### DoD/CDMRP - COVID-19 Impact on Research Awards

<p>| Department of Defense | NA |
| DoD/CDMRP - COVID-19 Impact on Research Awards [No Link Provided] |  |
| CDMRP continues to be concerned about the impacts of COVID-19 on Service Members and the public. We are aware of the challenges it poses and are tracking some of the impacts to current awardees and ongoing research. While not every program will have financial resources available to assist, awareness of any significant unresolved issues affecting current research awards is important; The intent of this notice is to remind recipients of the requirements in 32 CFR Part 1134, Subpart E Other Reporting. This provision specifies the requirement for recipients to disclose significant developments as soon as they become known. These include problems, delays, or adverse conditions that will materially impair your ability to meet the objectives of your awards; Disclosures of significant developments may be made on your next interim performance report or at any point between scheduled performance reporting dates by contacting the Science Officer or Grant Specialist assigned to your award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation |  |</p>

**Additional Information:** The Center for Drug Use and HIV Research (CDUHR) is seeking pilot project applications focused on proposing high-impact and innovative research in the fields of HIV, HCV, substance use, and the continuum of prevention and care in these topical areas. The Pilot Projects Award provides the opportunity for investigators to develop new research initiatives or test the feasibility of new research strategies with the long-term goal of securing subsequent external funding.

Center for Drug Use and HIV Research; cduhr.pilot@nyu.edu; View this email in your web browser; The Center for Drug Use and HIV Research (CDUHR) is seeking pilot project applications focused on proposing high-impact and innovative research in the fields of HIV, HCV, substance use, and the continuum of prevention and care in these topical areas. The Pilot Projects Award provides the opportunity for investigators to develop new research initiatives or test the feasibility of new research strategies with the long-term goal of securing subsequent external funding.

CDUHR'S PILOT PROJECTS PROGRAM IS SEEKING APPLICATIONS IN THE AREAS THAT ALIGN WITH THE CENTER'S MISSION: The mission of CDUHR is to end the HIV and HCV epidemics in drug using populations and their communities by conducting transdisciplinary research and disseminating its findings to inform programmatic, policy, and grass roots initiatives at the local, state, national and global levels. CDUHR accomplishes this mission through a "core infrastructure" designed to develop and enhance research with the following objectives: Devise innovative strategies to overcome barriers to ending HIV/AIDS among people who use drugs (PWUD); Conduct research to reveal effective ways to implement evidence-based practices that will advance the goal of ending HIV/AIDS among PWUD; Develop multilevel conceptual models of HIV/AIDS among PWUD to guide intervention and other research that will reduce new HIV infections, and increase the proportion of individuals living with HIV on antiretroviral therapy and virally suppressed, or at-risk of HIV infection on PrEP; Awards of up to $25,000 will be distributed to support one-year pilot projects. As part of CDUHR's mentorship program, pilot project awardees and other interested applicants are encouraged to receive mentoring and are matched with at least two senior investigators for mentorship (list of potential mentors will be available September 1, 2021) both within and outside of the grantee's discipline to foster a broad transdisciplinary perspective to their research. New and early career investigators, and applicants currently collaborating with senior investigators are eligible to apply. Senior investigators seeking to develop new expertise or embark on research in areas related to CDUHR's mission are also eligible to apply. Priority is given to early career and new investigators; A letter of intent is recommended and it is requested by October 1, 2021. The letter of intent is not required, and is not binding. We may contact the applicant with questions or suggestions for the Initial Statement.
of the Research Question. See Application Instructions for submitting the Letter of Intent; A one-page Initial Statement of the Research Question that states the overall purpose and specific aims of the project, how the project aligns with CDUHR’s mission, and a completed Mentorship Form are due by October 11, 2021 by 5:00 pm. See Application Instructions for submitting the one-page Initial Statement of the Research Question.; These materials will be screened for alignment with CDUHR’s mission and NIH HIV/AIDS research priority areas. Those concept papers meeting initial criteria will be invited to submit a full application. Invitations to submit will be sent by October 20, 2021. Investigators invited to apply must submit a full application by November 22, 2021 by 5:00 pm. See Application Instructions for submitting the full application.; ELIGIBILITY: The Pilot Projects Program is an open competition to investigators and potential investigators who have obtained a doctoral level degree.; While senior investigators and applicants not seeking mentoring are eligible to apply, applicants representative of the following groups are particularly encouraged and will be prioritized: Early stage investigators; Established investigators without prior experience in HIV, HCV, and substance use research; Established investigators who are pursuing a new area of inquiry within the fields of HIV, HCV and substance use research, and Investigators considered to be nationally underrepresented in the field of HIV and substance use research by NIH and NIDA. These include individuals from underrepresented racial and ethnic groups, individuals with disabilities, and individuals from socially, culturally, economically, or educationally disadvantaged backgrounds that have inhibited their ability to pursue a career in health-related research.; Pilot projects funds may not be used to supplement or prolong ongoing research, to support dissertation research or coursework, or to purchase equipment, and cannot be used as bridge funds when other research support is no longer available.; AWARD CRITERIA: Funding decisions will be based on the following criteria: Relation of proposed research to CDUHR’s thematic focus of overcoming barriers to ending HIV/AIDS among PWUD.; The extent to which the research falls within the high priority topics in the NIH Strategic Plan for HIV and HIV-Related Research.; Scientific quality of the proposed research.; Innovativeness and significance of the research idea.; Likelihood of research findings to translate into practice and/or result in meaningful public health impact.; Use of multidisciplinary approach/methodology.; Potential of the project to enhance the training of the investigator.; Potential of research findings to lead to subsequent funding.; Additional consideration will also be given to applicants who are new and early career investigators, established investigators without prior experience in substance use and HIV or HCV research, or who are exploring a new area of inquiry in the field, and/or investigators who are considered to be nationally underrepresented in the fields of HIV or HCV and substance use research by NIH and NIDA, as outlined above.; Note that NIDA requires CDUHR to provide a description and justification of all pilot projects before initiating them. Notification includes a description and rationale for the project, and addressing the question of how it falls within CDUHR’s mission. In addition, CDUHR must state that the project will comply with NIH policies, including approval of human subject research. Clinical trials and projects that pose greater than minimal risk to participants require prior approval from the NIDA project officer. The request for approval must include protocols for human subjects protection and a Data and Safety Monitoring Plan (DSMP). See NIH PAR-18-225, Section VI, “Prior Approval of Pilot Projects” for original language.; TIMELINE: Letter of Intent (recommended, but not required); October 1, 2021; Initial Statement of the Research & Mentorship Form Due: October 11, 2021 – 5:00 pm; Applicants Notified of Invitation to Apply (Standard): October 20, 2021; Full Application Due: November 21, 2021 – 5:00 pm; Announcement of Award: January 2022; Award Period: February 1, 2022 – January 31, 2023; Mid-year Progress Report Due: August 1, 2022; Awardee Final Presentations: Fall 2023; RFA Information Here; Application Instructions; Looking for a time-sensitive funding opportunity? The Center also funds a smaller, time-sensitive funding opportunity (e.g., pilot data needed to support a grant submission or to obtain data prior to an imminent policy change will also be considered). Maximum awards for time-sensitive projects is $5,000.; Time-Sensitive RFA

**Additional Information:** We are pleased to announce that the 2021 - 2022 cycle of the K Award Development Seminars will begin on Thursday, October 21st, 2021 and will run through Thursday, May 19th, 2022. Please distribute this email to those you feel may benefit from this seminar series.; As of now, seminars will be held virtually on the 3rd Thursday of every month from 10:00 am-11:00 am (with the exception of the May seminar which will be Thursday, May 19th; 10:00 am – 11:30 am); These seminars are designed to assist research fellows and junior faculty with preparing their proposal for a K Award, but also to expose the application process to those who are interested in learning more. Each monthly seminar has a faculty presenter or panel and focuses on a component of the KAward application. One of the seminars is a mock review, where seminar participants volunteer to have their applications reviewed by faculty and the class experiences a simulated review committee meeting.; Please note that we are expecting participants to commit to the full cycle by attending each monthly seminar and be willing to share interim drafts for constructive comments.; We are asking participants to register by completing this survey form: https://www.surveymonkey.com/r/BDRTVBZ.; Catherine Monk, PhD, Professor of Medical Psychology (in Psychiatry and Obstetrics and Gynecology), has joined me again this year in co-leading the seminar.; If you have any questions, please feel free to email either of us.; please distribute this email to those who might benefit from the seminars.; Thank you!; Best Regards, Harold and Catherine; Harold Alan Pincus, M.D.; Professor and Vice Chair; Department of Psychiatry; Co-Director, Irving Institute for Clinical and Translational Research; Vagelos College of Physicians and Surgeons; Email: Harold.Pincus@nyspi.columbia.edu; Senior Scientist, RAND Corporation; National Program Director, Health and Aging Policy Fellowship; www.healthandagingpolicy.org

**Additional Information:** Apply for the 2022 RISE Competition! Dear Colleagues, We invite you to apply to the 2022 Research Initiatives in Science and Engineering (RISE) competition. Via a one to two year annual award of $80k, RISE seeds innovative, interdisciplinary, high-risk, and potentially high-impact research collaborations that are not ready to secure funding through conventional sources. All Columbia-employed, full-time researchers eligible to serve as Principal Investigators may apply for this internal seed funding opportunity, albeit with seven important restrictions and recommendations: PIs and Co-PIs currently funded by the RISE program may not submit applications; Applications must be fully collaborative and must include at least two Lead PIs. Applications from only one PI, or who name a Lead PI who is not a full-time Columbia faculty member, RISE will reject; At least one of the two PIs must be a researcher from a scientific, engineering, and/or medical discipline; Applications from PIs

**RESEARCH RESOURCES**

mailman.columbia.edu/ur2
that span two or more schools and departments are strongly encouraged; Applications from PIs that have never previously collaborated are preferred; Proposed projects must not have received support from Columbia’s other seed funding programs; Multiple applications from the same PI are discouraged.; **About RISE:** RISE supports projects that conventional funding sources perceive as too risky or unfamiliar. RISE provides up to $80,000 for one year – with potential for a second year of funding – to enable researchers to produce the preliminary data and establish an initial proof of concept before submitting the proposal to government agencies, private foundations, and/or for-profit companies. Therefore, **you should not submit proposals currently suitable for submission to such conventional mechanisms to RISE.** The most frequent reason reviewers reject RISE proposals is that they believe that the project appears ready for conventional review.; Since its inception in 2004, the RISE competition has provided approximately $13.3 million in seed funding to 89 project teams. Consonant with the high risk/high reward objective of RISE, approximately half the projects fail to prove out. However, the half that succeed have subsequently won over $78 million in extramural grants or a nearly six-fold return to our research community.; Last year’s 2021 competition received 37 applications. RISE advanced thirteen to the secondary stage of consideration, and awarded funding to six teams. 102 Columbia faculty participated as peer reviewers of the applications.; **Other Internal Seed Funding Programs:** The RISE competition is one of multiple seed funding programs internal to Columbia University. Should the project you are conceptualizing not fit within RISE’s purview of early-stage, discovery research, we encourage you to review other internal programs, which are identified via my Office’s webpage: [https://research.columbia.edu/content/internal-seed-funding](https://research.columbia.edu/content/internal-seed-funding); **How to Apply:** To apply for the 2022 RISE competition, please submit your application via InfoReady by 5:00 p.m. EST on Monday, October 18th, 2020. Internal peer review committees composed of researchers across the University review all complete and eligible applications. All eligible applications will receive anonymized feedback relayed by the RISE administrator team.; We invite a small handful of the very strongest applications to submit a four-page Round 2 proposal by January 2022. RISE awards up to six teams from Round 2 by Spring 2022.; For more information pertaining to the RISE program, including a list of Frequently Asked Questions and past awarded teams, please visit the website at [www.columbia.edu/RISE](http://www.columbia.edu/RISE). You may also refer to the sample Evaluation Form that reviewers will use when evaluating applications, which is attached to this email.; With questions about the RISE competition or how to design the strongest application, please email rise@columbia.edu.; Sincerely, Jeannette M. Wing; Executive Vice President for Research

Data Science Institute DSI Seed Funds Program Fall 2021; Call for Faculty Participation; deadline 11/08/2021

Sponsor: The Data Science Institute at Columbia University , https://datascience.columbia.edu/

Deadline(s): 11/08/2021

Contact: datascience@columbia.edu ; dsi-seed@columbia.edu

Additional Information: Call for Fall 2021 Proposals; The Data Science Institute at Columbia University datascience@columbia.edu ; DSI Seed Funds Program Fall 2021; Call for Faculty Participation; Deadline for proposal submission is Monday, Nov. 8,
2021 @ 3 p.m. ET; **FUNDING OPPORTUNITY FOR FACULTY AND RESEARCH STAFF:** Every field has data. We use data to discover new knowledge, to interpret the world, to make decisions, and even to predict the future. The recent convergence of big data, cloud computing, and novel machine learning algorithms and statistical method is causing an explosive interest in data science and its applicability to all fields. This convergence has already enabled the automation of some tasks that improve human performance. The novel capabilities we derive from data science will drive our cars, treat disease, and keep us safe. At the same time, such capabilities risk leading to biased, inappropriate, or unintended action. The design of data science solutions requires both excellence in the fundamentals of the field and expertise to develop applications which meet human challenges without creating even greater risk.; **The Data Science Institute (DSI) at Columbia University** is a world leader in the theory and practice of the emerging field of data science. We advance the state of the art in data science; transform all fields, professions, and sectors through the application of data science; and ensure the responsible use of data for the benefit of society. It is in this context that DSI promotes “Data for Good”: using data to address societal challenges and bringing humanistic perspectives as— not after—new science and technology is invented.; **PROGRAM GOALS:** The DSI Seed Funds Program supports new collaborations that will lead to longer term and deeper relationships among faculty in different disciplines across campus. Aimed at advancing research that combines data science expertise with domain expertise, the program’s funded research should embody the spirit of the Institute’s mission. We are interested in the application of data science to all domains and bringing ideas from other domains to bear on data science. Aligned with these efforts, we are particularly interested in proposals that address one or more of DSI’s focus areas: Business and Finance, Climate, Foundations of Data Science, Health, and Social Justice.; DSI is pleased to announce a call for proposals from Columbia University faculty and research staff for its Seed Funds Program. We seek proposals that represent new collaborations, which will ideally lead to future proposal submissions to government, industry, or foundations. As such, DSI Seed Funds may be viewed as planning grants for upcoming solicitations from DARPA, NIH, NSF, etc. We encourage proposals that address the technical challenges in the fair and ethical use of data.; **STATEMENT ON RACIAL EQUITY:** DSI is committed to racial equity and justice. Proposals should explicitly state that the project will uphold these values, e.g., stating that the methods used to collect and analyze project data, and the project outcomes reported are fair, just, and ethical.; **FUNDING:** This year, DSI will provide two levels of funding. We will accept proposals with budgets up to $25,000, as well as proposals with budgets up to $75,000, annually, for a maximum of two years. The $25,000 grants are intended for projects where significant salary support of Ph.D. students, postdoctoral researchers, or research scientists is not needed. As a condition of funding, awardees will be required to submit quarterly financial reviews and biannual progress reports. Eligibility for continued funding for a second year will also require a progress report. All reports must include progress on external funding proposal submission(s) and other related activities (presentations, publications, etc.); Budgets are encouraged to request support for DSI research scientists and for the university’s Bridge to the Ph.D. Program in STEM program.; DSI research scientists and scholars represent a wide range of expertise, from the foundations of data science to domains where data science is heavily used. Collaborating with a DSI research scientist or scholar may accelerate your research project.; The Bridge to the Ph.D. Program in STEM is a structured, post-baccalaureate opportunity aimed to diversify the STEM professoriate and workforce. By including one of their scholars as part of your DSI Seed Funds research proposal, you contribute towards increasing pathways for underrepresented students to advance in STEM disciplines. The Office of the Vice Provost for Faculty Advancement covers 70% of the scholar’s salary and fringe, with 30% (~$17K) expected from the sponsoring principal investigator (PI). Your DSI Seed Funds budget is eligible to cover the PI’s expected cost for sponsoring a scholar.; **PROPOSAL PROCESS:** The deadline for proposal submission is **Monday, November 8, 2021 @ 3 p.m. ET**. We will not accept incomplete or late submissions. Please submit the following materials via email in a single .doc or .pdf format to dsi-seed@columbia.edu: application cover page, project proposal, racial equity statement, budget, and CVs for faculty / collaborators two-page, NSF-style format; **We anticipate notifying award recipients by December 21, 2021.**

DSI Scholars Program | Call for Student Applications | Fall 2021 Cohort; View in browser: Call for Student Applications | Fall 2021 Cohort; DEADLINE TO APPLY: September 25th, 2021; The Data Science Institute is pleased to announce that the Data Science Institute (DSI) and Data For Good Scholars Programs for Fall 2021 are open for applications.; The goal of the DSI Scholars Program is to engage Columbia’s undergraduate and master students in data science research with Columbia faculty through a research internship. The program connects students with research projects across Columbia and provides student researchers with additional learning experience and networking opportunities. Through unique enrichment activities, this program aims to foster a learning and collaborative community in data science at Columbia.; The Data For Good Scholars program connects student volunteers to organizations and individuals working for the social good whose projects have developed a need for data science expertise. As "real world" problems with real world data, these projects are excellent opportunities for students to learn how data science is practiced outside of the university setting and to learn how to work effectively with people for whom data science sits outside of their subject area.; This term we have had a very large number of projects submitted; please give yourself enough time to read the project descriptions. For your application, choose the TOP five projects of which you are most interested, eligible and qualified.; Please email questions to dsi-scholars@columbia.edu, see our FAQ, archival (09/14/2021) information session, session recording and slides can be accessed here.; The Data Science Institute encourages women and underrepresented minorities to apply to these programs.; Applications are due by SEPTEMBER 25, 2021; Apply Here

[NTW] [NIH ANNOUNCEMENTS/COVID-19]

Clarification and Guidance for Applicants Preparing Applications for the Fall 2021 Due Dates During the COVID-19 Pandemic

**Sponsor:** Office of the Director, NIH

**Deadline(s):** 08/25/2021 (Release Date)
Contact: NIH Review Policy Officer; ReviewPolicyOfficer@mail.nih.gov

Additional Information: Last week, NIH issued announcement NOT-OD-21-180, which provides additional guidance related to COVID-19 for applicants preparing applications for the May 2022 Council round, beginning with the September 25, 2021 due date for Spring 2022 initial peer review meetings. Please see text of the announcement below, especially highlighted section.; Purpose: The NIH remains firmly committed to supporting the biomedical research enterprise as the nation implements the President's Guidelines for Re-Opening America Again. The purpose of this Notice is to clarify the guidance provided earlier NOT-OD-21-026, for applicants preparing applications for the May 2022 Council round, beginning with the September 25, 2021 due date for Spring 2022 initial peer review meetings.; Reviewers will continue to receive instructions to assume that constraints arising from the COVID-19 pandemic (e.g., lab occupancy restrictions, declines in patient accrual, etc.) will be resolved during the project period and thus should not affect their scores.; Therefore, NIH grant applications should NOT include contingency or recovery plans for problems resulting from the COVID-19 pandemic. However, applicants may address effects due to the pandemic on productivity or other scoreable issues in their Personal Statement in the NIH Biosketch. Reviewers will be instructed to take these pandemic-related circumstances into account when assessing applicants' productivity and other score-driving factors.; As with previous instructions, if needed, NIH staff will request and assess plans to resolve specific problems arising from the COVID-19 pandemic prior to funding.; [brought to our attention by] Stephanie F. **[NTW] [NIH LOAN REPAYMENT PROGRAM]**

**NIH Loan Repayment Program (LRP) - NEW information is now accepting applications through November 18, 2021**
**Additional Information:** NIH Loan Repayment Program (LRP) - NEW information; **Subject:** NIH Loan Repayment Program (LRP) - NEW information; The NIH Loan Repayment Program (LRP) is now accepting applications through November 18, 2021. Awardees can receive up to $100,000 of qualified educational debt repayment with a two-year contract. This includes most undergraduate, graduate, and medical school loans. Loan repayment benefits are in addition to the institutional salary received for research. LRP awards are based on an applicant’s potential to build and sustain a research career. It is important to review the LRP eligibility criteria, and reach out to the LRP Information Center or LRP Liaison directly if you have any questions about eligibility or the various LRP Extramural Programs; **New This Year - ASSIST:** The NIH LRP application is now part of the Application Submission System & Interface for Submission Tracking (ASSIST) system. To access ASSIST an eRA commons ID is required. You will not be able to start or submit an LRP application without an eRA commons ID. If you do not have an eRA commons ID, contact SPA-eBiz@columbia.edu; Read the LRP Application Guide in its entirety, and watch the 11-minute LRP application video, prior to starting the application. Note you will not need to create a Rascal Proposal Tracking Sheet. Although applications are now submitted through ASSIST, the process itself is the same as prior cycles: the applicant creates and submits the application online and adds the appropriate Institutional Business Official (IBO) in the system using the IBO’s eRA Commons ID. William Berger is the IBO for both Columbia University’s Morningside and Irving Medical Center campuses. Contact him directly at wb2174@cumc.columbia.edu; **Please Note:** For NYSPI/RFMH please contact Simone Roberts simone.roberts@nyspi.columbia.edu and Steve Valdez steve.valdez@nyspi.columbia.edu for NYSPI/RFMH specific instructions.; **New Extramural LRP Subcategory:** There is a new subcategory for the Extramural LRP called Research in Emerging Areas Critical to Human Health (REACH). The REACH subcategory is designed for investigators pursuing major opportunities or gaps in emerging high-priority research areas, as defined by NIH Institutes and Centers. REACH will provide new LRP funding opportunities for those applicants who do not meet research eligibility requirements for any of the existing Extramural LRP subcategories. Please review the REACH Priority Statements list for information on each IC-specified area that is considered an emerging and/or a gap area. We strongly encourage applicants to discuss their career interests with an NIH Institute or Center scientific liaison before applying to REACH.; **Checklist for applying:** Obtain your NIH eRA Commons ID and make sure your password is current. An eRA Commons ID will be required to start your application; View new application tutorial videos; Read the latest LRP Application Guide to learn about application components; Read about the new LRP subcategory Research in Emerging Areas Critical to Human Health - REACH and check out the guide notice; Reach out to an NIH LRP Program Officer to discuss your research; Ensure you have the correct Institutional Business Official (IBO) information; Contact an LRP Ambassador; Application Deadline - November 18, 2021; For general questions, reach out to NIH LRP at (866) 849-4047 or lrp@nih.gov.; [brought to our attention by] Stephanie F. **Additional Information:** NIH Loan Repayment Program 2022; The National Institutes of Health (NIH) released six separate program announcements for the 2022 application cycle of the NIH Loan Repayment Program (LRP). The LRP may repay up to **$50,000** of qualified student loan debt per year to outstanding health professionals who commit at least two years to conduct biomedical, behavioral, social, or clinical research, and who agree to engage in such research for an average of at least 20 hours per week based on a 40-hour work week. This includes most undergraduate, graduate, and medical school loans. Loan repayment benefits are in addition to the institutional salary received for research. LRP awards are based on an applicant’s potential to build and sustain a research career.

**NEW** – the application process is different this year! All applications must be submitted through the Application Submission System & Interface for Submission Tracking (ASSIST), and not the LRP website. We will provide more explicit instructions on how to apply through ASSIST as it becomes available. ASSIST will begin accepting applications on September 1st, 2021 through **November 18, 2021, 8pm EST**; Potential applicants should carefully read the general eligibility requirements, plus the eligibility requirements and application instructions under each funding announcement. Questions concerning eligibility should be discussed with NIH staff. Find the appropriate contact at the Contact and Engage page.; The six program announcements are: **NOT-OD-21-139** – LRP for Clinical Researchers (LRP-CR); **NOT-OD-21-140** – LRP for Pediatric Research (LRP-PR); **NOT-OD-21-141** – LRP for Health Disparities Research (LRP-HDR); **NOT-OD-21-142** – Clinical Research LRP for Individuals from Disadvantaged Backgrounds (LRP-IDB); **NOT-OD-21-143** – LRP for Contraception and Infertility Research (LRP-CIR); **NOT-OD-21-144** – LRP for Research in Emerging Areas Critical to Human Health (LRP-REACH) – **NEW; Please note:** Recipients of Ruth L. Kirschstein National Research Service Award (NRSA) support from an individual postdoctoral fellowship (F32) or an institutional research training grant (T32) will be eligible for loan repayment during the second year of NRSA support if a formal extension of the NRSA service payback is granted (see NIH Training Payback). **Concurrent fulfillment of LRP and NRSA service obligations is prohibited.** You must request a deferral of NRSA payback service prior to acceptance into the LRP. A deferral form can be obtained by contacting the LRP Help Line at 866-849-4047. It is important to note, though, that NRSA recipients may continue to receive their stipends from the NRSA.; All general questions should be directed to the LRP Information Center at (866) 849-4047 or [lrp@nih.gov](mailto:lrp@nih.gov); [brought to our attention by] **Stephanie F. Additional Information: NIH recently released new clarifications for the Other Support format pages and Biographical Sketches. Key clarifications include:

- Signatures are not required on the Other Support format pages until January 25, 2022, regardless of whether you use the old or new formats.
- Completed support from the last three years is no longer required in Other Support. Only include active and pending projects.
- Awardees must report significant changes in Other Support in RPPRs, such as a change in status of previously reported current or pending projects, or access to a new resource/in-kind contribution.
- Only unique, high-value materials and data received within the past three years, that are still in use, must be included as in-kind contributions in Other Support.
- Only current positions and scientific appointments are required in the Biosketch. Applicants may choose to include past appointments that they wish to highlight.
- Consulting agreements must be included in Other Support only when the PD/PI or other senior/key personnel will be conducting research as part of the consulting activities. Non-research consulting activities are not Other Support.
- Include estimates for the amount paid, rather than time and effort reflected in calendar months, for consulting that is disclosed in Other Support.

Rather than simply updating a previously submitted Other Support form, we strongly recommend that you create a new form from scratch, to ensure that you are able to implement all changes.

To assist you further, we created additional FAQs based on questions collected from researchers and administrators at Columbia University. They are meant to supplement NIH’s FAQs. In addition, we will be hosting monthly webinars to walk you through the forms. Stay tuned for a separate communication with the webinar schedule.

**Additional Information:** With the NIH application due dates approaching in late September and early October, we wanted to take this opportunity to remind the research community of the latest required researcher disclosure requirements in proposals: Biographical Sketch (“Biosketch”) – The newest Biosketch format is preferred immediately and *required* to be used for applications and Research Performance Progress Reports (RPPRs) submitted on or after January 25, 2022 NOT-OD-21-073 and NOT-OD-21-110; The Positions, Scientific Appointments and Honors section of the Biosketch must include, in reverse chronological order, all current positions and scientific appointments both domestic and foreign, including affiliations with foreign entities or governments. This includes titled academic, professional, or institutional appointments whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary); Regardless of whether you use the old or new formats, only current positions and scientific appointments are required in the Biosketch. Applicants may choose to include past appointments that they wish to highlight.; The **Personal Statement** may now include including ongoing and completed research projects from the past three years that you want to draw attention to (previously captured under Section D. Research Support); Biosketches can be created using SciENcv, or using NIH's blank format page in Word.; If you forgot to include an item in the Biosketch after submission, contact your SPA Project Officer as soon as possible.; Refer to NIH's Biosketch FAQs, Columbia's supplementary FAQs, and contact your SPA Project Officer should you have any questions.; Disclosing a Foreign Component – If any significant scientific element or segment of your project will be performed outside the United States, either by you or by a researcher employed by a foreign organization, whether or not grant funds will be expended, your project has a “foreign component” that requires disclosure and prior approval by NIH. See NIH's full definition of Foreign Component; You must answer Field 6 of the Research and Related (R&R) Other Project Information form to indicate whether your project involves activities outside the U.S. or partnerships with international collaborators.; If you answer “Yes” to Field 6, you must include a Foreign Justification attachment in Field 12, Other Attachments.; If a project develops a foreign component during the course of the project, prior approval must be obtained. Contact your SPA Project Officer in this situation.; See NIH's Foreign Component FAQs.; We will be hosting several webinars in the coming months to provide the latest information on Biosketches and Other Support. Stay tuned for a subsequent announcement.; As always, all questions should be directed to your SPA Project Officer.; [brought to our attention by] ; Stephanie F. The research community may elect to forward inquiries that are pending a response to the new central email inbox, as needed.; NIH encourages the research community to review the currently available resources related to this effort; Updated Biosketch resources, including FAQs and sample Biosketch format pages can be found here.; Additional resources, including training videos and other materials will be posted on the pages above as they become available.; Related Announcements: NOT-OD-21-110 - Implementation of Changes to the Biographical Sketch and Other Support Format Page; NOT-OD-21-073 - Upcoming Changes to the Biographical Sketch and Other Support Format Page for Due Dates on or after May 25, 2021; NOT-OD-19-114 - Reminders of NIH Policies on Other Support and on Policies related to Financial Conflicts of Interest and Foreign Components; It is important for all NIH applicants and awardees, including PIs, senior/key personnel, and grants administrators, to read it in its entirety.; The updated Biographical Sketch and Other Support format pages will be required for applications and Research Performance Progress Reports (RPPRs) submitted for due dates on or after May 25, 2021. It is advisable that you bookmark these pages: NIH Biosketch format pages and instructions and FAQs; NIH Other Support format pages and FAQs; Please note: PIs and senior/key personnel will be required to certify that their Other Support information is true, complete and accurate to the best of their knowledge.; Our office is in the process of reviewing the updated forms and instructions. We are scheduling webinars in the coming weeks to provide an overview of these changes. NIH is also planning to release additional resources and training materials in the coming weeks. If you are in the process of creating either a Biosketch or Other Support format page for applications and RPPRs due on or after May 25, 2021; Updated Biosketch resources, including FAQs and sample Biosketch format pages can be found here.; Updated Other Support resources, including FAQs and sample Other Support format pages can be found here.; One of the most important changes in the Biosketch instructions is Section B: “List in reverse chronological order: all positions and scientific appointments both domestic and foreign, including affiliations with foreign entities or governments. This includes titled academic, professional, or institutional appointments whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary).”; This is critical. The senior/key personnel, and mentors for training grants, have to include all positions and appointments, not...
just select ones, or ones relevant to the proposal. It’s not just the heading of Section B that changed, it’s the instructions to Section B; The changes as outlined in the announcement are as follows:

<table>
<thead>
<tr>
<th>Format Page</th>
<th>Changes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biographical Sketch Format Page</td>
<td>Section B ‘Positions and Honors’ has been renamed ‘Positions, Scientific Appointments, and Honors’.</td>
</tr>
<tr>
<td></td>
<td>For the non-Fellowship Biosketch, Section D has been removed. For the Fellowship Biosketch, Section D has been updated to remove ‘Research Support.’</td>
</tr>
<tr>
<td></td>
<td>As applicable, all applicants may include details on ongoing and completed research projects from the past three years that they want to draw attention to within the personal statement, Section A.</td>
</tr>
<tr>

**Additional Information:** NIH-Wide Strategic Plan for FY 2021-2025 Now Available; We are pleased to announce that the NIH-Wide Strategic Plan for Fiscal Years (FYs) 2021-2025 is now available. This updated plan articulates NIH’s highest priorities over the next 5 years, outlining our vision for the future direction, capacity, and stewardship of biomedical and behavioral research.; The plan is organized around a framework of three key objectives: [1] Advancing Biomedical and Behavioral Sciences; [2] Developing, Maintaining, and Renewing Scientific Research Capacity; [3] Exemplifying and Promoting the Highest Level of Scientific Integrity, Public Accountability, and Social Responsibility in the Conduct of Science.; The plan weaves five cross-cutting themes across these objectives, centered around minority health and health disparities, women's health, public health challenges across the lifespan, collaborative science, and data science. The plan also mentions several achievements made during the previous FY 2016-2020 plan, but please recognize that this plan is not meant to describe everything NIH does.; As Dr. Francis Collins, the NIH Director, notes in the opening statement, "NIH will [invest] efficiently and effectively in a wide range of basic, translational, clinical, and applied research, while at the same time supporting the workforce and infrastructure required for a sustainable research enterprise. As outlined in this Strategic Plan, this approach will enable NIH to build a solid foundation of fundamental knowledge about living systems that will serve to accelerate research aimed at addressing our most pressing health needs."; We appreciate members from the research community, professional societies, advocacy groups, and the public who worked with us and provided feedback throughout the process to develop this plan.

Research; Sponsored Projects Administration; sfs2110@cumc.columbia.edu ; Website: https://spa.columbia.edu/; New Proposal Functionality, NSF Website Enhancements, and Updates to the Biographical Sketch and Current and Pending Support Formats; Dear Colleagues: The National Science Foundation (NSF) has enabled a number of enhancements for proposals submitted in Research.gov, FastLane, and Grants.gov. In addition, the updated NSF-approved biographical sketch and current and pending support SciENcv and fillable PDF formats that fall under the revised Proposal & Award Policies & Procedures Guide (PAPPG) NSF 22-1 will be available to preview by September 17, 2021.; We are also excited to announce enhanced NSF Funding Opportunity Search functionality and revamped program pages on nsf.gov and beta.nsf.gov, the new version of the NSF website. As NSF builds its new nsf.gov website in small, iterative pieces using the https://beta.nsf.gov/ platform, we are not simply moving existing content from nsf.gov to the new site. Rather, the new website will improve how information is presented for use by various audiences including prospective proposers, grantees, and the general public.; Here’s what to know.; Research.gov Proposal Submission System Enhancements; Research.gov proposal features continue to expand to support the transition of all proposal preparation and submission functionality from FastLane to Research.gov by a target date of December 31, 2022. Many NSF funding opportunities are supported in Research.gov and clearly specify whether submission via Research.gov is available or required.; Effective August 30, 2021, Conference and Ideas Lab proposal types, renewal and accomplishment-based renewal submission types, and preliminary proposals for Ideas Lab solicitations are all now available for submission in Research.gov. FastLane must be used to submit preliminary proposals for proposal types other than Ideas Lab until that functionality is available in Research.gov.; The proposal preparation landing page has been revised, and Principal Investigators will now first select the proposal submission type from the drop-down options and then will follow the proposal setup wizard to initiate a new proposal. In progress and submitted proposals are accessible from the tiles on the revised proposal preparation landing page, after first selecting the submission type from the drop-down options.; New automated compliance checks and associated error and warning messages for the enabled proposal and submission types were also implemented. Error messages will prohibit proposal submission to NSF, whereas warning messages still permit proposal submission.; New Frequently Asked Questions (FAQs) were added to the Research.gov About Proposal Preparation and Submission page, and the Proposal Submission Capabilities page has been updated to reflect the latest development updates.; All supported proposal and submission types as well as associated compliance checks are also enabled in the Research.gov Proposal Preparation Demo Site.; Refer to the PAPPG NSF 20-1 for current proposal requirements. Guidelines in the revised PAPPG NSF 22-1 will apply for proposals submitted or due on or after October 4, 2021.; NSF-approved Biographical Sketch and Current and Pending Support Format Updates; Current and Pending Support Fillable PDF Updates; Based on feedback from the research community and NSF Program Officers, NSF has incorporated functionality as of August 30, 2021, in FastLane and Grants.gov to remove any pages which do not contain data entered by users (i.e., blank pages) from the NSF-approved current and pending support fillable PDF. This trimming functionality will be integrated in Research.gov on October 4, 2021, in coordination with implementation of the revised PAPPG NSF 22-1 for proposals submitted in Research.gov and project reports submitted in the Research.gov Project Reporting System.; The trimming service only applies to the NSF-approved current and pending support fillable PDF and not to any other uploaded PDFs. Current and pending support PDFs generated in SciENcv do not include blank pages.; The current and pending support fillable PDF document is paginated, and the PDF page numbers will not be updated during the trimming process. This means that it is possible for the trimmed PDF to have skipped page numbers corresponding to the blank pages removed from the fillable PDF. NSF Program Officers are aware of this potential occurrence in proposals submitted to NSF.; Proposers with in progress proposals as of August 30, 2021, can delete previously uploaded current and pending support fillable PDFs from their FastLane or Grants.gov proposals and then re-upload them to trigger the trimming service.; Updated Biographical Sketch and Current and Pending Support SciENcv and Fillable PDF Formats; The updated NSF-approved biographical sketch and current and pending support formats will be available in September 2021 to preview before they are required on October 4th. The updated fillable PDF formats will be available for download from the NSF biographical sketch and current and pending support websites by September 3rd. Updated SciENcv formats will be available on the SciENcv Create a New Document screen by September 17th.; Biographical sketch format updates include increasing the page limit from two to three pages.; Current and pending
support format updates include the addition of new sections for information on objectives and overlap with other projects to help NSF and reviewers assess overlap/duplication. Although submission of the updated NSF-approved formats is not permitted (i.e., Research.gov, FastLane, and Grants.gov will not allow the 22-1 forms to be uploaded) until implementation of the revised PAPPG NSF 22-1 on October 4, 2021, NSF is encouraging proposers and grantees to begin familiarizing themselves with the updated NSF-approved formats when they are available; Enhanced Funding Opportunity Search Functionality and Revamped Program Pages; Based on extensive research with external and internal stakeholders, NSF has made significant improvements to the NSF Funding Opportunity Search functionality to help researchers and prospective researchers quickly and easily find relevant programs and NSF-funded projects in specified disciplines. Funding Search results now include short program descriptions, programs incorporated in core program solicitations with links to the relevant guidelines, and Dear Colleague Letters; The revamped program pages include significant content and navigation improvements including information previously only viewable in solicitations; For more information about NSF’s beta site, please visit https://beta.nsf.gov/about-beta. NSF will continue to enhance the site, and ongoing feedback from external and internal stakeholders is vital to the process. Feedback on the updated Funding Search and program page enhancements or any other aspect of the site may be directed to beta-nsf-feedback@nsf.gov; Questions? If you have IT system-related questions, please contact the NSF Help Desk at 1-800-381-1532 (7:00 AM - 9:00 PM ET; Monday - Friday except federal holidays) or to rgov@nsf.gov. Policy-related questions should be directed to policy@nsf.gov; Regards, National Science Foundation

Additional Information: NSF Predictive Intelligence for Pandemic Prevention – EVPR Information and Networking Session on August 4 for NSF 21-590 Solicitation; A new exciting NSF Development Grant opportunity: Predictive Intelligence for Pandemic Prevention (PIPP) on behalf of the Columbia Research Deans and Leaders: Garud Iyengar, Bob Mawhinney, Gary Miller, Mike Shelanski, Maureen Raymo, and Jeannette Wing. An information session will be held on Wednesday, August 4, 2:00 – 3:30 pm EST registration here. All faculty are welcome to attend! During the information session, participants are welcome (but not required) to give lightening talks to present their proposed research contribution in response to this funding announcement in 1-2 minutes. Discussion will take place on potential partnerships and participation. This opportunity spans very broad areas of research, and it is expected there will be balanced participation from computer and information science, biology, engineering, and social, behavioral, and economic sciences.; For questions about this event, or for more information about this opportunity, please email Victoria Hamilton, Executive Director, Research Initiatives, at victoria.hamilton@columbia.edu. See below for more information.; Dear Faculty,

The NSF has created a new program: Predictive Intelligence for Pandemic Prevention (PIPP). The goal is to transform society’s ability to forecast the likelihood of pandemic-scale events, detect outbreaks early, and respond quickly, thereby limiting transmission before an epidemic, let alone a pandemic, can occur. Please join our upcoming info session about this opportunity:

Date: Wednesday, August 4 (2:00 PM - 3:30 PM EDT); REGISTER HERE ; About: In anticipation of a future major multi-year Center Grant RFP, the NSF has issued an RFP for a Development Grant of up to $1M and 18 months duration, due October 1, 2021. Four directorates of NSF (BIO, CISE, ENG, SBE) collaborated on this RFP, and a successful proposal will have PI’s and co-PIs balanced participation across each of the four disciplines.; The $1M Development Grant is to: Articulate and refine a
vision of an innovative interdisciplinary Grand Challenge that a Center should pursue; Support team-formation activities (e.g., filling expertise gaps), to develop and nurture relationships with the stakeholder community, and to access specialized resources needed to address the proposed challenge; Pursue one small portion of the research that the Grand Challenge proposes to address.; Because of NSF’s emphasis on cross-disciplinary convergent research, Research Deans and Leaders (Garud Iyengar, Bob Mawhinney, Gary Miller, Mike Shelanski, Maureen Raymo, and Jeannette Wing) are sponsoring a workshop for this opportunity; Meeting Agenda: Overview of the solicitation requirements, webinar and FAQ (15 minutes + 5 minutes Q&A); 2 Minute Lightning Talks – Slide Submissions (30-45 minutes) - Participants are welcome (but not required) to sign up to present your research contribution or vision in 1-2 minutes. See guidelines below.; Discussion of synergies, ideas for partnership (15 minutes); Presentation/Submission Guidelines; Submission Deadline: Monday, August 2 (5:00 PM EDT) - Please submit within the deadline to give a presentation. Note that if you submit after the deadline, we will try to review and include your presentation.; SUBMISSION FORM; Lightning talks are open to all attending the event. Anyone presenting should prepare a single slide, submitted to including the following: Your name, department and school (to be shared with all participants); Identify the slide as either: Grand Challenge vision – what should the center do?; Contributions of relevant research expertise; Further ideas for collaboration; More Information: The Development Grant RFP is online here; The NSF sponsored four workshops to help shape the PIPP program. You can find the list of speakers/attendees, topics, and recordings online here; The RFP Webinar of July 13 and FAQs is online here; We hope you can attend.

Additional Information: May 28, 2021; Statement by NSF Director Sethuraman Panchanathan on the President’s FY22 Budget Request; President Proposes Crucial Investments to Advance the Frontiers of U.S. Science and Technology; The Biden-Harris Administration today submitted to Congress the President’s Budget for fiscal year 2022. As the Administration continues to make progress defeating the pandemic and getting our economy back on track, the Budget makes historic investments that will help the country build back better and lay the foundation for shared growth and prosperity for decades to come.; “This request will bolster the U.S. economy and our leadership in critical and emerging areas of research and technological advancements, which are essential to our long-term economic and national security,” said NSF Director Sethuraman Panchanathan. “NSF’s mission is unique in supporting research across all fields of science, technology, engineering, and mathematics, and all levels of STEM education. Seven decades of experience building the necessary partnerships between federal, state, and local government, academia, and industry have produced remarkable results for the country. With this budget, we can rapidly scale our investments and build even stronger bridges between discovery, innovation, and commercialization.”; The Budget includes more details on what is proposed in the two historic plans the President has already put forward — the Americans Jobs Plan and the American Families Plan – and reinvests in education, research, public health, and other foundations of our country’s strength. At the U.S. National Science Foundation, the Budget would: Enhance Fundamental Research and Development. $9.43 billion, an increase of $1.55 billion above 2021 enacted level will support research across the spectrum of science, engineering and technology. This includes biological sciences; computer and information sciences; engineering; geosciences; math and physical sciences; social, behavioral, and economic sciences; and education. With this additional funding, NSF will continue to be the champion of basic and fundamental research and will strengthen it at speed and scale; Strengthen U.S. Leadership in Emerging
Technologies. Includes the establishment of a new directorate for technology, innovation and partnerships within NSF to help translate research into practical applications. The directorate will work with programs across NSF and with other federal and non-federal entities to expedite technology development in emerging areas that are crucial for the United States’ technological leadership; Advances Equity in Science and Engineering, +$100 million, an increase of about 50 percent, in funding for programs that aim to increase participation in science and engineering of individuals from racial and ethnic groups underrepresented in these fields. Funding will support curriculum design, research on successful recruitment and retention methods, development of outreach or mentorship programs, fellowships, and building science and engineering research and education capacity at historically black colleges and universities, and other minority-serving institutions; Advances Climate Science and Sustainability Research. $1.2 billion for climate and clean energy-related research will fund a broad portfolio of research related to climate science and clean energy, including research on atmospheric composition, water and carbon cycles, modeling climate systems, renewable energy technologies, materials sciences, and social, behavioral, and economic research on human responses to climate change; Continues Construction of Forefront Research Infrastructure. Invests in the continued construction of major NSF research facilities, including long-term upgrades of NSF’s major Antarctic infrastructure. It also supports construction of the Vera C. Rubin Observatory to enable astronomy research. In addition, the budget request seeks funding for the construction and procurement of smaller research facilities and equipment across the nation.; Enacting the Budget policies into law this year would strengthen our Nation’s economy and lay the foundation for shared prosperity, while also improving our Nation’s long-term fiscal health.; For more information on the President’s FY22 Budget, please visit: https://www.whitehouse.gov/omb/budget/; For more information on the NSF budget, please visit: https://beta.nsf.gov/budget ; - NSF- [brought to our attention by Stephanie Scott / SPA]

The Alliances are integral to NSF INCLUDES and bring together new partners from many academic and professional disciplines and leverage the five design elements of collaborative infrastructure to address a broadening
participation challenge at scale. In FY 2018 and FY 2019, NSF INCLUDES funded a total of eight Alliances. For more information on funded NSF INCLUDES Alliances, visit https://www.includesnetwork.org/home; NSF INCLUDES Alliances build the infrastructure necessary to foster collaboration and broaden participation in STEM by emphasizing the following five design elements of collaborative infrastructure: Shared Vision - Develop a shared vision and strategy (e.g., problem statement and theory of change) for broadening the participation of the target population(s) in STEM along with relevant metrics of success and key milestones/goals to be achieved during the project's lifecycle; Partnerships - Develop multi-stakeholder partnerships and build infrastructure among them to decrease social distance and achieve progress on common goals targeted by the Alliance; Goals and Metrics - Contribute to the knowledge base on broadening participation in STEM through broadening participation and implementation research, sharing project evaluations, data, new scientific findings/discoveries, and promising practices; Leadership and Communication - Establish a "backbone" or support organization that provides a framework for communication and networking, network assistance and reinforcement, visibility and expansion of the Alliance and its partners, that will collaborate with the NSF INCLUDES Coordination Hub; Expansion, Sustainability, and Scale - Advance a logic model or other heuristic that identifies Alliance outcomes that reflect implementation of change at scale and progress toward developing an inclusive STEM enterprise.; NSF anticipates making up to three Alliance awards with a duration of five years, contingent on availability of funds and receipt of competitive proposals. Awards will range from $1.0 to $2.0 million per year for five years depending on the goals, objectives, and the size of the communities involved.; Eligibility: The lead PI must possess the experience and institutional support necessary to implement and manage the INCLUDES Alliance.; Deadlines: Internal Proposal due 9:00 a.m. on Wednesday, August 25, 2021; Sponsor Letter of Intent due October 4, 2021; Sponsor Proposal due January 25, 2022; How: For more information, please visit the internal application at https://columbia.infoready4.com/#competitionDetail/1848662; Questions should be sent to Greg Culler at limitedsubmissions@columbia.edu.; Program Solicitation: https://www.nsf.gov/pubs/2020/nsf20569/nsf20569.htm; Research Initiatives; Office of the Executive Vice President for Research; Columbia University in the City of New York; To view current limited submission programs please visit: https://columbia.infoready4.com/#limitedsubmissions; COLUMBIA | RESEARCH

**Additional Information:** This FOA invites basic and/or methodological research projects that seek to illuminate or measure independent and interdependent health-related effects within dyads. For the purpose of this FOA, a dyad is a unit of two individuals whose interactions and influences on one another are nested within larger social contexts and networks. Both animal and human subjects research projects are welcome. Types of projects submitted under this FOA include but are not limited to, observational studies involving humans, or existing/synthesized datasets studies. Researchers proposing basic science experimental studies involving human participants (i.e., experimentally manipulate independent variables) should consider the companion FOA PAR-21-280 “Dyadic Interpersonal Processes and Biopsychosocial Outcomes (R01 Basic Experimental Studies with Humans).”

**Additional Information:** This FOA invites basic and/or methodological research projects that illuminate and/or measure independent and interdependent health-related effects within dyads across relationships and settings. For the purpose of this FOA, a dyad is a unit of two individuals whose interactions and influences on one another are nested within larger social contexts and networks. Dyads are social relationships that extend beyond the individual and have strong bidirectional influences on physical and mental health. For the purpose of this FOA, independent effects are those effects that affect each member of the dyad individually (i.e., by nature of being part of the dyad), whereas interdependent effects are those that affect one member of the dyad contingent upon the other member of the dyad (i.e., not only because the individual is part of a dyad but also because being part of the dyad has an effect on the other individual within the dyad as well).

**Additional Information:** Sending on behalf of the Naomi Berrie Diabetes Center of Columbia University, and the Russell Berrie Foundation. Please send all questions to Dr. Utpal Pajvani up2104@cumc.columbia.edu. Applications are due **October 1, 2021.** See attached PDFs for more details and specific application instructions.; **2021 Naomi Berrie Diabetes Center; Russell Berrie Foundation Awards in Diabetes Research;** This program is designed to support the mentored diabetes-related research activity of outstanding postdoctoral fellows for a period of up to two years. The program will support postdoctoral scientists at up to $75,000 per year, for a maximum of two years (for a total of $150,000). Start dates are in January 2022. A second year of funding may be available contingent upon progress made in the first year and other programmatic considerations.; All postdoctoral scientists are eligible to apply to one of the following award mechanisms: 1) The **Russell Berrie Foundation Fellow Award** will be awarded to 2 post-doctoral scientists at Columbia University. Research projects can be laboratory-based or clinical, and can relate to causes, consequences or treatments of diabetes and allied disorders such as obesity.; 2) The **Russell Berrie Foundation Scholar Award** will be awarded to 1 foreign (non-US citizen) post-doctoral scientist being recruited by any lab at Columbia University to engage in clinical or laboratory research in diabetes and allied disorders such as obesity. Ideally, this will be a prospective application for an outstanding recruit who would otherwise not be able to be hosted by a Columbia University lab due to ineligibility for most funding mechanisms, such as NIH-supported training grants.; 3) For all awards, applicants with a committed career path in diabetes and obesity research, as demonstrated by prior achievements, completed training, or special skills in novel and underrepresented research themes, will be given preference. “High risk” studies, designed to test or extend novel concepts, are encouraged.; Please review the attached RFAs for further details. Applications are due to Dr. Utpal Pajvani up2104@cumc.columbia.edu by **October 1, 2021.**

Additional Information: NIH NOSI supports returning biomedical researchers; NIH Office of Research on Women’s Health; NIH NOSI Supports Returning Biomedical Researchers; NIH has announced a new supplements program for researchers returning to biomedical careers after a qualifying absence. Under “Notice of Special Interest (NOSI): Research Supplements to Promote Reentry and Reintegration into Health-Related Research Careers” (NOT-OD-21-134), successful applicants will be able to participate in full- or part-time mentored research experiences through existing NIH research grants. Eligible for these reentry supplements are individuals whose research careers have been interrupted for at least 6 months because of family responsibilities or other qualifying circumstances. The reintegration supplements will enable individuals to find supportive scientific environments after departure from an unsafe or discriminatory environment resulting from unlawful harassment.; Most candidates for the reentry supplements will have a doctoral degree or equivalent; however, some awarding NIH Institutes and Centers may enable predoctoral students, including those enrolled in dual-degree programs, to apply. Postdoctoral and predoctoral students are eligible to apply for reintegration supplements to allow them to transition to a safe, supportive research environment and complete their graduate degrees.; Click here for more information, including detailed eligibility requirements and staff contacts. The first available due date for submissions is August 26, 2021, and the supplements program is set to expire on October 7, 2023.; Related Announcements: PA-20-272 - Administrative Supplements to Existing NIH Grants and Cooperative Agreements (Parent Admin Supp Clinical Trial Optional)

Additional Information: The Peter T. Rowley Breast Cancer Scientific Research Projects (Round 7) Request for Applications (RFA) has been released. This RFA provides funding for researchers to try new methods and approaches in breast cancer research. The NYS Health Research Science Board wishes to stimulate and support research related to breast cancer biology, causation, prevention, detection or screening, treatment (including treatment of its effects), survivorship or cure. Any investigative approach appropriate to the application topic may be pursued, including, but not limited to, basic, translational, clinical, demographic, mapping, epidemiological, environmental, behavioral or psychosocial research. Projects will be supported by the state’s Breast Cancer Research and Education Fund. Approximately $2.16 million will be available through this RFA to support approximately five to seven of these awards. Annual direct costs are capped at $150,000. The contract term will be up to two years. To download a copy of the RFA and instructions, visit the New York State Grants Gateway:
https://grantsgateway.ny.gov/intelligrants_NYSGG/module/nysgg/goportal.aspx?NavItem1=4&ngoID=5001954. The Letter of Intent is not required; but is strongly encouraged and due by 8/24/2021. Applications are due by 4:00 PM EST on 10/26/2021 in the New York State Grants Gateway. EPA is seeking applications for research to accelerate water innovation that advances clean and safe water reuse goals, promotes better understanding of the Nation's water and wastewater treatment and infrastructure, and enhances the availability and efficient use of water resources through water reuse. This new funding opportunity is titled National Priorities: Water Innovation, Science, And Engagement to Advance Water Reuse Request for Applications (RFA). Safe and reliable water supplies are critical for our Nation's public health, ecosystems, and economy. As 89 percent of the western U.S. currently faces a drought, communities, agriculture, and businesses across the country are looking to diversify their supply portfolios to meet current and future needs. Water reuse (also commonly known as water recycling or water reclamation) represents a major...
opportunity to enhance the sustainability and efficient use of water resources to ensure the quality and quantity of existing water supplies. Water reuse is a well-established practice in some areas of the United States and internationally, yet substantial barriers exist to expand its consideration and application for different purposes and benefits. This RFA is intended to address multiple water reuse sources and applications that support national efforts to reduce technological and institutional barriers for expanded water reuse. Applications should address at BOTH of the following research areas: Research Area 1: Science, Technology Development, and Validation for Water Reuse Applications; Research is needed to help inform the role of water reuse in securing water availability and water quality for user communities. Research gaps exist for future fit-for-purpose specifications using risk assessment strategies; brine reduction and disposal technologies and processes; development of real-time monitoring and control strategies for water treatment processes; and assessment, demonstration, and validation of novel or improved treatment technologies.; Research Area 2: Social Science, Information, Engagement, and Organizational Barriers to Water Reuse; Research is needed to improve the national understanding of the water available for reuse and the critical impediments to advancing water reuse across the U.S., including public acceptance. Both social and organizational barriers contribute to the critical research gaps surrounding reuse, including, but not limited to potential policy, legal, regulatory, financial, and social impediments. More research is needed on the best approaches for improving cross-organizational engagement as well as approaches that increase public acceptance of water reuse.; For information on eligibility, project specifications, or how to apply, visit: National Priorities: Water Innovation, Science, and Engagement to Advance Water Reuse Request for Applications (RFA). Learn more about the Safe and Sustainable Water Resources (SSWR) Research Program.; Learn more about EPA Research Grants.; Informational Webinar; Date: August 5, 2021; Time: 2:00 p.m. ET; Join us for an informational webinar on the National Priorities: Water Innovation, Science, And Engagement to Advance Water Reuse funding opportunity. The webinar will cover application information and provide an overview of what has already been provided in the RFA.; Webinar Objectives: Share general information and information on research areas for the RFA (EPA Project Officer); Learn about the submission, eligibility, relevancy review and peer review processes (EPA Eligibility, Submission, and Peer Review Officers); Question & answer session; A copy of the webinar presentation will be available on the RFA webpage for those unable to participate in the scheduled webinar.

EJ is defined as the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies. Low-income, minority, tribal and indigenous communities are often disproportionately vulnerable to environmental health challenges because they are faced with greater exposure to many sources of pollutants or contaminants. They are also more likely to be overburdened due to systemic environmental policies resulting in wealth and health inequities or disparities and underserved in adaptive capacity to respond to and cope with emerging environmental stressors caused by climate change. Climate change can create various levels of environmental and health impacts in different regions, communities, and population groups across the nation. Additionally, children, older adults, and people with disabilities or pre-existing health conditions may be most susceptible and vulnerable to climate changes and associated environmental stressors. Proposed research projects should address all of the following research questions: What may be the most influential
community-, population- or lifestage-specific vulnerabilities caused by ongoing climate change that would elevate exposure to pollutants or contaminants and further exacerbate the health effects from exposure to pollutants or contaminants in overburdened communities?; What are the cumulative health impacts of climate change related stressors on vulnerable groups or susceptible lifestages in overburdened communities?; How can community-based scientific research results be translated and/or applied to provide effective solutions to reduce climate change impacts on human health in overburdened communities?; For information on eligibility, project specifications, or how to apply, visit: Cumulative Health Impacts at the Intersection of Climate Change, Environmental Justice, and Vulnerable Populations/Lifestages: Community-Based Research for Solutions Request for Applications (RFA); Learn more about EPA Research Grants; Informational Webinar https://cumulative_health_impacts_climate_change.eventbrite.com; Date: Tuesday, October 5, 2021; Time: 1:00 p.m. - 2:00 p.m.; Join us for an informational webinar on this funding opportunity. Additional Information: Register Now: Sustainable Communities Web Challenge; The U.S. Environmental Protection Agency (EPA), Code for America, and the Georgia Center of Innovation for Energy Technology have launched the Sustainable Communities Web Challenge, which will award a total of up to $10,000 across all winning participants. The purpose of this challenge is to customize our interactive community starter pages for a community of interest. These pages integrate tools that show the relationships between industries and the environment and local economy with an eye toward informing community decisions around sustainability. Sustainable communities promote health and well-being, such as through materials reuse and recycling, and prevention of environmental releases, while also being economically robust.; The challenge is open to anyone who is interested in creating these community pages, including students from high school through graduate school, community representatives, coders and others. An adult is required to register and oversee participation of any minors.; To start, the challenge asks participants to choose a location of interest – ranging from a local community to multiple states. They can then join a community team or create a new team for their community and use our starter pages to start their community page. To create a competitive challenge entry they may further develop, customize, and improve our existing web tools that integrate EPA models and data, or integrate data, tools or imagery from other sources of their choosing relevant to issues in their community. Participants will compete for $10,000 in awards. The challenge will culminate in a full-day showcase event and
award presentation on October 2, 2021; Register to participate; Learn more about the Challenge; Virtual workshops and Slack channel Information; Learn more about USEEIO.

**Link(s):** https://grants.nih.gov/grants/guide/notice-files/NOT-RM-21-029.html

**Additional Information:** The Bridge2AI Program seeks to bridge the biomedical and behavioral research communities with the rapidly growing community of experts developing AI/ML models by producing flagship datasets that adhere to the FAIR principles (Findable, Accessible, Interoperable, Reproducible) and critically integrate ethical considerations in preparing data for computation. The program will use biomedical and behavioral research grand challenges to drive the development of ethics, standards, tools, data sets, and skills and workforce development strategies for linking scientific workflows, protocols, and other information about the data collection process into computable knowledge. Data sets may be linked to existing clinical, environmental and surveillance data as required by the chosen grand challenges. The overall goal of the Bridge2AI Program is to generate flagship datasets and best practices for the collection and preparation of AI/ML-ready data to address biomedical and behavioral research grand challenges. The Bridge2AI program will require multiple scientific domains to come together with data science, data management and analytic experts to unlock the potential of AI/ML for the scientific community.

**Contact:** For questions about the opportunity, please contact John McLaughlin John.McLaughlin@noaa.gov

**Additional Information:** PEPH Colleagues, Here is a funding opportunity from NOAA that may be of interest to many of you.; For questions about the opportunity, please contact John McLaughlin John.McLaughlin@noaa.gov; NOAA Announces new Environmental Literacy Program Funding Opportunity; Apologies for any cross postings.; The NOAA Office of Education has issued a competitive funding opportunity for projects that develop the collective environmental literacy necessary for communities to take actions that build resilience to extreme weather and climate change in ways that contribute to community health, social cohesion, and socio-economic equity.; This funding opportunity is soliciting two types of projects through separate competitive priorities.; Priority 1 will support new projects ($250,000 - $500,000 per project) located in the following states: Colorado, Connecticut, Delaware, District of Columbia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Pennsylvania, Rhode Island, South Carolina, South Dakota, Vermont, Virginia, West Virginia, Wisconsin, and Wyoming. The entirety of a project must only serve audiences located in one or more of these listed states. Please note: The previous funding opportunity for this program in 2020 covered the other states and territories of the United States.; Priority 2 will support the evolution of projects ($250,000- $500,000 per project) funded under the 2015-2018 funding opportunities from this program. The list of projects that are eligible can be found here.; For both priorities, eligible applicants are: institutions of higher education; K-12 public and independent schools and school systems; other nonprofits, including community-based organizations and informal education institutions, such as museums, zoos, and aquariums; state and local government agencies; and Indian tribal governments in the United States.; Please note that we do not anticipate issuing a solicitation for applications next year. Rather, applications to this funding opportunity may be funded with fiscal year 2022 and 2023 funds.; Deadlines: For Priority 1, pre-applications are required and will be used to determine which applicants are invited to submit full applications to this priority. The deadline for pre-applications is 11:59 pm EDT on November 1, 2021 and the deadline for Priority 1 full applications is 11:59 pm EDT on March 17, 2022.; For Priority 2, only full applications are requested and the deadline for Priority 2 applications is 11:59 pm EST on January 25, 2022.; Informational Teleconferences; For Priority 1, two informational teleconferences with the program officers will occur on Thursday, September 23, 2021 from 3:00 to 5:00 pm EDT and Monday, September 27, 2021 from 3:00 to 5:00 pm EDT. An informational teleconference for Priority 2 with the program officers will occur on Thursday October 28, 2021 from 3:00 to 5:00 pm EDT. Interested applicants may obtain the phone number and related teleconference information by visiting the Apply webpage. Whenever possible, individuals from the same institution should try to
join the teleconference from the same phone line to maximize our ability to host as many interested institutions as possible.;
Additional Information; Read the full funding announcement NOAA-SEC-OED-2022-2006995 in Grants.gov for the complete requirements.; Sincerely, NOAA Environmental Literacy Program Grants Team; [ brought to our attention by] John McLaughlin; Education Program Manager; National Oceanic and Atmospheric Administration Office of Education; (202) 482-2893; John.McLaughlin@noaa.gov

DoD/CDMRP - COVID-19 Impact on Research Awards
[No Link Provided]
CDMRP continues to be concerned about the impacts of COVID-19 on Service Members and the public. We are aware of the challenges it poses and are tracking some of the impacts to current awardees and ongoing research. While not every program will have financial resources available to assist, awareness of any significant unresolved issues affecting current research awards is important.; The intent of this notice is to remind recipients of the requirements in 32 CFR Part 1134, Subpart E Other Reporting. This provision specifies the requirement for recipients to disclose significant developments as soon as they become known. These include problems, delays, or adverse conditions that will materially impair your ability to meet the objectives of your awards.; Disclosures of significant developments may be made on your next interim performance report or at any point between scheduled performance reporting dates by contacting the Science Officer or Grant Specialist assigned to your award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation

Earlier today, NIH issued corrected instructions to request childcare costs for recipients of NRSA individual fellowships. See NOT-OD-21-074, which replaces to announcement NOT-OD-21-069 referenced below. NIH also updated its FAQs; if you have any questions regarding how to make the request in a fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. We’ll provide you with any updates [brought to our attention by] Stephanie Scott, Announcement of Childcare Costs for Ruth L. Kirschstein National Research Service Award (NRSA) Supported Individual Fellows; This week NIH announced a new policy to allow for childcare support costs to recipients of NRSA individual fellowships (i.e., F31, F32, etc). These costs must be specifically requested in new, continuation applications or through administrative supplements beginning on or after April 8, 2021. Please read the full announcement at NOT-OD-21-069, the FAQs, and supplementary information below.; Some key takeaways: The policy applies to full-time NIH-NRSA supported individual fellowship applicants and awardees. However, additional information is forthcoming later this year regarding expanding the policy to trainees on institutional training grants, anticipated for FY2022.; Each fellow is eligible to receive $2,500 per budget period for childcare costs. The childcare cost amount is not determined by number of children.; Childcare costs are permitted for dependent children living in the eligible fellow’s home from birth under the age of 13, or children who are disabled and under age 18.; Eligible childcare is care that is licensed and/or regulated by state and/or local authorities. See FAQs for more details.; At a minimum, recipients must obtain and retain documentation verifying that a childcare provider is licensed and/or regulated by state and/or local authorities, and must document that the fellow is eligible to receive the childcare costs and has eligible dependents.; The childcare cost is restricted for that purpose and cannot be rebudgeted without prior written approval from the NIH awarding IC.; If you have any questions regarding how to make the request in the fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. The announcement NOT-OD-21-069, and the FAQs, provide instructions on how to make the childcare support request.; We’ll provide further guidance on these new costs at a later date.;

**Additional Information:** In April 2021, NIH began providing childcare cost support to recipients of full-time NRSA fellowships in recognition that the high cost of childcare impacts graduate students and post-doctorates funded through NRSA fellowships, and hinders their ability to successfully complete their training and fully participate in the extramural research workforce NOT-OD-21-074. As Phase 2 of this initiative, anticipated for awards made beginning in Fiscal Year 2022, NIH will begin providing childcare cost support to full-time predoctoral and postdoctoral trainees appointed on NRSA institutional research training awards.

**Additional Information:** The purpose of this FOA is to encourage research addressing major gaps identified in the United States Preventive Services Task Force (USPSTF) recommendation statement concerning interventions to prevent perinatal depression, with an emphasis on populations experiencing mental health disparities. The research scope for this FOA includes: 1) strategies for identifying women at risk for perinatal depression; 2) developing and testing tools for selecting those most likely to benefit from preventive interventions; 3) testing service-ready efficacious preventive interventions that are of appropriate intensity/dose, and are scalable, such that they can be delivered with fidelity by setting providers; and, 4) testing strategies that can be used to train providers and to support delivery of evidence-based approaches with fidelity across diverse health care and community settings. This FOA is intended to support effectiveness research trials that are statistically powered to provide a definitive answer regarding the effectiveness of the intervention. Support for pilot effectiveness is provided via a companion R34 FOA RFA-MH-21-241 that supports pilot effectiveness studies in preparation for the larger-scale, fully powered studies described in this FOA.

**Additional Information:** This Funding Opportunity Announcement (FOA) will support research that combines epidemiologic methods, digital technology, and data science approaches to better understand HIV prevention, transmission, and early care-cascade points for women living in the US. Applications must: 1) determine the best ways to identify, enroll, and retain cohorts of women living in the United States (US) who are behaviorally vulnerable to HIV; and 2) develop a knowledgebase comprised of cohort data from women augmented with other data sources including big data sources. Findings should not only lead to a better understanding of how women remain vulnerable to HIV but also inform future pilot interventions aimed at decreasing the incidence of HIV and other sexually transmitted infections (STIs) among cisgender, transgender, and gender non-conforming women.

**Contact:** Rada K. Dagher, PhD, MPH; National Institute on Minority Health and Health Disparities NIMHD; Telephone: 301-451-2187; Email: rada.dagher@nih.gov

**Additional Information:** NIH announces funding opportunity to study the role of work in health disparities in the U.S.; ORWH recently announced its participation in The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional) (PAR-21-275). The funding opportunity will support innovative population-based research designed to identify and characterize pathways and mechanisms through which work or occupation influences health outcomes and health status among populations with health and/or health care disparities. The main objective of this initiative is to determine the extent and mechanisms by which work, as a social determinant of health, both contributes to and helps alleviate disparities related to health and health care. Of particular interest are: Projects designed to examine pathways and mechanisms using conceptual model(s) grounded in minority health and health disparities theories that recognize that health disparities arise by multiple and overlapping contributing factors acting at multiple levels of influence; Intersectional approaches that consider different social identities and the embeddedness of individuals within families, households, and communities; Projects that explore whether work can explain the health or health care disparities seen within diseases or conditions (e.g., COVID-19, opioid use disorder, mental/behavioral health, diabetes, cancer, heart disease, asthma, and maternal and infant health); Projects that explore how work contributes to health care disparities—including, but not limited to, disparities in access to preventive, specialty, and emergency care in health insurance coverage and disparities in quality of health care; Applications for The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional) will open on September 5, 2021.

New York State Department of Health/Health Research, Inc. Comprehensive Cancer Control Program

**Sponsor:** Health Research, Inc (HRI) and the New York State Department of Health (NYSDOH)

**Deadline(s):** Applications will be accepted starting immediately and will be reviewed and awarded in the order received on a rolling basis until funds are no longer available.

**Contact:** Please click on the link to the Community Project Application below to apply: Community Project Application

**Additional Information:** New York State Department of Health/Health Research, Inc. Comprehensive Cancer Control Program; Health Research, Inc (HRI) and the New York State Department of Health (NYSDOH) Comprehensive Cancer Control Program are soliciting applications from organizations to conduct projects in support of the New York State Comprehensive Cancer Control Plan and the work of the New York State Cancer Consortium (Consortium) action teams. The Consortium is a voluntary network of individuals and organizations that collaborate to address New York’s cancer burden. The Consortium recommends statewide and local interventions to: prevent skin cancer, promote the human papillomavirus (HPV) vaccine, promote programs and services to increase quality of life for cancer survivors, and prevent and promote early detection of colorectal cancer. The purpose of this funding opportunity is to support local interventions to address the burden of cancer in communities and across the state. This funding will support awards, valued at $1,000 each to implement one of the six (6) community interventions listed in the attached solicitation.; Applications will be accepted beginning November 18, 2020, and will be reviewed and awarded in the order received on a rolling basis until funds are no longer available.

**Eligible applicants:** Nonprofit organizations and municipal organizations located in New York State including, but not limited to: local government and public health agencies, local educational agencies, academic institutions, community-based organizations, faith-based organizations, health care systems, primary care networks, professional associations, public and private schools, and volunteer associations.

**Additional Information:** [SP/A News] FW: eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; NIH sent this announcement yesterday after they had already made the changes in their Human Subjects System (HSS). Please see below, it outlines the changes made to the HSS and its integration with the updated FORMS-F PHS Human Subjects and Clinical Trials Form. [brought to our attention by] Stephanie Scott ; eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; Monday, June 15, 2020; As of Saturday, June 13, 2020, all applicants and recipients submitting post-submission updates in the Human Subjects System (HSS) will use the updated FORMS-F PHS Human Subjects and Clinical Trials Information Form. These updates address new requirements for participant-level data on sex/gender, race, ethnicity, and age at enrollment for projects subject to the NIH Policy and Guidelines on the Inclusion of Individuals Across the Lifespan as Participants in Research Involving Human Subjects. ; Users with records currently in progress will need to modify the records to meet new FORMS-F requirements.; The changes listed below include items released by eRA in March and items released on June 13.; Key FORMS-F Changes to the PHS Human...
Subjects and Clinical Trials Information Form; [*] A new Inclusion Enrollment Report title field is now available. The human subjects study title will appear by default for all existing studies and may be changed by the user. For new studies and those with a work in progress study, the title will be blank and need to be filled by the grantee. See Figure 1.; Figure 1: Inclusion Enrollment Report Title Field; [*] For clinical trials, the "Brief Summary" field will no longer appear in Section 4. Information in this field prior to June 13, 2020 will continue to be available in the PDF images of applications and Research Performance Progress Reports (RPPRs) submitted prior to this change.; [*] Question 1.4.a. “Does the study involve human subjects/participants” now has a default value of yes and cannot be changed unless the user changes their response to the question “Are Human Subjects Involved?” on the Other Projects Information form. As a study record should be completed only for research involving human participants, the “No” option is no longer available for this question. See Figure 2.; Figure 2: Question 1.4.a of the Clinical Trial Post Submission Study Record; [*] In Section 2.8 of the Study Record: PHS Human Subjects and Clinical Trials Information screen, the language has been changed from 'Enrollment of First Subject’ to ‘Enrollment of First Participant.; [*] A new question has been added to the Study Record: PHS Human Subjects and Clinical Trials Information screen — Section 4.6 asks ‘Is this an applicable clinical trial under FDAAA.'; [*] For a full list of significant FORMS-F changes, see the High-level Grant Application Form Change Summary: FORMS-F PDF; Key Inclusion Across the Lifespan Changes; [*] Recipients reporting actual enrollment progress for a grant application submitted for due dates January 25, 2019 or later must provide participant-level data on sex/gender, race, ethnicity, and age at enrollment in the Inclusion Enrollment Report of the PHS Human Subjects and Clinical Trials Information Form using HSS.; [*] Users must use the spreadsheet template available in HSS to submit participant-level data. The column titles must not be altered, and data should be provided using the values modeled in the template. Changes to the template may result in a submission error. See Figure 3.; Figure 3: Download Participant Level Data Template button on the Inclusion Enrollment Report; [*] Participant-level data must be uploaded in .csv format. Users do not need to separately enter the individual numerical fields in the Actual (Cumulative) Inclusion Enrollment Report table once the .csv file is successfully uploaded. The data provided will populate the actual (cumulative) enrollment table within the system. See Figure 4.; Figure 4: Upload Participant Level Data Attachment button on the Inclusion Enrollment Report; [*] For more information on the requirement of individual-level participant data on sex/gender, race, ethnicity, and age at enrollment in progress reports for research supported by NIH projects, please see NOT-OD-18-116; For more information, see: [*] Entering Inclusion Data Using the Participant Level Data Template (video and transcript); Participant-level Data Template ; [*] The eRA Human Subjects System (HSS) information page ; [*] Information about the PHS Human Subjects and Clinical Trials Information form; electronic Research Administration (eRA); NIH Office of Extramural Research; Questions? Additional Information: Data Tables for training grants; NIH just posted the latest Data Tables for FORMS-F required institutional training grant proposals. These tables will be required for applications due May 25th, 2020 or later. Go to: https://grants.nih.gov/grants/forms-f/data-tables.htm; They did not post a significant changes document yet, so I took the instructions from the previous tables and did a comparison to the new tables. See attached “Changes from FORMS-E to FORMS-F”; I have an email to NIH to clarify the significant changes, and any impact they may have in xTRACT. Upon first glance, the changes appear to be more of clarifications of the instructions, rather than anything drastically different; I know a number of you are preparing training grant proposals for May. Please feel free to take a look at these changes, and let me know if you have questions. This way I can collect them all and send them to NIH for clarification. As every training grant program is different, you may also need to go to your Program Officials for direction on how they want the table completed for your specific set of circumstances.; As soon as I have more information from NIH I will pass it along.; [brought to our attention by] Stephanie F. Extending the Special Exception to the NIH/AHRQ/NIOSH Post-Submission Material Policy During the COVID-19 Pandemic

[Sponsor]: National Institutes of Health

[Deadline(s)]: This Notice extends the special exception for post-submission material (see NOT-OD-20-123) to applications submitted for the May 2021 Council round; For applications submitted for the May 2021 council (beginning with applications submitted for the September 25, 2020 due date for Spring 2021 review meetings), the NIH, AHRQ, and NIOSH will accept a one-page update with preliminary data as post-submission materials for applications submitted under all activity codes, ONLY if the Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application; The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications; All other materials listed in NOT-OD-19-083 as acceptable post-submission materials will continue to be accepted if submitted 30 days before the study section meeting.

**Additional Information:**

Dear Mailman School faculty,
I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

- **2 weeks prior to submission deadline**—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@cumc.columbia.edu.

Best wishes,

Pam Factor-Litvak

**Additional Information**: New funding opportunity: $7M to advance park equity and racial justice through policy change; The COVID-19 pandemic has made it clear that parks and green spaces are a vital part of a healthy community. Yet, due to systemic racism, parks are still not enjoyed evenly. A 2020 study found that parks serving communities of color are—on average—half the size of parks located in majority-white communities and five times as crowded. The unequal distribution and investment in parks—and the unjust experiences that many people of color have in the outdoors—can be righted.; RWJF is currently seeking letters of interest from community-based organizations and base-building groups working to increase park equity and advance racial justice through local policy and systems change in urban, low-income communities of color across the nation. This effort is part of People, Parks, and Power, a joint initiative with the Doris Duke Charitable Foundation led and managed by Prevention Institute.; Learn more about eligibility and selection criteria >; Join us on September 29, 2021 for an applicant webinar to learn what we’re looking for and hear answers to frequently asked questions.

**Additional Information**: New funding opportunity: Innovative research to advance racial equity; As we enter into a year and a half of the pandemic there’s no doubt that we have had many difficult conversations as a country. One particular topic we should not stop discussing is the harm structural racism has on the health and well-being of society and how we can dismantle it.; RWJF’s Evidence for Action program is currently seeking proposals to evaluate specific policies, programs, and practices that have
the potential to contribute to dismantling and counteracting the harms of structural and systemic racism and improving health, well-being, and equity outcomes. Knowing that some approaches to disrupting racism are in early stages of development; other types of research that can advance racial equity will be considered.

RWJF; Pioneering Ideas: Exploring the Future to Build a Culture of Health

Sponsor: RWJF
Deadline(s): Open
Contact: pioneeringideas@rwjf.org

Additional Information: What can we do today to create a better, more equitable tomorrow? Through this new funding opportunity, RWJF seeks to understand and anticipate what dramatic changes we might see in the next five to 15 years in four areas: 1) Future of Evidence; 2) Future of Social Interaction; 3) Future of Food; and Future of Work. Additionally, this call for proposals seeks to support unconventional approaches and breakthrough ideas outside of these areas that could improve health equity and well-being for generations to come. We welcome proposals from scientists, anthropologists, artists, urban planners, community leaders—anyone, anywhere who has a cutting edge idea that could alter the trajectory of health and increase opportunities for everyone in the United States to live their healthiest life possible. Please note, while this CFP is focused on broader and longer-term societal trends and shifts that were evolving prior to the COVID-19 outbreak, we recognize the unique circumstances and learning created by the COVID-19 pandemic may inform your response. It is at your discretion whether you propose a project related to the pandemic directly or indirectly.

**Additional Information:** I-Corps @ NCATS Regional Short Course; Deadline: September 15; What is the business case for your translational science? Find out via the I-Corps@NCATS Regional Short Course. Based on the National Science Foundation’s Innovation Corps (I-CorpsTM) program, the premier federally-funded innovation and commercialization training in the U.S., I-Corps@NCATS provides biomedical scientists, clinician scientists and engineers with a new approach to accelerate the translation of discoveries from the lab to clinical practice.; Who should attend? Teams of faculty, postdocs and/or students with biomedical innovations or ideas.; Why should I attend? The five-week I-Corps@NCATS Regional Short Course will help you connect with potential customers for your research projects, protocol, service, or prototype.; Determine the commercial viability of your innovation.; Develop a successful business case for securing funding.; Expand your network of innovation partners, mentors, and potential collaborators.; Develop a new way of thinking about your research.; Questions? Visit [https://umassmed.edu/ccts/education/i-corps-program-at-the-umccts/](https://umassmed.edu/ccts/education/i-corps-program-at-the-umccts/) or contact Nate Hafer at Nathaniel.Hafer@umassmed.edu. Register by September 15th; I-Corps@NCATS Regional Short Course; Fall 2021 course starts October 15th, 2021; Does your latest discovery have commercial value? Would a potential "customer" of your research welcome your technology, protocol, or intervention?; The I-Corps Program at the UMCCTS, a UMass Center for Clinical and Translational Science (UMCCTS) initiative, is designed to support the translation of biomedical research by providing early-stage education and strategic guidance to faculty, staff and students during the ideation phase of technology development.; Designed specifically for the biomedical researcher at UMass, it guides interdisciplinary teams through a hands-on process of understanding the market for their technology utilizing a proven customer discovery methodology.; This short course is a pre-cursor to a selective and intense set of courses run by the NIH and NSF and known as I-Corps. The I-Corps Program at the UMCCTS is designed to give teams a feeling if they and their opportunity are ready to apply for the national classes held by NIH and NSF. This short course maintains the intensity of the full I-Corps program but limits the time commitment.

Special Exception to the NIH/AHRQ/NIOSH Post-Submission Material Policy During the COVID-19 Pandemic

Sponsor: National Institutes of Health (NIH); Agency for Healthcare Research and Quality (AHRQ); The National Institute for Occupational Safety and Health (NIOSH)

Deadline(s): For applications submitted for the January 2021 council (beginning with applications submitted for the May 25, 2020 due date for Fall 2020 review meetings), the NIH, AHRQ, and NIOSH will accept a one-page update with preliminary data as post-submission materials for applications submitted under all activity codes, ONLY if the Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application; The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications.; All other materials

Research Resources has been apprised that the R2eport distribution email to Faculty and other colleagues at times sorts to MS Outlook's "Other" vs. "Focused" tab when web accessed. You may move an email from the "Other" to "Focused" in box tabs, by selecting Move to Focused if you want only the selected message moved; or you may select Always Move to Focused if you want all future messages from the sender to be delivered to the Focused tab. You may also Turn off Focused In Box when accessing MS Outlook via the web by accessing the settings (cog icon adjacent to your initials), accessing "all outlook settings", activating the "Don't sort my messages" button and saving this setting. Rectifying email sorting to Outlook's Junk folder, may also be addressed. R2eports are posted weekly on our Reports Page

**Website:** [https://spa.columbia.edu/](https://spa.columbia.edu/)

**Additional Information:** NIH Guide Notice on Delayed Enforcement for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants; As I previously announced a few weeks ago, NIH will be delaying enforcement for some requirements affecting prospective basic science studies that also meet NIH's definition of a clinical trial. NIH just released the official notice stating this, along with their future plans: [https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-212.html](https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-212.html); Please read the notice in its entirety. The Council on Governmental Relations (COGR) provided a summary below. Here are some highlights: (*) **Registration and Reporting:** NIH still expects the registration and reporting of these prospective basic science studies, but is giving flexibility to allow reporting on existing basic science portals, and expects the data to eventually be transported to ClinicalTrials.gov. Flexibility given through September 24, 2019. They are issuing a Request for Information (RFI) to collect stakeholder feedback on this topic; (*) **Funding Opportunity Announcements (FOAs):** NIH will not administratively reject any proposal application for submission to an incorrect FOA based on study-type designation, and they plan to issue an FOA specifically for prospectively basic science studies in November for due dates starting on January 25th, 2019; (*) **The PHS Human Subjects and Clinical Trial Information Form (new in FORMS-E)** – they still expect that form for all applications involving prospective basic science studies; (*) **Good Clinical Practice (GCP) training** is still being enforced for all personnel involved in the conduct, oversight, or management of prospective basic science studies involving human participants. As a reminder, Columbia offers GCP training in Rascal through Course TC3450. For more information, see [https://research.columbia.edu/content/good-clinical-practice-training](https://research.columbia.edu/content/good-clinical-practice-training) or email NIH-GCP@columbia.edu.; Please read the notice in its entirety for more information, and stay tuned for more updates from me on this topic.; [brought to our attention by] Stephanie F. and Short-Term Flexibilities for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants; As you know, COGR and other organizations have expressed concern that the NIH clinical trial case studies broadened the agency’s definition of “clinical trial” to include basic science studies involving human participants. NIH, in response to report language in the Consolidated Appropriations Act of 2018, has released this notice NOT-OD-18-212 which delays enforcement of registration and reporting policies for prospective basic science studies involving human participants under NOT-OD-16-149. Per the notice, “through September 24, 2019, NIH will continue to expect registration and reporting for prospective basic science studies involving human participants, with additional flexibility to allow reporting on existing basic science portals, with the expectation that data will eventually be transported to ClinicalTrials.gov.” NIH will issue a Request for Information (RFI) to seek additional input “on registration and results reporting standards best suited for prospective basic science studies involving human participants.”; The notice also provides a period of “leniency for applications submitted to the incorrect FOA based on the study type designation” during which time NIH will not “administratively reject any application for submission to an incorrect FOA based on study-type designation.” The notice also indicates that the agency “plans to issue FOAs specifically for prospective basic science studies involving human participants.” Please see the notice for details. ; Lisa Nichols, Ph.D.; Council on Governmental Relations; 1200 New York Avenue, N.W., Suite 460; Washington, D.C. 20005; lnichols@cogr.edu; 202-289-6655

**Additional Information:**

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyses in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about they the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks

**Additional Information:** NIH Salary Cap: Guidance on Salary Limitation for Grants and Cooperative Agreements FY 2018; NIH issued guidance on the use of a new NIH salary cap, to increase from $187,000 to $189,600. See https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-137.html. The effective date of this increase is January 7th, 2018; NIH has not received the final Fiscal Year (FY) 2018 appropriation and is operating under a continuing resolution through March 23rd, 2018 (see NOT-OD-18-136 also a very important notice). However, NIH issued this guidance until a budget is passed; In summary, this is how the $189,600 salary cap can be applied: (*) NIH proposal budgets may be submitted using the new cap; (*) Active NIH awards may rebudget to the new cap if restricted to Executive Level II, and adequate funds are available, and the salary cap increase is consistent with the institutional base salary. The new cap should be prorated for the applicable months: (**) Cap is $187,000 through 1/6/18; (***) Cap is $189,600 from 1/7/18 – present; If you have any questions, please feel free to reach out to your SPA Project Officer. **NIH single IRB (sIRB) policy**

**Sponsor:** NIH  
**Deadline(s):** (for NIH application submissions on or after) 01/25/2018  
**Contact:** If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites.

**Link(s):** https://grants.nih.gov/policy/clinical-trials/single-irb-policy-multi-site-research.htm

**Additional Information:** The NIH single IRB (sIRB) policy applies to the domestic sites of new and competing renewal applications/proposals with due dates of January 25, 2018 and beyond for NIH-funded multi-site studies where each site will conduct the same protocol involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program. If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites.; If Columbia University is being proposed as one of the participating sites in an application to be submitted this month or soon after by another applicant organization, you must also contact the HRPO immediately. Moving forward, it is recommended that you contact the HRPO as soon as a decision is made to participate in a multi-site study to which the NIH sIRB Policy applies.; An official process that details the requirements for addressing the NIH sIRB Policy is being finalized, to be released shortly. In the meantime, PIs and/or departments can reach out to irboffice@columbia.edu to inform the HRPO about these applications. Upon receipt of your email, HRPO will send you an online form to be completed, and you will be provided with next steps.; In addition, we are offering several options to learn more about the sIRB process. **Note:** Protocols that address the same research questions, involve the same methodologies, and evaluate the same outcomes are considered to be the “same research protocol.” Additionally, sites that are accruing research participants for studies that are identical except for variations due to local context consideration would be considered to be conducting the “same research protocol." If you have any questions, please contact irboffice@columbia.edu.; Our website contains resources to help you while you get accustomed to all of the policy changes impacting proposal preparation. We have an Excel checklist to help you complete the new PHS NIH Human Subjects and Clinical Trials Information Form. **Additional Information:** HRPO and IRB Updates; Dear colleagues, This email provides updates from the Human Research Protection Office (HRPO) on recent new or revised policies, regulations or requirements that may affect IRB activities and requirements.; **Status of the Revised Common Rule:** The Final (revised) Common Rule, i.e., revisions to Subpart A of the DHHS regulations for the Protection of Human Subjects (45 CFR 46), were published on January 19, 2017, with an effective and compliance date of January 19, 2018 for the majority of the revisions. On January 17, 2018, an Interim Final Rule was released that delays the effective date for 6 months, to July 19,
2018. Certain federal departments and agencies are in the process of developing a proposed rule to further delay implementation. The HRPO is developing guidance for preparing for the transition to the Revised Common Rule. Stay tuned for more information...

**Revised Policies:** Revisions have been made to the new IRB Policy on the Privacy Rule and the Use of Health Information in Research (IRB HIPAA & Research Policy) and the IRB Data Security Plans Involving the Use, Storage or Transmission of Electronic Research Data Constituting Sensitive Data (IRB Data Security Policy). The IRB HIPAA & Research Policy, which was released on November 1, 2017, was revised to provide clarifications of definitions, scope, and when a Data Use Agreement is necessary. In addition, several case studies were added to assist with implementation of this policy. The IRB Data Security Policy was revised to include new terminology and definitions that are included in the IRB HIPAA & Research Policy. Sessions to explain the policy and review the examples will be scheduled. In addition, please let us know if you would like to have us come to your departmental meeting to review the policy! **Revised Standard Operating Procedures (SOPs):** Version 5.0 of the IRB’s SOPs were recently released. Included in this version: (*) Comprehensive information on Expanded Access; (*) Incorporation of Columbia’s Institutional Conflict of Interest Policy; (*) Clarifications on when Unanticipated Problems are reported to federal agencies; (*) Updates to the sections regarding recruitment of inpatients at NYP; (*) Addition of the new Single IRB processes; (*) Clarification on the process for IRB disapproval.

**Process for Implementing the NIH Single IRB Policy:** The NIH Single IRB (sIRB) Policy is applicable to new and competing renewal applications/proposals for NIH funding that are due on or after January 25, 2018, and contract solicitations issued on or after January 25, 2018. It is applicable to NIH-funded multi-site domestic studies involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program. If you are preparing an NIH application that is due on or before March 5, 2018, it is important that you contact the HRPO immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND (*) The same research protocol will be conducted at multiple domestic sites; The HRPO and SPA have developed tools to facilitate implementation of this policy. These tools, including an overview of our process and template language that can used in your grant applications, can be access here. The HRPO’s web page will continue to be updated with additional resources as more information becomes available to facilitate compliance with this policy.

**Upcoming HRPO Education Sessions:** Monthly IRB Investigation Monthly Meetings: (*) February 22, 3:30-4:30pm, P&S Amphitheatre 1; (*) March 22, 3:30-4:30pm, P&S Amphitheatre 1; (*) April 26, 3:30-4:30pm, P&S Amphitheatre 1; (*) May 24, 3:30-4:30pm, P&S Amphitheatre 1; **We want to hear from you:** Please send us your questions as well as suggestions for topics for future education sessions; **We look forward to hearing from you!**

**Additional Information:** I wanted to pass along this email we received from NICHD. Regardless of whether you receive funding from NICHD, I thought it was a great summary of the recent NIH policies concerning human subjects research and the definition of a clinical trial. It also highlights contacting the NIH Program Officials when you are uncertain if your study meets the NIH clinical trial definition; I promise you will see more communications from me as we prepare you for these proposal application changes in effect for proposals due January 25th, 2018 or later.; **Stephanie Scott** Changes to NIH policies and procedures related to human subjects research; Dear NICHD Investigator, NIH has broadened its definition of clinical trial, and it may impact
your future applications (new, resubmission, or revision) and awards; NIH’s definition of clinical trial now includes some research approaches not traditionally considered clinical trials. For example, many behavioral or biobehavioral studies that focus on underlying mechanisms of development may now be considered clinical trials. Also, conducting experiments that involve human subjects may be considered a clinical trial. **If you are conducting studies involving human subjects, it is very important that you understand this definition and determine whether it applies to your research.** How do I know if my study is a clinical trial? NIH has four questions that researchers need to answer to determine whether their study is a clinical trial. These questions may use terminology that has a different meaning than the typical meanings understood by certain research communities. It’s important to review the FAQs and case studies provided by the NIH Office of Extramural Research. If you answer “yes” to each of these four questions, your research will be considered a clinical trial by NIH: (1) Does the study involve human participants? (2) Are the participants prospectively assigned to an intervention? (3) Is the study designed to evaluate the effect of the intervention on the participants? (4) Is the effect being evaluated a health-related biomedical or behavioral outcome? Here is a link that can help you determine if your research is a clinical trial: [https://grants.nih.gov/cl-decision/index.htm](https://grants.nih.gov/cl-decision/index.htm); **Why is this important? What are the implications if my study is considered a clinical trial?** Beginning with applications submitted on or after January 25, 2018, if your application involves a clinical trial, you must: (*) Submit the application through a Funding Opportunity Announcement (FOA) that accepts clinical trials; (**) Provide additional information in the application, which will be subject to different and distinct review criteria for clinical trials.; If selected for funding, you will need to designate individual(s) to serve as the responsible party for the trial and to register and post results in the ClinicalTrials.gov system.; NIH has also issued other policy updates involving Good Clinical Practice training requirements and the use of Single Institutional Review Board (sIRB) approaches for domestic, multisite human subjects research. Details about all updates/changes are available at [https://grants.nih.gov/policy/clinical-trials.htm](https://grants.nih.gov/policy/clinical-trials.htm); Note: These policy updates/changes also apply to individuals conducting research through contracts.; **Why is NIH making these changes?** As stewards of public funding, NIH is implementing these changes in support of our scientific and ethical obligation to ensure that the burden and risk that volunteers assume as research participants ultimately contributes to scientific knowledge. In addition, these changes facilitate transparency in how NIH conducts and supports human subjects and clinical trials research and increases dissemination of data and conclusions derived from NIH-conducted or -supported clinical trials. More discussion of the reasons for the policy changes is at: [https://grants.nih.gov/policy/clinical-trials/why-changes.htm](https://grants.nih.gov/policy/clinical-trials/why-changes.htm); We know this is a lot to process, but we are here to answer your questions. Please contact your Program Officer with any questions. If you’re uncertain who your Program Officer is, this information is available in your Commons account.; Kind regards, Meredith D. Temple-O’Connor, Ph.D.; Senior Policy Advisor for Clinical Research; Division of Extramural Research; [Eunice Kennedy Shriver National Institute of Child Health and Human Development; National Institutes of Health / DHHS; Bethesda, MD 20892; NICHDTrials@nih.gov](mailto:NICHDTrials@nih.gov); Doing human subjects research? **Additional Information:** [adapted from] A MESSAGE FROM DEAN FRIED [previously distributed] to Faculty; Dear Mailman School faculty,; In acknowledgement of the increasingly competitive federal funding environment, the School’s administrative and academic leadership teams have been working to develop new resources to support faculty in preparing grant applications with the highest chance of success. In the fall, we will announce and begin rolling out a suite of such supports; Given the initial fall NIH submission deadline of October 5, I write today to inform you about the first of these resources. The School is providing support for pre-submission external review and for scientific final editing of R01, P, K, Center or other complex NIH proposals for NIH’s October 5 submission deadline, for all full-time faculty with primary appointments in the School. These services will only apply to first submissions (not to resubmissions). Note that, at this time, other grant types such as R03 and R21 are not eligible for this service.; For the external review of applications, the PI will be requested to identify an external expert who they think would be willing to review the grant. Please remember that an individual who serves as a reviewer in this way would then become ineligible to review the proposal for NIH. The School will arrange for the review and provide reviewers a $750 honorarium for R01 review and $1,000 for review of P or other more complex proposals. This external review is independent of any departmental review of aims or entire proposals, is independent of review by R5, and is entirely optional.; For the final scientific editing an outside company that has already been used by several departments will be engaged as needed. The editing review will polish writing, help with organization and logical progression, and assist with the production of figures.; Below is the timeline and process for requesting and utilizing these supports: (*) To ensure an adequate amount of time for grant review and/or editing, faculty wishing to participate must first inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) at least five weeks before the grant is due [in the case of the 10/05/2017 deadline, 09/01/2017] that you will be requesting one or both of these services. This request must include: the title of the grant, type of grant, due date, and name of the suggested external reviewer with contact information.; (*) Research Resources will contact the external reviewer to ensure his/her willingness to review within one week. That office will also send the appropriate paperwork for paying the honorarium. Three to four weeks prior to submission [in the case of the 10/05/2017 deadline, 09/14/2017 (3 weeks) or 09/07/2017 (4 weeks)] the PI must send the draft of the science to Craig, who will forward it to the external reviewer to complete his/her review within one week. The external reviewer will return comments directly to Craig and the PI. If you think you cannot meet this timeline, please discuss with Pam Factor-Litvak, Associate Dean for Research Resources.; (*) For editing of grant proposals, Craig will send the revised manuscript to the scientific editor ten to 14 days prior to submission [in the case of the 10/05/2017 deadline, 09/21/2017 – 09/25/2017], and the editor’s comments will be returned to Craig and the PI for finalization and submission within a few days.; If you have any questions about your eligibility or the above process, please contact Pam Factor-Litvak at prf1@columbia.edu; I hope you will consider taking advantage of these new services and that you find them helpful.; With best wishes, Linda P. Fried, MD, MPH; Dean and DelLamar Professor of Public Health; Mailman School of Public Health; Senior Vice President; Columbia University Medical Center; Professor of Epidemiology and Medicine

NIH to Limit Total Grant Support to PIs

**Link(s):**
- https://nexus.od.nih.gov/all/2017/05/02/nih-grant-support-index/

**Additional Information:** NIH to Limit Total Grant Support to PIs;

NIH announced on Tuesday that it will implement a limitation on the total grant support it will provide to principal investigators (PIs) who have multiple awards. The agency will use a “Grant Support Index” that assigns point values to various types of grants. PIs who exceed a set point, linked to having three or more awards with a single PI, will be forced to adjust their portfolio with reduced resources. NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH says that it believes 6 percent of PIs will be affected and that resources will be freed up to fund about 1,600 additional awards. NIH insists that no existing awards will be rescinded; An article posted by Nature reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.

NIH Releases Protocol Template for Behavioral and Social Sciences Research Involving Humans

Sponsor: National Institutes of Health
Deadline(s): 03/26/2019 (Release Date)
Contact: Please direct all inquiries to: NIH Office of Science Policy

Additional Information: Purpose: The National Institutes of Health (NIH) has released a clinical trial protocol template with instructional and example text for NIH funded investigators to use in writing protocols for behavioral and social sciences clinical trials. This template was developed in response to changes in NIH policies that expanded the requirements associated with clinical trials beyond FDA-regulated clinical trials to those studies including behavioral or social interventions. Use of the template is recommended, but not required.
