NEW THIS WEEK [NTW]

Funding opportunities and announcements listed in the “New this Week” section will be moved to the main body of the newsletter in the following weeks. They are presented (in the posted .pdf version of the newsletter) in the following order.
Limited Submission; NIH Pediatric Obesity Discovery Science Research to Improve Understanding of Risk and Causal Mechanisms for Obesity in Early Life (R01)

Sponsor: NIH

Deadline(s): 11/05/2021 (Internal, Limited Submission Deadline); 03/08/2022 (Application); 03/09/2022 (Expiration)

Contact: Questions: Greg Culler at limitedsubmissions@columbia.edu; Scientific/Research Contact(s): Voula Osganian, M.D., Sc.D., M.P.H.; National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK); Telephone: (301) 827-6939; Email: voula.osganian@nih.gov [NIH Contact provided for reference, this is a Limited Submission Opportunity]

Additional Information: NIH Pediatric Obesity Discovery Science Research to Improve Understanding of Risk and Causal Mechanisms for Obesity in Early Life (R01); Limited Submission; NIH Pediatric Obesity Discovery Science Research to Improve Understanding of Risk and Causal Mechanisms for Obesity in Early Life (R01); Internal Deadline – 9:00 a.m. on Friday, November 5; Internal Application and Instructions – Internal Applications must be completed on our InfoReady Review site at https://columbia.infoready4.com/#competitionDetail/1855323. Please click the "Columbia University Login" button to view instructions and begin your application.; What: The purpose of this Funding Opportunity Announcement (FOA) is to support innovative, discovery research studies to better characterize early-life risk factors and elucidate underlying causal mechanisms through which these risk factors contribute to the development of obesity during infancy and early childhood. Studies should aim to understand biological mechanisms that mediate behavioral and/or metabolic risk for obesity development in young children and how risk may be modified by other contributors such as psychosocial, contextual, and/or environmental factors. This FOA encourages multidisciplinary teams of scientists including, but not limited to those with expertise in basic, translational, clinical, and behavioral research.; Who: The Any individual(s) with the skills, knowledge, and resources necessary to carry out the proposed research as the Program Director/Principal Investigator (PD/PI) may apply.; When: Internal Deadline - 9:00 a.m. on Friday, November 5; Sponsor Deadline – March 8; How: To apply, please visit the internal application and instructions on our InfoReady Review site at: https://columbia.infoready4.com/#competitionDetail/1855323 ; Questions: Greg Culler at limitedsubmissions@columbia.edu.

Additional Information: Memo to: Principal Investigators and Sponsored Project Administrators; From: Mark Hawkins, Vice President, Finance & Controller; William Berger, Executive Director, Sponsored Projects Administration; October 25, 2021; Newly Negotiated Federal Facilities and Administrative Rates; We are writing to inform you that the University has recently concluded the negotiation of a new Facilities and Administrative (F&A) rate agreement with the federal government. This will impact the preparation of budgets included in future grant and contract proposals to federal sponsors.; Effective immediately, budgets being prepared for new research proposals should use the following new federal F&A rates based on the location and the year the expenses will be incurred. New competitive awards will also generally be subject to the following rates:

The memo is posted on our Institutional Information Page here:

https://research.columbia.edu/institutional-information

However, the actual rate agreement itself is not available yet. We are allowed, though, to use these new rates when preparing proposal budgets. The rate agreement itself will not be available for a few weeks.

Therefore, you need to rely on this memo, and speak with a SPA Project Officer if you have specific questions about how to use the new rates for proposal budgets.

[NTW] [CLIMATE CHANGE/FOUNDATION FUNDING]

Burroughs Welcome Fund Climate Change and Human Health Seed Grants

**Sponsor:** Burroughs Wellcome Fund (bwfund.org); https://www.bwfund.org/

**Deadline(s):** 12/15/2021

**Contact:** https://www.bwfund.org/contact/

**Additional Information:** The Burroughs Wellcome Fund aims to stimulate the growth of new connections between scholars working in largely disconnected fields who might together change the course of climate change’s impact on human health. Over the next two years, we will dedicate $1M to supporting small, early-stage grants of $2,500 - $50,000 toward achieving this goal.
Notice of High Priority Research Areas for NIDA T32 Training Grants

Sponsor: National Institute on Drug Abuse

Deadline(s): 10/21/2021 (Release Date);

Contact: Please direct all inquiries to: Lindsey Friend, PhD; Office of Research Training, Diversity and Health Disparities; National Institute on Drug Abuse (NIDA); Telephone: 301-402-1428; Email: lindsey.friend@nih.gov

Additional Information: Notice of High Priority Research Areas for NIDA T32 Training Grants; Just passing along this notice from NIDA, issued today, announcing their High Priority Research Areas for NIDA T32 Training Grants. See the full announcement: https://grants.nih.gov/grants/guide/notice-files/NOT-DA-21-087.html; Data Science: The goal is to prepare trainees to apply data science strategies including computational modeling, machine learning, analysis of large data sets, and artificial intelligence to substance use questions.; Translational Science: The goal is to move from discovery science to the development of medications and devices (including regulatory science).; Human Immunodeficiency Virus (HIV) and Drug Use/Addiction: The goal is to foster a dynamic workforce equipped to use novel approaches to address the intersection of HIV and substance use, prevention, treatment, and cure, including a special emphasis on addressing health inequities.

NIH Operates Under a Continuing Resolution

Sponsor: National Institutes of Health

Deadline(s): 10/20/2021 (Release Date)

Contact: Please direct all inquiries to: Questions regarding adjustments applied to individual grant awards may be directed to the Grants Management Specialist identified in the Notice of Award.

Additional Information: The Department of Health and Human Services (HHS), including NIH, operates under the Extending Government Funding and Delivering Emergency Assistance Act (Public Law 117-43) signed by President Biden on September 30, 2021. This Act (CR) continues government operations through December 3, 2021 at the FY 2021 enacted level, with no reduction.

Responsible and Ethical Conduct of Research Training for Postdocs

[NTW] [ETHICS/POSTDOCTORAL]
Responsible and Ethical Conduct of Research RECR training site

**Sponsor:** https://research.columbia.edu  
**Deadline(s):** 10/13/2021 - 04/2022 (Class Dates)  
**Contact:** Please send all questions about this series to Shawna Benston at RCTraining@columbia.edu

**Additional Information:** Sending on behalf of the Office of Research Compliance and Training, in collaboration with the Office of Postdoctoral Affairs. Please send all questions about this series to Shawna Benston at RCTraining@columbia.edu. These series of presentations are not just for postdocs, but for anyone interested, campus-wide; The Office of Research Compliance and Training, in collaboration with the Office of Postdoctoral Affairs, is offering our five-part series, ”Responsible and Ethical Conduct of Research Training for Postdocs”, starting in October. **Please note: This series is NOT limited to postdocs--we welcome anyone interested in any or all of these topics!** For postdocs, each of the training sessions will fulfill one of the eight required hours of RECR training for NIH.** At least the first two events will be conducted online via Zoom (more information on the final two events forthcoming). All events will feature experts in the following RECR-relevant subject areas: collaborative research, conflict of interest, ethics, science and security, issues of race in research ethics, and more.; Please note: postdocs may earn up to five hours of RECR credit by attending all of the presentations listed below (the one in December will count for two hours). In order to fulfill the remaining hours of the RECR training requirement, please consult our RECR training site; Even if you do not require RECR credit, anyone is welcome to attend any of the sessions below; **These RECR credit hours do not replace required RECR training for T32 trainees.; **Register for any or all of the sessions below:** November 15, 1 - 2:30pm: **Navigating Relationships with Industry.** A faculty panel will discuss their experiences collaborating with industry, successful commercial licensing, and starting their own companies. Featuring: Andrew Lassman (John Harris Associate Professor of Neurology); I. John Kymissis (Professor of Electrical Engineering; Co-Director, Maker Space Facility); Darcy Peterka (Senior Research Scientist in the Mortimer B. Zuckerman Mind Brain Behavior Institute; Director of Cellular Imaging in the Mortimer B. Zuckerman Mind Brain Behavior Institute); Ofra Weinberger (Director of Licensing Associate VP for IP and Tech Transfer); Moderated by Michael Klein (Director of Research Compliance, Columbia Office of Research Compliance and Training).; December 16, 1 - 3pm: **Ethics, scientist as a responsible member of society, issues of race in research ethics.** Featuring: Robert Fullilove (Professor of Sociomedical Sciences, CUIMC; Associate Dean, Community and Minority Affairs, Mailman School of Public Health); Harriet Washington (writer and medical ethicist; Lecturer in Professional Studies, Columbia School of Professional Studies); Hilda Hutcherson (Professor of Obstetrics and Gynecology, CUIMC; Senior Associate Dean for Diversity and Multicultural Affairs; College of Physicians and Surgeons); J.C. **HIV/PILOT/JUNIOR FACULTY/POSTDOCTORAL**

**CDUHR Pilot Projects Program Announcement**

**CDUHR’s Pilot Projects Program is Seeking Applications in the Areas That Align with the Center’s Mission**

**Application Instructions**
The Center for Drug Use and HIV Research (CDUHR) is seeking pilot project applications focused on proposing high-impact and innovative research in the fields of HIV, HCV, substance use, and the continuum of prevention and care in these topical areas. The Pilot Projects Award provides the opportunity for investigators to develop new research initiatives or test the feasibility of new research strategies with the long-term goal of securing subsequent external funding.

Center for Drug Use and HIV Research; CDUHR.pilot@nyu.edu; View this email in your web browser; The Center for Drug Use and HIV Research (CDUHR) is seeking pilot project applications focused on proposing high-impact and innovative research in the fields of HIV, HCV, substance use, and the continuum of prevention and care in these topical areas. The Pilot Projects Award provides the opportunity for investigators to develop new research initiatives or test the feasibility of new research strategies with the long-term goal of securing subsequent external funding.

The mission of CDUHR is to end the HIV and HCV epidemics in drug using populations and their communities by conducting transdisciplinary research and disseminating its findings to inform programmatic, policy, and grass roots initiatives at the local, state, national and global levels. CDUHR accomplishes this mission through a "core infrastructure" designed to develop and enhance research with the following objectives: Devise innovative strategies to overcome barriers to ending HIV/AIDS among people who use drugs (PWUD); Conduct research to reveal effective ways to implement evidence-based practices that will advance the goal of ending HIV/AIDS among PWUD; Develop multilevel conceptual models of HIV/AIDS among PWUD to guide intervention and other research that will reduce new HIV infections, and increase the proportion of individuals living with HIV on antiretroviral therapy and virally suppressed, or at-risk of HIV infection and on PrEP; Awards of up to $25,000 will be distributed to support one-year pilot projects. As part of CDUHR’s mentorship program, pilot project awardees and other interested applicants are encouraged to receive mentoring and are matched with at least two senior investigators for mentorship (list of potential mentors will be available September 1, 2021) both within and outside of the grantee’s discipline to foster a broad transdisciplinary perspective to their research. New and early career investigators, and applicants currently collaborating with senior investigators are eligible to apply. Senior investigators seeking to develop new expertise or embark on research in areas related to CDUHR’s mission are also eligible to apply. Priority is given to early career and new investigators. A letter of intent is recommended and it is requested by October 1, 2021. The letter of intent is not required, and is not binding. We may contact the applicant with questions or suggestions for the Initial Statement of the Research Question. See Application Instructions for submitting the Letter of Intent. A one-page Initial Statement of the Research Question that states the overall purpose and specific aims of the project, how the project aligns with CDUHR’s mission, and a completed Mentorship Form are due by October 11, 2021 by 5:00 pm. See Application Instructions for submitting the one-page Initial Statement of the Research Question. These materials will be screened for alignment with CDUHR’s mission and NIH HIV/AIDS research priority areas. Those concept papers meeting initial criteria will be invited to submit a full application. Invitations to submit will be sent by October 20, 2021. Investigators invited to apply must submit a full application by November 22, 2021 by 5:00 pm. See Application Instructions for submitting the full application.
competing to investigators and potential investigators who have obtained a doctoral level degree. While senior investigators and applicants not seeking mentoring are eligible to apply, applicants representative of the following groups are particularly encouraged and will be prioritized: Early stage investigators; Established investigators without prior experience in HIV, HCV, and substance use research; Established investigators who are pursuing a new area of inquiry within the fields of HIV, HCV and substance use research, and Investigators considered to be nationally underrepresented in the field of HIV and substance use research by NIH and NIDA. These include individuals from underrepresented racial and ethnic groups, individuals with disabilities, and individuals from socially, culturally, economically, or educationally disadvantaged backgrounds that have inhibited their ability to pursue a career in health-related research. Pilot projects funds may not be used to supplement or prolong ongoing research, to support dissertation research or coursework, or to purchase equipment, and cannot be used as bridge funds when other research support is no longer available.

AWARD CRITERIA: Funding decisions will be based on the following criteria: Relation of proposed research to CDUHR's thematic focus of overcoming barriers to ending HIV/AIDS among PWUD; The extent to which the research falls within the high priority topics in the NIH Strategic Plan for HIV and HIV-Related Research; Scientific quality of the proposed research; Innovativeness and significance of the research idea; Likelihood of research findings to translate into practice and/or result in meaningful public health impact; Use of multidisciplinary approach/methodology; Potential of the project to enhance the training of the investigator; Potential of research findings to lead to subsequent funding; Additional consideration will also be given to applicants who are new and early career investigators, established investigators without prior experience in substance use and HIV or HCV research, or who are exploring a new area of inquiry in the field, and/or investigators who are considered to be nationally underrepresented in the fields of HIV or HCV and substance use research by NIH and NIDA, as outlined above; Note that NIDA requires CDUHR to provide a description and justification of all pilot projects before initiating them. Notification includes a description and rationale for the project, and addressing the question of how it falls within CDUHR's mission. In addition, CDUHR must state that the project will comply with NIH policies, including approval of human subject research. Clinical trials and projects that pose greater than minimal risk to participants require prior approval from the NIDA project officer. The request for approval must include protocols for human subjects protection and a Data and Safety Monitoring Plan (DSMP). See NIH PAR-18-225, Section VI, “Prior Approval of Pilot Projects” for original language.

TIMELINE: Letter of Intent (recommended, but not required); October 1, 2021; Initial Statement of the Research & Mentorship Form Due: October 11, 2021 – 5:00 pm; Applicants Notified of Invitation to Apply (Standard): October 20, 2021; Full Application Due: November 21, 2021 – 5:00 pm; Announcement of Award: January 2022; Award Period: February 1, 2022 – January 31, 2023; Mid-year Progress Report Due: August 1, 2022; Awardee Final Presentations: Fall 2023; RFA Information Here; Application Instructions; Looking a smaller, time-sensitive funding opportunity? The Center also funds time-sensitive projects in need of expedited review (e.g., pilot data needed to support a grant submission or to obtain data prior to an imminent policy change will also be considered). Maximum awards for time-sensitive projects is $5,000.

Please click the “Columbia University Login” button to view instructions and begin your application.; What: The Scholar award is intended to develop the independent pediatric cancer research careers of highly qualified early career investigators, not to support well established or senior investigators. St. Baldrick's Scholars are awarded up to $110k/year for two years, with the option of an additional $115k/year for three years. Awards are limited to salary and fringe benefits. Funds may not be used for overhead or indirect costs, expenditures for laboratory costs/equipment, or travel.; Program Emphasis: Research projects must have direct applicability and relevance to pediatric cancer. They may be any discipline of basic, clinical, translational, or epidemiological research. This is intended to develop the independent pediatric cancer research careers of highly qualified investigators, not to support well-established or senior investigators. Funds may not be used for human embryonic stem cell research.; Due to high interest from donors and low numbers of past applications, the St. Baldrick's Foundation is particularly interested in applications in the following areas: Brain tumors – all types, including rare forms; Burkitt lymphoma; Complementary and alternative therapies; Hepatoblastoma; Langerhans Cell Histiocytosis; Rhabdoid tumors; Who: The following eligibility terms apply: Applicants should hold an Ph.D., M.D. or D.O. and a full-time faculty (Assistant Professor) appointment. Those holding adjunct or acting positions are not eligible;
Applicants must be within the first seven (7) years of their initial independent full-time faculty appointment at the time the award begins. Start date on or after July 1, 2015; Applicants holding R01 or K awards are not eligible; Institutional K12 funding is allowable; Scholars may receive funding from other sources to support their research. However, no other career development award may be held prior to or at the time the LOI is approved.; Scientific or budgetary overlap with other funded projects is not allowed. More information about overlap is provided at the bottom of this announcement.; Scholars must devote at least 40% effort to the funded project.; When: Internal Deadline – 9:00 a.m. on Wednesday, November 3; Sponsor Deadline – December 3; How: To apply, please visit the internal application and instructions on our InfoReady Review site at https://columbia.infoready4.com/#competitionDetail/1854495; Questions: Greg Culler at limitedsubmissions@columbia.edu.; Overlap: Overlap in funding is not permitted. St. Baldrick’s policy on overlap applies to Scientific, Budget, and Commitment Overlap as defined by the NIH.; Scientific Overlap: Scientific overlap occurs when substantially the same research is proposed in more than one application or is submitted to two or more different funding sources for review and funding consideration; or when a specific research objective and the experimental design for accomplishing that objective are the same or closely related in two or more pending applications or awards, regardless of funding source.; Budget Overlap: Budgetary overlap occurs when duplicate or equivalent budgetary items (i.e., equipment, salary) are requested in an application but are already funded by another source.; Commitment Overlap: Commitment overlap occurs when any project-supported personnel has time commitments (i.e., percent effort) exceeding 100%, regardless of how the effort/salary is being supported or funded.; Research Initiatives; Office of the Executive Vice President for Research; Columbia University in the City of New York; To view current limited submission programs please visit: https://columbia.infoready4.com/#limitedsubmissions; COLUMBIA | RESEARCH

**Additional Information:** NIH Loan Repayment Program (LRP) - NEW information; **Subject:** NIH Loan Repayment Program (LRP) - NEW information; The NIH Loan Repayment Program (LRP) is now accepting applications through November 18, 2021. Awardees can receive up to $100,000 of qualified educational debt repayment with a two-year contract. This includes most undergraduate, graduate, and medical school loans. Loan repayment benefits are in addition to the institutional salary received for research. LRP awards are based on an applicant’s potential to build and sustain a research career.; It is important to review the LRP eligibility criteria, and reach out to the LRP Information Center or LRP Liaison directly if you have any questions about eligibility or the various LRP Extramural Programs.; **New This Year - ASSIST:** The NIH LRP application is now part of the Application Submission System & Interface for Submission Tracking (ASSIST) system. Additional Information: NIH Loan Repayment Program 2022; The National Institutes of Health (NIH) released six separate program announcements for the 2022 application cycle of the NIH Loan Repayment Program (LRP). The LRP may repay up to $50,000 of qualified student loan debt per year to outstanding health professionals who commit at least two years to conduct biomedical, behavioral, social, or clinical research, and who agree to engage in such research for an average of at least 20 hours per week based on a 40-hour work week. This includes most undergraduate, graduate, and medical school loans. Loan repayment benefits are in addition to the institutional salary received for research. LRP awards are based on an applicant's potential to build and sustain a research career.

NEW – the application process is different this year! All applications must be submitted through the Application Submission System & Interface for Submission Tracking (ASSIST), and not the LRP website. We will provide more explicit instructions on how to apply through ASSIST as it becomes available. ASSIST will begin accepting applications on September 1st, 2021 through November 18, 2021, 8pm EST. Potential applicants should carefully read the general eligibility requirements, plus the eligibility requirements and application instructions under each funding announcement. Questions concerning eligibility should be discussed with NIH staff. Find the appropriate contact at the Contact and Engage page.; The six program announcements are: NOT-OD-21-139 – LRP for Clinical Researchers (LRP-CR); NOT-OD-21-140 – LRP for Pediatric Research (LRP-PR); NOT-OD-21-141 – LRP for Health Disparities Research (LRP-HDR); NOT-OD-21-142 – Clinical Research LRP for Individuals from Disadvantaged Backgrounds (LRP-IDB); NOT-OD-21-143 – LRP for Contraception and Infertility Research (LRP-CIR); NOT-OD-21-144 – LRP for Research in Emerging Areas Critical to Human Health (LRP-REACH) – NEW; Please note: Recipients of Ruth L. Kirschstein National Research Service Award (NRSA) support from an individual postdoctoral fellowship (F32) or an institutional research training grant (T32) will be eligible for loan repayment during the second year of NRSA support if a formal extension of the NRSA service payback is granted (see NIH Training Payback). Concurrent fulfillment of LRP and NRSA service obligations is prohibited. You must request a deferral of NRSA payback service prior to acceptance into the LRP. A deferral form can be obtained by contacting the LRP Help Line at 866-849-4047. It is important to note, though, that NRSA recipients may continue to receive their stipends from the NRSA.; All general questions should be directed to the LRP Information Center at (866) 849-4047 or lrp@nih.gov; [brought to our attention by] Stephanie F. Additional Information: By Mike Lauer; When the public health emergency was first declared, NIH, working with OMB and HHS, quickly identified a long list of flexibilities to support the research community. The list has evolved since the pandemic began, so we would like to take this opportunity to remind the community of many of the current flexibilities we have in place.

The award is conferred on a VP&S faculty member who will create and develop new educational programs for medical students that will “ensure that VP&S students are among the finest physicians entering the profession, skilled in the knowledge and practice of medicine and modeling compassionate, humanistic care to all patients.” This $40,000 amount is to be committed to salary and fringe support to give the scholar protected academic time for accomplishing the project. Applications are due by Friday, January 14, 2022.; Nominations must include: Statement of the proposed project: The proposed project must be directly related to undergraduate medical education at VP&S. It must be a project that will have a significant, demonstrable impact on medical student education. The statement must include background information about the project with at least three references, proposed methodology, plan for implementation, timeline, and proposed methods for evaluation (2 – 4 pages in length).; Personal statement: The personal statement should outline the applicant’s credentials as a medical educator and scholar, including their track record of completed scholarly projects and career trajectory in medical education. The statement must also indicate the applicant’s willingness to report on the project to the Apgar Academy members and guests at the end of the year in the Vanneck-Bailey Presentation (2 – 3 pages in length).; Letter of nomination from the department chair: In addition to information about the nominee’s credentials, this letter must indicate that, if selected, the nominee would have protected time for the project and would use the salary support for this purpose.; Letter from Vice Dean of Education, Associate Dean for Curriculum, course director, or clerkship director indicating that the project has been approved for inclusion in the curriculum if the project would result in a course for VP&S students.; Nominee’s current CV – please use enhanced CV template to outline all educational activities.; The Vanneck-Bailey Scholars Program is executed and administered by the Virginia Apgar Academy of Medical Educators, and Vanneck-Bailey Scholars are encouraged to approach academy members as mentors. One Vanneck-Bailey Scholar will be chosen per academic year. Deadline for applications is Friday, January 14, 2022. Please contact Renée Russas rs3970@cumc.columbia.edu with any questions.

https://columbia.infoready4.com/#/competitionDetail/1848434

**Additional Information:** Apply for the 2022 RISE Competition; Dear Colleagues, We invite you to apply to the 2022 Research Initiatives in Science and Engineering (RISE) competition. Via a one to two year annual award of $80k, RISE seeds innovative, interdisciplinary, high-risk, and potentially high-impact research collaborations that are not ready to secure funding through conventional sources. All Columbia-employed, full-time researchers eligible to serve as Principal Investigators may apply for this internal seed funding opportunity, albeit with seven important restrictions and recommendations: PIs and Co-PIs currently
funded by the RISE program may not submit applications; Applications must be fully collaborative and must include at least two Lead PIs. Applications from only one PI, or who name a Lead PI who is not a full-time Columbia faculty member, RISE will reject; At least one of the two PIs must be a researcher from a scientific, engineering, and/or medical discipline; Applications from PIs that span two or more schools and departments are strongly encouraged; Applications from PIs that have never previously collaborated are preferred; Proposed projects must not have received support from Columbia’s other seed funding programs; Multiple applications from the same PI are discouraged.; About RISE: RISE supports projects that conventional funding sources perceive as too risky or unfamiliar. RISE provides up to $80,000 for one year – with potential for a second year of funding – to enable researchers to produce the preliminary data and establish an initial proof of concept before submitting the proposal to government agencies, private foundations, and/or for-profit companies. Therefore, you should not submit proposals currently suitable for submission to such conventional mechanisms to RISE. The most frequent reason reviewers reject RISE proposals is that they believe that the project appears ready for conventional review; Since its inception in 2004, the RISE competition has provided approximately $13.3 million in seed funding to 89 project teams. Consonant with the high risk/high reward objective of RISE, approximately half the projects fail to prove out. However, the half that succeed have subsequently won over $78 million in extramural grants or a nearly six-fold return to our research community.; Last year’s 2021 competition received 37 applications. RISE advanced thirteen to the secondary stage of consideration, and awarded funding to six teams. 102 Columbia faculty participated as peer reviewers of the applications; Other Internal Seed Funding Programs: The RISE competition is one of multiple seed funding programs internal to Columbia University. Should the project you are conceptualizing not fit within RISE’s purview of early-stage, discovery research, we encourage you to review other internal programs, which are identified via my Office’s webpage: https://research.columbia.edu/content/internal-seed-funding; How to Apply: To apply for the 2022 RISE competition, please submit your application via InfoReady by 5:00 p.m. EST on Monday, October 18th, 2020. Internal peer review committees composed of researchers across the University review all complete and eligible applications. All eligible applications will receive anonymized feedback relayed by the RISE administrator team.; We invite a small handful of the very strongest applications to submit a four-page Round 2 proposal by January 2022. RISE awards up to six teams from Round 2 by Spring 2022.; For more information pertaining to the RISE program, including a list of Frequently Asked Questions and past awarded teams, please visit the website at www.columbia.edu/rise. You may also refer to the sample Evaluation Form that reviewers will use when evaluating applications, which is attached to this email; With questions about the RISE competition or how to design the strongest application, please email rise@columbia.edu; Sincerely, Jeannette M. Data Science Institute DSI Seed Funds Program Fall 2021; Call for Faculty Participation; deadline 11/08/2021

Sponsor: The Data Science Institute at Columbia University, https://datascience.columbia.edu/
Deadline(s): 11/08/2021
Contact: datascience@columbia.edu; dsi-seed@columbia.edu
Additional Information: Call for Fall 2021 Proposals; The Data Science Institute at Columbia University datascience@columbia.edu ; DSI Seed Funds Program Fall 2021; Call for Faculty Participation; Deadline for proposal submission is Monday, Nov. 8, 2021 @ 3 p.m. ET; FUNDING OPPORTUNITY FOR FACULTY AND RESEARCH STAFF; Every field has data. We use data to discover new knowledge, to interpret the world, to make decisions, and even to predict the future. The recent convergence of big data, cloud computing, and novel machine learning algorithms and statistical method is causing an explosive interest in data science and its applicability to all fields. This convergence has already enabled the automation of some tasks that improve human
performance. The novel capabilities we derive from data science will drive our cars, treat disease, and keep us safe. At the same time, such capabilities risk leading to biased, inappropriate, or unintended action. The design of data science solutions requires both excellence in the fundamentals of the field and expertise to develop applications which meet human challenges without creating even greater risk; The Data Science Institute (DSI) at Columbia University is a world leader in the theory and practice of the emerging field of data science. We advance the state of the art in data science; transform all fields, professions, and sectors through the application of data science; and ensure the responsible use of data for the benefit of society. It is in this context that DSI promotes “Data for Good”: using data to address societal challenges and bringing humanistic perspectives as—not after—new science and technology is invented; PROGRAM GOALS; The DSI Seed Funds Program supports new collaborations that will lead to longer term and deeper relationships among faculty in different disciplines across campus. Aimed at advancing research that combines data science expertise with domain expertise, the program’s funded research should embody the spirit of the Institute’s mission. We are interested in the application of data science to all domains and bringing ideas from other domains to bear on data science. Aligned with these efforts, we are particularly interested in proposals that address one or more of DSI’s focus areas: Business and Finance, Climate, Foundations of Data Science, Health, and Social Justice; DSI is pleased to announce a call for proposals from Columbia University faculty and research staff for its Seed Funds Program. We seek proposals that represent new collaborations, which will ideally lead to future proposal submissions to government, industry, or foundations. As such, DSI Seed Funds may be viewed as planning grants for upcoming solicitations from DARPA, NIH, NSF, etc. We encourage proposals that address the technical challenges in the fair and ethical use of data. STATEMENT ON RACIAL EQUITY: DSI is committed to racial equity and justice. Proposals should explicitly state that the project will uphold these values, e.g., stating that the methods used to collect and analyze project data, and the project outcomes reported are fair, just, and ethical.; FUNDING: This year, DSI will provide two levels of funding. We will accept proposals with budgets up to $25,000, as well as proposals with budgets up to $75,000, annually, for a maximum of two years. The $25,000 grants are intended for projects where significant salary support of Ph.D. students, postdoctoral researchers, or research scientists is not needed. As a condition of funding, awardees will be required to submit quarterly financial reviews and biannual progress reports. Eligibility for continued funding for a second year will also require a progress report. All reports must include progress on external funding proposal submission(s) and other related activities (presentations, publications, etc.). Budgets are encouraged to request support for DSI research scientists and for the university’s Bridge to the Ph.D. Program in STEM program.; DSI research scientists and scholars represent a wide range of expertise, from the foundations of data science to domains where data science is heavily used. Collaborating with a DSI research scientist or scholar may accelerate your research project.; The Bridge to the Ph.D. Program in STEM is a structured, post-baccalaureate opportunity aimed to diversify the STEM professoriate and workforce. By including one of their scholars as part of your DSI Seed Funds research proposal, you contribute towards increasing pathways for underrepresented students to advance in STEM disciplines. The Office of the Vice Provost for Faculty Advancement covers 70% of the scholar’s salary and fringe, with 30% (~$17K) expected from the sponsoring principal investigator (PI). Your DSI Seed Funds budget is eligible to cover the PI’s expected cost for sponsoring a scholar.; PROPOSAL PROCESS: The deadline for proposal submission is Monday, November 8, 2021 @ 3 p.m. ET. We will not accept incomplete or late submissions. Please submit the following materials via email in a single .doc or .pdf format to dsi-seed@columbia.edu: application cover page, project proposal, racial equity statement, budget, and CVs for faculty / collaborators two-page, NSF-style format; We anticipate notifying award recipients by December 21, 2021.

[NTW] [NIH ANNOUNCEMENTS/COVID-19]
Clarification and Guidance for Applicants Preparing Applications for the Fall 2021 Due Dates During the COVID-19 Pandemic
Sponsor: Office of the Director, NIH
Deadline(s): 08/25/2021 (Release Date)
Contact: NIH Review Policy Officer; ReviewPolicyOfficer@mail.nih.gov

Additional Information: Last week, NIH issued announcement NOT-OD-21-180, which provides additional guidance related to COVID-19 for applicants preparing applications for the May 2022 Council round, beginning with the September 25, 2021 due date for Spring 2022 initial peer review meetings. Please see text of the announcement below, especially highlighted section.; Purpose: The NIH remains firmly committed to supporting the biomedical research enterprise as the nation implements
the President's Guidelines for Re-Opening America Again. The purpose of this Notice is to clarify the guidance provided earlier NOT-OD-21-026, for applicants preparing applications for the May 2022 Council round, beginning with the September 25, 2021 due date for Spring 2022 initial peer review meetings.; Reviewers will continue to receive instructions to assume that constraints arising from the COVID-19 pandemic (e.g., lab occupancy restrictions, declines in patient accrual, etc.) will be resolved during the project period and thus should not affect their scores.; Therefore, NIH grant applications should NOT include contingency or recovery plans for problems resulting from the COVID-19 pandemic. However, applicants may address effects due to the pandemic on productivity or other scoreable issues in their Personal Statement in the NIH Biosketch. Reviewers will be instructed to take these pandemic-related circumstances into account when assessing applicants’ productivity and other score-driving factors.; As with previous instructions, if needed, NIH staff will request and assess plans to resolve specific problems arising from the COVID-19 pandemic prior to funding.; [brought to our attention by] Stephanie F.   **Additional Information:** Pilot Grants for Health Behavior Interventions; Columbia Roybal Center Pilot Award Program Columbia University Irving Medical Center; Deadline: Wednesday, December 1, 2021; The NIA-funded Columbia Roybal Center
for Fearless Behavior Change will fund one-year pilot studies relevant to developing health behavior interventions for patients who have suffered acute medical events. Our prior research has shown that many patients develop fear-based responses to these traumatic events (e.g., fear of recurrence, heightened distress from internal physiologic stimuli) that lead to avoidance of the very health behaviors (e.g., exercise, take medications regularly) that are recommended to prevent recurrence. Accordingly, our Center seeks to develop interventions that address these fear-related mechanisms. 

Eligibility: Applicants are not required to be affiliated with Columbia University. Additional Information: NIH recently released new clarifications for the Other Support format pages and Biographical Sketches. Key clarifications include:
Signatures are not required on the Other Support format pages until January 25, 2022, regardless of whether you use the old or new formats.
Completed support from the last three years is no longer required in Other Support. Only include *active and pending* projects. Awardees must report *significant changes* in Other Support in RPPRs, such as a change in status of previously reported current or pending projects, or access to a new resource/in-kind contribution.

Only unique, high-value materials and data received *within the past three years, that are still in use,* must be included as in-kind contributions in Other Support.

Only *current* positions and scientific appointments are required in the Biosketch. Applicants may choose to include past appointments that they wish to highlight.

Consulting agreements must be included in Other Support only when the PD/PI or other senior/key personnel will be conducting research as part of the consulting activities. Non-research consulting activities are not Other Support.

Include *estimates for the amount paid,* rather than time and effort reflected in calendar months, for consulting that is disclosed in Other Support.

*Rather than simply updating a previously submitted Other Support form, we strongly recommend that you create a new form from scratch, to ensure that you are able to implement all changes.*

To assist you further, we created additional FAQs based on questions collected from researchers and administrators at Columbia University. They are meant to *supplement* NIH’s FAQs. In addition, we will be hosting monthly webinars to walk you through the forms. Stay tuned for a separate communication with the webinar schedule.

All questions should be directed to your SPA Project Officer. Below is a listing of applicable resources:

Additional Information: With the NIH application due dates approaching in late September and early October, we wanted to take this opportunity to remind the research community of the latest required researcher disclosure requirements in proposals: Biographical Sketch (“Biosketch”) – The newest Biosketch format is preferred immediately and required to be used for applications and Research Performance Progress Reports (RPPRs) submitted on or after January 25, 2022 NOT-OD-21-073 and NOT-OD-21-110; The Positions, Scientific Appointments and Honors section of the Biosketch must include, in reverse chronological order, all current positions and scientific appointments both domestic and foreign, including affiliations with foreign entities or
governments. This includes titled academic, professional, or institutional appointments whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary). Regardless of whether you use the old or new formats, only current positions and scientific appointments are required in the Biosketch. Applicants may choose to include past appointments that they wish to highlight. The Personal Statement may now include including ongoing and completed research projects from the past three years that you want to draw attention to (previously captured under Section D. Research Support). Biosketches can be created using SciENcv, or using NIH's blank format page in Word. If you forgot to include an item in the Biosketch after submission, contact your SPA Project Officer as soon as possible. Refer to NIH's Biosketch FAQs, Columbia’s supplementary FAQs, and contact your SPA Project Officer should you have any questions. Disclosing a Foreign Component – If any significant scientific element or segment of your project will be performed outside the United States, either by you or by a researcher employed by a foreign organization, whether or not grant funds will be expended, your project has a “foreign component” that requires disclosure and prior approval by NIH. See NIH’s full definition of Foreign Component. You must answer Field 6 of the Research and Related (R&R) Other Project Information form to indicate whether your project involves activities outside the U.S. or partnerships with international collaborators. If you indicate “Yes” to Field 6, you must include a “Foreign Justification” attachment in Field 12, Other Attachments. If a project develops a foreign component during the course of the project, prior approval must be obtained. Contact your SPA Project Officer in this situation. See NIH’s Foreign Component FAQs. We will be hosting several webinars in the coming months to provide the latest information on Biosketches and Other Support. Stay tuned for a subsequent announcement. As always, all questions should be directed to your SPA Project Officer. [brought to our attention by] Stephanie F. The research community may elect to forward inquiries that are pending a response to the new central email inbox, as needed.; NIH encourages the research community to review the currently available resources related to this effort: Updated Biosketch resources, including FAQs and sample Biosketch format pages can be found here.; Additional resources, including training videos and other materials will be posted on the pages above as they become available.; Related Announcements: NOT-OD-21-110 - Implementation of Changes to the Biographical Sketch and Other Support Format Page; NOT-OD-21-073 - Upcoming Changes to the Biographical Sketch and Other Support Format Page for Due Dates on or after May 25, 2021; NOT-OD-19-114 - Reminders of NIH Policies on Other Support and on Policies related to Financial Conflicts of Interest and Foreign Components; It is important for all NIH applicants and awardees, including PIs, senior/key personnel, and grants administrators, to read it in its entirety.; The updated Biographical Sketch and Other Support format pages will be required for applications and Research Performance Progress Reports (RPPRs) submitted for due dates on or after May 25, 2021. It is advisable that you bookmark these pages: NIH Biosketch format pages and instructions and FAQs; NIH Other Support format pages and FAQs; Please note: PIs and senior/key personnel will be required to certify that their Other Support information is true, complete and accurate to the best of their knowledge.; Our office is in the process of reviewing the updated forms and instructions. We are scheduling webinars in the coming weeks to provide an overview of these changes. NIH is also planning to release additional resources and training materials in the coming weeks. If you are in the process of creating either a Biosketch or Other Support format page for applications and RPPRs due on or after May 25, 2021; Updated Biosketch resources, including FAQs and sample Biosketch format pages can be found here.; Updated Other Support resources, including FAQs and sample Other Support format pages can be found here.; One of the most important changes in the Biosketch instructions is Section B: ‘List in reverse chronological order all positions and scientific appointments both domestic and foreign, including affiliations with foreign entities or governments. This includes titled academic, professional, or institutional appointments whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary).’; This is critical. The senior/key personnel, and mentors for training grants, have to include all positions and appointments, not just select ones, or ones relevant to the proposal. It’s not just the heading of Section B that changed, it’s the instructions to Section B.; The changes as outlined in the announcement are as follows:

**Additional Information:** NIH-Wide Strategic Plan for FY 2021-2025 Now Available; We are pleased to announce that the NIH-Wide Strategic Plan for Fiscal Years (FYs) 2021-2025 is now available. This updated plan articulates NIH's highest priorities over the next 5 years, outlining our vision for the future direction, capacity, and stewardship of biomedical and behavioral research.; The plan is organized around a framework of three key objectives: [1] Advancing Biomedical and Behavioral Sciences; [2] Developing, Maintaining, and Renewing Scientific Research Capacity; [3] Exemplifying and Promoting the Highest Level of Scientific Integrity, Public Accountability, and Social Responsibility in the Conduct of Science.; The plan weaves five cross-cutting themes across these objectives, centered around minority health and health disparities, women's health, public health challenges across the lifespan, collaborative science, and data science. The plan also mentions several achievements made during the previous FY 2016-2020 plan, but please recognize that this plan is not meant to describe everything NIH does.; As Dr. Francis Collins, the NIH Director, notes in the opening statement, "NIH will [invest] efficiently and effectively in a wide range of basic, translational, clinical, and applied research, while at the same time supporting the workforce and infrastructure required for a sustainable research enterprise. As outlined in this Strategic Plan, this approach will enable NIH to build a solid foundation of fundamental knowledge about living systems that will serve to accelerate research aimed at addressing our most pressing health needs."; We appreciate members from the research community, professional societies, advocacy groups, and the public who worked with us and provided feedback throughout the process to develop this plan.

Additional Information: NSF announced today a number of system enhancements for proposals submitted in Research.gov and FastLane, and upcoming revisions to the NSF-approved Biographical Sketch and Current and Pending Support SciENcv and fillable PDF formats that fall under the revised Proposal & Award Policies & Procedures Guide (PAPPG) NSF 22-1 will be available to preview by September 17, 2021.; We are also excited to announce enhanced NSF Funding Opportunity Search functionality and revamped program pages on nsf.gov and beta.nsf.gov, the new version of the NSF website. As NSF builds its new nsf.gov website in small, iterative pieces using the https://beta.nsf.gov/ platform, we are not simply moving existing content from nsf.gov to the new site. Rather, the new website will improve how information is presented for
use by various audiences including prospective proposers, grantees, and the general public.; Here’s what to know.; **Research.gov Proposal Submission System Enhancements**; Research.gov proposal features continue to expand to support the transition of all proposal preparation and submission functionality from FastLane to Research.gov by a target date of December 31, 2022. Many NSF funding opportunities are supported in Research.gov and clearly specify whether submission via Research.gov is available or required.; Effective August 30, 2021, Conference and Ideas Lab proposal types, renewal and accomplishment-based renewal submission types, and preliminary proposals for Ideas Lab solicitations are all now available for submission in Research.gov. FastLane must be used to submit preliminary proposals for proposal types other than Ideas Lab until that functionality is available in Research.gov.; The proposal preparation landing page has been revised, and Principal Investigators will now first select the proposal submission type from the drop-down options and then will follow the proposal setup wizard to initiate a new proposal. In progress and submitted proposals are accessible from the tiles on the revised proposal preparation landing page, after first selecting the submission type from the drop-down options.; New automated compliance checks and associated error and warning messages for the enabled proposal and submission types were also implemented. Error messages will prohibit proposal submission to NSF, whereas warning messages still permit proposal submission.; New Frequently Asked Questions (FAQs) were added to the Research.gov About Proposal Preparation and Submission page, and the Proposal Submission Capabilities page has been updated to reflect the latest development updates.; All supported proposal and submission types as well as associated compliance checks are also enabled in the Research.gov Proposal Preparation Demo Site.; Refer to the PAPPG NSF 20-1 for current proposal requirements. Guidelines in the revised PAPPG NSF 22-1 will apply for proposals submitted or due on or after October 4, 2021.; **NSF-approved Biographical Sketch and Current and Pending Support Format Updates**; Current and Pending Support Fillable PDF Updates; Based on feedback from the research community and NSF Program Officers, NSF has incorporated functionality as of August 30, 2021, in FastLane and Grants.gov to remove any pages which do not contain data entered by users (i.e., blank pages) from the NSF-approved current and pending support fillable PDF. This trimming functionality will be integrated in Research.gov on October 4, 2021, in coordination with implementation of the revised PAPPG NSF 22-1 for proposals submitted in Research.gov and project reports submitted in the Research.gov Project Reporting System.; The trimming service only applies to the NSF-approved current and pending support fillable PDF and not to any other uploaded PDFs. Current and pending support PDFs generated in SciENcv do not include blank pages.; The current and pending support fillable PDF document is paginated, and the PDF page numbers will not be updated during the trimming process. This means that it is possible for the trimmed PDF to have skipped page numbers corresponding to the blank pages removed from the fillable PDF. NSF Program Officers are aware of this potential occurrence in proposals submitted to NSF.; Proposers with in progress proposals as of August 30, 2021, can delete previously uploaded current and pending support fillable PDFs from their FastLane or Grants.gov proposals and then re-upload them to trigger the trimming service.; Updated Biographical Sketch and Current and Pending Support SciENcv and Fillable PDF Formats; The updated NSF-approved biographical sketch and current and pending support formats will be available in September 2021 to preview before they are required on October 4. The updated fillable PDF formats will be available for download from the NSF biographical sketch and current and pending support websites by September 3. Updated SciENcv formats will be available on the SciENcv Create a New Document screen by September 17.; Biographical sketch format updates include increasing the page limit from two to three pages.; Current and pending support format updates include the addition of new sections for information on objectives and overlap with other projects to help NSF and reviewers assess overlap/duplication.; Although submission of the updated NSF-approved formats is not permitted (i.e., Research.gov, FastLane, and Grants.gov will not allow the 22-1 forms to be uploaded) until implementation of the revised PAPPG NSF 22-1 on October 4, 2021, NSF is encouraging proposers and grantees to begin familiarizing themselves with the updated NSF-approved formats when they are available.; Enhanced Funding Opportunity Search Functionality and Revamped Program Pages; Based on extensive research with external and internal stakeholders, NSF has made significant improvements to the NSF Funding Opportunity Search functionality to help researchers and prospective researchers quickly and easily find relevant programs and NSF-funded projects in specified disciplines. Funding Search results now include short program descriptions, programs incorporated in core program solicitations with links to the relevant guidelines, and Dear Colleague Letters.; The revamped program pages include significant content and navigation improvements including information
previously only viewable in solicitations. For more information about NSF's beta site, please visit https://beta.nsf.gov/about-beta. NSF will continue to enhance the site, and ongoing feedback from external and internal stakeholders is vital to the process. Feedback on the updated Funding Search and program page enhancements or any other aspect of the site may be directed to beta-nsf-feedback@nsf.gov. Questions? If you have IT system-related questions, please contact the NSF Help Desk at 1-800-381-1532 (7:00 AM - 9:00 PM ET; Monday - Friday except federal holidays) or to rgov@nsf.gov. Additional Information: See NSF update below regarding system updates that were made yesterday in Research.gov and FastLane to align with the latest Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1); We'll be reviewing some of these changes during next week’s Research Administration Forum, taking place on Wednesday, October 13th at 11am (click link for more information about the Forum); As always, please feel free to reach out to your SPA Project Officer should you have any questions.; [brought to our attention by Stephanie Scott] ; Now Available: New Proposal and Submission Types and System Enhancements to Support the Revised PAPPG (NSF 22-1); Dear Colleague: Effective October 4, 2021, the National Science Foundation (NSF) made a number of system updates for proposals submitted in Research.gov, FastLane, and Grants.gov in accordance with the implementation of the Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1). Please see the list of PAPPG (NSF 22-1) significant changes and clarifications for all of the updates. New proposal and submission types were also enabled in the Research.gov Proposal Submission System.; New Proposal Types in the PAPPG; The PAPPG (NSF 22-1) incorporates two new "Other Types of Proposals": Planning Proposals; Planning proposals must be prepared and submitted in Research.gov.; Refer to PAPPG Chapter II.E.1. for Planning proposal requirements.; Career-Life Balance (CLB) Supplemental Funding Requests; CLB supplemental funding requests must be prepared and submitted in FastLane.; Refer to PAPPG Chapter II.E.8. for CLB supplemental funding request requirements.; Updates to NSF-approved Biographical Sketch and Current and Pending Support Formats; The NSF-approved biographical sketch and current and pending support formats were updated to incorporate revisions in the PAPPG (NSF 22-1) and must be used for proposals submitted or due on or after October 4, 2021.; The current formats are posted on the NSF biographical sketch and current and pending support websites. Updated system-related Frequently Asked Questions (FAQs) are also available: FAQs on using SciENcv and FAQs on using NSF fillable PDF. SciENcv documents created using the previous version (i.e., NSF 20-1) prior to October 4th are automatically converted in SciENcv to the current version after October 4th.; Biographical sketch format updates include increasing the page limit from two to three pages.; Current and pending support format updates include the addition of new sections for information on objectives and overlap with other projects to help NSF and reviewers assess overlap/duplication.; Biographical sketches and current and pending support information must also be uploaded with Change of Principal Investigator (PI) and Add/Change co-PI requests in FastLane.; When notifying NSF that active other support has changed since the award was made, or since the most recent annual report, current and pending support information must be uploaded in annual and final project reports in the Research.gov Project Reporting System.; Research.gov, FastLane, and Grants.gov will generate a compliance error message if a proposer or grantee attempts to upload a prior version of the biographical sketch or current and pending support formats on or after October 4th.; Removal of Blank Pages from the Current and Pending Support Fillable PDF; Research.gov, FastLane, and Grants.gov will remove any pages which do not contain data
entered by users (i.e., blank pages) from the NSF-approved current and pending support fillable PDF. The trimming service is triggered in Research.gov and FastLane during document upload and during proposal submission in Grants.gov. The trimming service only applies to the NSF-approved current and pending support fillable PDF and not to any other uploaded PDFs. Current and pending support PDFs generated in SciENcv do not include blank pages. The current and pending support fillable PDF document is paginated, and the PDF page numbers will not be updated during the trimming process. This means that it is possible for the trimmed PDF to have skipped page numbers corresponding to the blank pages removed from the fillable PDF. Research.gov Proposal Submission System Enhancements; The Grant Opportunities for Academic Liaison with Industry (GOALI) and Planning proposal types and the Letter of Intent submission type are now available for submission in Research.gov. New automated compliance checks and associated error and warning messages for the enabled proposal and submission types were also implemented. Error messages will prohibit proposal submission to NSF, whereas warning messages still permit proposal submission. All supported proposal and submission types as well as associated compliance checks are also enabled in the Research.gov Proposal Preparation Demo Site; New FAQs were added to the Research.gov About Proposal Preparation and Submission page, and the Proposal Submission Capabilities page has been updated to reflect the latest development updates. Research.gov proposal features continue to expand to support the transition of all proposal preparation and submission functionality from FastLane to Research.gov by a target date of December 31, 2022. Many NSF funding opportunities are supported in Research.gov and clearly specify whether submission via Research.gov is available or required. Questions? **Additional Information:** Issuance of NSF Proposal and Award Policies and Procedures Guide (NSF 22-1); See below announcement from NSF. They have released the latest version of the NSF Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1), effective for proposals submitted or due on or after October 4, 2021. While this version of the PAPPG becomes effective on October 4, 2021, in the interim, the guidelines contained in the current PAPPG (NSF 20-1) continue to apply. A listing of significant changes can be found here, and a condensed list of major changes are below. NSF will be hosting a webinar to review the significant changes, date to be determined. However, you can sign up here to be notified immediately when registration for the webinar is open. I’ll also provide that information once it becomes available.; One thing I’d like to highlight is that NSF will be increasing the page limit for the biographical sketch from two to three pages, effective for proposals submitted or due on or after October 4, 2021. Stay tuned for more information about that.; As always, feel free to contact your SPA Project Officer should you have any questions, and we’ll keep you posted of new developments.; [brought to our attention by] Stephanie F. Scott, MS, CRA; Director of Policy and Research Development; sfs2110@cumc.columbia.edu; Website: https://spa.columbia.edu/; Dear Colleagues: ; We are pleased to announce that a revised version of the NSF Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 22-1) has been issued.; The new PAPPG will be effective for proposals submitted or due on or after October 4, 2021. Significant changes include: A new section covering requests for reasonable and accessibility accommodations regarding the proposal process or requests for accessibility accommodations to access NSF’s electronic systems, websites and other digital content; A table entitled, NSF Pre-award and Post-award Disclosures Relating to the Biographical Sketch and Current and Pending Support. This table identifies where pre- and post-award current and pending support disclosure information must be provided. Proposers and awardees may begin using this table immediately; Increasing the page limit for the biographical sketch from two to three pages; Updates to the current and pending support section of NSF proposals to require that information on objectives and overlap with other projects is provided to help NSF and reviewers assess overlap/duplication; Adding planning proposals and Career-Life Balance supplemental funding requests as new proposal types; Updates to travel proposals will require that AOs certify that prior to the proposer’s participation in the meeting for which NSF travel support is being requested, the proposer will assure that the meeting organizer has a written policy or code-of-conduct addressing harassment; You are encouraged to review the by-chapter summary of changes provided in the Introduction section of the PAPPG.; NSF plans to conduct a webinar covering these changes. Visit the NSF policy outreach website to sign up for notifications about this and other outreach events; While this version of the PAPPG becomes effective on October 4, 2021, in the interim, the guidelines contained in the current PAPPG (NSF 20-1) continue to apply.; If you have any questions regarding these changes, please contact the DIAS/Policy Office at policy@nsf.gov; Regards, Jean Feldman; Head, Policy Office; Division of Institution and Award Support; Office of Budget, Finance & Award Management

https://beta.nsf.gov/budget
Additional Information: May 28, 2021; Statement by NSF Director Sethuraman Panchanathan on the President’s FY22 Budget Request; President Proposes Crucial Investments to Advance the Frontiers of U.S. Science and Technology; The Biden-Harris Administration today submitted to Congress the President’s Budget for fiscal year 2022. As the Administration continues to make progress defeating the pandemic and getting our economy back on track, the Budget makes historic investments that will help the country build back better and lay the foundation for shared growth and prosperity for decades to come; “This request will bolster the U.S. economy and our leadership in critical and emerging areas of research and technological advancements, which are essential to our long-term economic and national security,” said NSF Director Sethuraman Panchanathan. “NSF’s mission is unique in supporting research across all fields of science, technology, engineering, and mathematics, and all levels of STEM education. Seven decades of experience building the necessary partnerships between federal, state, and local government, academia, and industry have produced remarkable results for the country. With this budget, we can rapidly scale our investments and build even stronger bridges between discovery, innovation, and commercialization.”; The Budget includes more details on what is proposed in the two historic plans the President has already put forward — the Americans Jobs Plan and the American Families Plan – and reinvests in education, research, public health, and other foundations of our country’s strength. At the U.S. National Science Foundation, the Budget would: Enhance Fundamental Research and Development. $9.43 billion, an increase of $1.55 billion above 2021 enacted level will support research across the spectrum of science, engineering and technology. This includes biological sciences; computer and information sciences; engineering; geosciences; math and physical sciences; social, behavioral, and economic sciences; and education. With this additional funding, NSF will continue to be the champion of basic and fundamental research and will strengthen it at speed and scale.; Strengthen U.S. Leadership in Emerging Technologies. Includes the establishment of a new directorate for technology, innovation and partnerships within NSF to help translate research into practical applications. The directorate will work with programs across NSF and with other federal and non-federal entities to expedite technology development in emerging areas that are crucial for the United States’ technological leadership.; Advances Equity in Science and Engineering. +$100 million, an increase of about 50 percent, in funding for programs that aim to increase participation in science and engineering of individuals from racial and ethnic groups underrepresented in these fields. Funding will support curriculum design, research on successful recruitment and retention methods, development of outreach or mentorship programs, fellowships, and building science and engineering research and education capacity at historically black colleges and universities, and other minority-serving institutions.; Advances Climate Science and Sustainability Research. $1.2 billion for climate and clean energy-related research will fund a broad portfolio of research related to climate science and clean energy, including research on atmospheric composition, water and carbon cycles, modeling climate systems, renewable energy technologies, materials sciences, and social, behavioral, and economic research on human responses to climate change.; Continues Construction of Forefront Research Infrastructure. Invests in the continued construction of major NSF research facilities, including long-term upgrades of NSF’s major Antarctic infrastructure. It also supports construction of the Vera C. Rubin Observatory to enable astronomy research. In addition, the budget request seeks funding for the construction and procurement of smaller research facilities and equipment across the nation.; Enacting the Budget policies into law this year would strengthen our Nation’s economy and lay the foundation for shared prosperity, while also improving our Nation’s long-term fiscal health.; For more information on the President’s FY22 Budget, please visit: https://www.whitehouse.gov/omb/budget/; For more information on the NSF budget, please visit: https://beta.nsf.gov/budget

The Alliances are integral to NSF INCLUDES and bring together new partners from many academic and professional disciplines and leverage the five design elements of collaborative infrastructure to address a broadening participation challenge at scale. In FY 2018 and FY 2019, NSF INCLUDES funded a total of eight Alliances. For more information on funded NSF INCLUDES Alliances, visit https://www.includesnetwork.org/home.; NSF INCLUDES Alliances build the infrastructure necessary to foster collaboration and broaden participation in STEM by emphasizing the following five design elements of collaborative infrastructure: Shared Vision - Develop a shared vision and strategy (e.g., problem statement and theory of change) for broadening the participation of the target population(s) in STEM along with relevant metrics of success and key milestones/goals to be achieved during the project's lifecycle; Partnerships - Develop multi-stakeholder partnerships and build infrastructure among them to decrease social distance and achieve progress on common goals targeted by the Alliance; Goals and Metrics - Contribute to the knowledge base on broadening participation in STEM by broadening participation and implementation research, sharing project evaluations, data, new scientific findings/discoveries, and promising practices; Leadership and Communication - Establish a "backbone" or support organization that provides a framework for communication and networking, network assistance and reinforcement, visibility and expansion of the Alliance and its partners, that will collaborate with the NSF INCLUDES Coordination Hub; Expansion, Sustainability, and Scale - Advance a logic model or other heuristic that identifies Alliance outcomes that reflect implementation of change at scale and progress toward developing an inclusive STEM enterprise.; NSF anticipates making up to three Alliance awards with a duration of five years, contingent on availability of funds and receipt of competitive proposals. Awards will range from $1.0 to $2.0 million per year for five years depending on the goals, objectives, and the size of the communities involved.; Eligibility: The lead PI must possess the experience and institutional support necessary to implement and manage the INCLUDES Alliance.; Deadlines: Internal Proposal due 9:00 a.m. on Wednesday, August 25, 2021; Sponsor Letter of Intent due October 4, 2021; Sponsor Proposal due January 25, 2022; How: For more information, please visit the internal application at https://columbia.infoready4.com/#competitionDetail/1848662; Questions should be sent to Greg Culler at limitedsubmissions@columbia.edu; Program Solicitation: https://www.nsf.gov/pubs/2020/nsf20569/nsf20569.htm;

Additional Information: This FOA invites basic and/or methodological research projects that seek to illuminate or measure independent and interdependent health-related effects within dyads. For the purpose of this FOA, a dyad is a unit of two individuals whose interactions and influences on one another are nested within larger social contexts and networks. Both animal and human subjects research projects are welcome. Types of projects submitted under this FOA include but are not limited to, observational studies involving humans, or existing/synthesized datasets studies. Researchers proposing basic science experimental studies involving human participants (i.e., experimentally manipulate independent variables) should consider the companion FOA PAR-21-280" Dyadic Interpersonal Processes and Biopsychosocial Outcomes (R01 Basic Experimental Studies with Humans)."

Additional Information: This FOA invites basic and/or methodological research projects that illuminate and/or measure independent and interdependent health-related effects within dyads across relationships and settings. For the purpose of this FOA, a dyad is a unit of two individuals whose interactions and influences on one another are nested within larger social contexts and networks. Dyads are social relationships that extend beyond the individual and have strong bidirectional influences on physical and mental health. For the purpose of this FOA, independent effects are those effects that affect each member of the dyad individually (i.e., by nature of being part of the dyad), whereas interdependent effects are those that affect one member of the dyad contingent upon the other member of the dyad (i.e., not only because the individual is part of a dyad but also because being part of the dyad has an effect on the other individual within the dyad as well).

Under “Notice of Special Interest (NOSI): Research Supplements to Promote Reentry and Reintegration into Health-Related Research Careers” (NOT-OD-21-134), successful applicants will be able to participate in full- or part-time mentored research experiences through existing NIH research grants. Eligible for these reentry supplements are individuals whose research careers have been interrupted for at least 6 months because of family responsibilities or other qualifying circumstances. The reintegration supplements will enable individuals to find supportive scientific environments after departure from an unsafe or discriminatory environment resulting from unlawful harassment. Most candidates for the reentry supplements will have a doctoral degree or equivalent; however, some awarding NIH Institutes and Centers may enable predoctoral students, including those enrolled in dual-degree programs, to apply. Postdoctoral and predoctoral students are eligible to apply for reintegration supplements to allow them to transition to a safe, supportive research environment and complete their graduate degrees. Click here for more information, including detailed eligibility requirements and staff contacts. The first available due date for submissions is August 26, 2021, and the supplements program is set to expire on October 7, 2023.; Related Announcements: PA-20-272 - Administrative Supplements to Existing NIH Grants and Cooperative Agreements (Parent Admin Supp Clinical Trial Optional)

DASHI Pilot projects in the intersection of Artificial Intelligence (AI) and Health Sciences Workshop 12.10.2021

Sponsor: Hosted by The Data Science Institute and Columbia University Irving Medical Center; The Data Science Institute and Columbia University Irving Medical Center have a new partnership focused on building collaborative research projects that leverage foundational data science for new clinical advances. On the biomedical side, this is driven by emerging access to large scale complex datasets due to recently deployed technologies, e.g. in imaging, genomics, and electronic health records. These data challenges are looking for analysis tools to tackle them. On the engineering side, method developers are seeking data to sink their teeth into and test their developments in real-world settings. The Data Science and Health Initiative (DASHI) aims to bridge this gap and create synergy between our institutional strengths.

[NTW] [CANCER]
Peter T. Rowley Breast Cancer Scientific Research Projects (Round 7) Request for Applications (RFA)
Additional Information: The Peter T. Rowley Breast Cancer Scientific Research Projects (Round 7) Request for Applications (RFA) has been released. This RFA provides funding for researchers to try new methods and approaches in breast cancer research. The NYS Health Research Science Board wishes to stimulate and support research related to breast cancer biology, causation, prevention, detection or screening, treatment (including treatment of its effects), survivorship or cure. Any investigative approach appropriate to the application topic may be pursued, including, but not limited to, basic, translational, clinical, demographic, mapping, epidemiological, environmental, behavioral or psychosocial research. Projects will be supported by the state’s Breast Cancer Research and Education Fund. Approximately $2.16 million will be available through this RFA to support approximately five to seven of these awards. Annual direct costs are capped at $150,000. The contract term will be up to two years. To download a copy of the RFA and instructions, visit the New York State Grants Gateway: https://grantsgateway.ny.gov/intelligrants_NYSGG/module/nysgg/goportal.aspx?NavItem1=4&ngoID=5001954 . The Letter of Intent is not required; but is strongly encouraged and due by 8/24/2021. Applications are due by 4:00 PM EST on 10/26/2021 in the New York State Grants Gateway. If you are unfamiliar with the New York State Grants Gateway, we strongly encourage you to participate in the “Grant Application” webinar hosted by the New York State Grants Gateway Team. The training schedule can be found here: https://grantsmanagement.ny.gov/live-webinars .

This research is needed to assist communities throughout the United States in evaluating whether to invest in EAR strategies to improve water management and security. This new funding opportunity is titled, “Life-Cycle Analysis to Support Cost-Effective Enhanced Aquifer Recharge Request for Applications (RFA)”; Using too much groundwater can lead to many issues that impact water quality and water security. EAR is the practice of using excess surface water to replenish and supplement existing groundwater supplies for storage, potential reuse, and to augment water supplies. In many locations, EAR can be a cost-effective way to increase water resource resiliency to mitigate the impacts of drought exacerbated by climate change and can also provide ways to combat saltwater intrusion near coastal communities, among other benefits. However, the growing rate of groundwater extraction outpaces the rate of EAR implementation.; This RFA is intended to address the key economic, technological, institutional, and legal factors that affect the ability to implement EAR projects. The expected outcomes from this research include new tools, frameworks, and models that assist state, local and other decision-makers in understanding the costs and benefits of pursuing EAR strategies.; Applications should address both of the following two research areas: Research Area 1: Identification of Priority Research and Development Needs to Support EAR; Research Area 2: Development of Tools, Models, and Frameworks to Support EAR Implementation; For information on eligibility, project specifications, or how to apply, visit: [Life-Cycle Analysis to Support Cost-Effective Enhanced Aquifer Recharge Request for Applications (RFA)](https://www.epa.gov/research-grants/forms/contact-us-about-research-grants); Learn more about EPA Research Grants; Informational Webinar for Applicants; Date: Wednesday, December 1, 2021; Time: 1:00 p.m. EST; Register: [https://enhanced-aquifer-recharge-info-webinar.eventbrite.com](https://enhanced-aquifer-recharge-info-webinar.eventbrite.com); Join us for an informational webinar on this funding opportunity. Please see the Flexibilities Available to Organizations Impacted by COVID-19 clause in Section IV of EPA’s Solicitation Clauses.; URL: https://www.epa.gov/research-grants/development-innovative-approaches-assess-toxicity-chemical-mixtures-request ; Open/Close Dates: October 8, 2021 – December 8, 2021; Register for the Informational Webinar: Thursday, October 21 at 1:00 p.m. ET; Background: The U.S. Environmental Protection Agency (EPA), as part of its Science to Achieve Results (STAR) program, is seeking applications focused on improving the quantitative evaluation of risks posed by chemical mixtures in the environment. The focus should be on the development and improvement, evaluation, and integration of predictive toxicology methods to evaluate environmental chemical mixtures. This new funding opportunity is titled Development of Innovative Approaches to Assess the Toxicity of Chemical Mixtures Request for Applications (RFA). People are continually exposed to multiple chemicals present in the environment, including in air, water, soil, food, and products in commerce. Thousands of chemicals exist with minimal risk assessment-relevant information and there is a near infinite number of possible combinations of chemical mixtures like PFAS, phthalates, polycyclic aromatic hydrocarbons (PAHs), disinfection by-products (DBPs) or other well-characterized mixtures. These factors make it challenging to assess the toxicity of chemical mixtures. When assessing chemical mixtures, researchers have typically relied on information obtained from traditional experimental animal studies and/or human epidemiological exposure-response data on individual component chemicals; This RFA is intended to address the number of hazards and the associated human health risks of exposures to chemical mixtures found in the environment; Applications should address at least one of the following two research areas: Development and application of approaches to establish qualitative membership of chemical mixture components into toxicity pathway groupings, in order to quantitatively evaluate their potential joint toxicity.; Development of methods and tools useful for the examination of chemical mixture toxicity across different levels of biological organization. Specifically, research is needed on how New Approach Methodologies (NAMs) data/outputs on differing levels of biological organization (e.g., from cellular to whole organism level) intended to discern toxicity or bioactivity of individual mixture components can relate back to their originating (i.e., exposure source) mixtures, and to final whole organism health effects.; For information on eligibility, project specifications, or how to apply, visit: Development of Innovative Approaches to Assess the Toxicity of Chemical Mixtures; Learn more about the Chemical Safety for Sustainability research program; Learn more about EPA Research Grants.; Date: October 21, 2021 Time: 1:00 p.m. – 2:00 p.m. ET; Join us for an informational webinar on this funding opportunity. The webinar will cover
application information and provide an overview of what has already been provided in the RFA.; Webinar Objectives: Share general information and information on research areas for the RFA (EPA Project Officer); Learn about the submission, eligibility, relevancy review and peer review processes (EPA Eligibility, Submission, and Peer Review Officers); Question & answer session; A copy of the webinar presentation will be available on the RFA webpage for those unable to participate in the scheduled webinar.

**Additional Information:** EPA's 2022 Clean Air Excellence Awards Program -- Applications due Tuesday, November 30, 2021; EPA's Clean Air Excellence Awards are Now Being Accepted! The U.S. Environmental Protection Agency (EPA) is now accepting applications for the 2022 Clean Air Excellence Awards Program. Through this program, EPA recognizes and honors individuals and organizations whose efforts have helped to make progress in achieving cleaner air. The award recipients are selected for developing innovative, replicable, and sustainable programs; serving as pioneers in their fields; and improving air quality either directly or indirectly through reduced emissions of criteria pollutants, hazardous air pollutants, and/or greenhouse gases.; If your work falls into any of the award categories, please consider applying for one of these prestigious awards.; In addition, please help us spread the word by forwarding this information to other organizations and individuals who may be interested and encouraging other good candidates to apply.; The five award categories are: (1) Clean Air Technology; (2) Community Action; (3) Education/Outreach (4) State/Tribal/Local Air Quality Policy Innovations; and (5) Transportation Efficiency Innovations. In addition, the Clean Air Excellence Award Program will recognize two special award categories: (1) the Gregg Cooke Visionary Program Award, honoring a former EPA Regional Administrator, is given to the air quality project or program that successfully blends two or more of the existing awards categories; and (2) the Thomas W. Zosel Outstanding Individual Achievement Award, honoring a former member of the CAAAC and environmental leader at 3M, recognizes one individual for their outstanding achievement, leadership, and lasting commitment to promote clean air and achieve better air quality.; The award application and more information are available at [https://www.epa.gov/ccaac](https://www.epa.gov/ccaac) or [https://www.epa.gov/ccaac/clean-air-excellence-awards](https://www.epa.gov/ccaac/clean-air-excellence-awards);

**Applications must be emailed or postmarked by Tuesday, November 30, 2021.** Applicants are strongly encouraged to send their entries electronically to OAR_Clean_Air_Excellence_Awards@epa.gov. EPA will also accept hard copies of applications mailed to Catrice Jefferson, U.S. Environmental Protection Agency, Office of Air and Radiation, MC-6103A, Room 5442-Q (WJC-North), 1200 Pennsylvania Avenue, NW, Washington, D.C. 20460.; Award recipients will be recognized by the U.S. EPA at a special awards ceremony held in Washington, DC, in 2022 (date to be announced later).

EJ is defined as the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies. Low-income, minority, tribal and indigenous communities are often disproportionately vulnerable to environmental health challenges because they are faced with greater exposure to many sources of pollutants or contaminants. They are also more likely to be overburdened due to systemic environmental policies resulting in wealth and health inequities or disparities and underserved in adaptive capacity to respond to and cope with emerging environmental stressors caused by climate change. Climate change can create various levels of environmental and health impacts in different regions, communities, and population groups across the nation. Additionally, children, older adults, and people with disabilities or pre-existing health conditions may be most susceptible and vulnerable to climate changes and associated environmental stressors. Proposed research projects should address all of the following research questions: What may be the most influential community-, population- or lifestage-specific vulnerabilities caused by ongoing climate change that would elevate exposure to pollutants or contaminants and further exacerbate the health effects from exposure to pollutants or contaminants in overburdened communities?; What are the cumulative health impacts of climate change related stressors on vulnerable groups or susceptible lifestages in overburdened communities?; How can community-based scientific research results be translated and/or applied to provide effective solutions to reduce climate change impacts on human health in overburdened communities?; For information on eligibility, project specifications, or how to apply, visit: Cumulative Health Impacts at the Intersection of Climate Change, Environmental Justice, and Vulnerable Populations/Lifestages: Community-Based Research for Solutions Request for Applications (RFA) ; Learn more about EPA Research Grants ; Informational Webinar https://cumulative_health_impacts_climate_change.eventbrite.com ; Date: Tuesday, October 5, 2021; Time: 1:00 p.m. - 2:00 p.m.; Join us for an informational webinar on this funding opportunity. Additional Information: NIH releases NOSI on COVID-19’s impact on underserved and vulnerable populations; View it as a Web page.; NIH NOSI to Support Studies on COVID-19’s Impact on Underserved and Vulnerable Populations; ORWH has announced its participation in Notice of Special Interest (NOSI): Social, Behavioral, and Economic Impact of COVID-19 in Underserved and Vulnerable Populations (NOT-MH-21-330). The COVID-19 pandemic has demonstrated that prevention and mitigation strategies for the pandemic are uneven—for a range of reasons, including a lack of trust in health systems, economic circumstances, and challenges in sustaining long-term adherence, especially for underserved and vulnerable populations. By increasing our understanding of the multifaceted effects of the COVID-19 pandemic and public health interventions that mitigate risk and promote resilience in high-risk populations, we can improve the long-term response to the pandemic and prepare more effectively for future public health emergencies.; To strengthen the understanding and response to social, behavioral, and economic effects of the COVID-19 pandemic, NIH is encouraging the submission of applications that will: Address the roles and effects of interventions, particularly those under the umbrella of digital health, as well as community-engaged and multilevel interventions in health care settings to address access, reach, delivery, engagement, effectiveness, scalability, and sustainability of services that are utilized during and following the pandemic; Encourage the leveraging of existing large-scale data sources with broad population coverage to improve prediction of various mitigation efforts (including vaccinations, masking, and physical distancing) on transmission reduction and on social and economic effects and assess the downstream health and health care access effects, with an emphasis on underserved and vulnerable populations; The first submission date is October 5, 2021, and subsequent receipt dates will extend through September 8, 2024.

Contact: Please direct all inquiries to the Bridge2AI program staff who will respond to inquiries sent to this email: bridge2AI@od.nih.gov.
Additional Information: The Bridge2AI Program seeks to bridge the biomedical and behavioral research communities with the rapidly growing community of experts developing AI/ML models by producing flagship datasets that adhere to the FAIR principles (Findable, Accessible, Interoperable, Reproducible) and critically integrate ethical considerations in preparing data for computation. The program will use biomedical and behavioral research grand challenges to drive the development of ethics, standards, tools, data sets, and skills and workforce development strategies for linking scientific workflows, protocols, and other information about the data collection process into computable knowledge. Data sets may be linked to existing clinical, environmental and surveillance data as required by the chosen grand challenges. The overall goal of the Bridge2AI Program is to generate flagship datasets and best practices for the collection and preparation of AI/ML-ready data to address biomedical and behavioral research grand challenges. The Bridge2AI program will require multiple scientific domains to come together with data science, data management and analytic experts to unlock the potential of AI/ML for the scientific community.

**Additional Information:** Thank you all for attending today’s Forum. The slides are available for you to view and download here. If you have any trouble downloading them, please email me directly (sometimes there are browser incompatibility issues); These slides contain many links to registrations to upcoming events and trainings, including: Tomorrow's NIH Loan Repayment Program webinar; Next week's NIH Other Support and Biosketch town hall; Next week's training on the new Request for Outbound Subaward form, targeted for administrators; And many more. Please view these slides and feel free to register for anything applicable to you. I will still be sending separate emails announcing some of these upcoming events.; As always, please feel free to reach out to your SPA Project Officer should you have any questions.; During yesterday’s Research Administration Forum, I provided an overview of transitioning to two-factor authentication (2FA) using Login.gov and/or InCommon Federated accounts (your Columbia UNI and password) in order to be able to access the NIH eRA Commons and other NIH modules. NIH is requiring everyone to transition to 2FA, but is taking a phased approach.; I recorded this segment of the Forum. You can watch the video here, and follow along with yesterday’s slide deck, see slides 61-76. I cover: Who needs to transition; When you need to transition; The two different options (Login.gov vs InCommon Federated); Essential tips for doing it correctly; Where to go for help; NIH also has their own videos and resources, but I do think listening to me explain it first will assist you in making decisions faster.; NIH Resources: NIH videos on transitioning to Login.gov ; Overview of NIH eRA and 2FA ; NIH FAQs on both Login.gov and InCommon Federated ; If after watching my video and reading NIH’s FAQs you feel you are in a unique situation then feel free to contact me.; [brought to our attention by] Stephanie F. **Additional Information:** Merck Foundation Alliance for Equity in Cancer Care; Deadline: LOI November 19; The Merck Foundation (the Foundation) is pleased to announce an exciting new funding opportunity to improve the delivery of patient-
centered, equitable cancer care in the United States: Merck Alliance for Equity in Cancer Care (The Alliance). The Alliance aims to address persistent disparities across the cancer care continuum – from diagnosis to survivorship – and improve patient outcomes among adult underserved populations. The Foundation is committing $20 million over 5 years to support the development and implementation of innovative, multifaceted cancer care programs, as well as promote multisectoral community collaborations to address barriers to care associated with the social determinants of health. The Foundation is seeking applications from eligible nonprofit organizations such as community cancer centers; oncology medical homes; community health centers and other health care organizations; community-based organizations; and units of state or local government. We invite you to join us in sharing information about The Alliance through your organization’s communications channels (e.g., list serves, newsletters, member-only sites). If you have any questions, please send them to Rabin Martin at cancercareequity@rabinmartin.com by November 5, 2021.

**Contact:** Please submit questions to Office_Acad_Affairs@cumc.columbia.edu.  
**Link(s):** No Link Provided  
**Additional Information:** The VP&S Office of Academic Affairs has a new externally funded program that provides support to 10-12 early career physician-scientists at VP&S who conduct important and innovative clinical and translational research. This award provides funds for “extra hands” related to awardee’s research (i.e. part-time support for administrative and research needs such as a research coordinator or lab personnel, or specific research-related services, assays, biostatistical support, etc.). Funding is intended to help researchers maintain productivity in the face of extraprofessional commitments related to family caregiving. Funding will be for up to $50,000 over 18 months for “extra hands”. Per our funder, funding is not permitted for awardee salary support or direct caregiving expenses; Eligibility Requirements: Full-time physician-scientist (MD, DO or non-U.S. equivalent) performing clinical and translational research, employing human subjects and/or human tissue or cell lines; AND Early career faculty, defined as the academic rank of assistant professor or associate professor (within one year at that rank); AND Currently funded for research through external and/or internal funding mechanisms for >50% effort; AND Have family caregiver responsibilities that threaten to impede development of their research careers; Potential applicants must submit a one-page letter of intent to the Office of Academic Affairs by **November 5, 2021**; Faculty eligible to submit a full proposal will be notified by **December 6, 2021**; Letters of intent must include: Applicant name, UNI, department of primary appointment, academic rank; Title(s) of currently funded research projects, along with four to six relevant key words; Identification of primary research mentors(s); Brief non-binding proposal of how the funding will be used; Please submit questions to Office_Acad_Affairs@cumc.columbia.edu.

**Additional Information:** 2022 Louis V. Gerstner, Jr. Scholars Program - FUNDING OPPORTUNITY; Dear VP&S Colleagues, We are pleased to announce the launch of the 2022 Louis V. Gerstner, Jr. Scholars Program that supports physicians who are on tenure track and conduct research that has the promise of ultimately bringing new treatments to patients. To be eligible, applicants must hold current faculty level appointments and currently have, have applied for, or are in the process of pursuing an NIH K or R award. An applicant with more than 5 years of faculty service, whether at Columbia or at another US institution, will be ineligible except in special cases which should be discussed with the Senior Vice Dean for Research prior to applying. All applicants must have a license to practice medicine in the state of New York. The applicant must have a senior faculty mentor who has current and sustained NIH research funding. Preference will be given to applicants who are on a rapid path to independence. The fund will provide a stipend of $75,000 per year for up to three years to be used for salary or laboratory support of the awardees. During their time as a Gerstner Scholar, each investigator is expected to seek and obtain funding from NIH or other sponsors in order to effectively progress on an academic career track. Please note that due to the overlap in the terms of the award for the Louis V. Gerstner, Jr. Scholars Program and The Irving Scholars Program, faculty are eligible to hold only one of these awards at any one time. It is important to note that all Gerstner Scholars are required to devote a minimum of 50% effort to translational research, and report on their progress to the Gerstner Foundation on an annual basis.; Applicants interested in applying to the program must click here and submit all materials outlined below by 5:00 pm EST on December 7, 2021; 1) Cover Sheet (online); 2) Letters of recommendation from Department Chair and faculty member who will be the applicant's principal mentor; 3) Summary of the project that includes: project title, specific aims, background and significance, preliminary data and research methods (two single spaced pages, 1/2-inch margins, 11-pt Arial font); 4) One page detailed budget; 5) NIH formatted biosketch of the investigator and principal mentor; All questions should be directed to Naomi Hornedo, Administrative Manager of Research at nh83@columbia.edu. Awardees will be notified in March 2022, with funding to begin July 1, 2022.; We look forward to your nominations.; Anil K. Rustgi, M.D.; Interim Executive Vice President and Dean of the Faculties of Health Sciences and Medicine; Irving Professor of Medicine Director, Herbert Irving Comprehensive Cancer Center; Michael Shelanski, M.D., Ph.D.; Senior Vice Dean for Research, Henry Taub Professor of Pathology and Cell Biology; Co-Director, Taub Institute for Research on Alzheimer’s Disease and the Aging Brain.

DoD/CDMRP - COVID-19 Impact on Research Awards
[No Link Provided]

CDMRP continues to be concerned about the impacts of COVID-19 on Service Members and the public. We are aware of the challenges it poses and are tracking some of the impacts to current awardees and ongoing research. While not every program will have financial resources available to assist, awareness of any significant unresolved issues affecting current research awards is important.; The intent of this notice is to remind recipients of the requirements in 32 CFR Part 1134, Subpart E Other Reporting. This provision specifies the requirement for recipients to disclose significant developments as soon as they become known. These include problems, delays, or adverse conditions that will materially impair your ability to meet the objectives of your awards.; Disclosures of significant developments may be made on your next interim performance report or at any point between scheduled performance reporting dates by contacting the Science Officer or Grant Specialist assigned to your award. This disclosure must include a statement of the action taken, or contemplated, and any assistance needed to resolve the situation

Full applications from extramural organizations (non-DoD organizations) must be submitted through Grants.gov [http://www.grants.gov](http://www.grants.gov). Intramural DoD organizations may submit full applications to either eBRAP or Grants.gov. Refer to the General Application Instructions, Section II.A. for registration and submission requirements for eBRAP and Grants.gov. For detailed information on the submission process, refer to Section II.D. of the Program Announcement/Funding Opportunity.; eBRAP is a multifunctional web-based system that allows PIs to submit their pre-applications electronically through a secure connection, to view and edit the content of their pre-applications and full applications, to receive communications from the CDMRP, and to submit documentation during award negotiations and period of performance. A key feature of eBRAP is the ability of an organization’s representatives and PIs to view and modify the Grants.gov application submissions associated with them. eBRAP will validate Grants.gov application files against the specific Program Announcement/Funding Opportunity requirements and discrepancies will be noted in an email to the PI and in the Full Application Files tab in eBRAP. It is the applicant’s responsibility to review all application components for accuracy as well as ensure proper ordering as specified in this Program Announcement/Funding Opportunity.

- https://nexus.od.nih.gov/all/2021/03/19/how-do-i-request-childcare-costs-in-my-fellowship-application/

**Additional Information:** Earlier today, NIH issued corrected instructions to request childcare costs for recipients of NRSA individual fellowships. See NOT-OD-21-074, which replaces to announcement NOT-OD-21-069 referenced below. NIH also updated its FAQs; If you have any questions regarding how to make the request in a fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. We'll provide you with any updates [brought to our attention by] Stephanie Scott, Announcement of Childcare Costs for Ruth L. Kirschstein National Research Service Award (NRSA) Supported Individual Fellows; This week NIH announced a new policy to allow for childcare support costs to recipients of NRSA individual fellowships (i.e., F31, F32, etc). These costs must be specifically requested in new, continuation applications or through administrative supplements beginning on or after April 8, 2021. Please read the full announcement at NOT-OD-21-069, the FAQs, and supplementary information below.; **Some key takeaways:** The policy applies to full-time NIH-NRSA supported individual fellowship applicants and awardees. However, additional information is forthcoming later this year regarding expanding the policy to trainees on institutional training grants, anticipated for FY2022.; Each fellow is eligible to receive $2,500 per budget period for childcare costs. The childcare cost amount is not determined by number of children.; Childcare costs are permitted for dependent children living in the eligible fellow’s home from birth under the age of 13, or children who are disabled and under age 18.; Eligible childcare is care that is licensed and/or regulated by state and/or local authorities. See FAQs for more details.; At a minimum, recipients must obtain and retain documentation verifying that a childcare provider is licensed and/or regulated by state and/or local authorities, and must document that the fellow is eligible to receive the childcare costs and has eligible dependents.; The childcare cost is restricted for that purpose and cannot be rebudgeted without prior written approval from the NIH awarding IC.; If you have any questions regarding how to make the request in the fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. The announcement NOT-OD-21-069, and the FAQs, provide instructions on how to make the childcare support request.; We’ll provide further guidance on these new costs at a later date.; **Feed:** blog – NIH Extramural Nexus; **Posted on:** Tuesday, March 2, 2021 11:40 AM; **Author:** Mike Lauer; **Subject:** Announcement of Childcare Costs for Ruth L. Kirschstein National Research Service Award (NRSA) Supported Individual Fellows; View article.; Subsequently, NIH posted this blog, with screen shot, to assist applicants with the request for childcare costs. If you have any questions regarding how to make the request in a fellowship application, RPPR, or administrative supplement, please contact your SPA Project Officer. We’ll provide you with any updates

Announcement of Childcare Costs for Ruth L. Kirschstein National Research Service Award (NRSA) Institutional Research Training Awards

**Sponsor:** National Institutes of Health  
**Deadline(s):** 09/23/2021 (Release Date)  
**Contact:** NIH Office of Policy for Extramural Research Administration; Division of Grants Policy; grantspolicy@nih.gov  
**Additional Information:** In April 2021, NIH began providing childcare cost support to recipients of full-time NRSA fellowships in recognition that the high cost of childcare impacts graduate students and post-doctorates funded through NRSA fellowships, and hinders their ability to successfully complete their training and fully participate in the extramural research workforce NOT-OD-21-074. As Phase 2 of this initiative, anticipated for awards made beginning in Fiscal Year 2022, NIH will begin providing childcare cost support to full-time predoctoral and postdoctoral trainees appointed on NRSA institutional research training awards.

Additional Information: The purpose of this FOA is to encourage research addressing major gaps identified in the United States Preventive Services Task Force (USPSTF) recommendation statement concerning interventions to prevent perinatal depression, with an emphasis on populations experiencing mental health disparities. The research scope for this FOA includes: 1) strategies for identifying women at risk for perinatal depression; 2) developing and testing tools for selecting those most likely to benefit from preventive interventions; 3) testing service-ready efficacious preventive interventions that are of appropriate intensity/dose, and are scalable, such that they can be delivered with fidelity by setting providers; and, 4) testing strategies that can be used to train providers and to support delivery of evidence-based approaches with fidelity across diverse health care and community settings. This FOA is intended to support effectiveness research trials that are statistically powered to provide a definitive answer regarding the effectiveness of the intervention. Support for pilot effectiveness is provided via a companion R34 FOA RFA-MH-21-241 that supports pilot effectiveness studies in preparation for the larger-scale, fully powered studies described in this FOA.

**Additional Information:** This Funding Opportunity Announcement (FOA) will support research that combines epidemiologic methods, digital technology, and data science approaches to better understand HIV prevention, transmission, and early care-cascade points for women living in the US. Applications must: 1) determine the best ways to identify, enroll, and retain cohorts of women living in the United States (US) who are behaviorally vulnerable to HIV; and 2) develop a knowledgebase comprised of cohort data from women augmented with other data sources including big data sources. Findings should not only lead to a better understanding of how women remain vulnerable to HIV but also inform future pilot interventions aimed at decreasing the incidence of HIV and other sexually transmitted infections (STIs) among cisgender, transgender, and gender non-conforming women.

**Additional Information:** NIH issues funding opportunity for studies on mitigating sexual harassment in the biomedical research enterprise; National Institutes of Health; Office of Research on Women’s Health; NIH issues funding opportunity for studies on mitigating sexual harassment in the biomedical research enterprise (govdelivery.com) ; NIH NOSI to Support Studies on Mitigating Sexual Harassment in the Biomedical Research Enterprise; ORWH has announced its participation in Notice of Special Interest (NOSI): Interventions Designed to Change the Culture to Mitigate or Eliminate Sexual Harassment in the Biomedical Research Enterprise NOT-OD-21-150. The cumulative effect of sexual harassment has a devastating and costly impact on individuals and the Nation. There are emotional, physical, mental, and legal consequences, which may have a direct impact on individual performance and career advancement, as well as social and fiscal effects on institutional settings, students, and co-workers.; The National Academies of Sciences, Engineering, and Medicine report titled Sexual Harassment of Women: Climate, Culture, and Consequences in Academic Sciences, Engineering, and Medicine demonstrates the urgent need to develop new partnerships to address this challenging problem. NIH is encouraging applications to test interventions that would be designed to change the culture and mitigate or eliminate sexual harassment in the biomedical research enterprise.; The first available due date for funding opportunity submissions is October 13, 2021, and subsequent receipt dates will extend through October 14, 2023.

*Additional Information:* Longevity Impetus Grant Announcement; FYI Below. Yousin shared this. Applications open on 9/13: [https://www.impetusgrants.com/](https://www.impetusgrants.com/); Impetus Grants provides funding for scientists to start working on what they consider the most important problems in aging biology, without delay. September 7, 2021; Dear AGEMember, I’d like to bring to your attention a new source of grant funding for bold ideas in aging research: the Longevity Impetus Grants. These grants will support bold ideas with the potential to change how the field thinks and works, including high-risk projects. For more information about the program and to apply, please visit the website. The applications are ~1 page, and decisions are made within three weeks. Impetus Grants range from $10K to $500K, with a maximum of 10% institutional overhead. There’s no restriction on project period, and no strings attached. The ideal application is able to explain how the project would broadly impact the field, by developing/validating new tools and/or changing how we think about aging biology. Such proposals could seek to prove or disprove common assumptions in the field, discover new ways to reverse aging processes, synthesize isolated manifestations of aging into a systemic perspective, and/or develop widely applicable methodologies. Please consider sharing this email within your institution, and with anyone else you think should apply.; I highly encourage you to consider applying for a Longevity Impetus Grant.; Sincerely, [brought to our attention by] Matt Kaeberlein; CEO and Chair, American Aging Association; Impetus Grants provides funding for scientists to start working on what they consider the most important problems in aging biology, without delay. Such work should not be held up by red tape: we offer grants of up to $500k, with decisions made within 3 weeks. Our review process asks "what's the potential for impact" rather than "could this go wrong".; Our goal is to have a broad impact on the field, by supporting projects that challenge assumptions, develop new tools and methodologies, discover new ways to reverse aging processes, and/or synthesize isolated manifestations of aging into a systemic perspective. To ensure that we learn from every project, we're organizing a special issue of GeroScience to provide an opportunity to publish both positive and negative results from funded studies.; Applications will open on September 13, 2021.

The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional)

Additional Information: NIH Announces Funding Opportunity to Study the Role of Work in Health Disparities in the U.S.; ORWH recently announced its participation in The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional) (PAR-21-275). The funding opportunity will support innovative population-based research designed to identify and characterize pathways and mechanisms through which work or occupation influences health outcomes and health status among populations with health and/or health care disparities; The main objective of this initiative is to determine the extent and mechanisms by which work, as a social determinant of health, both contributes to and helps alleviate disparities related to health and health care; Of particular interest are: Projects designed to examine pathways and mechanisms using conceptual model(s) grounded in minority health and health disparities theories that recognize that health disparities arise by multiple and overlapping contributing factors acting at multiple levels of influence; Intersectional approaches that consider different social identities and the embeddedness of individuals within families, households, and communities; Projects that explore whether work can explain the health or health care disparities seen within diseases or conditions (e.g., COVID-19, opioid use disorder, mental/behavioral health, diabetes, cancer, heart disease, asthma, and maternal and infant health); Projects that explore how work contributes to health care disparities—including, but not limited to, disparities in access to preventive, specialty, and emergency care in health insurance coverage and disparities in quality of health care; Applications for The Role of Work in Health Disparities in the U.S. (R01 Clinical Trials Optional) will open on September 5, 2021.

**Additional Information:** [SPA News] FW: eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; NIH sent this announcement yesterday after they had already made the changes in their Human Subjects System (HSS). Please see below, it outlines the changes made to the HSS and its integration with the updated FORMS-F PHS Human Subjects and Clinical Trials Form. [brought to our attention by] Stephanie Scott; eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June 13; eRA Information: Changes in HSS Post-Submission Updates with FORMS-F Starting June
Reminder of Upcoming FORMS-F and Inclusion Across the Lifespan Requirements for NIH Applicants and Recipients Submitting Post-Submission Updates Using the Human Subjects System (HSS)

As of Saturday, June 13, 2020, all applicants and recipients submitting post-submission updates in the Human Subjects System (HSS) will use the updated FORMS-F PHS Human Subjects and Clinical Trials Information Form. These updates address new requirements for participant-level data on sex/gender, race, ethnicity, and age at enrollment for projects subject to the NIH Policy and Guidelines on the Inclusion of Individuals Across the Lifespan as Participants in Research Involving Human Subjects. Users with records currently in progress will need to modify the records to meet new FORMS-F requirements. The changes listed below include items released by eRA in March and items released on June 13; Key FORMS-F Changes to the PHS Human Subjects and Clinical Trials Information Form; [*] A new Inclusion Enrollment Report title field is now available. The human subjects study title will appear by default for all existing studies and may be changed by the user. For new studies and those with a work in progress study, the title will be blank and need to be filled by the grantee. See Figure 1; Figure 1: Inclusion Enrollment Report Title Field; [*] For clinical trials, the “Brief Summary” field will no longer appear in Section 4. Information in this field prior to June 13, 2020 will continue to be available in the PDF images of applications and Research Performance Progress Reports (RPPRs) submitted prior to this change; [*] Question 1.4.a. “Does the study involve human subjects/participants” now has a default value of yes and cannot be changed unless the user changes their response to the question “Are Human Subjects Involved?” on the Other Projects Information form. As a study record should be completed only for research involving human participants, the “No” option is no longer available for this question. See Figure 2; Figure 2: Question 1.4.a of the Clinical Trial Post Submission Study Record; [*] In Section 2.8 of the Study Record: PHS Human Subjects and Clinical Trials Information screen, the language has been changed from 'Enrollment of First Subject' to 'Enrollment of First Participant'; [*] A new question has been added to the Study Record: PHS Human Subjects and Clinical Trials Information screen — Section 4.6 asks ‘Is this an applicable clinical trial under FDAAA?’. [*] For a full list of significant FORMS-F changes, see the High-level Grant Application Form Change Summary: FORMS-F PDF; Key Inclusion Across the Lifespan Changes; [*] Recipients reporting actual enrollment progress for a grant application submitted for due dates January 25, 2019 or later must provide participant-level data on sex/gender, race, ethnicity, and age at enrollment in the Inclusion Enrollment Report of the PHS Human Subjects and Clinical Trials Information Form using HSS; [*] Users must use the spreadsheet template available in HSS to submit participant-level data. The column titles must not be altered, and data should be provided using the values modeled in the template. Changes to the template may result in a submission error. See Figure 3; Figure 3: Download Participant Level Data Template button on the Inclusion Enrollment Report; [*] Participant-level data must be uploaded in .csv format. Users do not need to separately enter the individual numerical fields in the Actual (Cumulative) Inclusion Enrollment Report table once the .csv file is successfully uploaded. The data provided will populate the actual (cumulative) enrollment table within the system. See Figure 4; Figure 4: Upload Participant Level Data Attachment button on the Inclusion Enrollment Report; [*] For more information on the requirement of individual-level participant data on sex/gender, race, ethnicity, and age at enrollment in progress reports for research supported by NIH projects, please see NOT-OD-18-116; For more information, see: [*] Entering Inclusion Data Using the Participant Level Data Template (video and transcript); Participant-level Data Template; [*] The eRA Human Subjects System (HSS) information page; [*] Information about the PHS Human Subjects and Clinical Trials Information form; electronic Research Administration (eRA); NIH Office of Extramural Research; Questions? Please contact the eRA Service Desk. Check out self-help resources on the Help page before submitting an online ticket; or call Toll-free: 1-866-504-9552, Phone: 301-402-7469. These tables will be required for applications due May 25th, 2020 or later. Go to: https://grants.nih.gov/grants/forms-f/data-tables.htm; They did not post a significant changes document yet, so I took the instructions from the previous tables and did a comparison to the new tables. See attached “Changes from FORMS-E to FORMS-F”; I have an email to NIH to clarify the significant changes, and any impact they may have in xTRACT. Upon first glance, the changes appear to be more of clarifications of the instructions, rather than anything drastically different; I know a number of you are preparing training grant proposals for May. Please feel free to take a look at these changes, and let me know if you have questions. This way I can collect them all and send them to NIH for clarification. As every training grant program is different, you may also need to go to your Program Officials for direction on how they want the table completed for your specific set of circumstances.; As soon as I have more information from NIH I will pass it along; [brought to our attention by] Stephanie F. Extending the Special Exception to the NIH/AHRQ/NIOSH Post-Submission Material Policy During the COVID-19 Pandemic

Sponsor: National Institutes of Health

Deadline(s): This Notice extends the special exception for post-submission material (see NOT-OD-20-123) to applications submitted for the May 2021 Council round.; For applications submitted for the May 2021 council (beginning with applications submitted for the September 25, 2020 due date for Spring 2021 review meetings), the NIH, AHRQ, and NIOSH will accept a one-page update with preliminary data as post-submission materials for applications submitted under all activity codes, ONLY if the Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application.; The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications.; All other materials listed in NOT-OD-19-083 as acceptable post-submission materials will continue to be accepted if submitted 30 days before the study section meeting.

**Additional Information:**

Dear Mailman School faculty,
I want to give you an update on Research Support Services—the School's new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I'm happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.

I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

- **2 weeks prior to submission deadline**—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@cumc.columbia.edu.

Best wishes,

Pam Factor-Litvak

https://rwjf.zoom.us/webinar/register/WN_87srKb5eSviEOWt6ShluJg  
**Additional Information:** New funding opportunity: $7M to advance park equity and racial justice through policy change; The COVID-19 pandemic has made it clear that parks and green spaces are a vital part of a healthy community. Yet, due to systemic racism, parks are still not enjoyed evenly.; A 2020 study found that parks serving communities of color are — on average — half the size of parks located in majority-white communities and five times as crowded. The unequal distribution and investment in parks — and the unjust experiences that many people of color have in the outdoors — can be righted.; RWJF is currently seeking letters of interest from community-based organizations and base-building groups working to increase park equity and advance...
racial justice through local policy and systems change in urban, low-income communities of color across the nation. This effort is part of People, Parks, and Power, a joint initiative with the Doris Duke Charitable Foundation led and managed by Prevention Institute.; Learn more about eligibility and selection criteria >; Join us on September 29, 2021 for an applicant webinar to learn what we’re looking for and hear answers to frequently asked questions.

**Additional Information:** New funding opportunity: Innovative research to advance racial equity; As we enter into a year and a half of the pandemic there’s no doubt that we have had many difficult conversations as a country. One particular topic we should not stop discussing is the harm structural racism has on the health and well-being of society and how we can dismantle it.; RWJF’s Evidence for Action program is currently seeking proposals to evaluate specific policies, programs, and practices that have the potential to contribute to dismantling and counteracting the harms of structural and systemic racism and improving health, well-being, and equity outcomes. Knowing that some approaches to disrupting racism are in early stages of development; other types of research that can advance racial equity will be considered. ; Learn more about eligibility and selection criteria >

RWJF; Pioneering Ideas: Exploring the Future to Build a Culture of Health

Sponsor: RWJF
Deadline(s): Open
Contact: pioneingideas@rwjf.org

Additional Information: What can we do today to create a better, more equitable tomorrow? Through this new funding opportunity, RWJF seeks to understand and anticipate what dramatic changes we might see in the next five to 15 years in four areas: 1) Future of Evidence; 2) Future of Social Interaction; 3) Future of Food; and Future of Work; Additionally, this call for proposals seeks to support unconventional approaches and breakthrough ideas outside of these areas that could improve health equity and well-being for generations to come. We welcome proposals from scientists, anthropologists, artists, urban planners, community leaders—anyone, anywhere who has a cutting edge idea that could alter the trajectory of health and increase opportunities for everyone in the United States to live their healthiest life possible. Please note, while this CFP is focused on broader and longer-term societal trends and shifts that were evolving prior to the COVID-19 outbreak, we recognize the unique circumstances and learning created by the COVID-19 pandemic may inform your response. It is at your discretion whether you propose a project related to the pandemic directly or indirectly.

I-Corps @ NCATS Regional Short Course

**Sponsor:** https://umassmed.edu

**Deadline(s):** 09/15/2021 (Registration Deadline); 10/15/2021 (Course Starts)

**Contact:** Nathaniel.Hafer@umassmed.edu; REGISTER BY SEPTEMBER 15th; I-Corps@NCATS Regional Short Course

**Link(s):** https://umassmed.edu/ccs/education/i-corps-program-at-the-umccts/

**Additional Information:** I-Corps @ NCATS Regional Short Course; Deadline: September 15; What is the business case for your translational science? Find out via the I-Corps@NCATS Regional Short Course. Based on the National Science Foundation’s Innovation Corps (I-CorpsTM) program, the premier federally-funded innovation and commercialization training in the U.S., I-Corps@NCATS provides biomedical scientists, clinician scientists and engineers with a new approach to accelerate the translation of discoveries from the lab to clinical practice.; Who should attend? Teams of faculty, postdocs and/or students with biomedical innovations or ideas.; Why should I attend? The five-week I-Corps@NCATS Regional Short Course will help you connect with potential customers for your research projects, protocol, service, or prototype.; Determine the commercial viability of your innovation.; Develop a successful business case for securing funding.; Expand your network of innovation partners, mentors, and potential collaborators.; Develop a new way of thinking about your research; Questions? Visit https://umassmed.edu/ccs/education/i-corps-program-at-the-umccts/ or contact Nate Hafer at Nathaniel.Hafer@umassmed.edu. Register by September 15th; I-Corps@NCATS Regional Short Course; Fall 2021 course starts October 15th, 2021; Does your latest discovery have commercial value? Would a potential "customer" of your research welcome your technology, protocol, or intervention?; The I-Corps Program at the UMCCTS, a UMass Center for Clinical and Translational Science (UMCCTS) initiative, is designed to support the translation of biomedical research by providing early-stage education and strategic guidance to faculty, staff and students during the ideation phase of technology development.; Designed specifically for the biomedical researcher at UMass, it guides interdisciplinary teams through a hands-on process of understanding the market for their technology utilizing a proven customer discovery methodology.; This short course is a pre-cursor to a selective and intense set of courses run by the NIH and NSF and known as I-Corps. The I-Corps Program at the UMCCTS is designed to give teams a feeling if they and their opportunity are ready to apply for the national classes held by NIH and NSF. This short course maintains the intensity of the full I-Corps program but limits the time commitment.

**Additional Information:** ViCTER RFA Released!; Hello Colleagues, Just wanted to share information about the release of NIEHS's Request for Applications (RFA) for the multi-disciplinary "Virtual Consortium for Translational/Transdisciplinary
Environmental Research (ViCTER)” RFA-ES-21-007, which posted yesterday evening.; The purpose of the ViCTER program is to foster and promote early-stage transdisciplinary collaborations and/or translational research efforts to address fundamental research among basic (technology and mechanism oriented), clinical (patient-oriented) and population-based researchers in the environmental health field. The newly established collaborative teams will come together in common interest to investigate potential linkages between human health and one or more environmental stressor(s). The ViCTER program is intended to support innovative high-risk, high-reward transdisciplinary/translational research projects that are more difficult to achieve in a typical R01 application. Collaboration among investigators at different institutions through a virtual consortium arrangement is encouraged. The next due date is February 1, 2022. There will be a free informational webinar on November 18th from 2-3pm ET. Please visit the ViCTER webpage for a link to register to the webinar and for any updates related to this announcement: https://www.niehs.nih.gov/research/supported/translational/victer/index.cfm.; I invite you to share this announcement with teams of researchers who might be interested in this funding mechanism. If you have questions, please don’t hesitate to reach out to me.; Thank you, Heather Henry; [brought to our attention by] Heather F. Special Exception to the NIH/AHRQ/NIOSH Post-Submission Material Policy During the COVID-19 Pandemic

Sponsor: National Institutes of Health (NIH); Agency for Healthcare Research and Quality (AHRQ); The National Institute for Occupational Safety and Health (NIOSH)
Deadline(s): For applications submitted for the January 2021 council (beginning with applications submitted for the May 25, 2020 due date for Fall 2020 review meetings), the NIH, AHRQ, and NIOSH will accept a one-page update with preliminary data as post-submission materials for applications submitted under all activity codes, ONLY if the Funding Opportunity Announcement (FOA) used for submission allowed preliminary data in the application. One page of preliminary data will be accepted for single component applications or for each component of a multi-component application.; The deadline for submitting all post-submission materials, including preliminary data, will be 30 days before the study section meeting. Because applications for emergency competitive revisions and urgent competitive revisions undergo expedited review, post-submission materials will not be accepted for those applications.; All other materials listed in NOT-OD-19-083 as acceptable post-submission materials will continue to be accepted if submitted 30 days before the study section meeting.

Research Resources has been apprised that the R2report distribution email to Faculty and other colleagues at times sorts to MS Outlook’s “Other” vs. “Focused” tab when web accessed. You may move an email from the “Other” to “Focused” in box tabs, by selecting Move to Focused if you want only the selected message moved; or you may select Always Move to Focused if you want all future messages from the sender to be delivered to the Focused tab. You may also Turn off Focused In Box when accessing MS Outlook via the web by accessing the settings ( cog icon adjacent to your initials), accessing “all outlook settings”, activating the “Don’t sort my messages” button and saving this setting. Rectifying email sorting to Outlook’s Junk folder, may also be addressed. R2reports are posted weekly on our Reports Page

**Link(s):** https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-212.html

**Additional Information:** NIH Guide Notice on Delayed Enforcement for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants; As I previously announced a few weeks ago, NIH will be delaying enforcement for some requirements affecting prospective basic science studies that also meet NIH's definition of a clinical trial. NIH just released the official notice stating this, along with their future plans: https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-212.html; Please read the notice in its entirety. The Council on Governmental Relations (COGR) provided a summary below. Here are some highlights: (*) Registration and Reporting: NIH still expects the registration and reporting of these prospective basic science studies, but is giving flexibility to allow reporting on existing basic science portals, and expects the data to eventually be transported to ClinicalTrials.gov. Flexibility given through September 24, 2019. They are issuing a Request for Information (RFI) to collect stakeholder feedback on this topic; (*) Funding Opportunity Announcements (FOAs): NIH will not administratively reject any proposal application for submission to an incorrect FOA based on study-type designation, and they plan to issue an FOA specifically for prospectively basic science studies in November for due dates.
starting on January 25th, 2019. (*) The PHS Human Subjects and Clinical Trial Information Form (new in FORMS-E) – they still expect that form for all applications involving prospective basic science studies; (*) Good Clinical Practice (GCP) training is still being enforced for all personnel involved in the conduct, oversight, or management of prospective basic science studies involving human participants. As a reminder, Columbia offers GCP training in Rascal through Course TC3450. For more information, see https://research.columbia.edu/content/good-clinical-practice-training or email NIH-GCP@columbia.edu. Please read the notice in its entirety for more information, and stay tuned for more updates from me on this topic.; [brought to our attention by Stephanie F. Scott, MS, CRA; Director of Policy and Research Development; Columbia | Research; Sponsored Projects Administration; Email: stephanie.scott@columbia.edu; or sfs2110@cumc.columbia.edu; Website: https://spa.columbia.edu/; NIH Guide Notice on Delayed Enforcement for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants; Dear COGR Members, NIH issued the following Guide Notice this morning, Delayed Enforcement and Short-Term Flexibilities for Some Requirements Affecting Prospective Basic Science Studies Involving Human Participants.; As you know, COGR and other organizations have expressed concern that the NIH clinical trial case studies broadened the agency’s definition of “clinical trial” to include basic science studies involving human participants. NIH, in response to report language in the Consolidated Appropriations Act of 2018, has released this notice NOT-OD-18-212 which delays enforcement of registration and reporting policies for prospective basic science studies involving human participants under NOT-OD-16-149. Per the notice, “through September 24, 2019, NIH will continue to expect registration and reporting for prospective basic science studies involving human participants, with additional flexibility to allow reporting on existing basic science portals, with the expectation that data will eventually be transported to ClinicalTrials.gov." NIH will issue a Request for Information (RFI) to seek additional input on registration and results reporting standards best suited for prospective basic science studies involving human participants.; The notice also provides a period of “leniency for applications submitted to the incorrect FOA based on the study type designation” during which time NIH will not “administratively reject any application for submission to an incorrect FOA based on study-type designation.” The notice also indicates that the agency plans to issue FOAs specifically for prospective basic science studies involving human participants. **Additional Information:** NIH Salary Cap: Guidance on Salary Limitation for Grants and Cooperative Agreements FY 2018; NIH issued guidance on the use of a new NIH salary cap, to increase from $187,000 to $189,600. See https://grants.nih.gov/grants/guide/notice-files/NOT-OD-18-137.html. The effective date of this increase is January 7th, 2018; NIH has not received the final Fiscal Year (FY) 2018 appropriation and is operating under a continuing resolution through March 23rd, 2018 (see NOT-OD-18-136 also a very important notice). However, NIH issued this guidance until a budget is passed; In summary, this is how the $189,600 salary cap can be applied: (*) NIH proposal budgets may be submitted using the new cap; (**) Active NIH awards may rebudget to the new cap if restricted to Executive Level II, and adequate funds are available, and the salary cap increase is consistent with the institutional base salary. The new cap should be prorated for the applicable months: (***) Cap is $187,000 through 1/6/18; (****) Cap is $189,600 from 1/7/18 – present; If you have any questions, please feel free to reach out to your SPA Project Officer. **Update on Research Support Services, Spring 2018; we are pleased to expand the Research Support Services to also include resubmissions of otherwise eligible R01, P, K, Center and T32 grants (if the services have not yet been utilized)**

**Sponsor:** Mailman School

**Deadline(s):** relative to upcoming NIH Grant Submission Deadlines: 5 weeks prior to submission deadline (Inform R2 of intent to utilize services); 4 weeks prior to submission deadline (science draft for external review); 2 weeks prior to submission deadline (submission for editing services)

**Additional Information:**

Dear Mailman School faculty,

I want to give you an update on Research Support Services—the School’s new program for pre-submission external review and final editing. As Dean Fried wrote in October, the program is geared “to support faculty in preparing grant applications with the highest chance of success.”

I’m happy to report that those using the services this fall have found them valuable. Katherine Keyes in Epidemiology spoke enthusiastically at the recent Assembly: “It was a great experience. I got to focus on the science without having to deal with any of the administrative aspects. I got really good feedback. I will be using these services again.”

In my estimation, all the grants were greatly improved by these services. Of course, the ultimate test is how they are scored and funded. As soon I have that information, I will share it with you.
I encourage everyone to take advantage of Research Support Services to give your grants a competitive advantage. Please keep in mind the following deadlines:

- **5 weeks prior to submission deadline**—Inform Research Resources (via Craig Kandell at ckk7@cumc.columbia.edu) if you plan on using Research Support Services with information about they the type of grant at least five weeks prior to the grant due date. If you seek external review, please provide the name and contacts of at least three potential reviewers so we can reach out to them in your order of preference.

- **4 weeks prior to submission deadline**—Send us your science draft for external review three to four weeks prior to submission. We will forward it to the external reviewer. Generally, they provide feedback within a week.

- **2 weeks prior to submission deadline**—For editorial services, send us your manuscript at least 10 days ahead of the deadline. We will make arrangements with the editor. Comments will be returned to Craig and the PI for finalization and submission within a few days.

Please keep in mind that it may take you a day or two to incorporate comments and edits. For best results, get in touch with us prior to these deadlines.

Research Support Services cover first-time submissions, and we are pleased to expand the service to encompass resubmissions (if the support services have not been utilized for the grant) of R01, P, K, Center, T32, or other complex NIH proposals by full-time faculty with primary appointments in the School. I am available to provide feedback for grants that utilize this service and also for other grant types (such as R21s) that are ineligible for the services.

If you have any questions about your eligibility or the above process, please visit Research Resources online or contact me at prf1@columbia.edu.

Best wishes,

Pam Factor-Litvak

**NIH single IRB (sIRB) policy**  
**Sponsor:** NIH  
**Deadline(s):** (for NIH application submissions on or after) 01/25/2018  
**Contact:** If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites  
**Link(s):**  

**Additional Information:** The NIH single IRB (sIRB) policy applies to the domestic sites of new and competing renewal applications/proposals with due dates of January 25, 2018 and beyond for NIH-funded multi-site studies where each site will conduct the same protocol involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program.; If you are preparing an NIH application due on or soon after January 25th, 2018, you should contact the Human Research Protection Office (HRPO) immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND; (*) The same research protocol will be conducted at multiple domestic sites.; If Columbia University is being proposed as one of the participating sites in an application to be submitted this month or soon after by another applicant organization, you must also contact the HRPO immediately. Moving forward, it is recommended that you contact the HRPO as soon as a decision is made to participate in a multi-site study to which the NIH sIRB Policy applies.; An official process that details the requirements for addressing the NIH sIRB Policy is being finalized, to be released shortly. In the meantime, PIs and/or departments can reach out to irboffice@columbia.edu to inform the HRPO about these applications. Upon receipt of your email, HRPO will send you an online form to be completed, and you will be provided with next steps.; In addition, we are offering several options to learn more about the sIRB process. **Note:** Protocols that address the same research questions, involve the same methodologies, and evaluate the same outcomes are considered to be the “same research protocol.” Additionally, sites that are accruing research participants for studies that are identical except for variations due to local context consideration would be considered to be conducting the “same research protocol.” If you have any questions, please contact irboffice@columbia.edu.; Our website contains resources to help you while you get accustomed to all of
the policy changes impacting proposal preparation. We have an Excel checklist to help you complete the new PHS NIH Human Subjects and Clinical Trials Information Form. We also have a one-page reference guide (thank you Katherine Rochmat of School of Social Work for the initial template)!

Additional Information: HRPO and IRB Updates; Dear colleagues, This email provides updates from the Human Research Protection Office (HRPO) on recent new or revised policies, regulations or requirements that may affect IRB activities and requirements. Status of the Revised Common Rule: The Final (revised) Common Rule, i.e., revisions to Subpart A of the DHHS regulations for the Protection of Human Subjects (45 CFR 46), were published on January 19, 2017, with an effective and compliance date of January 19, 2018 for the majority of the revisions. On January 17, 2018, an Interim Final Rule was released that delays the effective date for 6 months, to July 19, 2018. Certain federal departments and agencies are in the process of developing a proposed rule to further delay implementation.; The HRPO is developing guidance for preparing for the transition to the Revised Common Rule. Stay tuned for more information... Revised Policies: Revisions have been made to the new IRB Policy on the Privacy Rule and the Use of Health Information in Research (IRB HIPAA & Research Policy) and the IRB Data Security Plans Involving the Use, Storage or Transmission of Electronic Research Data Constituting Sensitive Data (IRB Data Security Policy). The IRB HIPAA & Research Policy, which was released on November 1, 2017, was revised to provide clarifications of definitions, scope, and when a Data Use Agreement is necessary. In addition, several case studies were added to assist with implementation of this policy. The IRB Data Security Policy was revised to include new terminology and definitions that are included in the IRB HIPAA & Research Policy. Sessions to explain the policy and review the examples will be scheduled. In addition, please let us know if you would like to have us come to your departmental meeting to review the policy!; Revised Standard Operating Procedures (SOPs): Version 5.0 of the IRB’s SOPs were recently released. Included in this version: (*) Comprehensive information on Expanded Access; (*) Incorporation of Columbia’s Institutional Conflict of Interest Policy; (*) Clarifications on when Unanticipated Problems are reported to federal agencies; (*) Updates to the sections regarding recruitment of inpatients at NYP; (*) Addition of the new Single IRB processes; (*) Clarification on the process for IRB disapproval; Process for Implementing the NIH Single IRB Policy: The NIH Single IRB (sIRB) Policy is applicable to new and competing renewal applications/proposals for NIH funding that are due on or after January 25, 2018, and contract solicitations issued on or after January 25, 2018. It is applicable to NIH-funded multi-site domestic studies involving non-exempt human subjects research, whether supported through grants, cooperative agreements, contracts, or the NIH Intramural Research Program; If you are preparing an NIH application that is due on or before March 5, 2018, it is important that you contact the HRPO immediately at irboffice@columbia.edu if your application proposes to: (*) Conduct non-exempt human subjects research; AND (*) The same research protocol will be conducted at multiple domestic sites.; The HRPO and SPA have developed tools to facilitate implementation of this policy. These tools, including an overview of our process and template language that can used in your grant applications, can be access here. The HRPO’s web page will continue to be updated with additional resources as more information becomes available to facilitate compliance with this policy.;

Additional Information: I wanted to pass along this email we received from NICHD. Regardless of whether you receive funding from NICHD, I thought it was a great summary of the recent NIH policies concerning human subjects research and the definition of a clinical trial. It also highlights contacting the NIH Program Officials when you are uncertain if your study meets the NIH clinical trial definition.; I promise you will see more communications from me as we prepare you for these proposal application changes in effect for proposals due January 25\textsuperscript{th}, 2018 or later.; Stephanie Scott Changes to NIH policies and procedures related to human subjects research; Dear NICHD Investigator, NIH has broadened its definition of clinical trial, and it may impact your future applications (new, resubmission, or revision) and awards.; NIH’s definition of clinical trial now includes some research approaches not traditionally considered clinical trials. For example, many behavioral or biobehavioral studies that focus on underlying mechanisms of development may now be considered clinical trials. Also, conducting experiments that involve human subjects may be considered a clinical trial. If you are conducting studies involving human subjects, it is very important that you understand this definition and determine whether it applies to your research.; How do I know if my study is a clinical trial?; NIH has four questions that researchers need to answer to determine whether their study is a clinical trial. These questions may use terminology that has a different meaning than the typical meanings understood by certain research communities. It’s important to review the FAQs and case studies provided by the NIH Office of Extramural Research. If you answer “yes” to each of these four questions, your research will be considered a clinical trial by NIH: (1) Does the study involve human participants?; (2) Are the participants prospectively assigned to an intervention?; (3) Is the study designed to evaluate the effect of the intervention on the participants?; (4) Is the effect being evaluated a health-related biomedical or behavioral outcome?; Here is a link that can help you determine if your research is a clinical trial: https://grants.nih.gov/grants/cit/decision/index.htm; Why is this important? What are the implications if my study is considered a clinical trial?; Beginning with applications submitted on or after January 25, 2018, if your application involves a clinical trial, you must: (*) Submit the application through a Funding Opportunity Announcement (FOA) that accepts clinical trials.; (*) Provide additional information in the application, which will be subject to different and distinct review criteria for clinical trials.; If selected for funding, you will need to designate individual(s) to serve as the responsible party for the trial and to register and post results in the ClinicalTrials.gov system.; NIH has also issued other policy updates involving Good Clinical Practice training requirements and the use of Single Institutional Review Board (sIRB) approaches for domestic, multi-site human subjects research. Details about all updates/changes are available at https://grants.nih.gov/policy/clinical-trials.htm.; Note: These policy updates/changes also apply to individuals conducting research through contracts.; Why is NIH making these changes?; As stewards of public funding, NIH is implementing these changes in support of our scientific and ethical obligation to ensure that the burden and risk that volunteers assume as research participants ultimately contributes to scientific knowledge. In addition, these changes facilitate transparency in how NIH conducts and supports human subjects and clinical trials research and increases dissemination of data and conclusions derived from NIH-conducted or -supported clinical trials. More discussion of the reasons for the policy changes is at: https://grants.nih.gov/policy/clinical-trials/why-changes.htm; We know this is a lot to process, but we are here to answer your questions. Please contact your Program Officer with any questions. If you’re uncertain who your Program Officer is, this information is available in your Commons account.; Kind regards, Meredith D. Temple-O’Connor, Ph.D.; Senior Policy Advisor for Clinical Research; Division of Extramural Research; Eunice Kennedy Shriver National Institute of Child Health and Human Development; National Institutes of Health / DHHS; Bethesda, MD 20892; NICHDTRials@nih.gov. **Additional Information:** [adapted from] A MESSAGE FROM DEAN FRIED [previously distributed] to Faculty: Dear Mailman School faculty; In acknowledgement of the increasingly competitive federal funding environment, the School’s administrative and academic leadership teams have been working to develop new resources to support faculty in preparing grant applications with the highest chance of success. In the fall, we will announce and begin rolling out a suite of such supports.; Given the initial fall NIH submission deadline of October 5, I write today to inform you about the first of these resources. The School is providing support for pre-submission external review and for scientific final editing of R01, P, K, Center or other complex NIH proposals for NIH’s October 5 submission deadline, for all full-time faculty with primary appointments in the School. These services will only apply to first submissions (not to resubmissions). Note that, at this time, other grant types such as R03 and R21 are not eligible for this service.; For the external review of applications, the PI will be requested to identify an external expert who they think would be willing to review the grant. Please remember that an individual who serves as a reviewer in this way would then become ineligible to review the proposal for NIH. The School will arrange for the review and provide reviewers a $750 honorarium for R01 review and $1,000 for review of P or other more complex proposals. This external review is independent of any departmental review of aims or entire proposals, is independent of review by R², and is entirely optional.; For the final scientific editing an outside company that has already been used by several departments will be engaged as needed. The editing review will polish writing, help with organization and logical progression, and assist with the production of figures.; Below is the timeline and process for requesting and utilizing these supports: (*) To ensure an adequate amount of time for grant review and/or editing, faculty wishing to participate must first inform Research Resources (via Craig Kandell at ckk7@columbia.edu) at least five weeks before the grant is due [in the case of the 10/05/2017 deadline, 09/01/2017] that you will be requesting one or both of these services. This request must include: the title of the grant, type of grant, due date, and name of the suggested external reviewer with contact information.; (*) Research Resources will contact the external reviewer to ensure his/her willingness to review within one week. That office will also send the appropriate paperwork for paying the honorarium. Three to four weeks prior to submission, [in the case of the 10/05/2017 deadline, 09/14/2017 (3 weeks) or 09/07/2017 (4 weeks)] the PI must send the draft of the science to Craig, who will forward it to the external reviewer to complete his/her review within one week. The external reviewer will return comments directly to Craig and the PI. If you think you cannot meet this timeline, please discuss with Pam Factor-Litvak, Associate Dean for Research Resources.; (*) For editing of grant proposals, Craig will send the revised manuscript to the scientific editor ten to 14 days prior to submission [in the case of the 10/05/2017 deadline, 09/21/2017 – 09/25/2017, and the editor’s comments will be returned to Craig and the PI for finalization and submission within a few days.; If you have any questions about your eligibility or the above process, please...
contact Pam Factor-Litvak at prf1@columbia.edu; I hope you will consider taking advantage of these new services and that you find them helpful.; With best wishes, Linda P. Fried, MD, MPH; Dean and Delamar Professor of Public Health; Mailman School of Public Health; Senior Vice President; Columbia University Medical Center; Professor of Epidemiology and Medicine

NIH to Limit Total Grant Support to PIs

Additional Information: NIH to Limit Total Grant Support to PIs; NIH announced on Tuesday that it will implement a limitation on the total grant support it will provide to principal investigators (PIs) who have multiple awards. The agency will use a “Grant Support Index” that assigns point values to various types of grants. PIs who exceed a set point, linked to having three or more awards with a single PI, will be forced to adjust their portfolio with reduced resources. NIH said that the proposed formula will be discussed by institute and center councils during their spring meetings before a final formula is shared with the community. NIH says that it believes 6 percent of PIs will be affected and that resources will be freed up to fund about 1,600 additional awards. NIH insists that no existing awards will be rescinded; An article posted by Nature reports that some researchers believe the new policy will disincentivize research collaborations.; Tentative plans are to make the process effective for applications submitted starting in September 2017. NIH also said that non-NIH funding sources will not enter the formula, nor would promised effort. Dr. Francis Collins released a statement on the announcement and Dr. Michael Lauer, NIH Deputy Director for Extramural Research, posted additional information about the proposal on his blog site. Both Drs. Collins and Lauer report that 10 percent of NIH awardees receive 40 percent of NIH extramural funding.

Additional Information: Contacting Staff at the NIH Institutes and Centers; In today’s NIH Extramural News blog, the NIH staff posted a handy chart of the major roles of NIH staff: Program Officials, Scientific Review Officers, Grants Management Officials, and staff of the Division of Receipt and Referral in NIH’s Center of Scientific Review. It explains each role’s responsibility, when it is appropriate to contact them, and where to find their contact information.; See Who At NIH Can Answer my Question About….?; Remember that your Sponsored Projects Administration (SPA) Project Officer must communicate with NIH staff directly when submitting proposals, negotiating awards, submitting Just-in-Time information, submitting formal requests for prior approval, submitting progress reports, clarifying NIH policies, and discussing financial or administrative issues. However, there may be times when contacting NIH directly is appropriate, for example, to identify the right type of grant program and/or funding opportunity for you and your research, or to verify that your idea fits within the mission and priorities of an NIH Institute or Center. When in doubt, reach out to your SPA Project Officer; [brought to our attention by] Stephanie F. Notice to Extend Eligibility for Submission to PAR-19-371, NIAID Career Transition Award (K22 Independent Clinical Trial Not Allowed) due to COVID-related Disruptions

**Sponsor:** National Institute of Allergy and Infectious Diseases (NIAID)

**Deadline(s):** Standard dates; Standard AIDS dates; 01/08/2022 (Expiration) [for PAR-19-371]; Though subject to future updates, NIAID now will provide at least a 2-receipt cycle extension (roughly 8 additional months) of eligibility for individuals whose eligibility to apply for the K22, under normal eligibility rules (including the resubmission policy as defined in NOT-OD-18-197), is expiring between June/July 2020 and February/March 2021 (inclusive of these dates). In addition, those who normally would have been eligible to apply for the June/July 2021 receipt date will have a 1-receipt cycle (roughly 4 months) extension.
