, lung, and blood disorders.; The Summer Institute program provides an intensive didactic and mentored research training program in cardiovascular health disparities, grantsmanship and career development skills. The goal of this multidisciplinary research training program is to inspire scholars to conduct research in cardiovascular health disparities by employing techniques at the forefront of the field.; I am writing to you today on behalf of the PRIDE-CVD Director, Dr. Mohamed Boutjdir, to announce that our program is open for applications, and we are currently recruiting for Summer 2022's Cohort 10 which begins on June 12th, 2022. Additional Information: Related Announcements: OTA-22-006 - NIH All of Us Engagement, Communications, and Enrollment Partners Other Transactions (OT) Research Opportunity Announcement (ROA); The All of Us Research Program is a historic effort to gather data from at least 1 million people, with the goal of accelerating health research and medical breakthroughs, and enabling individualized prevention, treatment, and care. The program is creating a national research resource to inform thousands of studies, covering a wide variety of health conditions. Researchers will use data from the program to learn more about how individual differences in lifestyle, environment, and biological makeup can influence health and disease. The purpose of this announcement is to fund organizations who can help All of Us build its cohort of volunteers who reflect the rich diversity of the United States and are actively engaged as partners. These funded organizations will help design and implement strategies to raise awareness of the program through community and health care provider organizations, drive increased enrollment of participants, foster regular communication with participants, and engage the research community to use the data being gathered.

**Additional Information:** Many different factors—biological, social, and environmental—affect human health. It is also increasingly recognized that interactions between these factors play a significant role in prevention, pathophysiology, and management of human disease. Sex/gender differences, being a member of a sexual and/or gender minority group, and race/ethnicity are among those factors with a significant impact on human health and disease. However, consideration of these factors in research projects remains limited.

Additional Information: Hello, all. With the standard due date coming up for NIH Research Career Development awards (K-awards), due Monday, February 14th (moved from the 12th since that falls on a weekend), our office has received a lot of questions about the requirements for Other Support forms for mentors and co-mentors, given the new NIH Other Support requirements that took effect January 25, 2022; The instructions for Current & Pending Support (which is what it is called for mentors in K-awards, as opposed to Other Support) remain unchanged, with the exception of the change from ‘annual direct costs’ to ‘total costs’, and the addition of the electronic signature.; There is still a 3-page limit for each mentor, and it is limited to the mentor’s/co-mentor’s current and pending research support relevant to the candidate’s research plan. In other words, the mentor includes selected projects and in-kind contributions in their Current & Pending Support that are relevant to the candidate’s research plan. In addition, “percent effort/person months” and “overlap” should not be included. See page 61 of the new FORMS-G instructions for K-awards, which outlines what should be included in Current & Pending Support.; The new Other Support format pages should be used to create Current & Pending Support in K-award applications. Do not reuse and recycle old Other Support forms.; We recommend the use of DocuSign to meet NIH’s electronic signature requirement. User guides and training videos on the use of DocuSign are on our website here.; NIH will request full Other Support forms, to include all resources made available to a researcher in support of and/or related to all of their research endeavors, during Just-in-Time (JIT), upon request.; Should you have any questions, please reach out to your SPA Project Officer.; *Important* Are you ready for the new NIH Biosketch and

The Greenwall Foundation Faculty Scholars Program; Internal Deadline – 9:00 a.m. on Friday, August 19; Internal Application and Instructions - Internal Applications must be completed on our InfoReady site at https://columbia.infoready4.com/#manageCompetitionsDetail/1877030; Please click the “Columbia University Login” button to view instructions and begin your application.; What: The Greenwall Faculty Scholars Program in Bioethics is a career development award to enable junior faculty members to carry out innovative bioethics research. It supports research that goes beyond current work in bioethics to help resolve pressing ethical issues in clinical, biomedical, and public health decision-making, policy, and practice, and creates a community that enhances future bioethics research by Scholars and Alumni/ae.; Each year, the Foundation selects approximately three Greenwall Faculty Scholars to receive 50 percent salary support for three years to enable them to carry out a specific research proposal and develop their research program. The Foundation provides $5,000 each year for limited project support and travel (no indirect costs are provided for these items); Approximately twelve applicants submitting letters of intent will be invited to submit full applications, which will be due January 9, 2023. Approximately six applicants will be invited to in-person interviews in March 2023. Note as of the last three award cycles three applicants have been awarded each year.; Program Emphasis: Demonstrated publication of bioethics research is given great weight, applicants who have not yet published an innovative bioethics article will not be successful.; In the case of proposals to carry out an empirical study of a topic that has a bioethics component, the most successful applicants have conducted enough empirical research to be able to discuss what conceptual or normative bioethics issues they will focus on and will need to summarize the methods for the empirical part of the project as well. Applicants who propose to carry out empirical work on a bioethics issue, without a strong conceptual framework, normative analysis, and methods are unlikely to be successful.; Who: Applicants must meet the following eligibility requirements.; Applicants must hold a full time, tenure-track faculty appointment as Assistant Professor.; The appointment must allow for at least 50 percent of the applicant’s effort to be dedicated to research.; Priority will be given to applicants whose research will have an impact on clinical, biomedical, and public health decision-making, policy, and practice; and who will make important contributions to the field of bioethics over their careers.; When: Internal Deadline – Friday, August 19 (9:00 a.m.); Sponsor Deadline – Monday, September 19; How: To apply, please view the internal application and instructions on our InfoReady site at: https://columbia.infoready4.com/#manageCompetitionsDetail/1877030; Summary of Previous Awards: 77.7% of awardees have a background overall in Health, Policy, and Ethics. While the majority hold a background in Health, Policy, and Ethics, 44.4% of awardees have a background in Philosophy and humanistic approaches.; Questions: Casey Rollins at limitedsubmissions@columbia.edu; Research Initiatives; Office of the Executive Vice President for Research; Columbia University in the City of New York; To view current limited submission programs please visit: https://columbia.infoready4.com/#limitedsubmissions; COLUMBIA | RESEARCH

**Additional Information:** Funding opportunity for CUIMC postdoctoral fellows (neurosciences field);
Dear Researcher, The Warren Alpert Foundation recently announced that the nomination period for the 5th Annual Warren Alpert Distinguished Scholars Fellowship Award is open; The Warren Alpert Distinguished Scholars program will support individual scientists of exceptional creativity who have an MD or PhD degree (or both) and who have completed a minimum of three years of a post-doctoral fellowship by July 1, 2023 in the field of neurosciences at a medical school, research institute or academic hospital located in the United States. These awards are given as transitional post-doctoral awards for recipients as they advance to become full time faculty members at the Assistant Professor level or higher. The medical school nominating each scholar will be awarded $200,000 annually for two years to cover their salary, lab costs, and related expenses. Up to fifteen percent of indirect costs is included in the $200,000. All applicants are required to provide 75% effort.; The dean or academic officer of each medical school, academic hospital or research institute is invited to nominate one candidate. Scholars will be chosen on the basis of the success in their prior post-doctoral work as well as in the importance and creativity of their continued work. The Foundation expects to make five awards in 2023. The Foundation will select recipients for awards using an objective and nondiscriminatory selection process based upon criteria including a review of each applicant’s scholastic achievements, academic records, scientific proposal and submitted letters of recommendation.; Postdoctoral fellows at CUIMC can submit their application for the internal competition at https://columbia.infoready4.com/#competitionDetail/1881422 by October 13, 2022.; Please direct any questions to Claudia Cosentino at cc3704@cumc.columbia.edu (subject line: Warren Alpert Fellowship).

a single internal competition in the fall annually to select nominees for both submission cycles.; **Timeline:** Columbia solicits one-page concept papers in the fall.; Selected concept papers are discussed on a counseling call with the Keck Foundation between January 1 – February 15. PIs do not participate in this call.; Based on the Foundation’s feedback, four concepts are selected to go to Phase I submission (two in May and two in November); **Program Priorities:** Keck awards funding to universities and institutions nationwide for projects that: Focus on important and emerging areas of basic research; Have the potential to develop breakthrough technologies, instrumentation, or methodologies; Are innovative, transformative distinctive and interdisciplinary; Demonstrate a high level of risk due to unconventional approaches, or by challenging the prevailing paradigm; Have the potential for transformative impact, such as the founding of a new field of research, the enabling of observations not previously possible or the altered perception of a previously intractable problem; Are too high-risk or preliminary to likely receive funding from public funding agencies; Demonstrate that private philanthropy generally, and the W. M. Keck Foundation in particular, is essential to the project’s success; Keck will **not** fund proposals that could be considered by federal agencies such as NIH, NSF or DoD; Keck will **not** fund proposals that are oriented to a specific disease, and specifically states that it will not fund “clinical or translational research, treatment trials or research for the sole purpose of drug development.”; **Who:** The following eligibility terms apply: Applicants must hold a full-time faculty appointment at Columbia University as an independent researcher. Postdoctoral researchers are **not** eligible.; **When:** **Internal deadline:** 9:00 a.m. on Friday, October 28, 2022; **How:** Please submit the below: One-page concept paper with the below information: Project title; Full name of Principal Investigator(s); Area of emphasis: Medical research or Science and Engineering research; An overview of the proposed project emphasizing any unique aspects and pilot studies; A description of the methodologies and key personnel; A brief justification of the need for Keck Foundation support; An estimated budget broken down, if possible, by major areas, e.g., personnel, equipment, consumable supplies, etc. (budgets can be rough approximations at this stage): If possible, within the 1-page limit, the authors may add other details (e.g., background to put the research into perspective, description of the institution’s prominence in the field). Avoid illustrations in these single-pagers – the researchers will need all the room for text. If a reference is necessary, abbreviate it as (Science, 323, 45, ’11). DO NOT USE (Jones et al., 2011); CV(s): Proof that conventional funders (primarily relevant government agencies such as NIH, NSF, DOE) previously rejected the project and are unlikely to reconsider the project.; List of pending applications to any federal agencies and confirmation there is no overlap. **There must be no pending application for the same proposal to a relevant federal agency** at the time of either internal submission or actual submission to Keck.; Information on at least two other groups that are pursuing comparable or related work, and explanation on how this project differs from theirs. If there are not significant differences from the research being conducted by other groups, the project should not be proposed to Keck.; For additional information, please contact Dimitra Koutsantoni at dk2617@columbia.edu or 212-851-9924.

**Additional Information:** The Department of Health and Human Services (HHS), including National Institutes of Health (NIH), operates under the Further Extending Government Funding Act (Public Law 117-70) signed by President Biden on December 3, 2021. This Act (CR) continues government operations through February 18, 2022 at the FY 2021 enacted level, with no reduction. Continuing the procedures identified under [NOT-OD-21-058](http://grants.nih.gov/grants/guide/notice-files/NOT-OD-21-058.html) and consistent with NIH practices during the CRs of FYs 2006 - 2021, NIH Institutes and/or Centers may, at their discretion, issue non-competing research grant awards at a level below that indicated on the most recent Notice of Award. Upward adjustments to awarded levels will be considered after FY 2022 appropriations are enacted, but NIH expects institutions to monitor their expenditures carefully during this period. All legislative mandates that were in effect in FY 2021 (see [NOT-OD-21-056](http://grants.nih.gov/grants/guide/notice-files/NOT-OD-21-056.html)) remain in effect under this CR, as well as the salary limitation set at Executive Level II of the Federal Pay Scale (see [NOT-OD-21-057](http://grants.nih.gov/grants/guide/notice-files/NOT-OD-21-057.html)) and the Ruth L. Kirschstein National Research Service Award predoctoral and postdoctoral stipend levels and tuition/fees as described in [NOT-OD-21-049](http://grants.nih.gov/grants/guide/notice-files/NOT-OD-21-049.html).

Policy and Regulation on ClinicalTrials.gov Registration and Reporting | grants.nih.gov

Additional Information: Last week, the NIH implemented new system validations for Research Performance Progress Reports (RPPR) for clinical trial registration and results reporting. RPPRs that have associated clinical trials that are non-compliant with these requirements will receive errors preventing submission of the RPPR. See NOT-OD-22-008 for more details.; As a reminder, failure to register or report results data for an Applicable Clinical Trial (ACT) as per FDAAA 801 and the Final Rule or the NIH Policy on the Dissemination of NIH-Funded Clinical Trial Information can result in immediate suspension or termination of funding, monetary civil penalties of up to $10,000 per day of non-compliance, criminal or civil prosecution, and/or a permanent notice of non-compliance posted on the ClinicalTrials.gov record for a study.; Of note, the FDA issued its first Notice of Noncompliance to an individual investigator conducting a trial sponsored by an academic institution. The Principal Investigator (PI) failed to submit required results data to ClinicalTrials.gov. As a result of this noncompliance, the ClinicalTrials.gov record for the study will be permanently marked with and searchable by the "FDAAA 801 Violations" field, even though results were posted a day after the Notice was issued.; The requirements for registration and results reporting are as follows: Applicable studies must be registered no later than 21 days after enrollment of the 1st participant (i.e., date of when the 1st participant signs a study consent form); Results information for applicable studies must be submitted to ClinicalTrials.gov no later than one year after primary completion date (with limited exceptions) for the primary outcome measure, and one year after the study completion date for all other outcome measures, including safety data.; If you require assistance with ClinicalTrials.gov registration or results reporting, please contact the University’s system administrators at ClinicalTrialsGov@cumc.columbia.edu. When the public health emergency was first declared, NIH, working with OMB and HHS, quickly identified a long list of flexibilities to support the research community. The list has evolved since the pandemic began, so we would like to take this opportunity to remind the community of many of the current flexibilities we have in place.

NIH Extramural Nexus, Clarifying NIH’s Approach to Granting ESI Extensions

Additional Information: By Mike Lauer; There has been a lot of focus on early stage investigator (ESI) extension requests in the community recently. And we certainly understand why. The experience of the COVID-19 public health emergency has brought into sharp focus that the effects of the pandemic on careers and life in general may continue for years to come. This fact has led us to revisit our approach to granting ESI extension requests.

Additional Information: Please see below article from today’s NIH Extramural News on new NIH administrative supplements to support diversity mentorship. You can also read the article here if you’re having trouble seeing it below. [brought to our attention by Stephanie Scott]; NIH Extramural Nexus – 2021; Posted: Wednesday, February 9, 2022 by Marie A. Bernard; Subject: New NIH Administrative Supplements Available to Support Diversity Mentorship; Marie A. Bernard, M.D., NIH Chief Officer for Scientific Workforce Diversity; I am pleased to announce the availability of a new NIH administrative supplement that recognizes the crucial role outstanding mentors play in fostering future leaders in the biomedical research enterprise.; Qualified investigators can now submit proposals in response to the Chief Officer for Scientific Workforce Diversity (COSWD)-led xxx. Notice of Special Interest (NOSI) NOT-OD-22-057: Administrative Supplements to Recognize Excellence in Diversity, Equity, Inclusion, and Accessibility (DEIA) Mentorship. *Proposals are due by April 7, 2022.* Mentorship is a critical part of recruiting and retaining an inclusive scientific workforce. Evidence suggests mentorship helps foster scientific identity and career progression in science, technology, engineering, mathematics, and medicine (STEMM) disciplines. For example, research shows that grant-writing mentorship for early-career biomedical investigators from underrepresented groups can foster increased publication productivity, a key contributor to scientific career advancement.; Based on this evidence, one goal of my office is to support and amplify the impact of programs that develop scientific talent through training and mentorship. Thus, this new NOSI is part of our commitment to enhancing mentorship within NIH-supported research, with an emphasis on scientists from underrepresented groups.; The participating NIH Institutes and Centers will supplement the existing awards of scientists who have demonstrated a commitment to exceptional training and mentorship, especially to individuals from groups identified as underrepresented in the biomedical sciences.; Supplements are available for various grant types, including career development, training, cooperative, and Research Project Grants (R01). They will provide up to $250,000 in direct costs, not to exceed the direct costs of the parent award. Investigators may use the funds to perform additional research within the parent grant’s scope, develop curricula or training activities to strengthen mentor training, or help foster the research career development of additional students, post-doctorates, or other trainees.; The NIH has an array of mentorship initiatives.
and resources, and I am excited about this addition to the agency’s offerings. I encourage all eligible investigators to take advantage of this opportunity to be recognized for outstanding mentoring, and for promoting inclusive excellence.

**Link(s)**: https://grants.nih.gov/grants/guide/pa-files/PAR-22-129.html

**Additional Information**: The National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) announces a program that provides NIDDK-supported K01, K08, K23, and K25 recipients the opportunity to apply for Small Grant (R03) support during the latter years of the award period of their K award. Through the use of this mechanism, the NIDDK is seeking to enhance the capability of its K01, K08, K23, and K25 award recipients to conduct research as they complete their transition to fully independent investigator status. The R03 grant mechanism supports different types of projects, including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. The R03 is, therefore, intended to support research projects that can be carried out in a short period of time with limited resources and that may provide preliminary data to support a subsequent R01, or equivalent, application.

significant increase in the COVID-19 data available in its precision medicine database, adding survey responses from more than 37,000 additional participants, and virus-related diagnosis and treatment data from the nearly 215,000 participant electronic health records (EHRs) that are currently available. The program has also expanded its collection of wearable data to now include 11,670 paired participant Fitbit records, a 42% increase from its last update, making this one of the largest publicly-available sets of digital health technology data available.; Researchers interested in exploring the data and conducting analyses can apply for access after their institutions have signed a data use agreement with the program. At this time, any U.S.-based academic, nonprofit, or health care organization can enter into a data use agreement with the program.; The program anticipates releasing the first set of genomic data in the next refresh, anticipated this winter.

**Additional Information:** Call for Faculty Participation: DSI Scholars Program (Deadline: September 3); Columbia University Data Science Institute; https://datascience.columbia.edu/; DSI Scholars Program; Call for Faculty Participation | Fall 2022 Cohort; Deadline to Apply: September 3rd, 2022; Application Form Here; About; The Data Science Institute is calling for faculty submissions of research projects for the Fall 2022 sessions of the Data Science Institute (DSI) Scholars Program. The goal of the DSI Scholars Program is to engage undergraduate and master students to work with Columbia faculty, through the creation of data science research internships. Last year, we worked with 30 projects and received more than 250 unique applications from Columbia Students. The program’s unique enrichment activities foster a learning and collaborative community in data science at Columbia. Apply here, and find more details here.; Details & Support; Call for Faculty Participation --- DSI Scholars Fall 2022 (cu-dsi-scholars.github.io) ; Call for Faculty Participation - DSI Scholars Fall 2022; Funding support: For selected projects, the DSI will provide matching funds of up to $2,500 per project for internship-supporting stipends. Approximately 10 such stipend funds will be awarded. This fund is expected to be a fraction of a full stipend that is appropriate for the time and effort required by the research project. The DSI Scholars program recommends that the PI/lab engage DSI scholars approximately 8 hours a week during the academic semester and consider a full-time or part-time research internship during summer. Allocation of funds will be made via a first-come-first-serve need-based process, with efforts to balance allocation across disciplines, to prioritize new PIs/projects and new student scholars, and support novel interdisciplinary research. For more details on how projects are selected and information about whether your project might be appropriate for the Scholars Program (versus another DSI program), please see our PI FAQs; Administrative support: The DSI will collect faculty-submitted internship positions and create an umbrella application page to solicit student applications. The collected applications for each position will be compiled and sent to the hosting faculty/center/lab for review. The faculty/center/lab will then review, identify and notify the Scholars for their own
projects. Funded projects will receive additional support through the coordination of stipends with Student Financial services. **Intellectual support via various DSI Scholars enrichment activities:** The DSI education committee will organize various enrichment activities for the DSI Scholars Program, including speaker series, mini workshops, and peer research presentation meetups. These activities are contingent upon student interest and participation. In addition, all DSI Scholars (receiving matching funds or not) are invited to present their research during a DSI poster session at DSI Town Hall in the Fall semester.

**Questions?** Get full details here or see our PI FAQ! A video recording from a previous online information session can be found here, and slides from the same event can be found here. **Additional Information:** The NIH Common Fund Harnessing Data Science for Health Discovery and Innovation (DS-I Africa) Program issued new funding opportunity announcements (FOAs) to support a Research Education Program and Partnership for Innovation Research Projects. The Research Education Program RFA-RM-22-022 supports research education activities in the mission areas of the NIH. The overarching goal of this program is to support educational activities that complement and/or enhance the training of a workforce to meet the biomedical, behavioral, and clinical research needs of the DS-I Africa program. The Partnership for Innovation Research Projects RFA-RM-22-023 are meant to support discrete research projects led by investigators in Africa to expand the DS-I Africa consortium. The goal of DS-I Africa is to spur new health discoveries and catalyze innovation in healthcare, public health, and health research on the continent through application of data science.; A [pre-application webinar](https://grants.nih.gov/grants/guide/rfa-files/RFA-RM-22-022.html) will be held for potential applicants on July 6, 2022, at 9:00AM EST. Additional Information: Last week, NIH issued announcement NOT-OD-21-180, which provides additional guidance related to COVID-19 for applicants preparing applications for the May 2022 Council round, beginning with the September 25, 2021 due date for Spring 2022 initial peer review meetings. Please see text of the announcement below, especially highlighted section.; Purpose: The NIH remains firmly committed to supporting the biomedical research enterprise as the nation implements the President's Guidelines for Re-Opening America Again. The purpose of this Notice is to clarify the guidance provided earlier NOT-OD-21-026, for applicants preparing applications for the May 2022 Council round, beginning with the September 25, 2021 due date for Spring 2022 initial peer review meetings.; Reviewers will continue to receive instructions to assume that constraints arising from the COVID-19 pandemic (e.g., lab occupancy restrictions, declines in patient accrual, etc.) will be resolved during the project period and thus should not affect their scores.; Therefore, NIH grant applications should NOT include contingency or recovery plans for problems resulting from the COVID-19 pandemic. However, applicants may address effects due to the pandemic on productivity or other scoreable issues in their Personal Statement in the NIH Biosketch. Reviewers will be instructed to take these pandemic-related circumstances into account when assessing applicants’ productivity and other score-driving factors.; As with previous instructions, if needed, NIH staff will request and assess plans to resolve specific problems arising from the COVID-19 pandemic prior to funding. ; [brought to our attention by] Stephanie F. **Additional Information:** NIH-Wide Strategic Plan for FY 2021-2025 Now Available; We are pleased to announce that the NIH-Wide Strategic Plan for Fiscal Years (FYs) 2021-2025 is now available. This updated plan articulates NIH’s highest priorities over the next 5 years, outlining our vision for the future direction, capacity, and stewardship of biomedical and behavioral research.; The plan is organized around a framework of three key objectives: [1] Advancing Biomedical and Behavioral Sciences; [2] Developing, Maintaining, and Renewing Scientific Research Capacity; [3] Exemplifying and Promoting the Highest Level of Scientific Integrity, Public Accountability, and Social Responsibility in the Conduct of Science.; The plan weaves five cross-cutting themes across these objectives, centered around minority health and health disparities, women’s health, public health challenges across the lifespan, collaborative science, and data science. The plan also mentions several achievements made during the previous FY 2016-2020 plan, but please recognize that this plan is not meant to describe everything NIH does.; As Dr. Francis Collins, the NIH Director, notes in the opening statement, “NIH will [invest] efficiently and effectively in a wide range of basic, translational, clinical, and applied research, while at the same time supporting the workforce and infrastructure required for a sustainable research enterprise. As outlined in this Strategic Plan, this approach will enable NIH to build a solid foundation of fundamental knowledge about living systems that will serve to accelerate research aimed at addressing our most pressing health needs.”; We appreciate members from the research community, professional societies, advocacy groups, and the public who worked with us and provided feedback throughout the process to develop this plan.

### Additional Information:

NSF announced today a number of system enhancements for proposals submitted in Research.gov and FastLane, and upcoming revisions to the NSF-approved Biographical Sketch and Current and Pending Support format pages. In addition, NSF announced significant improvements to the NSF Funding Opportunity Search functionality with enhanced features to help you identify opportunities quickly and easily. Please see below for the details. I highlighted in yellow a few key points. - New Proposal Functionality, NSF Website Enhancements, and Updates to the Biographical Sketch and Current and Pending Support Formats; Dear Colleagues: The National Science Foundation (NSF) has enabled a number of enhancements for proposals submitted in Research.gov, FastLane, and Grants.gov. In addition, the updated NSF-approved biographical sketch and current and pending support SciENcv and fillable PDF formats that fall under the revised Proposal & Award Policies & Procedures Guide (PAPPG) NSF 22-1 will be available to preview by September 17, 2021.; We are also excited to announce enhanced NSF Funding Opportunity Search functionality and revamped program pages on nsf.gov and beta.nsf.gov, the new version of the NSF website. As NSF builds its new nsf.gov website in small, iterative pieces using the https://beta.nsf.gov/ platform, we are not simply moving existing content from nsf.gov to the new site. Rather, the new website will improve how information is presented for use by various audiences including prospective proposers, grantees, and the general public.; Here’s what to know.;

### Research.gov Proposal Submission System Enhancements:

Research.gov proposal features continue to expand to support the transition of all proposal preparation and submission functionality from FastLane to Research.gov by a target date of December 31, 2022. Many NSF funding opportunities are supported in Research.gov and clearly specify whether submission via Research.gov is available or required.; Effective August 30, 2021, Conference and Ideas Lab proposal types, renewal and accomplishment-based renewal submission types, and preliminary proposals for Ideas Lab solicitations are all now available for submission in Research.gov. FastLane must be used to submit preliminary proposals for proposal types other than Ideas Lab until that functionality is available in Research.gov.; The proposal preparation landing page has been revised, and Principal Investigators will now first select the proposal submission type from the drop-down options and then will follow the proposal setup wizard to initiate a new proposal. In progress and submitted proposals are accessible from the tiles on the revised proposal preparation landing page, after first selecting the submission type from the drop-down options.; New automated compliance
checks and associated error and warning messages for the enabled proposal and submission types were also implemented. Error messages will prohibit proposal submission to NSF, whereas warning messages still permit proposal submission.; New Frequently Asked Questions (FAQs) were added to the Research.gov About Proposal Preparation and Submission page, and the Proposal Submission Capabilities page has been updated to reflect the latest development updates.; All supported proposal and submission types as well as associated compliance checks are also enabled in the Research.gov Proposal Preparation Demo Site.; Refer to the PAPPG NSF 20-1 for current proposal requirements. Guidelines in the revised PAPPG NSF 22-1 will apply for proposals submitted or due on or after October 4, 2021.; NSF-approved Biographical Sketch and Current and Pending Support Format Updates; Current and Pending Support Fillable PDF Updates; Based on feedback from the research community and NSF Program Officers, NSF has incorporated functionality as of August 30, 2021, in FastLane and Grants.gov to remove any pages which do not contain data entered by users (i.e., blank pages) from the NSF-approved current and pending support fillable PDF. This trimming functionality will be integrated in Research.gov on October 4, 2021, in coordination with implementation of the revised PAPPG NSF 22-1 for proposals submitted in Research.gov and project reports submitted in the Research.gov Project Reporting System.; The trimming service only applies to the NSF-approved current and pending support fillable PDF and not to any other uploaded PDFs. Current and pending support PDFs generated in SciENcv do not include blank pages.; The current and pending support fillable PDF document is paginated, and the PDF page numbers will not be updated during the trimming process. This means that it is possible for the trimmed PDF to have skipped page numbers corresponding to the blank pages removed from the fillable PDF. NSF Program Officers are aware of this potential occurrence in proposals submitted to NSF.; Proposers with in progress proposals as of August 30, 2021, can delete previously uploaded current and pending support fillable PDFs from their FastLane or Grants.gov proposals and then re-upload them to trigger the trimming service.; Updated Biographical Sketch and Current and Pending Support SciENcv and Fillable PDF Formats; The updated NSF-approved biographical sketch and current and pending support formats will be available in September 2021 to preview before they are required on October 4th. The updated fillable PDF formats will be available for download from the NSF biographical sketch and current and pending support websites by September 3rd. Updated SciENcv formats will be available on the SciENcv Create a New Document screen by September 17th.; Biographical sketch format updates include increasing the page limit from two to three pages; Current and pending support format updates include the addition of new sections for information on objectives and overlap with other projects to help NSF and reviewers assess overlap/duplication.; Although submission of the updated NSF-approved formats is not permitted (i.e., Research.gov, FastLane, and Grants.gov will not allow the 22-1 forms to be uploaded) until implementation of the revised PAPPG NSF 22-1 on October 4, 2021, NSF is encouraging proposers and grantees to begin familiarizing themselves with the updated NSF-approved formats when they are available.; Enhanced Funding Opportunity Search Functionality and Revamped Program Pages; Based on extensive research with external and internal stakeholders, NSF has made significant improvements to the NSF Funding Opportunity Search functionality to help researchers and prospective researchers quickly and easily find relevant programs and NSF-funded projects in specified disciplines. Funding Search results now include short program descriptions, programs incorporated in core program solicitations with links to the relevant guidelines, and Dear Colleague Letters.; The revamped program pages include significant content and navigation improvements including information previously only viewable in solicitations.; For more information about NSF’s beta site, please visit https://beta.nsf.gov/about-beta. NSF will continue to enhance the site, and ongoing feedback from external and internal stakeholders is vital to the process. Feedback on the updated Funding Search and program page enhancements or any other aspect of the site may be directed to beta-nsf-feedback@nsf.gov.; Questions? Additional Information: Please see this important announcement from NSF regarding the required use of Research.gov, and the decommission of FastLane. Policy-related questions should always be directed to your SPA Project Officer. [brought to our attention by Stephanie Scott]; NSF sent the announcement below reminding the research community that FastLane will be decommissioned at the end of this calendar year. NSF currently requires the use of Research.gov for many program solicitations. See Program Descriptions that Require Proposal Preparation and Submission in Research.gov or Grants.gov, a document that identifies program descriptions requiring Research.gov preparation and submission and the associated effective date. This document will be updated on an ongoing basis.; Please see NSF's full announcement below, which contains training resources to assist you. For questions, please contact your SPA Project Officer.; [brought to our attention by Stephanie Scott]; Required Use of Research.gov for Preparation and Submission of Proposals in Response to Program Descriptions; System Update; Dear Colleague: In accordance
with Important Notice No. 147, many National Science Foundation (NSF) program solicitations now require the use of Research.gov for the preparation and submission of proposals. Please be advised that NSF will now start requiring the use of Research.gov for the preparation and submission of proposals in response to program descriptions. As a reminder, FastLane is targeted to be removed as a submission option from all funding opportunities by December 31, 2022. Grants.gov will remain a submission option for most NSF proposals. To assist the research community, NSF developed a dynamic listing of program descriptions that require submission in Research.gov. Follow these steps to determine if your proposal for a specific program description must be prepared and submitted in Research.gov: Access the relevant NSF.gov program description page (e.g., Magnetospheric Physics, PD 98-5750); View the advisory in the Program Guidelines section on the right side of the program description page and click on the link in the advisory: Alert: Many NSF programs are only accepting proposals in Research.gov or Grants.gov. FastLane may no longer be a submission option. For more information, please visit Program Descriptions that Require Proposal Preparation and Submission in Research.gov or Grants.gov.; The document will identify program descriptions requiring Research.gov preparation and submission and the associated effective date. This document will be updated on an ongoing basis as FastLane will be removed from all program descriptions as a proposal preparation and submission option by December 31, 2022.; Since many program solicitations also require submission in Research.gov, proposers should pay close attention to the requirements identified in those specific funding opportunities.; Research.gov Proposal Capabilities and Transition from FastLane Proposal Preparation; Nearly all FastLane proposal preparation and submission capabilities are now available in Research.gov. For details about the remaining proposal features that will soon be added to Research.gov, please see the Proposal Submission Capabilities table on the Research.gov About Proposal Preparation and Submission page. To stay informed about Research.gov and FastLane changes, we invite you to join our System Updates listserv. **Additional Information:** See NSF update below regarding system updates that were made yesterday in Research.gov and FastLane to align with the latest Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1); We'll be reviewing some of these changes during next week's Research Administration Forum, taking place on Wednesday, October 13th at 11am (click link for more information about the Forum); As always, please feel free to reach out to your SPA Project Officer should you have any questions.; [brought to our attention by Stephanie Scott] ; Now Available: New Proposal and Submission Types and System Enhancements to Support the Revised PAPPG (NSF 22-1); Dear Colleague: Effective October 4, 2021, the National Science Foundation (NSF) made a number of system updates for proposals submitted in Research.gov, FastLane, and Grants.gov in accordance with the implementation of the Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1). Please see the list of PAPPG (NSF 22-1) significant changes and clarifications for all of the updates. New proposal and submission types were also enabled in the Research.gov Proposal Submission System.; New Proposal Types in the PAPPG; The PAPPG (NSF 22-1) incorporates two new "Other Types of Proposals": Planning Proposals; Planning proposals must be prepared and submitted in Research.gov.; Refer to PAPPG Chapter II.E.1. for Planning proposal requirements.; Career-Life Balance (CLB) Supplemental Funding Requests; CLB supplemental funding requests must be prepared and submitted in FastLane.; Refer to PAPPG Chapter II.E.8. for CLB supplemental funding request requirements.; Updates to NSF-approved Biographical Sketch and Current and Pending Support Formats; The NSF-approved biographical sketch and current and pending support formats were updated to incorporate revisions in the PAPPG (NSF 22-1) and must be used for proposals submitted or due on or after October 4, 2021.; The current formats are posted on the NSF biographical sketch and current and pending support websites. Updated system-related Frequently Asked Questions (FAQs) are also available: FAQs on using SciENcv and FAQs on using NSF fillable PDF. SciENcv documents created using the previous version (i.e., NSF 20-1) prior to October 4th are automatically converted in SciENcv to the current version after October 4th.; Biographical sketch format updates include increasing the page limit from two to three pages.; Current and pending support format updates include the addition of new sections for information on objectives and overlap with other projects to help NSF and reviewers assess overlap/duplication.; Biographical sketches and current and pending support information also must be uploaded with Change of Principal Investigator (PI) and Add/Change co-PI requests in FastLane.; When notifying NSF that active other support has changed since the award was made, or since the most recent annual report, current and pending support information must be uploaded in annual and final project reports in the Research.gov Project Reporting System.; Research.gov, FastLane, and Grants.gov will generate a compliance error message if a proposer or grantee attempts to upload a prior version of the biographical sketch or current and pending support formats on or after October 4th.; Removal of Blank Pages from the Current and Pending Support Fillable PDF; Research.gov, FastLane, and Grants.gov will remove any pages which do not contain data entered by users (i.e., blank pages) from the NSF-approved current and pending support fillable PDF.; The trimming service is triggered in Research.gov and FastLane during document upload and during proposal submission in Grants.gov.; The trimming
service only applies to the NSF-approved current and pending support fillable PDF and not to any other uploaded PDFs. Current and pending support PDFs generated in SciENcv do not include blank pages.; The current and pending support fillable PDF document is paginated, and the PDF page numbers will not be updated during the trimming process. This means that it is possible for the trimmed PDF to have skipped page numbers corresponding to the blank pages removed from the fillable PDF.; Research.gov Proposal Submission System Enhancements; The Grant Opportunities for Academic Liaison with Industry (GOALI) and Planning proposal types and the Letter of Intent submission type are now available for submission in Research.gov.; New automated compliance checks and associated error and warning messages for the enabled proposal and submission types were also implemented. Error messages will prohibit proposal submission to NSF, whereas warning messages still permit proposal submission.; All supported proposal and submission types as well as associated compliance checks are also enabled in the Research.gov Proposal Preparation Demo Site.; New FAQs were added to the Research.gov About Proposal Preparation and Submission page, and the Proposal Submission Capabilities page has been updated to reflect the latest development updates.; Research.gov proposal features continue to expand to support the transition of all proposal preparation and submission functionality from FastLane to Research.gov by a target date of December 31, 2022. Many NSF funding opportunities are supported in Research.gov and clearly specify whether submission via Research.gov is available or required.; Questions? If you have IT system-related questions, please contact the NSF Help Desk at 1-800-381-1532 (7:00 AM - 9:00 PM ET; Monday - Friday except federal holidays) or to rgov@nsf.gov. Policy-related questions should be directed to policy@nsf.gov.; Regards, National Science Foundation

Additional Information: NSF recently issued an announcement, Coming February 2022: Implementation of the New SAM UEI to Replace DUNS in NSF Systems. In summary, there is a government-wide initiative to phase out Dun & Bradstreet (DUNS) numbers, to be replaced with Unique Entity Identifier (UEI) numbers. These numbers are entity registration numbers required by the federal government in order to receive federal funds. Most electronic proposal submission systems request our DUNS numbers, either upon registering in that system, or on the cover page of a grant application. These systems will now require UEI numbers. Columbia already has UEI numbers for the Morningside and CUIMC campuses. This information can be obtained on our Institutional Information webpage.; NSF's announcement provides an overview of how their proposal systems are transitioning to accommodate the new UEI numbering system. While these changes do not directly impact Columbia because we already have UEI numbers, any proposed subrecipients in NSF grant applications will need to have either DUNS or UEI numbers if they don't already have them. Beginning February 28th, subrecipients need to have UEI numbers and be registered in NSF systems, or you will be unable to include them as subawardees in the budget when preparing a proposal.; Attached you will find a two-page guidance document to assist you when preparing an NSF proposal containing subrecipients.; The second important item related to this is we have updated our outbound and inbound Subawards Face Pages to include the UEI numbers, with additional minor revisions. Please begin using these forms anytime you propose subrecipients, regardless of sponsor. These updated forms...
can be found on our Internal Forms webpage, or you can access the following webpages containing the updated forms with more specific instructions about subawards: Subawards - Proposal Preparation (Columbia as Prime Recipient); Inbound Subawards (Columbia as Subrecipient); If you have questions concerning the attached guidance document, you can contact me.; If you have IT system-related questions regarding NSF's transition to the SAM UEI, please contact the NSF Help Desk at 1-800-381-1532 or rgov@nsf.gov.; Questions concerning grants policies and required subaward forms for proposals should be directed to your SPA Project Officer. *Important* Are you ready for the new NIH Biosketch and Other Support requirements, effective January 25, 2022? For resources and FAQs to assist you, please see NIH Researcher Disclosure Requirements; [brought to our attention by] Stephanie F. Scott, MS, CRA; Director of Policy and Research Development; Columbia Research; Sponsored Projects Administration; Columbia University & Columbia University Irving Medical Center; Email: stephanie.scott@columbia.edu ; Website: https://spa.columbia.edu; [02/28/2022 Reminder/Update] I just wanted to send a reminder that beginning 02/28/2022, subrecipients need to have UEI numbers and be registered in NSF systems, or you will be unable to include them as subawardees in the budget when preparing an NSF proposal. See original announcement below, and attached guidance document.; NSF released another press release today to remind the research community of this. You may see emails from them. Our attached guidance document summarizes what you need to know and what to do.; If you have IT system-related questions regarding NSF's transition to the SAM UEI, please contact the NSF Help Desk at 1-800-381-1532 or rgov@nsf.gov.; Questions concerning grants policies and required subaward forms for proposals should be directed to your SPA Project Officer. **Additional Information:** Issuance of NSF Proposal and Award Policies and Procedures Guide (NSF 22-1); See below announcement from NSF. They have released the latest version of the NSF Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1), effective for proposals submitted or due on or after October 4, 2021. While this version of the PAPPG becomes effective on October 4, 2021, in the interim, the guidelines contained in the current PAPPG (NSF 20-1) continue to apply. A listing of significant changes can be found here, and a condensed list of major changes are below. NSF will be hosting a webinar to review the significant changes, date to be determined. However, you can sign up here to be notified immediately when registration for the webinar is open. I’ll also provide that information once it becomes available. One thing I’d like to highlight is that NSF’s Pre-Award and Award Policies & Procedures Guide (PAPPG) (NSF 22-1) has been issued.; The new PAPPG will be effective for proposals submitted or due on or after October 4, 2021. Significant changes include: A new section covering requests for reasonable and accessibility accommodations regarding the proposal process or requests for accessibility accommodations to access NSF’s electronic systems, websites and other digital content; A table entitled, NSF Pre-award and Post-award Disclosures Relating to the Biographical Sketch and Current and Pending Support. This table identifies where pre- and post-award current and pending support disclosure information must be provided. Proposers and awardees may begin using this table immediately; Increasing the page limit for the biographical sketch from two to three pages; Updates to the current and pending support section of NSF proposals to require that information on objectives and overlap with other projects is provided to help NSF and reviewers assess overlap/duplication; Adding planning proposals and Career-Life Balance supplemental funding requests as new proposal types; Updates to travel proposals will require that AORs certify that prior to the proposer’s participation in the meeting for which NSF travel support is being requested, the proposer will assure that the meeting organizer has a written policy or code-of-conduct addressing harassment; You are encouraged to review the by-chapter summary of changes provided in the Introduction section of the PAPPG.; NSF plans to conduct a webinar covering these changes. Visit the NSF policy outreach website to sign up for notifications about this and other outreach events.; While this version of the PAPPG becomes effective on October 4, 2021, in the interim, the guidelines contained in the current PAPPG (NSF 20-1) continue to apply.; If you have any questions regarding these changes, please contact the DIAS/Policy Office at policy@nsf.gov.; Regards, Jean Feldman; Head, Policy Office; Division of Institution and Award Support; Office of Budget, Finance & Award Management.

Additional Information: May 28, 2021; Statement by NSF Director Sethuraman Panchanathan on the President’s FY22 Budget Request; President Proposes Crucial Investments to Advance the Frontiers of U.S. Science and Technology; The Biden-Harris Administration today submitted to Congress the President’s Budget for fiscal year 2022. As the Administration continues to make progress defeating the pandemic and getting our economy back on track, the Budget makes historic investments that will help the country build back better and lay the foundation for shared growth and prosperity for decades to come; “This request will bolster the U.S. economy and our leadership in critical and emerging areas of research and technological advancements, which are essential to our long-term economic and national security,” said NSF Director Sethuraman Panchanathan. “NSF’s mission is unique in supporting research across all fields of science, technology, engineering, and mathematics, and all levels of STEM education. Seven decades of experience building the necessary partnerships between federal, state, and local government, academia, and industry have produced remarkable results for the country. With this budget, we can rapidly scale our investments and build even stronger bridges between discovery, innovation, and commercialization.; The Budget includes more details on what is proposed in the two historic plans the President has already put forward — the Americans Jobs Plan and the American Families Plan – and reinvests in education, research, public health, and other foundations of our country’s strength. At the U.S. National Science Foundation, the Budget would: Enhance Fundamental Research and Development. $9.43 billion, an increase of $1.55 billion above 2021 enacted level will support research across the spectrum of science, engineering and technology. This includes biological sciences; computer and information sciences; engineering; geosciences; math and physical sciences; social, behavioral, and economic sciences; and education. With this additional funding, NSF will continue to be the champion of basic and fundamental research and will strengthen it at speed and scale.; Strengthen U.S. Leadership in Emerging Technologies. Includes the establishment of a new directorate for technology, innovation and partnerships within NSF to help translate research into practical applications. The directorate will work with programs across NSF and with other federal and non-federal entities to expedite technology development in emerging areas that are crucial for the United States’ technological leadership.; Advances Equity in Science and Engineering. +$100 million, an increase of about 50 percent, in funding for programs that aim to increase participation in science and engineering of individuals from racial and ethnic groups underrepresented in these fields. Funding will support curriculum design, research on successful recruitment and retention methods, development of outreach or mentorship programs, fellowships, and building science and engineering research and education capacity at historically black colleges and universities, and other minority-serving institutions.; Advances Climate Science and Sustainability Research. $1.2 billion for climate and clean energy-related research will fund a broad portfolio of research related to climate science and clean energy, including research on atmospheric composition, water and carbon cycles, modeling climate systems, renewable energy technologies, materials sciences, and social, behavioral, and economic research on human responses to climate change.; Continues Construction of Forefront Research Infrastructure. Invests in the continued construction of major NSF research facilities, including long-term upgrades of NSF’s major Antarctic infrastructure. It also supports construction of the Vera C. Rubin Observatory to enable astronomy research. In addition, the budget request seeks funding for the construction and procurement of smaller research facilities and equipment across the nation.; Enacting the Budget policies into law this year would strengthen our Nation’s economy and lay the foundation for shared prosperity, while also improving our Nation’s long-term fiscal health.; For more information on the President’s FY22 Budget, please visit: https://www.whitehouse.gov/omb/budget; For more information on the NSF budget, please visit: https://beta.nsf.gov/budget; -NSF- [brought to our attention by Stephanie Scott / SPA]

**Additional Information:** NIH NOSI supports returning biomedical researchers; NIH Office of Research on Women's Health; NIH NOSI Supports Returning Biomedical Researchers; NIH has announced a new supplements program for researchers returning to biomedical careers after a qualifying absence. Under "Notice of Special Interest (NOSI): Research Supplements to Promote Reentry and
Reintegration into Health-Related Research Careers" (NOT-OD-21-134), successful applicants will be able to participate in full- or part-time mentored research experiences through existing NIH research grants. Eligible for these reentry supplements are individuals whose research careers have been interrupted for at least 6 months because of family responsibilities or other qualifying circumstances. The reintegration supplements will enable individuals to find supportive scientific environments after departure from an unsafe or discriminatory environment resulting from unlawful harassment.; Most candidates for the reentry supplements will have a doctoral degree or equivalent; however, some awarding NIH Institutes and Centers may enable predoctoral students, including those enrolled in dual-degree programs, to apply. Postdoctoral and predoctoral students are eligible to apply for reintegration supplements to allow them to transition to a safe, supportive research environment and complete their graduate degrees.; Click here for more information, including detailed eligibility requirements and staff contacts. The first available due date for submissions is August 26, 2021, and the supplements program is set to expire on October 7, 2023.; Related Announcements: PA-20-272 - Administrative Supplements to Existing NIH Grants and Cooperative Agreements (Parent Admin Supp Clinical Trial Optional)

EPA’s NARS program assesses the quality of the nation’s coastal waters, lakes and reservoirs, rivers and streams, and wetlands and provides a point in time
assessment of the condition of these resources, identifies key stressors, and track changes over time. EPA is inviting applicants to assess NARS datasets to address key environmental questions. Each winner or winning team will receive a prize of $5,000. Winners may receive national recognition for their university or organization as well as for the students, scientists, and project activities by being featured on the NARS Data Challenge webpage. Winners may be invited to present at webinars, conferences and/or other events including reaching EPA, state/tribal, and other water quality specialists. **Contact:** NIH Grants Information; Email: grantsinfo@od.nih.gov  
**Link(s):** https://grants.nih.gov/grants/guide/notice-files/NOT-OD-22-205.html  
**Additional Information:** Continued Extension of Certain Flexibilities for Prospective Basic Experimental Studies With Human Participants; **Notice Number:** NOT-OD-22-205; **Purpose:** This notice replaces NOT-OD-21-088. The purpose of this notice is to further extend interim policy flexibilities regarding registration and results reporting for a subset of NIH-funded research whose primary purpose is basic experimental studies with humans (BESH) submitted in response to BESH Funding Opportunity Announcements (FOAs). These studies, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants,” meet both the NIH definition of a “clinical trial” and also the definition of basic research. This additional extension will last through September 24, 2024. During this extension period, NIH will continue to work with the BESH community to achieve effective and efficient dissemination of information that is useful to other researchers and members of the public, while also maintaining the NIH commitment to stewardship and increasing transparency.

Additional Information: NIH releases NOSI on COVID-19’s impact on underserved and vulnerable populations; View it as a Web page. NIH NOSI to Support Studies on COVID-19’s Impact on Underserved and Vulnerable Populations; ORWH has announced its participation in Notice of Special Interest (NOSI): Social, Behavioral, and Economic Impact of COVID-19 in Underserved and Vulnerable Populations.
Vulnerable Populations (NOT-MH-21-330). The COVID-19 pandemic has demonstrated that prevention and mitigation strategies for the pandemic are uneven—for a range of reasons, including a lack of trust in health systems, economic circumstances, and challenges in sustaining long-term adherence, especially for underserved and vulnerable populations. By increasing our understanding of the multifaceted effects of the COVID-19 pandemic and public health interventions that mitigate risk and promote resilience in high-risk populations, we can improve the long-term response to the pandemic and prepare more effectively for future public health emergencies.

To strengthen the understanding and response to social, behavioral, and economic effects of the COVID-19 pandemic, NIH is encouraging the submission of applications that will: Address the roles and effects of interventions, particularly those under the umbrella of digital health, as well as community-engaged and multilevel interventions in health care settings to address access, reach, delivery, engagement, effectiveness, scalability, and sustainability of services that are utilized during and following the pandemic; Encourage the leveraging of existing large-scale data sources with broad population coverage to improve prediction of various mitigation efforts (including vaccinations, masking, and physical distancing) on transmission reduction and on social and economic effects and assess the downstream health and health care access effects, with an emphasis on underserved and vulnerable populations; The first submission date is October 5, 2021, and subsequent receipt dates will extend through September 8, 2024.

Please view these slides and feel free to register for anything applicable to you. I will still be sending separate emails announcing some of these upcoming events.; As always, please feel free to reach out to your SPA Project Officer should you have any questions; During yesterday’s Research Administration Forum, I provided an overview of transitioning to two-factor authentication (2FA) using Login.gov and/or InCommon Federated accounts (your Columbia UNI and password) in order to be able to access the NIH eRA Commons and other NIH modules. NIH is requiring everyone to transition to 2FA, but is taking a phased approach.; I recorded this segment of the Forum. You can watch the video here, and follow along with yesterday’s slide deck, see slides 61-76. I cover: Who needs to transition; When you need to transition; The two different options (Login.gov vs InCommon Federated); Essential tips for doing it correctly; Where to go for help; NIH also has their own videos and resources, but I do think listening to me explain it first will assist you in making decisions faster.; NIH Resources: NIH videos on transitioning to Login.gov ; Overview of NIH eRA and 2FA ; NIH FAQs on both Login.gov and InCommon Federated ; If after watching my video and reading NIH’s FAQs you feel you are in a unique situation then feel free to contact me.; [brought to our attention by] Stephanie F. **Additional Information:** HHEAR public data available! The HHEAR Data Center’s public data repository has recently been updated. To benefit the broader research community, the HHEAR Data Center hosts a public data repository that contains both de-identified original study and de-identified harmonized data from all studies accepted into the CHEAR and HHEAR program that have passed the embargo period. The goal of this repository is to promote the secondary analysis of pooled environmental health data by providing data in a manner that is findable, accessible, interoperable and reusable. The repository is searchable by a number of features and users are able to compile and download customized datasets from CHEAR and HHEAR research studies. The repository is updated periodically as studies come off embargo. To access both types of data, go to HHEAR Data Center website; Thank you, The HHEAR Coordinating Center

Additional Information: For US science, one of today’s most pressing challenges is to maximize scientific impact by building a workforce that fully reflects our increasingly diverse country. To pioneer life-saving medications, transformative technology, and basic knowledge that the whole world needs, we can't afford to leave talent behind. The Howard Hughes Medical Institute (HHMI) is committed to addressing this challenge through our science and education mission. HHMI’s strategy is to influence academic science at key points along career pathways, from undergraduate to tenured faculty.; Freeman Hrabowski Scholars will be outstanding basic researchers, including physician-scientists, who have strong potential to become leaders in their fields and to advance diversity, equity, and inclusion through their mentorship and understanding of the experiences of trainees from races and ethnicities underrepresented in US science. Scholars will prioritize scientific excellence in their own research while creating an equitable and inclusive lab climate that values diversity and serves as a model within their own institutions and beyond. Eligible research areas include all basic biomedical science disciplines, as well as plant biology, evolutionary biology, biophysics, chemical biology, biomedical engineering, and computational biology.

DoD/CDMRP - COVID-19 Impact on Research Awards  
[No Link Provided]  
CDMRP continues to be concerned about the impacts of COVID-19 on Service Members and the public. We are aware of the challenges it poses and are tracking some of the impacts to current awardees and ongoing research. While not every program will have financial resources available to assist, awareness of any significant unresolved issues affecting current research awards is important.; The intent of this notice is to remind recipients of the requirements in 32 CFR Part 1134, Subpart E Other Reporting. This provision specifies the requirement for recipients to disclose significant developments as soon as they become known. These include problems, delays, or adverse conditions that will materially impair your ability to meet the objectives of your award.; Disclosures of significant developments may be made on your next interim performance report or at any point between scheduled performance reporting dates by contacting the Science Officer or Grant Specialist assigned to your award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation.

Additional Information: The Department of Defense (DoD) Congressionally Directed Medical Research Programs (CDMRP) just released the following four programs containing their Fiscal Year 2022 (FY22) funding opportunities! Each hyperlink below contains the details of their pre-application deadlines, awarding mechanisms, and application instructions: Amyotrophic Lateral Sclerosis [04/29/2022 Pre-Application; 07/28/2022 Application]; Breast Cancer: Lung Cancer; Peer Reviewed Medical Program (PRMRP). * - soliciting a wide range of topic areas. See important notes about this program below: Per their help desk, “Topic areas and strategic goals are found specifically within the Program Announcement for the mechanism you are interested in applying under the PRMRP funding opportunity. Please note, as the topic areas and strategic goals may differ between mechanisms, we recommend reviewing the Program Announcement under each mechanism you may be interested in. You can find the page to this section of the Program Announcement under the index to the Program Announcement.” Resources for all the CDMRP programs: Synopsis of Open Program Funding Opportunities; How to Apply; Avoiding Research Duplication; Webinar Series.; *Per the instructions, “All applications for FY22 PRMRP funding must specifically address one of the FY22 PRMRP Topic Areas as directed by the U.S. Congress and have direct relevance to military health. Additionally, the PRMRP implements a portfolio-driven approach by grouping related Topic Areas with Strategic Goals as a framework within which to address critical gaps in major research areas. All applications must address one of the FY22 PRMRP Strategic Goals as it relates to the portfolio-assigned FY22 PRMRP Topic Area. If the proposed research does not specifically address one FY22 PRMRP Topic Area and one FY22 PRMRP Strategic Goal, then the government reserves the right to administratively withdraw the application. The government reserves the right to reassign the application’s Topic Area if submitted to an incorrect Topic Area.”; Should you have any questions about the application process, please reach out to your SPA Project Officer.; [brought to our attention by] Stephanie F. https://nexus.od.nih.gov/all/2021/03/19/how-do-i-request-childcare-costs-in-my-fellowship-application/

**Additional Information:** Earlier today, NIH issued corrected instructions to request childcare costs for recipients of NRSA individual fellowships. See NOT-OD-21-074, which replaces to announcement NOT-OD-21-069 referenced below. NIH also updated its FAQs; If you have any questions regarding how to make the request in a fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. We'll provide you with any updates [brought to our attention by] Stephanie Scott, Announcement of Childcare Costs for Ruth L. Kirschstein National Research Service Award (NRSA) Supported Individual Fellows; This week NIH announced a new policy to allow for childcare support costs to recipients of NRSA individual fellowships (i.e., F31, F32, etc). These costs must be specifically requested in new, continuation applications or through administrative supplements beginning on or after April 8, 2021. Please read the full announcement at NOT-OD-21-069, the FAQs, and supplementary information below.; **Some key takeaways:** The policy applies to full-time NIH-NRSA supported individual fellowship applicants and awardees. However, additional information is forthcoming later this year regarding expanding the policy to trainees on institutional training grants, anticipated for FY2022.; Each fellow is eligible to receive $2,500 per budget period for childcare costs. The childcare cost amount is not determined by number of children.; Childcare costs are permitted for dependent children living in the eligible fellow’s home from birth under the age of 13, or children who are disabled and under age 18.; Eligible childcare is care that is licensed and/or regulated by state and/or local authorities. See FAQs for more details.; At a minimum, recipients must obtain and retain documentation verifying that a childcare provider is licensed and/or regulated by state and/or local authorities, and must document that the fellow is eligible to receive the childcare costs and has eligible dependents.; The childcare cost is restricted for that purpose and cannot be rebudgeted without prior written approval from the NIH awarding IC.; If you have any questions regarding how to make the request in the fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. The announcement NOT-OD-21-069, and the FAQs, provide instructions on how to make the childcare support request.; We’ll provide further guidance on these new costs at a later date.; **Feed:** blog – NIH Extramural Nexus; **Posted on:** Tuesday, March 2, 2021 11:40 AM; **Author:** Mike Lauer; **Subject:** Announcement of Childcare Costs for Ruth L. Kirschstein National Research Service Award (NRSA) Supported Individual Fellows; View article.; Subsequently, NIH posted this blog, with screen shot, to assist applicants with the request for childcare costs. If you have any questions regarding how to make the request in a fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. Additional Information: ORWH announces administrative supplements to support research on the health of women in U3 populations; https://grants.nih.gov/grants/guide/notice-files/NOT-OD-22-031.html; National Institutes of Health; Office of Research on Women’s Health; ORWH Announces Administrative Supplements to Support Research on the Health of Women in U3 Populations; ORWH has announced the availability of administrative supplements to support research highlighting health inequities among populations of women in the U.S. that are understudied, underrepresented, and underreported (U3) in biomedical research. Applications should provide robust study designs that would explore sex and gender influences and social determinants of health in order to reduce health inequities. The proposed research must address at least one objective from strategic goal 1, 2, or 3 of Advancing Science for the Health of Women: The Trans-NIH Strategic Plan for Women's Health Research.; There is a complex intersection of internal (e.g., genetics) and external institutional and structural forces (e.g., social determinants of health and experiences of trauma) that play a role in the health status, disease presentation, treatment responses, and health-related quality of life of women across the life course. These administrative supplements will support projects highlighting common sources of disparities in the health of women and girls, with an emphasis on projects that propose to integrate measures beyond the individual level and consider perspectives from multiple disciplines. A broad range of research topics studied at the preclinical, clinical, behavioral, and translational levels are encouraged. Proposals incorporating multilevel interventions, using community-engaged approaches, and focusing on one or more NIH-designated health disparity populations are also desired.; Applications are due January 31, 2022.

**Contact:** Scientific/Research Contact(s): Lisa Begg, Dr.P.H., RN; Office of Research on Women's Health (ORWH); Telephone: 301-496-3975; Email: beggl@od.nih.gov

**Additional Information:** NIH issues funding opportunity for studies on mitigating sexual harassment in the biomedical research enterprise; National Institutes of Health; Office of Research on Women’s Health; NIH issues funding opportunity for studies on mitigating sexual harassment in the biomedical research enterprise (govdelivery.com); NIH NOSI to Support Studies on Mitigating Sexual Harassment in the Biomedical Research Enterprise; ORWH has announced its participation in Notice of Special Interest (NOSI): Interventions Designed to Change the Culture to Mitigate or Eliminate Sexual Harassment in the Biomedical Research Enterprise NOT-OD-21-150. The cumulative effect of sexual harassment has a devastating and costly impact on individuals and the Nation. There are emotional, physical, mental, and legal consequences, which may have a direct impact on individual performance and career advancement, as well as social and fiscal effects on institutional settings, students, and co-workers.; The National Academies of Sciences, Engineering, and Medicine report titled Sexual Harassment of Women: Climate, Culture, and Consequences in Academic Sciences, Engineering, and Medicine demonstrates the urgent need to develop new partnerships to address this challenging problem. NIH is encouraging applications to test interventions that would be designed to change the culture and mitigate or eliminate sexual harassment in the biomedical research enterprise.; The first available due date for funding opportunity submissions is October 13, 2021, and subsequent receipt dates will extend through October 14, 2023.

Additional Information: Avenir Award Program for Genetics or Epigenetics of Substance Use Disorders (DP1 Clinical Trial Optional) PAR-19-225; Avenir means future in French, and this award looks toward the future by supporting early stage investigators proposing highly innovative studies. The award will support those in an early stage of their career who may lack the preliminary data required for an R01 grant, but who propose high impact research and who show promise of being tomorrow’s leaders in the field. NIDA has developed two Avenir Award Programs, one for HIV/AIDS research and the other for genetics or epigenetics studies.; The Genetics or Epigenetics of Substance Use Disorders Avenir Award program supports early stage investigators proposing highly innovative studies that open new areas of research for the genetics or epigenetics of addiction. These may be novel methods or approaches that can potentially be applied to the analysis of the genetics or epigenetics of addiction. Investigators outside the field of addiction interested in applying their novel approaches to the genetics or epigenetics of addiction are encouraged to apply. The award will support those in an early stage of their career who may lack the preliminary data required for an R01 grant, but who propose high impact research and who show promise of being tomorrow’s leaders in the field of genetics or epigenetics of substance use disorders.; https://grants.nih.gov/grants/guide/pa-files/PAR-20-225.html ; Letter of Intent due September 19, 2022 and applications are due October 19, 2022.

**Additional Information:** Longevity Impetus Grant Announcement; FYI Below. Yousin shared this. Applications open on 9/13: [https://www.impetusgrants.com/](https://www.impetusgrants.com/). Impetus Grants provides funding for scientists to start working on what they consider the most important problems in aging biology, without delay; [www.impetusgrants.com](http://www.impetusgrants.com). September 7, 2021; Dear AGE Member, I'd like to bring to your attention a new source of grant funding for bold ideas in aging research: the Longevity Impetus Grants. These grants will support bold ideas with the potential to change how the field thinks and works, including high-risk projects. For more information about the program and to apply, please visit the website. The applications are ~1 page, and decisions are made within three weeks. Impetus Grants range from $10K to $500K, with a maximum of 10% institutional overhead. There's no restriction on project period, and no strings attached. The ideal application is able to explain how the project would broadly impact the field, by developing/validating new tools and/or changing how we think about aging biology. Such proposals could seek to prove or disprove common assumptions in the field, discover new ways to reverse aging processes, synthesize isolated manifestations of aging into a systemic perspective, and/or develop widely applicable methodologies. Please consider sharing this email within your institution, and with anyone else you think should apply.; I highly encourage you to consider applying for a Longevity Impetus Grant.; Sincerely, [brought to our attention by] Matt Kaeberlein; CEO and Chair, American Aging
Association; Impetus Grants provides funding for scientists to start working on what they consider the most important problems in aging biology, without delay. Such work should not be held up by red tape: we offer grants of up to $500k, with decisions made within 3 weeks. Our review process asks "what's the potential for impact" rather than "could this go wrong"; Our goal is to have a broad impact on the field, by supporting projects that challenge assumptions, develop new tools and methodologies, discover new ways to reverse aging processes, and/or synthesize isolated manifestations of aging into a systemic perspective. To ensure that we learn from every project, we’re organizing a special issue of GeroScience to provide an opportunity to publish both positive and negative results from funded studies; Applications will open on September 13, 2021.

Imagine a country in which all individuals, families, and communities have ready access to enough affordable, nutritious food to sustain healthy lives. However, this was still an illusory notion for at least 13.8 million food insecure US households in 2020. Household food insecurity is defined by having difficulty at some time during the year providing enough food for all members because of lack of resources. Moreover, in 2020, the prevalence of food insecurity among African American/Black households was estimated at 21.7%, and among Latino/Hispanic households was estimated at 17.2%, both substantially higher than the overall estimated prevalence of 13.5%.

**Additional Information:** PAR-22-072: Measures and Methods to Advance Research on Minority Health and Health Disparities-Related Constructs (R01 Clinical Trial Not Allowed) The purpose of this Funding Opportunity Announcement (FOA) is to support research that will advance the measurement and methodology of complex constructs relevant to minority health and health disparities.; The NIEHS seeks applications that advance innovative development of new measures and methods, or validation and adaptation of existing measures and approaches, to address the complex interplay of the physical, chemical, cultural, social, and built environmental factors that contribute to or exacerbate environmental health disparities. Applications of interest may include, but are not limited to: The use of mixed methods approaches that integrate qualitative and quantitative data collection methods and measures of factors that contribute to environmental health disparities, including how qualitative methods can inform the development and validation of quantitative surveys and instruments that evaluate these factors.; Application and testing of methods and measures of SDOH, and structural racism and discrimination, to the study of environmental health disparities.; Establishment of novel interdisciplinary collaborations (including, but not limited to, methodologists, behavioral scientists, exposure scientists, epidemiologists, bioinformaticians, biostatisticians, data scientists, social scientists) to incorporate concomitant chemical and built environmental factors with existing or developed measures of structural and individual racism into a multilevel assessment of environmental health disparities.; Development, testing and adaptation of methods and measures that capture the lived experience of intersectionality to identify structural factors contributing to disproportionate exposures to chemical and non-chemical stressors at the community and individual level.; Application of community engaged approaches to identify or develop measures that are based on the interests and primary concerns identified by multiple community stakeholders, such as parents, schools, organizations, and fence-line residents, particularly for communities that are
under resourced and populations that have historically been combating environmental injustices and disparate rates of adverse health outcomes.; Examination of the ethical issues related to methods and measurement approaches in the study of environmental health disparities, including issues around data harmonization and the collection of common data elements.; Enhancement of existing place-based indices, environmental exposures models and geocoded data to account for social level factors, to explain environmental health disparities at the regional or community level. Of interest are the extent to which these measures demonstrate how placed-based structural racism and discrimination exacerbate environmental risk factors and/or limit protective factors.; Novel use of SDOH and structural racism and discrimination methods and measures to guide the development of multi-level, evidence-based prevention and intervention strategies to reduce environmental health disparities.; NIEHS Program Contacts: Lindsey Martin lindsey.martin@nih.gov and Melissa Smarr melissa.smarr@nih.gov

Notice of Special Interest (NOSI): Epidemiologic studies in Asian Americans, Native Hawaiians, and Pacific Islanders (Parent R01 Clinical Trial Not Allowed)

**Sponsor:** National Heart, Lung, and Blood Institute; National Cancer Institute; National Human Genome Research Institute; National Institute on Aging; National Institute of Environmental Health Sciences; National Institute on Minority Health and Health Disparities; National Institute of Neurological Disorders and Stroke

**Contact:** Please direct all inquiries to the contacts in Section VII of the listed funding opportunity announcements with the following additions/substitutions: Scientific/Research Contact(s): Robb Rowley, MD; Division of Genome Medicine; National Human Genome Research Institute (NHGRI); Telephone: 301-827-9126; Email: Robb.Rowley@nih.gov; NIEHS Program Contact: Lindsey Martin lindsey.martin@nih.gov

**Additional Information:** NOT-HL-23-001 Notice of Special Interest (NOSI): Epidemiologic studies in Asian Americans, Native Hawaiians, and Pacific Islanders (Parent R01 Clinical Trial Not Allowed) The purpose of this Notice of Special Interest (NOSI) is to stimulate novel epidemiological research to address key knowledge gaps within and between subpopulations of Asian Americans, Native Hawaiians, and Pacific Islanders. These populations are frequently aggregated in research, potentially masking important social and health differences. Given clear heterogeneity in ancestry, culture, immigration patterns among Asian Americans, socioeconomic position, and acculturation into American life, a critical need exists for epidemiological research to enhance our understanding of the interplay of environmental exposures, lifestyle, behavioral, genomics, social, neighborhood, and biological factors that impact the health of Asian American, Native Hawaiian, and Pacific Islander subpopulations.; The National Institute of Environmental Health Sciences encourages submissions of applications that are within the mission of NIEHS, which is to discover how the environment affects people to promote healthier lives. Exposures of interest include, but are not limited to, chemicals that people are exposed to via air, water, food, or direct dermal exposure (e.g., personal care products), including air pollutants, pesticides, metals, industrial chemicals, nanomaterials, environmental tobacco smoke, certain microbial products, and certain physical agents, such as environmental radiation. Applications examining the impacts of climate change on health are encouraged and could include a focus on weather extremes (e.g., prolonged or excessively high heat waves, droughts, severe unseasonal cold spells) and extreme weather-related disasters (e.g., hurricanes, storm surges, floods, wildfires) attributed to our changing climate.; Specific topics of interest include but are not limited to environmental epidemiology studies: Characterizing environmental health disparities among Asian American, Native Hawaiian and Pacific Islander subpopulations.; Investigating exposures at the intersection of the physical, chemical, built, and social environments, including social determinants of health, and how these exposures affect health outcomes in Asian American, Native Hawaiian and Pacific Islander subpopulations.; Examining the linkages between structural racism and discrimination, environmental exposures, and health outcomes in Asian American, Native Hawaiian and Pacific Islander subpopulations.; Examining resilience among Asian American, Native Hawaiian and Pacific
Islander subpopulations in the context of climate change and climate change-related disasters. The NIEHS strongly supports research conducted in partnership with communities. Studies that utilize community engaged and/or citizen science approaches done in partnership with Asian American, Native Hawaiian and Pacific Islander communities and/or community-based organizations are strongly encouraged. Applications that utilize report-back methods to increase the environmental health literacy within these subpopulations are also strongly encouraged. **Additional Information:** NIH Announces Funding Opportunity to Study the Role of Work in Health Disparities in the U.S.; ORWH recently announced its participation in The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional) (PAR-21-275). The funding opportunity will support innovative population-based research designed to identify and characterize pathways and mechanisms through which work or occupation influences health outcomes and health status among populations with health and/or health care disparities; The main objective of this initiative is to determine the extent and mechanisms by which work, as a social determinant of health, both contributes to and helps alleviate disparities related to health and health care; Of particular interest are: Projects designed to examine pathways and mechanisms using conceptual model(s) grounded in minority health and health disparities theories that recognize that health disparities arise by multiple and overlapping contributing factors acting at multiple levels of influence; Intersectional approaches that consider different social identities and the embeddedness of individuals within families, households, and communities; Projects that explore whether work can explain the health or health care disparities seen within diseases or conditions (e.g., COVID-19, opioid use disorder, mental/behavioral health, diabetes, cancer, heart disease, asthma, and maternal and infant health); Projects that explore how work contributes to health care disparities—including, but not limited to, disparities in access to preventive, specialty, and emergency care in health insurance coverage and disparities in quality of health care; Applications for The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional) will open on September 5, 2021.

**Additional Information:** NIH Data Management & Sharing Policy Webinar Series; NIH's new Data Management and Sharing Policy (NOT-OD-21-013) takes effect January 25, 2023. For a high-level overview of the Policy, see their PowerPoint presentation, Data Management & Sharing Policy Overview (June 2022); NIH will be offering a two-part webinar series to prepare researchers and administrators for the policy implementation: **Thursday, August 11, 2022 / 1:30 - 3:30 PM EDT; Understanding the New NIH Data Management and Sharing Policy;** **Agenda:** In this webinar, you will learn about DMS policy expectations, the applicability
of the policy, how to prepare a Data Management and Sharing Plan, and considerations for sharing data responsibly. Thursday, September 22, 2022 / 1:30 - 3:30 PM EDT; Diving Deeper into the new NIH Data Management and Sharing Policy; Agenda: In this second webinar of the series, we will expand upon the information presented in the first webinar and dive deeper into topics including privacy protections for data from human participants and justifiable limitations on sharing data. To register for these events, go to the NIH Data Management and Sharing Policy Webinar Series. NIH confirmed that these webinars will be recorded and available for viewing shortly after the live events. We highly encourage all researchers planning to submit NIH grants, and grant administrators, to attend these webinars to gain an understanding of the new policy and proposal expectations. Please visit the Research Data at Columbia webpage for additional resources and information, including a list of research data storage options and resources for writing a data management plan. Later in the fall, several central offices will provide additional information and resources to assist you with meeting this new data management and sharing requirement. Participant-level Data Template

Additional Information: [SPA News] FW: eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; NIH sent this announcement yesterday after they had already made the changes in their Human Subjects System (HSS). Please see below, it outlines the changes made to the HSS and its integration with the updated FORMS-F PHS Human Subjects and Clinical Trials Form. [brought to our attention by] Stephanie Scott; eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; Monday, June 15, 2020; As of Saturday, June 13, 2020, all applicants and recipients submitting post-submission updates in the Human Subjects System (HSS) will use the updated FORMS-F PHS Human Subjects and Clinical Trials Information Form. These updates address new requirements for participant-level data on sex/gender, race, ethnicity, and age at enrollment for projects subject to the NIH Policy and Guidelines on the Inclusion of Individuals Across the Lifespan as Participants in Research Involving Human Subjects.; Users with records currently in progress will need to modify the records to meet new FORMS-F requirements.; The changes listed below include items released by eRA in March and items released on June 13.; Key FORMS-F Changes to the PHS Human Subjects and Clinical Trials Information Form; [*] A new Inclusion Enrollment Report title field is now available. The human subjects study title will appear by default for all existing studies and may be changed by the user. For new studies and those with a work in progress study, the title will be blank and need to be filled by the grantee. See Figure 1.; Figure 1: Inclusion Enrollment Report Title Field; [*] For clinical trials, the “Brief Summary” field will no longer appear in Section 4. Information in this field prior to June 13, 2020 will continue to be available in the PDF images of applications and Research Performance Progress Reports (RPPRs) submitted prior to this change.; [*] Question 1.4.a. “Does the study involve human subjects/participants” now has a default value of yes and cannot be changed unless the user changes their response to the question “Are Human Subjects Involved?” on the Other Projects Information form. As a study record should be completed only
for research involving human participants, the "No" option is no longer available for this question. See Figure 2; Figure 2: Question 1.4.a of the Clinical Trial Post Submission Study Record; [*] In Section 2.8 of the Study Record: PHS Human Subjects and Clinical Trials Information screen, the language has been changed from 'Enrollment of First Subject' to 'Enrollment of First Participant'; [*] A new question has been added to the Study Record: PHS Human Subjects and Clinical Trials Information screen — Section 4.6 asks 'Is this an applicable clinical trial under FDAAA'; [*] For a full list of significant FORMS-F changes, see the High-
level Grant Application Form Change Summary: FORMS-F PDF.; Key Inclusion Across the Lifespan Changes; [*] Recipients reporting actual enrollment progress for a grant application submitted for due dates January 25, 2019 or later must provide participant-level data on sex/gender, race, ethnicity, and age at enrollment in the Inclusion Enrollment Report of the PHS Human Subjects and Clinical Trials Information Form using HSS; [*] Users must use the spreadsheet template available in HSS to submit participant-
level data. The column titles must not be altered, and data should be provided using the values modeled in the template. Changes to the template may result in a submission error. See Figure 3; Figure 3: Download Participant Level Data Template button on the Inclusion Enrollment Report; [*] Participant-level data must be uploaded in .csv format. Users do not need to separately enter the individual numerical fields in the Actual (Cumulative) Inclusion Enrollment Report table once the .csv file is successfully uploaded. The data provided will populate the actual (cumulative) enrollment table within the system. See Figure 4; Figure 4: Upload Participant Level Data Attachment button on the Inclusion Enrollment Report; [*] For more information on the requirement of individual-level participant data on sex/gender, race, ethnicity, and age at enrollment in progress reports for research supported by NIH projects, please see NOT-OD-18-116; For more information, see: [*] Entering Inclusion Data Using the Participant Level Data Template (video and transcript); Participant-level Data Template ; [*] The eRA Human Subjects System (HSS) information page ; [*] Information about the PHS Human Subjects and Clinical Trials Information form ; electronic Research Administration (eRA); NIH Office of Extramural Research; Questions? Please contact the eRA Service Desk. Check out self-help resources on the Help page before submitting an online ticket; or call Toll-free: 1-866-504-9552, Phone: 301-402-7469. **Additional Information:** Data Tables for training grants; NIH just posted the latest Data Tables for FORMS-F required institutional training grant proposals. These tables will be required for applications due May 25th, 2020 or later. Go to: https://grants.nih.gov/grants/forms-f/data-tables.htm; They did not post a significant changes document yet, so I took the instructions from the previous tables and did a comparison to the new tables. See attached “Changes from FORMS-E to FORMS-F”; I have an email to NIH to clarify the significant changes, and any impact they may have in xTRACT. Upon first glance, the changes appear to be more of clarifications of the instructions, rather than anything drastically different; I know a number of you are preparing training grant proposals for May. Please feel free to take a look at these changes, and let me know if you have questions. This way I can collect them all and send them to NIH for clarification. As every training grant program is different, you may also need to go to your Program Officials for direction on how they want the table completed for your specific set of circumstances; As soon as I have more information from NIH I will pass it along; [brought to our attention by] Stephanie F. **Additional Information:**

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about they the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.
- **2 weeks prior to submission deadline** — For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@cumc.columbia.edu.

Best wishes,

Pam Factor-Litvak

**Link(s):** [https://www.czbiohub.org/cz](https://www.czbiohub.org/cz)

**Additional Information:** Columbia University Coordination on CZ Biohub Letter of Intent; Dear Faculty: The Chan Zuckerberg Initiative recently announced a competition for a new **Chan Zuckerberg Biohub** to focus on developing new technologies to measure and observe human biology in ways that help deepen our understanding of human health and disease. The ideal scientific themes should be interdisciplinary in nature, have large engineering challenges to conquer, and should be wildly ambitious. The focus area of this new CZ Biohub should further diversify CZI's existing research portfolio, which includes: infectious disease and quantitative cell science (San Francisco CZ Biohub); neuroscience and artificial intelligence (Kempner Institute for the Study of Natural and Artificial Intelligence at Harvard University); and the Chan Zuckerberg Institute for Advanced Biomedical Imaging. ; The Letter of Intent (LOI) requires a minimum of three geographically proximate institutions collectively to propose a concept for the CZ Biohub. As an organizational structure, the CZ Biohub will be a nonprofit medical research organization that will enter into a collaboration agreement with its institutional partners, enabling the new CZ Biohub to support research at its partner Institutions. Funding is anticipated in the $200–250 million range, over an initial ten-year period, with the possibility for an additional five-year commitment of funds.; Columbia plans to endorse only one institutional partnership application for this opportunity. The EVPR’s Office is working with schools to determine the theme and institutional partners for our Chan Zuckerberg Biohub LOI. I will appoint and convene a faculty committee to coordinate with relevant deans, Provost Boyce, and colleagues in Development on next steps.; Please direct any questions to **EVPR@columbia.edu** with “CZ Biohub” in the subject line.;

Additional Information: As a resource to the fields of HIV treatment and prevention, NIAID maintains contracts to support the development of emerging HIV therapeutics, vaccines, and nBP candidates. The services under these contracts are provided on a case-by-case basis and are designed to assist in filling key gaps in their product development pathway. These services have enabled the acquisition of critical data, development of essential methods, manufacture and characterization of products, fulfillment of regulatory requirements, and/or completion of studies necessary for entering clinical trials. Over the past years, these contract activities have helped investigators to obtain critical data and materials to attract additional funding, gain prospective partnership, fulfill regulatory requirements, and complete studies before entering clinical trials. Information about these contract resources or activities can be found at the following website: https://www.niaid.nih.gov/research/resources.

Understanding Suicide Risk and Protective Factors among Black Youth (R01 Clinical Trial Not Allowed)

**Sponsor:** National Institute of Mental Health; National Institute on Minority Health and Health Disparities; Office of Behavioral and Social Sciences Research  
**Deadline(s):** 10/19/2022; 06/20/2023; 06/21/2023 (Expiration)  
**Contact:** Scientific/Research Contact(s); Eric R. Murphy, Ph.D.; National Institute of Mental Health (NIMH); Telephone: 301-443-9230; Email: eric.murphy@nih.gov  

**Additional Information:** Understanding Suicide Risk and Protective Factors among Black Youth; (R01 Clinical Trial Not Allowed); **FOA Number:** RFA-MH-22-140; **Key Dates:** Open Date (Earliest Submission Date): September 18, 2022; Expiration Date: June 21, 2023; **Purpose:** This FOA aims to advance translational research to better understand factors that confer risk and resilience for suicide among Black youth. This FOA encourages research that is designed to identify neurobiological, behavioral, social, and structural/systemic mechanisms underlying risk and protective factors for suicide among Black youth, with consideration for identification of novel targets for future development of prevention and intervention efforts. This FOA is intended to support R01 research project grants that are adequately powered and of sufficient scope to examine the impact of empirically and theoretically suggested risk and protective factors on suicide and STB among Black youth, and the pathways by which these factors uniquely contribute to suicide related outcomes in this population. These studies should be adequately powered to definitively answer the primary research question(s), with well-justified hypotheses supported by pilot data. Support for earlier-stage exploratory developmental projects is provided via a companion FOA, RFA-MH-22-141.; View RFA-MH-22-140

**Contact:** Scientific/Research Contact(s); Eric R. Murphy, Ph.D.; National Institute of Mental Health (NIMH); Telephone: 301-443-9230; Email: eric.murphy@nih.gov

**Additional Information:** Understanding Suicide Risk and Protective Factors among Black Youth; (R21 Clinical Trial Not Allowed); **FOA Number:** RFA-MH-22-141; **Key Dates:** Open Date (Earliest Submission Date): September 18, 2022; Expiration Date: June 21, 2023; **Purpose:** This FOA aims to advance translational research to better understand factors that confer risk and resilience for suicide among Black youth. R21 exploratory grant awards in response to this FOA are intended to conduct preliminary work regarding the assessment and characterization of risk and protective factors, with consideration for the identification of novel targets for future development of prevention and intervention efforts. Studies may involve evaluating the relevance of risk and protective factors for Black youth and their families, identifying risk or protective factors (or their interactions) unique to Black youth (or subgroups of this population), developing new or adapted assessment methods that are developmentally and culturally appropriate, and/or examining the acceptability and utility of existing assessment methods. This FOA supports exploratory developmental projects focused on refining strategies for the assessment and characterization of risk and protective factors and collecting preliminary data needed as a pre-requisite to a larger-scale, definitive project. A companion R01 FOA RFA-MH-22-140 supports larger scale projects that are of sufficient scope and are powered to provide a definitive examination of risk/protective factors associated with suicide risk among Black youth.; **RFA-MH-22-141**

**Link(s):** [https://grants.nih.gov/grants/guide/pa-files/PA-22-238.html](https://grants.nih.gov/grants/guide/pa-files/PA-22-238.html)

**Additional Information:** Funding Opportunity Purpose: The Agency for Healthcare Research and Quality (AHRQ) announces its interest in supporting conferences through the AHRQ Single-Year and Multiple-Year Conference grant programs (R13). AHRQ seeks to support conferences that help further its mission to produce evidence to make health care safer, higher quality, more accessible, equitable and affordable, and to work with HHS and other partners to make sure the evidence is understood and used [http://www.ahrq.gov/funding/policies/foaguidance/index.html](http://www.ahrq.gov/funding/policies/foaguidance/index.html); The types of conferences eligible for support include: 1) Research Development; 2) Research Design and Methodology; 3) Dissemination and Implementation; 4) Research Training, Infrastructure and Career Development; AHRQ is especially interested in supporting conferences that demonstrate strategies that include plans for disseminating complementary conference materials and products beyond the participants attending the event. Regionally-based conferences are acceptable with the expectation that plans will be developed for national dissemination. Such strategies might include, but are not limited to, submitting articles for publication, posting information on a website, and seeking formal opportunities to discuss conference information with others.

Columbia Roybal Center for Fearless Behavior Change | Division of Cardiology; Pilot Grant for Health

Message from the Director | Irving Institute for Clinical and Translational Research Resources and Cores | Irving Institute for Clinical and Translational Research

Deadline(s): 12/01/2022
Contact: For questions about the scientific content, please contact Ian Kronish, MD, MPH; Director, Columbia Roybal Center, at ik2293@columbia.edu; For questions about the application process and format, please contact Darlene Straussman, at ds3900@cumc.columbia.edu
Our prior research has shown that many patients develop fear-based responses to these traumatic events (e.g., fear of recurrence, fear of exercise) that lead to avoidance of the very health behaviors (e.g., exercise, taking medications regularly) that are recommended to prevent recurrence. Accordingly, our Center seeks to develop interventions that address these fear-related mechanisms. Relevant study populations include, but are not limited to, patients with stroke, myocardial infarction, cardiac arrest, COPD, heart failure, respiratory failure, COVID-19, or recent diagnosis with cancer or end-stage renal disease. Relevant behavioral outcomes include, but are not limited to, medication adherence, physical activity, sleep, as well as measures of psychological distress and quality of life. The goal of the award is to help investigators obtain preliminary data to support independent grant applications to the NIH or other funders. Applicants are encouraged to follow the experimental medicine approach to intervention development promoted by the Science of Behavior Change.

**Additional Information:**

**Pilot Grants for Health Behavior Interventions**; Columbia Roybal Center Pilot Award Program; Columbia University Irving Medical Center; The NIA-funded Columbia Roybal Center for Fearless Behavior Change will fund one-year pilot studies relevant to developing health behavior interventions for patients who have suffered acute medical events. Researchers obtain preliminary data to support independent grant applications to the NIH or other funders. Applicants are encouraged to follow the experimental medicine approach to intervention development promoted by the Science of Behavior Change.

**Award Amount:** $50,000 (inclusive of direct and indirect costs). Investigators will also gain in-kind support from the research infrastructure at the Columbia Roybal Center.

**Eligibility:** Applicants can be post-doctoral research fellows or faculty at any rank. Applicants are not required to be affiliated with Columbia University.; **Deadline:** Thursday, December 1st, 2022; For questions about the scientific content, please contact Ian Kronish, MD, MPH; Director, Columbia Roybal Center, at ik2293@columbia.edu; For questions about the application process and format, please contact Darlene Straussman, at ds3900@cumc.columbia.edu; Application Instructions; Message from the Director; Resources for Researchers

**Additional Information:** ViCTER RFA Released! Hello Colleagues, Just wanted to share information about the release of NIEHS’s Request for Applications (RFA) for the multi-disciplinary “Virtual Consortium for Translational/Transdisciplinary Environmental Research (ViCTER)” RFA-ES-21-007, which posted yesterday evening. The purpose of the ViCTER program is to foster and promote early-stage transdisciplinary collaborations and/or translational research efforts to address fundamental research among basic (technology and mechanism oriented), clinical (patient-oriented) and population-based researchers in the environmental health field. The newly established collaborative teams will come together in common interest to investigate potential linkages between human health and one or more environmental stressor(s). The ViCTER program is intended to support innovative high-risk, high-reward transdisciplinary/translational research projects that are more difficult to achieve in a typical R01 application. Collaboration among investigators at different institutions through a virtual consortium arrangement is encouraged. The next due date is February 1, 2022. There will be a free informational webinar on November 18th from 2-3pm ET. Please visit the ViCTER webpage for a link to register to the webinar and for any updates related to this announcement: https://www.niehs.nih.gov/research/supported/translational/victer/index.cfm. I invite you to share this announcement with teams of researchers who might be interested in this funding mechanism. If you have questions, please don’t hesitate to reach out to me. Special Exception to the NIH/AHRQ/NIOSH Post-Submission Material Policy During the COVID-19 Pandemic

Sponsor: National Institutes of Health (NIH); Agency for Healthcare Research and Quality (AHRQ); The National Institute for Occupational Safety and Health (NIOSH)

Deadline(s): For applications submitted for the January 2021 council (beginning with applications submitted for the May 25, 2020 due date for Fall 2020 review meetings), the NIH, AHRQ, and NIOSH will accept a one-page update with preliminary data as post-submission materials for applications submitted under all activity codes. ONLY if the Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application.; The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications.; All other materials listed in NOT-OD-19-083 as acceptable post-submission materials will continue to be accepted if submitted 30 days before the study section meeting.

**NIH single IRB (sIRB) policy**

**Sponsor:** NIH  
**Deadline(s):** (for NIH application submissions on or after 01/25/2018  
**Contact:** If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites  
**Link(s):** https://grants.nih.gov/policy/clinical-trials/single-irb-policy-multi-site-research.htm
**Additional Information:** The NIH single IRB (sIRB) policy applies to the domestic sites of new and competing renewal applications/proposals with due dates of January 25, 2018 and beyond for NIH-funded multi-site studies where each site will conduct the same protocol involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program; If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites; If Columbia University is being proposed as one of the participating sites in an application to be submitted this month or soon after by another applicant organization, you must also contact the HRPO immediately. Moving forward, it is recommended that you contact the HRPO as soon as a decision is made to participate in a multi-site study to which the NIH sIRB Policy applies.; An official process that details the requirements for addressing the NIH sIRB Policy is being finalized, to be released shortly. In the meantime, PIs and/or departments can reach out to irboffice@columbia.edu to inform the HRPO about these applications. Upon receipt of your email, HRPO will send you an online form to be completed, and you will be provided with next steps; In addition, we are offering several options to learn more about the sIRB process. **Note:** Protocols that address the same research questions, involve the same methodologies, and evaluate the same outcomes are considered to be the “same research protocol.” Additionally, sites that are accruing research participants for studies that are identical except for variations due to local context consideration would be considered to be conducting the “same research protocol.”; If you have any questions, please contact irboffice@columbia.edu; Our website contains resources to help you while you get accustomed to all of the policy changes impacting proposal preparation. We have an Excel checklist to help you complete the new PHS NIH Human Subjects and Clinical Trials Information Form. We also have a one-page reference guide (thank you Katherine Rochmat of School of Social Work for the initial template); https://research.columbia.edu/content/nih-proposal-information; As always, feel free to contact your SPA Project Officer should you have any questions about NIH proposal preparation; [brought to our attention by] Stephanie F. **Additional Information:** HRPO and IRB Updates; Dear colleagues, This email provides updates from the Human Research Protection Office (HRPO) on recent new or revised policies, regulations or requirements that may affect IRB activities and requirements.

- **Status of the Revised Common Rule:** The Final (revised) Common Rule, i.e., revisions to Subpart A of the DHHS regulations for the Protection of Human Subjects (45 CFR 46), were published on January 19, 2017, with an effective and compliance date of January 19, 2018 for the majority of the revisions. On January 17, 2018, an Interim Final Rule was released that delays the effective date for 6 months, to July 19, 2018. Certain federal departments and agencies are in the process of developing a proposed rule to further delay implementation. The HRPO is developing guidance for preparing for the transition to the Revised Common Rule. Stay tuned for more information...

- **Revised Policies:** Revisions have been made to the new IRB Policy on the Privacy Rule and the Use of Health Information in Research (IRB HIPAA & Research Policy) and the IRB Data Security Plans

---

Involving the Use, Storage or Transmission of Electronic Research Data Constituting Sensitive Data (IRB Data Security Policy). The IRB HIPAA & Research Policy, which was released on November 1, 2017, was revised to provide clarifications of definitions, scope, and when a Data Use Agreement is necessary. In addition, several case studies were added to assist with implementation of this policy. The IRB Data Security Policy was revised to include new terminology and definitions that are included in the [IRB HIPAA & Research Policy]. Sessions to explain the policy and review the examples will be scheduled. In addition, please let us know if you would like to have us come to your departmental meeting to review the policy; **Revised Standard Operating Procedures (SOPs):** Version 5.0 of the IRB’s SOPs were recently released. Included in this version: (*) Comprehensive information on Expanded Access; (*) Incorporation of Columbia’s Institutional Conflict of Interest Policy; (*) Clarifications on when Unanticipated Problems are reported to federal agencies; (*) Updates to the sections regarding recruitment of inpatients at NYP; (*) Addition of the new Single IRB processes; (*) Clarification on the process for IRB disapproval; **Process for Implementing the NIH Single IRB Policy:** The NIH Single IRB (sIRB) Policy is applicable to new and competing renewal applications/proposals for NIH funding that are due on or after January 25, 2018, and contract solicitations issued on or after January 25, 2018. It is applicable to NIH-funded multi-site domestic studies involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program.; If you are preparing an NIH application that is due on or before March 5, 2018, it is important that you contact the HRPO immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND (*) The same research protocol will be conducted at multiple domestic sites.; The HRPO and SPA have developed tools to facilitate implementation of this policy. These tools, including an overview of our process and template language that can be used in your grant applications, can be accessed here. The HRPO’s web page will continue to be updated with additional resources as more information becomes available to facilitate compliance with this policy.

**Upcoming HRPO Education Sessions:** Monthly IRB-Investigation Monthly Meetings: (*) February 22, 3:30-4:30pm, P&S Amphitheatre 1; (*) March 22, 3:30-4:30pm, P&S Amphitheatre 1; (*) April 26, 3:30-4:30pm, P&S Amphitheatre 1; (*) May 24, 3:30-4:30pm, P&S Amphitheatre 1; [We want to hear from you!]: Please send us your questions as well as suggestions for topics for future education sessions! NIH to Limit Total Grant Support to PIs

**Link(s):** https://www.nih.gov/about-nih/about-nih-director/statements/launching-next-generation-researchers-initiative-strengthen-biomedical-research-enterprise  
**Additional Information:** NIH announced on Tuesday that it will implement a limitation on the total grant support it will provide to principal investigators (PIs) who have multiple awards. The agency will use a “Grant Support Index” that assigns point values to various types of grants. PIs who exceed a set point, linked to having three or more awards with a single PI, will be forced to adjust their portfolio with reduced resources. NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH says that it believes 6 percent of PIs will be affected and that resources will be freed up to fund about 1,600 additional awards. NIH insists that no existing awards will be rescinded.; An article posted by Nature reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.

It explains each role’s responsibility, when it is appropriate to contact them, and where to find their contact information; See Who At NIH Can Answer my Question About….?; Remember that your Sponsored Projects Administration (SPA) Project Officer must communicate with NIH staff directly when submitting proposals, negotiating awards, submitting Just-in-Time information, submitting formal requests for prior approval, submitting progress reports, clarifying NIH policies, and discussing financial or administrative issues. However, there may be times when contacting NIH directly is appropriate, for example, to identify the right type of grant program and/or funding opportunity for you and your research, or to verify that your idea fits within the mission and priorities of an NIH Institute or Center.
